Employment Issue:

“Get a little something of a job”
“Volunteer”
“We don’t let them work with you.”
“You see your poor and disorganized”
“I’m a spotless jew.”
Signed David.

When you said David that’s what you get.

Dismiss David with credits for a job well done.

I can’t call Michael with you here.
You should do something you enjoy doing.

Who are we discussing?
Not Michael, Bill.

The big word is “Mitigating” as in “Mitigating Factor.”

There is a medical “Mitigating Factor.”
From what you know that isn’t the case.

Is there “Dis-incentive” for you to work.
You can make up to \$8000/yr (I’ll check the actual figure)

It depresses people if you have a heart attack at work. The
doctors have recommended just take care of your health.

But you say “Bill is a young man.”
They leave out the Insulin injections as what did he do today.
They leave out, “How does Bill put his medicines together?”
They show “Luxury Bum Bill”
At first it was the smoking “Bill Quit in 2015”

But living clean he can afford a can of soup and a loaf of bread.
 The guys he knows want Fries and Tobacco.
 He can go sit with them in a “Behavioral Psych Center.”
 He got in to minorities and others like him for two years. He was
 given it as a job. Then the powers that be allowed him to live at
 home.

David wasn't wrong to insist.
 What is your pole doing?

Please respecify.

- 1) Moe Grobowski seems fine
- 2) My social worker is named Holly Brennan but that is not pole.
- 3) Sheldon is getting old and had an 85th birthday last weekend.
- 4) Daniel is dating again. Although he really does better with boys than girls. Not exactly.

Metaphysical Stuff? Y

Bill (the guy) is to be ageless, sexless and without a physical form.

So things Bill might need will never be filled.

He is a word in the wind, and a blip on a computer.

So every time David says to work. There is no answer. Left alone he can't put himself together to even try. There is a Negate Bill and a Negate David in progress. That may be female or it may be rainbow flag. All the guy does is “Mansplain” to Bill.

Picture Bill emulator as a female with kids at home. Her part of the fantasy involves the “strong person” who must stay at home.

Luxury poor Bill is played with a chuckle by guys just flat out doing better and enjoying a game of dominance against white boy and blanco.

David "People lie"

One point about fan out. The exclusive nature of helping Bill the blip is shared by many groups. It runs concurrently. So David old chum, you are never exclusive in your efforts.

Your job was to find out all of the "ins" and "outs" of the system. You don't have time and wouldn't it be Marcia anyway.

The foreigners want more money. Exclusive pays more. You should refer to the do it yourself Presidency in the fiction.

4 systems on right now. Now 6 on.
With resale they present the attack.

The dis -incentive is not tht 8K but if you go over you lose healthcare benefits.

So to the others, take David's advice
"GET A JOB"

as if the guy were a beggar.

Oh I see it now from the guys luxury bum phase.
David's destroyed and Chris got busy.

So what does it mean to "Help Out." It means "Mansplaining"
That's the other David.

The guy knows or knew 36 David's
David

Moore, Bernstein, Brede Krieg Centner
Whitmore La Placa Berg Nelson Anderson
Whetstone Lincenberg

etc.

What about Mike or Michael.

Sharo, Kaminski, Roth, Jannsen, Twigg, Mostovoy

So the modern kids say to David. "Could you give the guy some help"

As you have just seen the list, "What should those old fools help with?"

The butt assumes he will get his healthcare by coming clean to David. The guy takes the opportunity every time for free healthcare.

He uses numbers and letters incorrectly (Has 3 falses to sumps)

But wait there is the Mark or Marc puzzle

Marc or Mark

Bernstein, Iglesias, Cohen, Romness, Welton, Williams

Thanks Mike.

Some people switch to the current Mark, Mike, Dave and Bill but you see the apple on the tree goes back to 1979

But wait more life occurred after Peter (Saint that he is) was asked to "Lock the bitch down on his people.

That's who Bill was, Mark, Mike, David and Bill.

Alan and Scott were good but could not Mark, Mike and David well enough.

Peter could Frosh with David

Not Ross -

You forgot Chris. Let us pray for hopeful things.

In the name of Bill the Father, Bill the son and Bill the holy spirit, the kids found play with the 4.

Content creation consists of text, music, graphics and software.

The man wants to know if you seek a life of content creation.

Worlds collided with modern jets and a world wide web. What of the contemplative meditative people in India, Tibet and the far east.

Many that found themselves thinking too much about content creation took to chanting the simple song of “Om”

Bill chants “Om” on many occasions.

Don’t miss out on a beautiful day his young spirit spits up to him.

“What’s the point?”, the doctor of philosophy muses.

The point of content must involve the person whose mind should process and utter the text. The ten year old thinks he could utter the text of the guru.

The rich Bill thinks he knows what people believe. The insects go for the food and return to the nest. Creating the nest must have shown resolve.

“The insight must purge the ordinary.” the guru continued. “This will lead to a higher consciousness.”

Wealthy Bill insists the old fool has no insight for the young and the wealthy.

The programmers laugh at the old guru. They say he wants nothing more than to have a good meal and a young beautiful lover. These things are known good.

One grows old by avoiding death.

Word size in a word salad world

Cubs and urban revitalization.

For example Cubs management type people and “Beer Vendor” type people. It’s all one family.

People mistook Cubs skipper as “Beer Vendor Loving” He really sees himself as a rich man with high intellect. Of course so does the vendor.

We live in a world that evolved. Each one of this lives with the equal protection under the law. Society affords protections for the wealthy and important. Those that live without protections

risk occurrences of crime and accident. Many people and groups oppose the nominee. The nominee displays himself as male east coast wealth. The man worked hard academical ly. The fact that he can't pass muster with Jewish, Black or Woman Americans proves we can do better as a supreme court justice. With prejudice who should be the next Supreme Coon.

This is poet. "I can't get it down." Peter commented. Bill knew what he meant. Peter meant the writing Bill called his book.

Sticking together proved difficult for the family. Should the far flung tribe enlighten people on the meaning of the clan.

Bill never knew or couldn't have known what the family would say to inte rnational stress. He let them know by offering "The Bill on it" Problem solving for hardware, food and software for modern life meant more then the opinions of Bill.

Good dining goes to heaven. The June on it was the family eats so the biographies of each would not matter.

Some spiritual gift would be flushed.

This intrigues some that need to hear sense to regulate mental lives in a superior fashion.

Best Bill may occur on ingestion of good salmon or good lox. This promotes a discussion on foods that people feel well on. Simply an inclusive table allows for discussion.

The detection of war like gestures in a post war era leads to scrutiny of public and private lives.

Bad people may wish to limit access to heaven. When American colleges aren't seen as love, foreign overlords have been instructed to kill America.

So Bill wrote something. The Peter couldn't keep it down. Peter worked a job and had little time between work, childcare and eating. Check his dining Peter bellowed and his grown daughters began to endeavor into what Bill ate. The religious comrades began thinking of food for the soul. The idea men thought of food for inventions. Simply no the family said. "Is it roast beef or thin soup?" the family wondered.

The thing about the Bill on it lives in the price paid for an action. Every action is summed up on the Bill post event. Eating out may cost more then eating in. Not attending school may lead to a lower paying job.

So after the words had slowed from the series of books , the nieces began sharing that Bill had something to say. This led to a family crisis in how to paraphrase at a tea shop or bar and grill, the books Bill had shared with them.

They had made an error in allowing a gifted reader to share their thoughts on the text. Alas the reader had called it a positive thing.

So they said "When will Bill give up?" Peter sold parts. Sheldon retired, Dan made loans.

Music, art and dance compose three areas of culture. Scientists enjoy culture on occasion. People show interest in politics and war. So, sir she said, "Your personal philosophy is Sophomoric" The man knew he was seen as a "Bum who was long winded and full of lies"

He gave pause to the comment. The abbreviated text and the translation must have been wrong. So sir he said, "What is your personal philosophy."

“Develop the body and the mind.” as he worked out he would say with inhale and exhale. “The body and the mind”

So he continued, “Educate your children”

“But how?”, she exclaimed.

He knew the answer. He would just declare “Long winded and full of feces.”

“Bums don’t get to have real opinions.” The old immigrant father cried out.

Music, art and dance compose three areas of culture. Scientists enjoy culture on occasion. People show interest in politics and war. So, sir she said, “Your personal philosophy is Sophomoric” The man knew he was seen as a “Bum who was long winded and full of lies”

He gave pause to the comment. The abbreviated text and the translation must have been wrong. So sir he said, “What is your personal philosophy.”

“Develop the body and the mind.” as he worked out he would say with inhale and exhale. “The body and the mind”

So he continued, “Educate your children”

“But how?”, she exclaimed.

He knew the answer. He would just declare “Long winded and full of feces.”

“Bums don’t get to have real opinions.” The old immigrant father cried out.

We held you too low. That’s not cool Buckwheat.

Your living in the past.

Endeavor to remember the last 10 years of your life more closely.

The adverb thing shouldn't bother you. Remember closely.

We don't have any respect for clown.

You make men of boys.

There is a "Smart-Guy" answer to you. You will never know it.

Direct yourself to the food.

You don't have any respect for pigs also.

Forgive the time waster to enjoy the precious seconds of your life.

Back to the point which is whether Bill was low or held low by others.

It happens quite naturally at my rivals place in the ivy league. It is said there is no second place. It's Harvard and then lastly all others.

So the game is to assemble tokens to resemble the finished puzzle Harvard created for you.

Wait you say. Hasn't pioneering work been done at Michigan. Didn't a Michigan man become president once. So you represent Harvard as having held him to low. The Mercedes of dishonor looms.

Oh, you meant some bums from Cleveland held him to low.
Well sure they did.

One million smackers can't be wrong can it chum.

AI – Artificial Intelligence
Natural Language Interface.

I kid you not people want all light switches replaced with voice
activated lighting.

Russian Oligarchs owned everything of value in Russia.
Successful billionaires control the capital in the USA as well.

Ultimate gaming theory creates a capitalist contest as to who can
collect all of the money.

For love and money the struggles once known, ebb for a robot
chef and auto-sweep AID's.

Billy is turning into a big boy. He had his birthday that allowed
three fingers to be flashed as a kid sign of life.

Everyone should do Israeli methods for things. Israel is great.
Everyone in Israel is smart. So the question of motivating troops
arises often. A quick sentence brought on the Israeli way of
phrasing. Everyone does his job. Of course it is similar in the
USA to say such things. Who is the guy saying "Everyone does
his job." Is that a doer of a job that is not theirs. It tins the
American ear to say it like this.

So German and Israel have it worked out in the same way. So your job is not writer it's computer coding. Who said you could say, "Everyone does his job." That is a good question. People search for things the Torah gives you right away. Israel dodged the man who is a searcher concept. Flat out the searcher must be wrong. You are born into your life and live it.

As they say on YentaDate website, "What does your father do for a living?"

At the end of the day you found Torah. The computer web site guy was doing content and could do nothing about violations.

What is this noise. He asked you to tell them what language.. Serbian is spoken here. Now treat Bill fairly.

Why can't he be my Russian dog? Because he is Serbian. Oh my you mean he isn't US any? That is correct.

Death is an option for him.

Peter is cold.

Is this a game.

No

You can't use first person that way.

What did you do today.

The subject was "Suburbs and the Microsoft way." Israelis would insist on an educated population.

Remember to be smart you must excel in the Social Sciences.

So with knowledge of urban groupings and the Microsoft way how would one comprehend what "Bill" did today..

Four pages of text were lost.

Microsoft way is real great but it does not make room for diversity.

Further discussion on the "No Win" situation occurred. The heads I win, tails you lose demonstration went to the heart of it.

As for our Israelis they have been getting by with an 8th grade knowledge of suburbs and good people.

The if not good people problem led to the knowledge that Jews treat the Palestinian kid like an asshole.

It was said, "He'll go asshole." but how was Bill to do this.. Again the no win situation refers to German laws against Jews.

So Mark and Peter obsessed and dreamed it up for the people they know.

Why scream "Foul" in the face of real city violence.

So the bad end to the day is one more attempt to feel all powerful being assholes by design.

Alright be damned.

I can't tell you something from my life but I can tell you, you have no business with me.

Who is this?

Its some Jew from Cleveland.

You said I had the no win situation in my head. What is it.

Yes you need to get all the gold and keep the maiden. The maiden requires all your time and gold. The gold is defended by lions. You know the lion ttrainer. The lion tamer hits on the girl. She seems to respond. He asks if you swing. One of them has a disease.

So you make lemons out of lemonade and create a Vegas lion act. The act is a hit and you earn the gold. The maiden loses luster and you wish to build a circus. The theory that a sucker is born everyday gets in your head so you start running lines with people. Some think the coke is good with you so you buy a pound.

You need respect.

Many people that scored with something get "tag teamed" by the next generation of fighters. So say the lion tamer did have a go with your desired girl. Each spy says lion tamer to you not caring it once had meaning for you. Only its always Bill they tell you about. Bill said Lion Tamer. Bill knows the maiden. You start to hate Bill. Only Bill hears Cleveland is going to get you.. The gay brothers father can't be bothered with relative minor issues.

So Cleveland asks, what is Bill going to buy. Only Bill is being tag teamed 24x7. Cleveland disbelieves it because Lebanese attack merchant piggy backs on computer money. So is it respect for you not to say "No Way" Everyone believes Bill's lions could not be trained. They are trained and they have been "Zach fleeced" He didn't care some old Jew will have to cover over the disrespect trap.

After all none of you care about "Climate Change" like we do. What about Woodsy the owl and "Give a hoot don't pollute."

It's volcanic the way the tag team spews names and once important stuff. They had to make marijuana legal so folks can't be taunted poor over the joint in ;78,

Its all of them. Not one kid got out with a specciaal. You mind tricked my youth he cried.

Joint, affair, fumbled corsage. What? You used drugs. You were bad with woman and you are a klutz.

Blame the brother. Tell the brothers kids he lacks in importance to us. Tell them the brother eats well and better then we.

Had he not been in the way the store would belong to our club.

The newly formed club of the "Chirpa Guides" live much like the Sherpa guides of Nepal. They walk and talk about this and that and expect the same of the client.

Today the chirps ran deep. Birds of a feather flock together. The apple does not fall far from the tree..

The chirp had to go into song describing the multiplication table lecture. Wait she sang 9×8 does not equal 74. The laughing and snickering in the room cut down the proud lecturer. It should be enough to point out the error. It's still 72 if you were stuck. The barrel for an outfit wanted the negate puzzle to enter into it. The bird had to echo forgiveness for the one the chest may have missed. Fathers that worked math for a living get often unusual answers from their offspring.

So in a moment the man went weak with demeanor. He thought the elder would express dismay thinking couldn't you miss one of those. The hope and dream without effort should prove it.

Siblings often blame each other.

Categories help the filing system in the mind.
 The people that hate math, probably also hate using the language arts.
 The talkative people often argue the point on the errors that the educated liberal artist points up.
 The logic category could be math or expression.
 People that loved logic created the challenges of the colleges and universities.

It's about People, Machines or Animals. Pick a finger.

Social media posts invite category analysis/

Perhaps you would like to smoke. No thanks I gave it up years ago. That heart pain and subsequent stress test woke him up.

So, stay with it. The digital solution taken to soon creates childhood errors. For example
 If you are hungry eat.
 If society causes climate change, change society.
 If you are lonely, call a friend.

If you are short, get tall.

If you are poor, then get rich.

If taking a quiz then write the correct answer.

How was the smoke, he wondered.

Bill should it go with the part before?

That produces a long thought. Beauty is in the eye of the beholder. You have been helpful. Have a nice day. All I did was say through the lens of me, do a good thing.

From the looks of it, there is no lens of the reader. That is to say, Bill met war.

I can't suicide to him. I mean isn't it allowed to flow from one hand. I'll check where it was. Yes the categorization principle of sense applies. The nature of the specificity troubles the written expression person. First the question, "Do you like to make sense?" produces the pun of trouble for people living through autism like his brother. Is it a pun? The ever present brother hears this and the pun on sense is heard to him as Scents or Cents. This troubling aspect makes an irrelevant written world even more ludicrous. Some 49 years ago it became the style of speaking. The one true way movement contradicted the mystery of words movement. Self gratification showed that the providing of text or images pleased only the gifted. The tie dyed fall out shelter ratted out the fine mind for wanting food and sex just as the not gifted or talented person. So now the cry of make it follow made a game of moving the wind to the other person or having it move to the giver. You don't have to be with the pride movement to get that part. The answer may be blowing in the wind.

The world follows the rumblings at high tech firms such as Apple, Google and Microsoft. Microsoft today sells some xbox gaming systems, MS -Word and some Windows operating system. Without the cash reserves the company as a startup would not impress anyone and be valued at about \$20 Million. The trivial changes in software and systems keeps the lights on. The world went iPhone and the failed Microsoft phone and Zunes proved that the lumbering giant lost the way.

The PC works well for designing programs, web pages and corporate spreadsheets. After 17 years patents usually expire and put the programs in the public trust. Dell ships PC systems with Libre Office which can do basically the same as MS-Office.

So the razor sharp people at Microsoft decided to keep the wealth rolling in. Microsoft should take a good long look at itself. In the past Microsoft needed to innovate. Today firms in the sector operate as financial services corporations. For example Microsoft owns a part of Intel and many other companies.

Seattle and Microsoft are one and the same. Data driven systems power the web. Windows Server code runs on different platforms.

The corporate world requires employees that dedicate themselves to the corporate values set up by the executives who write mission statements. The software that Microsoft advanced society with runs software written over 29 years ago. The ancients proved that a well designed system can last, be flexible and work in a variety of ways. The new generation of engineers wants the gravy train to continue. The work on Cortana the assistant for Windows 10 enhances the upgrade to the OS. Some things impress at Microsoft. The nature of the game means knowing what the marketplace expects in products ready for 2019 and beyond. In its infancy it was Bill and Paul writing DOS. The programmer that does the whole program gets to eat the whole pie. The people of today felt chipping in a few coins should enable them to an entertainment system that plays Netflix shows. The time for the computer as the primary source of entertainment arrived and then through ports allowed a TV person to watch a current offering.

So conceptually the team works to solve the computer program. Seen as good, the method carries the laggards that hang on to a world where nobody does anything some years. The executives know about the slave issues. As it is said, "Microsoft is Seattle, and Seattle Data is Microsoft." And definitely do ask Cortana the meaning of ingrate.

I am not for you. I am for Jim. I am Rachel's friend Jew. She doesn't want to know you.

If Bill understands so much, what is she thinking right now.

If your so smart why should I do anything.

When this happens I flash to the females in the herd gently grazing while the bucks spar with there antlers.

She acts dumb, to the buck, by not acting into it. As soon as one buck wins he mounts her. The time spent sitting and grazing empties her mental tank as to what to do. The natural way gets her mounted and with a fertilized ovum inside.

So the game with Bill is to see him lock horns with another male. Physically that sounds cold. Some deer however have the losing males stand around with the females and talk about how there should be rules if he mounts one of us.

Long and the short of it, that queered off male is screwing with the males locking antlers. So that male wants a game.

Shouldn't you get to have him forever if he mounts you. What kind of dumb deer takes the old hump and dump and just forgets her rights.

So now the male who grazes with the females asks about success and the journey and how to screw other males. One of the things he explains is that male is playing "Hard to get" and you have to mess with him so he will screw you, then we are within our rights to screw him up.

It's a real thing when one person with maladies tells the story of the illness or condition.

So he ate the oatmeal cereal at noon. The cinnamon sugar and raisins livened the normally bland bowl. He thought it gruel non the less and continued on having a coffee and diet cola zero in the early afternoon. The day shone with the high sun. Damp and pollen filled from the wet spring he sneezed and sadly sat. Flipping on Jeopardy he thought in a bit disoriented way about eating something at the top of the hour. The disorientation held for about eight minutes and he seemed to realize eating something was necessary. He grabbed at the glucose tablets and ate the broken pieces of one, then another. "Darn, still not enough," he opined. Then the light crispy Mexican taco chips entered the awaiting mouth. "Still not enough." Amy's spicy chili in a can made it's way into the soup crock.

With no time to heat it up the hand of the programmer grabbed the Xoctil chips and crumbled them atop the chili. Thirty seconds later the bottom of the bowl looked clean and still not enough. Then the Nutrigrain strawberry bar found it's way down the gullet. OK, that should do it. Jeopardy was no ending so he looked at the champ for a moment. He used his meter and gosh it showed 84 on the meter. Any number under 100 you must eat something. So the frozen burrito died and James won again. Old Jimmy Holzhauser who must have forgotten he owed some debts still in Las Vegas.

So a bit less wobble now he could take the shot of insulin that keeps him regular. Food magic keeps the diabetes from destroying the person. So the issue of no car comes up. He lived the last 9 years depending on the delivery man showing up with the groceries. Somehow the feeling continued pressuring him to try and walk to the store and back a 1 mile walk half of it with bags of groceries.

So depending on it. The Africans, Hispanics, Bosnians, Germans and Russians all wanted him off the Peapod computer grocery

set. So people learn if you go there in Chicago you better have protection. He felt exposed but not chicken or dumb. If all you want is hot dogs for the Memorial day 3 day weekend you must walk to get it. If you get the fact someone in our community is hurting you see the pressure. His neighbor for the last 9 years saw her daughter graduate and leave the apartment building. But wait low and behold her sisters friend from Africa or the islands leaves a 2 year old for her to raise. She likes to wander into the grocery man now. She tries to cover for the diabetic man by saying he has mouths to feed at home.

He liked it when people took care of there own business. After the second check and the shot he checked again. It was 186, over 100 but still much to high.

Like he says, "It's a balance act."

Just so you know, "Mounting an offensive is impossible." for him. He is bound by his values.

My life of offensives occurred primarily in 2004
The US forces studies your Jewish ally's.
Congratulations, you didn't lose anyone's physical life. The mental life is dead.

The Torah from 1979 is not in play, repeat the 1979 Torah is not in play

What is it about your family that believes you know people as single lovers of life.
It's not you, and its not Bill. How hard is it to update your Torah.

You know in German the high crime was names. It took years to get that out of the Torah readers club.

So now the Russian math team by way of Israel says you must know us 40 years later. The guys long beard must be in his soup wondering what is a Peter Mostovoy

Bill must have played some '79 Torah. Certainly he did. The issue is how to press the advantage. You remember what was said in '79 as does Bill. The guy melted and opens his ass. He says try to ram something at his ass but you can't because he calls you a Nice Guy.

Who were Peters friends. Each and everyone is cold I mean dead cold after you beat his erect American army. When you went cold with words that mean nothing you defeated the very guy you say you know. As stated, "The strategy of your program must be to recognize winning and losing positions." The whole lot of them are like this '79 guys got us cold, take the shot. You mumble and stumble and call the guy a fantastic citizen and you almost love him

What should your old pals say? Bill says it to you so you don't evaluate the win lose, you just oppose Bill so much he makes sense only in a world with facts.

But you were fond of your pals in '79.

They now, and I assure you, don't care about much of anything. Go ahead and put your word count on these wizards of capitalism. What do you think your blind girlfriend eats "William" She went young and eats Ice Cream. Your '79 old gals still make the soup like you like. Ha.

So you see this is a lot of words for a product of the '70s. Why doesn't he just say it to us. By now you haven't gotten the joke. Rest assured you figured out what to do with your head. You remembered old friends and what a gay time you had with them. Yes '79 Torah folks were quite bright and shared their bread with wine each time.

About the gay time, he will ask you the new best friend, 'What did you guys do together that was so cold.' And you say scouting and clubs. You might live a series of affairs looking to capture the new things that you could do. So now you say you compared notes on theme parks. Surely they would remember the happy chats about sissy cups and theme parks.

But wait your no sissy. It's called a Sippy cup. So you ask each day, "What should we do with our heads." The guy knows hes the names guy, the other guy knows he would pickpocket. It got to easy to rake in the cash. But wait, "Long memory guy has no cash" Did you think treating people with decency would catch on. Being cold to non cool people would be your thing.

People studying Psychology, Psychiatry and Counseling undergo the contradiction lecture.

The contradiction lecture begins with a nice and kind person explaining there will be a food reward after the lecture and to please stay through the lecture. The lecturer then enters with a flourish and says there is to be no talking during the lecture. He then points to a potential therapist and says state your name. The person does as instructed and he says loudly, "You are out." as she has violated the no speaking rule. A second person is included in the same game.

The two selected people come to the front of the room and in a booming voice the lecturer asks, "Who is the better person?" So there are three possible answers one of which is, "I don't know we just met." The other answers are "I am" or "You are."

So do all people want to please the lecturer? The question goes to who would be a better therapist?

So the two test subjects return to there seats. To the room by a show of hands how many were interested at that moment about

what the food reward would be. This part may be enhanced with questions as to what type of food would be provided along with the subjects dietary customs.

A discussion on what it felt like to be “now out” also takes place. A discussion on being better than someone also occurs. A trusted media source informs the public. Philosophical readership allows for ‘point of view’ interpretation.

To say, “Millennials love ear buds.’ may be true but with age marking it must refer to only the Millennials one has direct contact with. The trend spotters use media. This knowledge disqualifies generational meddling.

The experience of people called “Hippies” in earlier times agreed with the youth of today. Meaning my 4 nieces and 1 nephew.

As one who worked for a market research firm, the data of what products people buy and shows people watch appear as real data elements. The nieces and nephew deny the access to an obvious data bank.

Conversation Plan over Thai Food in Skokie.

- 1) Weather
- 2) Rehearsal Schedule
- 3) Did you want to be a Lawyer, Doctor or Business Executive?
- 4) My opinion doesn't matter because I don't vote
- 5) What have you been doing?
 - a) Laundry
 - b) Making a turkey meatloaf
- c) Getting into black student athletes and NCAA Basketball
- 6) Is Trump the greatest president of all time
- 7) Is the media to be believed.
- 8) Is it news if a newsreader says it.

9) Is Israel brainwashing it's people with the news in Hebrew on Israel television

10) Is it believed America must shape peoples ideas in the same way people in the great nation of ours would do it.

1. Genteel law.

2. Honor amongst thieves law.

3. Physic al laws.

4. Television law.

5. International Television law.

6. Where am I law?

11) Will the angel of death pass over us this year. Which lamb will be slaughtered for bloodlines

12) From Dr. King's dream and birthday through the black church easter bonnet we re -evaluate our friendships with the minority communities. Primarily through our love of Basketball and colleges

In Africa the tribe concept traces back to very early in human evolution. Native Americans formerly referred to as Indians also have a tribal concept to them. The food and tools puzzle of the tribe explains to the world where the tribe lived mentally and physically.

Advances in healthcare and engineering led to nations declaring God on the tribal people remaining on thee planet.

Things like good water and proper sanitation created a world where those that believe in the nations gifts live a long and prosperous life.

The urban tribes question the ways of science and domination of nature.

Consuming animal products is debated in the tribe. Treating health conditions is an issue in the tribe. The invention and use of machines is debated.

The election is upon us. The tribal people thought you enlisted tribal help when you fed and inoculated them.

It's not about merely party politics's. It's about respect for differing opinions in the tribe.

Grocery shopping proves difficult without a vehicle. The major chain grocers require two bus trips to reach them. There is a market walking distance. This is about a 10 minute walk. They cater to the government check people. They often stare blankly at the array of products hoping to receive charity. On one occasion 2 men from Africa presumably peered at all the food the checkers were ringing up. No joke they were very stern. A chicken was almost too much to bear for the large men. There are no suburban woman shoppers in this market. Hardcore recovering alcoholics along with people back on the street during their probation lurk.

So assuming the purchases can be made, how many bags could be transferred on the 10 minute walk home.

This is the Messiah's guide to treachery, deceit and torture.

Holiness only works in a world of faithfulness. Those that show holiness look to be revered by all. The exception to a holy following rests with the unfaithful. Shootings in blessed environments crash the faith of blessed places.

First the concept of being high minded allowing for an over-man who lives life with a concepts first added must reconcile with bodily minded individuals.

So those that educate offspring through the university claim to endorse high concepts and precepts. The denial of the flesh for concept confuses those that live through the eternal concepts of food, procreation, drugs and feces.

Those that exert effort to remove themselves from the eternal concepts grow cold to nature and natural order in many examples. An over -man may deny food, procreation drugs and feces in order to find answers from an almighty. So the answer given to a fasting guru, monk or seeker confuses those who eat and enjoy the in the now moment.

Simplicity grows into complexity in the knowledge age. The simplicity of acquiring a smart phone, downloading an app and finding a hotel proves the relativity of the point. Many paths solve simple issues.

The oil issue ranks highly in importance in the relativistic simplicity scale. Should devices that move us use electric or hydrogen the shock will be powerful. Huge petrol economies will wither as the air becomes a bit cleaner. Will the nations that profit from an oil boom grow cold with violence to there once captive consumer. Automakers changed from gas to electric and the oil reserves last longer.

Place yourself at a feast. No, not the feast experienced today but the feast after a tribal hunt. Each member lives to dine on the fresh kill. As noted one goal of eating fills the minds of the primitive peoples. The specialization of goals divides the populations in many lands. The fresh kill needed to be transported from the field to the fire pit the tribe uses. The builder that arranges needs to eat. The cooks need a spit. The leather maker needs to take time with the hides.

The hunter provided. The basic people do not get creative. The antics of a clown would not get fed by the hunter. Hunters kill and do love making for dominance.

Specialize conflicts with basics.

The defenders of society carry weapons to insure criminally cold soldiers or civilians will not win the battle of the civilized world. Those that write articles concerning the guard in the "Republic" need discover the intelligent soldier defense of encapsulating all of society into attacker and defender. The clowns, the city mouse, the country mouse find the snakebite of social shooters overwhelming in a revolutionary time. The person that creates things with vision for society labors foolishly in the eyes of the soldier and defender. The person planned to earn a living while denying the defenders law. The law states either you make love with it, eat it or use it to defeat an enemy. That each day contains a defense of your laid back, mellow person confuses the elite. Laid back and mellow times require the winning of your war. Failure to realize you have been attacked cures many on the sidelines.

Throwing a party with cake, cups, balloons and streamers, leaves a room full of garbage. Should people that want to have a pollution free world, not hold such gatherings they would not have the trash problem.

Without revealing bias, analyze whether people do what they want. Science of nature assumes individuals do what they want.

The lost meaning dread leaves no hope for delaying satisfaction. People used card catalogs at a library to find answers. The web provides instantaneous answers.

People do what they want. Slaves do not do what they want. Using the word slave in the fine parlors of the USA grew common in the early portion of the 21st century.

Spoiled children grow up to rule society.

Rachel grew inside to be with Bill. She mentioned once she had asked her father what she should say when she went away to school. Bill thought this would take quite an effort as there were many topics that could arise.

Away at school in Michigan, Rachel noticed Bill was also from the prairie state, Illinois. College appeared to attract those of a like mind. The young students worked hard and enjoyed the revival of ancient bands like The Doors. Some people change their perception of life. Others nod a head and see about the next more than friend hook-up.

Boom! Bill graduates with a signed degree in Engineering. Rachel fresh from her studies of Organic Chemistry begins her academic specialty. With Bill in Chicago she parties her way for another year before showing up at Bill's door. She wrote once or twice but Bill felt it did not have much heart to it. The phone would have been easier, but Rachel is no phone girl.

So Bill took her as sort of a waif without any love for anything or anyone she could participate in a physical relationship and did. So many lost endeavors attracted the young Rachel. Her heart belonged to her pursuit of advanced educational studies. The more she studied the less she cared for Bill the programmer. His life and love with her ended with her fantasies of love, in a pure way, with striving high school students. In the school system they need woman and men who live for virtue.

Rachel left Bill at the end of the year. Bill worked for awhile. Rachel married John and had baby Amelia.

You would think a married Rachel wouldn't affect Bill. But wait, she had eaten at a family get together and in Sheldon and his wife put them together in a Torah. So the sharing caring young couple live in fear of the "Scarlet Letter" attack by both Rachel's family and Bill's Torah.

Bill is not divorced now. Rachel is a widow. Amelia is in elementary school. Social media perusing allows for some peeking. Pokes to Rachel fail. So now enough time has passed that questions about the couple of people from Ann Arbor should have stopped. So they have.

As to what the two say about each other, Bill says, "She denied me sex booze and meat." She couldn't cook, clean or shop. She didn't have laundry with him. She expected Bill to pay for many shared things. There were some gifts to be fair.

Rachel says, "He must care for me in all areas to have me around for physical pleasure."

Bill doesn't really remember her cold or warm. The family went computerized on the lives of these two active people. Those that don't update the computer trap people in the sand trap of life.

Bill and Rachel can't remember nicely for the computer memory lasts forever.

They were young and figuring it out. The computer needs to be modified. The lines they echoed live in the screenplays of Mike and Chris.

Raising sperm and egg donor kids can be difficult, can't it boys.

No Trump

WD Mostovoy

-In the game it is known that, no trump suit will take the trick .

What is this noise. He asked you to tell them what language..
Serbian is spoken here. Now treat Bill fairly.

Why can't he be my Russian dog? Because he is Serbian. Oh
my you mean he isn't US any? That is correct.

Death is an option for him.

Peter is cold.

Is this a game.

No

You can't use first person that way.

What did you do today?

The subject was "Suburbs and the Microsoft way." Israelis
would insist on an educated population.

Remember to be smart you must excel in the Social Sciences.

So with knowledge of urban groupings and the Microsoft way
how would one comprehend what "Bill" did today..

Four pages of text were lost.

Microsoft way is real great but it does not make room for
diversity.

Further discussion on the "No Win" situation occurred. The
heads I win, tails you lose demonstration went to the heart of it.

As for our Israelis they have been getting by with an 8th grade knowledge of suburbs and good people.

The “if not good people problem,” led to the knowledge that Jews treat the Palestinian kid like an asshole.

It was said, “He’ll go asshole.” How was Bill to do this? Again the no win situation refers to German laws against Jews.

So Mark and Peter obsessed and dreamed it up for the people they know.

Why scream “Foul” in the face of real city violence.

So the bad end to the day is one more attempt to feel all powerful being assholes by design.

Alright be damned.

I can’t tell you something from my life but I can tell you, you have no business with me.

Who is this?

Its some Jew from Cleveland.

You said I had the no win situation in my head. What is it.

Yes you need to get all the gold and keep the maiden. The maiden requires all your time and gold. The gold is defended by lions. You know the lion ttrainer. The lion tamer hits on the girl. She seems to respond. He asks if you swing. One of them has a disease.

So you make lemons out of lemonade and create a Vegas lion act. The act is a hit and you earn the gold. The maiden loses luster and you wish to build a circus. The theory that a sucker is born everyday gets in your head so you start running lines with people. Some think the coke is good with you so you buy a pound.

You need respect.

Many people that scored with something get "tag teamed" by the next generation of fighters. So say the lion tamer did have a go with your desired girl. Each spy says lion tamer to you not caring it once had meaning for you. Only its always Bill they tell you about. Bill said Lion Tamer. Bill knows the maiden. You start to hate Bill. Only Bill hears Cleveland is going to get you.. The gay brothers father can't be bothered with relative minor issues.

So Cleveland asks, what is Bill going to buy. Only Bill is being tag teamed 24x7. Cleveland disbelieves it because Lebanese attack merchant piggy backs on computer money. So is it respect for you not to say "No Way" Everyone e believes Bill's lions could not be trained. They are trained and they have been "Zach fleeced" He didn't care some old Jew will have to cover the disrespect trap.

After all none of you care about "Climate Change" like we do. What about Woodsy the owl and "Give a hoot don't pollute."

It's volcanic the way the tag team spews names and once important stuff. They had to make marijuana legal so folks can't be taunted poor over the joint in ;78,

Its all of them. Not one kid got out with a speccial. You mind tricked my youth he cried.

Joint, affair, fumbled corsage. What? You used drugs. You were bad with woman and you are a klutz.

Blame the brother. Tell the brothers kids he lacks in importance to us. Tell them the brother eats well and better then we.

Had he not been in the way the store would belong to our club.

The newly formed club of the "Chirpa Guides" live much like the Sherpa guides of Nepal. They walk and talk about this and that and expect the same of the client.

Today the chirps ran deep. Birds of a feather flock together. The apple does not fall far from the tree..

The chirp had to go into song describing the multiplication table lecture. Wait she sang 9×8 does not equal 74. The laughing and snickering in the room cut down the proud lecturer. It should be enough to point out the error. It;s still 72 if you were stuck. The barrel for an outfit wanted the negate puzzle to enter into it. The bird had to echo forgiveness for the one the chest may have missed. Fathers that worked math for a living get often unusual answers from their offspring.

So in a moment the man went weak with demeanor. He thought the elder would express dismay thinking couldn't you miss one of those. The hope and dream without effort should prove it.

Siblings often blame each other.

Employment Issue:

"Get a little something of a job"

"Volunteer"

"We don't let them work with you."

“You see your poor and disorganized”
“I’m a spotless jew.”
Signed David.

When you said David that’s what you get.

Dismiss David with credits for a job well done.

I can’t call Michael with you here.
You should do something you enjoy doing.

Who are we discussing?
Not Michael Bill.

The big word is “Mitigating” as in “Mitigating Factor.”

There is a medical “Mitigating Factor.”
From what you know that isn’t the case.

Is there “Dis-incentive” for you to work.
You can make up to \$8000/yr (I’ll check the actual figure)

It depresses people if you have a heart attack at work. The
doctors have recommended just take care of your health.

But you say “Bill is a young man.”
They leave out the Insulin injections as what did he do today.
They leave out, “How does Bill put his medicines together?”
They show “Luxury Bum Bill”
At first it was the smoking “Bill Quit in 2015”
But living clean he can afford a can of soup and a loaf of bread.
The guys he knows want Fries and Tobacco.
He can go sit with them in a “Behavioral Psych Center.”
He got in to minorities and others like him for 2 years. He was
given it as a job. Then the powers that be allowed him to live at
home.

David wasn't wrong to insist.

What is your pole doing?

Please respecify.

- 1) Moe Grobowski seems fine
- 2) My social worker is named Holly Brennan but that is not pole.
- 3) Sheldon is getting old and had an 85th birthday last weekend.
- 4) Daniel is dating again. Although he really does better with boys then girls. Not exactly.

Metaphysical Stuff? Y

Bill (the guy) is to be ageless, sexless and without a physical form.

So things Bill might need will never be filled.

He is a word in the wind, and a blip on a computer.

So every time David says to work. There is no answer. Left alone he can't put himself together to even try. There is a Negate Bill and a Negate David in progress. That may be female or it may be rainbow flag. All the guy does is "Mansplain" to Bill.

Picture Bill emulator as a female with kids at home. Her part of the fantasy involves the "strong person" who must stay at home.

Luxury poor Bill is played with a chuckle by guys just flat out doing better and enjoying a game of dominance against white boy and blanco.

David "People lie"

Think about the fan out. The exclusive nature of helping Bill the blip is shared by many groups. It runs concurrently. So David old chum, you are never exclusive in your efforts.

Your job was to find out all of the “ins” and “outs” of the system.
You don’t have time and wouldn’t it be Marcia anyway.

The foreigners want more money. Exclusive pays more. You
should refer to the do it yourself Presidency in the fiction.

There are 4 systems on right now. Now 6 systems are on.
With resale they present the attack.

The dis -incentive is not tht 8K but if you go over you lose
healthcare benefits.

So to the others, take David’s advice
“GET A JOB”

as if the guy were a beggar.

Oh I see it now from the guys luxury bum phase.
David’s destroyed and Chris got busy.

So what does it mean to “Help Out.” It means “Mansplaining”
That’s the other David.

The guy knows or knew 36 David’s
David
Moore, Bernstein, Brede Krieg Centner
Whitmore La Placa Berg Nelson Anderson
Whetstone Lincenberg

etc.

What about Mike or Michael.
Sharo, Kaminski, Roth, Jannsen, Twigg, Mostovoy

So the modern kids say to David. “Could you give the guy some
help”

As you have just seen the list , “What should those old fools help with?”

The butt assumes he will get his healthcare by coming clean to David. The guy takes the opportunity every time for free healthcare.

He uses numbers and letters incorrectly (Has 3 falses to sumps)

But wait there is the Mark or Marc puzzle
Marc or Mark
Bernstein, Iglesias, Cohen, Romney, Welton, Williams

Thanks Mike.

Some people switch to the current Mark, Mike, Dave and Bill but you see the apple on the tree goes back to 1979

But wait more life occurred after Peter (Saint that he is) was asked to “Lock the bitch down on his people.

That’s who Bill was, Mark, Mike, David and Bill.

Alan and Scott were good but could not Mark, Mike and David well enough.

Peter could Frosh with David
Not Ross -

You forgot Chris. Let us pray for hopeful things.

In the name of Bill the Father, Bill the son and Bill the holy spirit, the kids found play with the 4.

Content creation consists of text, music, graphics and software.
The man wants to know if you seek a life of content creation.

Worlds collided with modern jets and a world wide web. What
of the contemplative meditative people in India, Tibet and the far
east.

Many that found themselves thinking too much about content
creation took to chanting the simple song of "Om"

Bill chants "Om" on many occasions.

Don't miss out on a beautiful day his young spirit spits up to him.

"What's the point?", the doctor of philosophy muses.

The point of content must involve the person whose mind should
process and utter the text. The ten year old thinks he could utter
the text of the guru.

The rich Bill thinks he knows what people believe. The insects
go for the food and return to the nest. Creating the nest must
have shown resolve.

"The insight must purge the ordinary." the guru continued. "This
will lead to a higher consciousness."

Wealthy Bill insists the old fool has no insight for the young and
the wealthy.

The programmers laugh at the old guru. They say he wants
nothing more than to have a good meal and a young beautiful
lover. These things are known good.

One grows old by avoiding death.

Regionalism

NBA

NFL Lineman

Word size in a word salad world

Cubs and urban revitalization change the landscape.

For example Cubs management type people and “Beer Vendor” type people. It’s all one family.

People mistook Cubs skipper as “Beer Vendor Loving” He really sees himself as a rich man with high intellect. Of course so does the vendor.

We live in a world that evolved. Each one of this lives with the equal protection under the law. Society affords protections for the wealthy and important. Those that live without protections risk occurrences of crime and accident. Many people and groups oppose the nominee. The nominee displays himself as male east coast wealth. The man worked hard academically. The fact that he can’t pass muster with Jewish, Black or Woman Americans proves we can do better as a supreme court justice. With prejudice who should be the next Supreme Coon.

This is poet. “I can’t get it down.” Peter commented. Bill knew what he meant. Peter meant the writing Bill called his book.

Sticking together proved difficult for the family. Should the far flung tribe enlighten people on the meaning of the clan.

Bill never knew or couldn’t have known what the family would say to international stress. He let them know by offering “The Bill on it” Problem solving for hardware, food and software for modern life meant more than the opinions of Bill.

Good dining goes to heaven. The June on it was the family eats so the biographies of each would not matter.

Some spiritual gift would be flushed.

This intrigues some that need to hear sense to regulate mental lives in a superior fashion.

Best Bill may occur on ingestion of good salmon or good lox. This promotes a discussion on foods that people feel well on. Simply an inclusive table allows for discussion.

The detection of war like gestures in a post war era leads to scrutiny of public and private lives.

Bad people may wish to limit access to heaven. When American colleges aren't seen as love, foreign overlords have been instructed to kill America.

So Bill wrote something. The Peter couldn't keep it down. Peter worked a job and had little time between work, childcare and eating. Check his dining Peter bellowed and his grown daughters began to endeavor into what Bill ate. The religious comrades began thinking of food for the soul. The idea men thought of food for inventions. Simply no the family said. "Is it roast beef or thin soup?" the family wondered.

The thing about the Bill on it lives in the price paid for an action. Every action is summed up on the Bill post event. Eating out may cost more than eating in. Not attending school may lead to a lower paying job.

So after the words had slowed from the series of books, the nieces began sharing that Bill had something to say. This led to a family crisis in how to paraphrase at a tea shop or bar and grill, the books Bill had shared with them.

They had made an error in allowing a gifted reader to share their thoughts on the text. Alas the reader had called it a positive thing.

So they said “When will Bill give up?” Peter sold parts. Sheldon retired, Dan made loans.

Music, art and dance compose three areas of culture. Scientists enjoy culture on occasion. People show interest in politics and war. So, sir she said, “Your personal philosophy is Sophomoric” The man knew he was seen as a “Bum who was long winded and full of lies”

He gave pause to the comment. The abbreviated text and the translation must have been wrong. So sir he said, “What is your personal philosophy.”

“Develop the body and the mind.” as he worked out he would say with inhale and exhale. “The body and the mind”

So he continued, “Educate your children”

“But how?”, she exclaimed.

He knew the answer. He would just declare “Long winded and full of feces.”

“Bums don’t get to have real opinions.” The old immigrant father cried out.

Music, art and dance compose three areas of culture. Scientists enjoy culture on occasion. People show interest in politics and war. So, sir she said, “Your personal philosophy is Sophomoric”

The man knew he was seen as a “Bum who was long winded and full of lies”

He gave pause to the comment. The abbreviated text and the translation must have been wrong. So sir he said, “What is your personal philosophy.”

“Develop the body and the mind.” as he worked out he would say with inhale and exhale. “The body and the mind”

So he continued, “Educate your children”

“But how?”, she exclaimed.

He knew the answer. He would just declare “Long winded and full of feces.”

“Bums don’t get to have real opinions.” The old immigrant father cried out.

We held you too low. That’s not cool Buckwheat.

You’re living in the past.

Endeavor to remember the last 10 years of your life more closely.

The adverb thing shouldn’t bother you. Remember closely.

We don’t have any respect for clown.

You make men of boys.

There is a “Smart-Guy” answer to you. You will never know it.

Direct yourself to the food.

You don't have any respect for pigs also.

Forgive the time waster to enjoy the precious seconds of your life.

Back to the point which is whether Bill was low or held low by others.

It happens quite naturally at my rivals place in the ivy league. It is said there is no second place. It's Harvard and then lastly all others.

So the game is to assemble tokens to resemble the finished puzzle Harvard created for you.

Wait you say. Hasn't pioneering work been done at Michigan. Didn't a Michigan man become president once. So you represent Harvard as having held him to low. The Mercedes of dishonor looms.

Oh, you meant some bums from Cleveland held him to low. Well sure they did.

One million smackers can't be wrong can it chum.

AI – Artificial Intelligence
Natural Language Interface.

I kid you not people want all light switches replaced with voice activated lighting.

Russian Oligarchs owned everything of value in Russia.
Successful billionaires control the capital in the USA as well.

Ultimate gaming theory creates a capitalist contest as to who can collect all of the money.

For love and money the struggles once known, ebb for a robot chef and auto-sweep AID's.

Billy is turning into a big boy. He had his birthday that allowed three fingers to be flashed as a kid sign of life.

Everyone should do Israeli methods for things. Israel is great. Everyone in Israel is smart. So the question of motivating troops arises often. A quick sentence brought on the Israeli way of phrasing. Everyone does his job. Of course it is similar in the USA to say such things. Who is the guy saying "Everyone does his job." Is that a doer of a job that is not theirs. It tins the American ear to say it like this.

So German and Israel have it worked out in the same way. So your job is not writer it's computer coding. Who said you could say, "Everyone does his job." That is a good question. People search for things the Torah gives you right away. Israel dodged the man who is a searcher concept. Flat out the searcher must be wrong. You are born into your life and live it.

As they say on YentaDate website, "What does your father do for a living?"

At the end of the day you found Torah. The computer web site guy was doing content and could do nothing about violations.

Categories help the filing system in the mind.

The people that hate math, probably also hate using the language arts.

The talkative people often argue the point on the errors that the educated liberal artist points up.

The logic category could be math or expression.

Logic lovers created the challenges, of colleges and universities.

It's about People, Machines or Animals. Pick a finger.

Social media posts invite category analysis/

Perhaps you would like to smoke. No thanks I gave it up years ago. That heart pain and subsequent stress test woke him up.

So, stay with it. The digital solution taken to soon creates childhood errors. For example

If you are hungry eat.

Society causes climate change. Change the society to account for it.

If you are lonely, call a friend.

If you are short, get tall.

If you are poor, then get rich.

If taking a quiz then write the correct answer.

How was the smoke, he wondered.

Bill should it go with the part before?

That produces a long thought . Beauty is in the eye of the beholder. You have been helpful. Have a nice day. All I did was say through the lens of me, do a good thing.

From the looks of it, there is no lens of the reader. That is to say, Bill met war.

I can't suicide to him. I mean isn't it allowed to flow from one hand. I'll check where it was. Yes the categorization principle of sense applies. The nature of the specificity troubles the written expression person. First the question, "Do you like to make sense?" produces the pun of trouble for people living through autism like his brother. Is it a pun? The ever present brother hears this and the pun on sense is heard to him as Scents or Cents. This troubling aspect makes an irrelevant written world even more ludicrous. Some 49 years ago it became the style of speaking. The one true way movement contradicted the mystery of words movement. Self gratification showed that the providing of text or images pleased only the gifted. The tie dyed fall out shelter ratted out the fine mind for wanting food and sex just as the not gifted or talented person. So now the cry of make it follow made a game of moving the wind to the other person or having it move to the giver. You don't have to be with the pride movement to get that part. The answer may be blowing in the wind.

The world follows the rumblings at high tech firms such as Apple, Google and Microsoft. Microsoft today sells some xbox gaming systems, MS -Word and some Windows operating system. Without the cash reserves the company as a startup would not impress anyone and be valued at about \$20 Million. The trivial changes in software and systems keep the lights on. The world went iPhone and the failed Microsoft phone and Zunes proved that the lumbering giant lost the way.

The PC works well for designing programs, web pages and corporate spreadsheets. After 17 years patents usually expire and put the programs in the public trust. Dell ships PC systems with Libre Office which can do basically the same as MS-Office.

So the razor sharp people at Microsoft decided to keep the wealth rolling in. Microsoft should take a good long look at itself. In the past Microsoft needed to innovate. Today firms in the sector operate as financial services corporations. For example Microsoft owns a part of Intel and many other companies.

Seattle and Microsoft are one and the same. Data driven systems power the web. Windows Server code runs on different platforms.

The corporate world requires employees that dedicate themselves to the corporate values set up by the executives who write mission statements. The software that Microsoft advanced society with runs software written over 29 years ago. The ancients proved that a well designed system can last, be flexible and work in a variety of ways. The new generation of engineers wants the gravy train to continue. The work on Cortana the assistant for Windows 10 enhances the upgrade to the OS. Some things impress at Microsoft. The nature of the game means knowing what the marketplace expects in products ready for 2019 and beyond. In it's infancy it was Bill and Paul writing DOS. The programmer that does the whole program gets to eat the whole pie. The people of today felt chipping in a few coins should enable them to an entertainment system that plays Netflix shows. The time for the computer as the primary source of entertainment arrived and then through ports allowed a TV person to watch a current offering.

So conceptually the team works to solve the computer program. Seen as good, the method carries the laggards that hang on to a world where nobody does anything some years. The executives know about the slave issues. As it is said, "Microsoft is Seattle, and Seattle Data is Microsoft." And definitely do ask Cortana the meaning of ingrate.

I am not for you. I am for Jim. I am Rachel's friend Jew. She doesn't want to know you.

If Bill understands so much, what is she thinking right now.

If your so smart why should I do anything.

When this happens I flash to the females in the herd gently grazing while the bucks spar with their antlers.

She acts dumb, to the buck, by not acting into it. As soon as one buck wins he mounts her. The time spent sitting and grazing empties her mental tank as to what to do. The natural way gets her mounted and with a fertilized ovum inside.

So the game with Bill is to see him lock horns with another male. Physically that sounds cold. Some deer however have the losing males stand around with the females and talk about how there should be rules if he mounts one of us.

Long and the short of it, that queered off male is screwing with the males locking antlers. So that male wants a game.

Shouldn't you get to have him forever if he mounts you. What kind of dumb deer takes the old hump and dump and just forgets her rights.

So now the male who grazes with the females asks about success and the journey and how to screw other males. One of the things he explains is that male is playing "Hard to get" and you have to mess with him so he will screw you, then we are within our rights to screw him up.

It's a real thing when one person with maladies tells the story of the illness or condition.

So he ate the oatmeal cereal at noon. The cinnamon sugar and raisins livened the normally bland bowl. He thought it gruel non the less and continued on having a coffee and diet cola zero in the early afternoon. The day shone with the high sun. Damp and pollen filled from the wet spring he sneezed and sadly sat. Flipping on Jeopardy he thought in a bit disoriented way about eating something at the top of the hour. The disorientation held for about eight minutes and he seemed to realize eating something was necessary. He grabbed at the glucose tablets and ate the broken pieces of one, then another. “Darn, still not enough,” he opined. Then the light crispy Mexican taco chips entered the awaiting mouth. “Still not enough.” Amy’s spicy chili in a can made it’s way into the soup crock.

With no time to heat it up the hand of the programmer grabbed the Xoctil chips and crumbled them atop the chili. Thirty seconds later the bottom of the bowl looked clean and still not enough. Then the Nutrigrain strawberry bar found it’s way down the gullet. OK, that should do it. Jeopardy was no ending so he looked at the champ for a moment. He used his meter and gosh it showed 84 on the meter. Any number under 100 you must eat something. So the frozen burrito died and James won again. Old Jimmy Holzhauer who must have forgotten he owed some debts still in Las Vegas.

So a bit less wobble now he could take the shot of insulin that keeps him regular. Food magic keeps the diabetes from destroying the person. So the issue of no car comes up. He lived the last 9 years depending on the delivery man showing up with the groceries. Somehow the feeling continued pressuring him to try and walk to the store and back a 1 mile walk half of it with bags of groceries.

So depending on it. The Africans, Hispanics, Bosnians, Germans and Russians all wanted him off the Peapod computer grocery

set. So people learn if you go there in Chicago you better have protection. He felt exposed but not chicken or dumb. If all you want is hot dogs for the Memorial day 3 day weekend you must walk to get it. If you get the fact someone in our community is hurting you see the pressure. His neighbor for the last 9 years saw her daughter graduate and leave the apartment building. But wait low and behold her sisters friend from Africa or the islands leaves a 2 year old for her to raise. She likes to wander into the grocery man now. She tries to cover for the diabetic man by saying he has mouths to feed at home.

He liked it when people took care of there own business. After the second check and the shot he checked again. It was 186, over 100 but still much to high.

Like he says, "It's a balance act."

Just so you know, "Mounting an offensive is impossible." for him. He is bound by his values.

My life of offensives occurred primarily in 2004
The US forces studies your Jewish ally's.
Congratulations, you didn't lose anyone's physical life. The
mental life is dead.

The Torah from 1979 is not in play, repeat the 1979 Torah is not
in play

What is it about your family that believes you know people as
single lovers of life.
It's not you, and its not Bill. How hard is it to update your
Torah.

You know in German the high crime was names. It took years to
get that out of the Torah readers club.

So now the Russian math team by way of Israel says you must know us 40 years later. The guys long beard must be in his soup wondering what is a Peter Mostovoy
Bill must have played some '79 Torah. Certainly he did. The issue is how to press the advantage. You remember what was said in '79 as does Bill. The guy melted and opens his ass. He says try to ram something at his ass but you can't because he calls you a Nice Guy.

Who were Peters friends. Each and everyone is cold I mean dead cold after you beat his erect American army. When you went cold with words that mean nothing you defeated the very guy you say you know. As stated, "The strategy of your program must be to recognize winning and losing positions." The whole lot of them are like this '79 guys got us cold, take the shot. You mumble and stumble and call the guy a fantastic citizen and you almost love him

What should your old pals say? Bill says it to you so you don't evaluate the win lose, you just oppose Bill so much he makes sense only in a world with facts.

But you were fond of your pals in '79.
They now, and I assure you, don't care about much of anything. Go ahead and put your word count on these wizards of capitalism. What do you think your blind girlfriend eats "William" She went young and eats Ice Cream. Your '79 old gals still make the soup like you like. Ha.

So you see this is a lot of words for a product of the '70s. Why doesn't he just say it to us. By now you haven't gotten the joke. Rest assured you figured out what to do with your head. You remembered old friends and what a gay time you had with them. Yes '79 Torah folks were quite bright and shared their bread with wine each time.

About the gay time, he will ask you the new best friend, 'What did you guys do together that was so cold.' And you say scouting and clubs. You might live a series of affairs looking to capture the new things that you could do. So now you say you compared notes on theme parks. Surely they would remember the happy chats about sissy cups and theme parks.

But wait your no sissy. It's called a Sippy cup. So you ask each day, "What should we do with our heads." The guy knows hes the names guy, the other guy knows he would pickpocket. It got to easy to rake in the cash. But wait, "Long memory guy has no cash" Did you think treating people with decency would catc h on. Being cold to non cool people would be your thing.

People studying Psychology, Psychiatry and Counseling undergo the contradiction lecture.

The contradiction lecture begins with a nice and kind person explaining there will be a food reward after the lecture and to please stay through the lecture. The lecturer then enters with a flourish and says there is to be no talking during the lecture. He then points to a potential therapist and says state your name. The person does as instructed and he sa ys loudly, "You are out." as she has violated the no speaking rule. A second person is included in the same game.

The two selected people come to the front of the room and in a booming voice the lecturer asks, "Who is the better person?" So there are t hree possible answers one of which is, "I don't know we just met." The other answers are "I am" or "You are."

So do all people want to please the lecturer? The question goes to who would be a better therapist?

So the two test subjects return to there s eats. To the room by a show of hands how many were interested at that moment about

what the food reward would be. This part may be enhanced with questions as to what type of food would be provided along with the subjects dietary customs.

A discussion on what it felt like to be “now out” also takes place. A discussion on being better than someone also occurs. A trusted media source informs the public. Philosophical readership allows for ‘point of view’ interpretation.

To say, “Millennials love ear buds. ’ may be true but with age marking it must refer to only the Millennials one has direct contact with. The trend spotters use media. This knowledge disqualifies generational meddling.

The experience of people called “Hippies” in earlier times agreed with the youth of today. Meaning my 4 nieces and 1 nephew.

As one who worked for a market research firm, the data of what products people buy and shows people watch appear as real data elements. The nieces and nephew deny the access to an obvious data bank.

Conversation Plan over Thai Food in Skokie.

3. Physical laws.
4. Television law.
5. International Television law.
6. Where am I law?

In Africa the tribe concept traces back to very early in human evolution. Native Americans formerly referred to as Indians also have a tribal concept to them. The food and tools puzzle of the tribe explains to the world where the tribe lived mentally and physically.

Advances in healthcare and engineering led to nations declaring God on the tribal people remaining on the planet.

Things like good water and proper sanitation created a world where those that believe in the nation's gifts live a long and prosperous life.

The urban tribes question the ways of science and domination of nature.

Consuming animal products is debated in the tribe. Treating health conditions is an issue in the tribe. The invention and use of machines is debated.

The election is upon us. The tribal people thought you enlisted tribal help when you fed and inoculated them.

It's not about merely party politics's. It's about respect for differing opinions in the tribe.

Grocery shopping proves difficult without a vehicle. The major chain grocers require two bus trips to reach them. There is a market walking distance. This is about a 10 minute walk. They cater to the government check people. They often stare blankly at the array of products hoping to receive charity. On one occasion 2 men from Africa presumably peered at all the food the checkers were ringing up. No joke they were very stern. A chicken was almost too much to bear for the large men. There are

no suburban woman shoppers in this market. Hardcore recovering alcoholics along with people back on the street during there probation lurk.

So assuming the purchases can be made, how many bags could be transferred on the 10 minute walk home.

This is the Messiah's guide to treachery, deceit and torture.

Holiness only works in a world of faithfulness. Those that show holiness look to be revered by all. The exception to a holy following rests with the unfaithful. Shootings in blessed environments crash the faith of blessed places.

First the concept of being high minded allowing for an over -man who lives life with a concepts first added must reconcile with bodily minded individuals.

So those that educate offspring through the university claim to endorse high concepts and precepts. The denial of the flesh for concept confuses those that live through the eternal concepts of food, procreation, drugs and feces.

Those that exert effort to remove themselves from the eternal concepts grow cold to nature and natural order in many examples. An over -man may deny food, procreation drugs and feces in order to find answers from an almighty. So the answer given to a fasting guru, monk or seeker confuses those who eat and enjoy the in the now moment.

Simplicity grows into complexity in the knowledge age. The simplicity of acquiring a smart phone, downloading an app and finding a hotel proves the relativity of the point. Many paths solve simple issues.

The oil issue ranks highly in importance in the relative simplicity scale. Should devices that move us use electric or hydrogen the shock will be powerful. Huge petrol economies will wither as the air becomes a bit cleaner. Will the nations that profit from an oil boom grow cold with violence to their once captive consumer. Automakers changed from gas to electric and the oil reserves last longer.

Place yourself at a feast. No, not the feast experienced today but the feast after a tribal hunt. Each member lives to dine on the fresh kill. As noted on the goal of eating fills the minds of the primitive peoples. The specialization of goals divides the populations in many lands. The fresh kill needed to be transported from the field to the fire pit the tribe uses. The builder that arranges needs to eat. The cooks need a spit. The leather maker needs to take time with the hides.

The hunter provided. The basic people do not get creative. The antics of a clown would not get fed by the hunter. Hunters kill and do love making for dominance.

Specialize conflicts with basics.

The defenders of society carry weapons to insure criminally cold soldiers or civilians will not win the battle of the civilized world. Those that write articles concerning the guard in the "Republic" need discover the intelligent soldier defense of encapsulating all of society into attacker and defender. The clowns, the city mouse, the country mouse find the snakebite of social shooters overwhelming in a revolutionary time. The person that creates things with vision for society labors foolishly in the eyes of the soldier and defender. The person planned to earn a living while denying the defenders law. The law states either you make love with it, eat it or use it to defeat an enemy. That each day contains a defense of your laid back, mellow person confuses the elite. Laid back and mellow times require the winning of your

war. Failure to realize you have been attacked cures many on the sidelines.

Throwing a party with cake, cups, balloons and streamers, leaves a room full of garbage. Should people that want to have a pollution free world, not hold such gatherings they would not have the trash problem.

Without revealing bias, analyze whether people do what they want. Science of nature assumes individuals do what they want.

The lost meaning dread leaves no hope for delaying satisfaction. People used card catalogs at a library to find answers. The web provides instantaneous answers.

People do what they want. Slaves do not do what they want. Using the word slave in the fine parlors of the USA grew common in the early portion of the 21st century.

Spoiled children grow up to rule society.

Rachel grew inside to be with Bill. She mentioned once she had asked her father what she should say when she went away to school. Bill thought this would take quite an effort as there were many topics that could arise.

Away at school in Michigan, Rachel noticed Bill was also from the prairie state, Illinois. College appeared to attract those of a like mind. The young students worked hard and enjoyed the revival of ancient bands like The Doors. Some people change there perception of life. Others nod a head and see about the next more then friend hook-up.

Boom! Bill graduates with a signed degree in Engineering. Rachel fresh from her studies of Organic Chemistry begins her

academic specialty. With Bill in Chicago she parties her way for another year before showing up at Bill's door. She wrote once or twice but Bill felt it did not have much heart to it. The phone would have been easier, but Rachel is no phone girl.

So Bill took her as sort of a waif without any love for anything or anyone she could participate in a physical relationship and did. So many lost endeavors attracted the young Rachel. Her heart belonged to her pursuit of advanced educational studies. The more she studied the less she cared for Bill the programmer. His life and love with her ended with her fantasies of love, in a pure way, with striving high school students. In the school system they need woman and men who live for virtue.

Rachel left Bill at the end of the year. Bill worked for awhile. Rachel married John and had baby Amelia.

You would think a married Rachel wouldn't affect Bill. But wait, she had eaten at a family get together and in Sheldon and his wife put them together in a Torah. So the sharing caring young couple live in fear of the "Scarlet Letter" attack by both Rachel's family and Bill's Torah.

Bill is not divorced now. Rachel is a widow. Amelia is in elementary school. Social media perusing allows for some peeking. Pokes to Rachel fail. So now enough time has passed that questions about the couple of people from Ann Arbor should have stopped. So they have.

As to what the two say about each other, Bill says, "She denied me sex booze and meat." She couldn't cook, clean or shop. She didn't have laundry with him. She expected Bill to pay for many shared things. There were some gifts to be fair.

Rachel says, "He must care for me in all areas to have me around for physical pleasure."

Bill doesn't really remember her cold or warm. The family went computerized on the lives of these two active people. Those that don't update the computer trap people in the sand trap of life.

Bill and Rachel can't remember nicely for the computer memory lasts forever.

They were young and figuring it out. The computer needs to be modified. The lines they echoed live in the screenplays of Mike and Chris.

Raising sperm and egg donor kids can be difficult, can't it boys.

The meaning of change, changes every generation. The shining light in 2008 as Barak Obama swept the nation with the slogan of change. The throngs and multitudes cheered, Years of doubting American sincerity ended on that day. The day before the election then candidate Obama flooded all of the airways of the message of change. As a contemporary of Obama, this was the most honest way we could show that black lives matter. Every story has a villain. Who would discuss in ner city violence and all of the other issues of substance that matter. I knew that when issues of protesting occur the kind American spirit would know that someone in the American family hurts.

The protesters impressed with unity, resolve and passion. The nature of life in the USA is that often times the symbols and superficial ideas film well but to what end? No one can erase racist pasts. No one person can provide economic empowerment. Many may have felt bad as we had believed in the miracle of the Obama family. The dream that a Mercedes driving man had died in Minneapolis for passing a bogus \$20, angered all of us. The issue of police brutality should have been the issue. Making the officer out as a white man with an attitude confuses those that found hope in the integrated model of America. The victim who died that day was considered a black man and not a counter-fitter. Protests bring together people in a black and white way. Issues of race show that there is a double meaning in the issue. The mind searches for the shades of gray or colors of the rainbow argument. The American saying is, "You are either for us or against us." The call for human rights involves passage of citizens without police brutality. One of the rainbow thoughts people express involves the race of the public officials and police chiefs. Programs and training of people work. Mental illness

programs work. Statistics tell us far too many black folks go to see the new prison construction just to test the system. Protests have love. The Obama revolution is real. Middle class and rich suburbs provide a home for many members of the coalition. Generalize well and you have a theorem. Generalize poorly and you have a stereotype. We were beyond painting black and white as stereotypes of earlier generations. The Emmett Till accuser is made to look bad somehow against the much loved Emmett. So the colorful are at a loss. The battle being won on the streets convince many people that they must insult their fathers and give the proper distinction to the abused African American people. No one wants to be abused with a knee on the neck. The prisons are filled with people who would return the favor. In the wealthier communities they may also like to offer with love that color doesn't fill the system as a commentary on life. Life can prove difficult. The wealthy and the rich countries in the world believed that wealth would and should solve poor system cutting poor people. Don't stereotype poorly or we could sink the ship here.

5-01-2020

People care about democracy. Political parties developed to represent differing interest in society. Many feel only glory and triumph should be reflected in government. The victor has no poverty, health exceptions or second language support issues. Feel great America though the Covid 19 situation. It reminds government to continue to spend on infectious disease research as well as protective equipment. Both of these things looked like convenient budget items to cut. So conquest with care might be a better slogan for us in the Pandemic era.

Stand tall and be strong.

4-10-2020

Hi again,

The way things are going elections may produce unpredictable results. They are already talking about a "Mail In" election in November.

The thing about politics is about a way to see the world. The young people are very concerned with the environment and global warming. They also have doubts about the government taking care of the retirement accounts. They tend to see taxes as bad.

Take pollution requirements as an issue. The form shows up and asks do you throw anything out. Do you have a smoke stack. The business leader is so upset they are asking him about the garbage. The person has so much to worry about in making a profit he doesn't feel like analyzing it. Yes the guy hires workers and provides a good product. Our society demands knowledge about the waste.

Deregulation leads to a poor environment, even if a few businesses do the right thing.

Should long haul truckers have to stop after a period of time?

Regulations make sure of it.

Taxes on businesses are fair and do not "strangle the business."

Joe the owner of Joes restaurant can make a living and pay low personal taxes while the restaurant breaks even and pays NO taxes for it because he does business well. A good accountant will beat the US tax code on corporate tax.

I insult big business for being a "financial services company" and not a computer, car or retail company. Microsoft never has to write another line of code yet they will be profitable. They do not need to innovate to survive. It's a country really. The Disney Company innovates, but votes no on adult wars. People believe in the Disney way and the Microsoft Way.

The joke is on the government as the big guys say no to the militarized attack of the world. What these kids did after Viet Nam was make Christmas every day for the world.

I have no idea what is in the minds of future Americans, meaning the kids. They may have been lied to and deceived so well they hope to quote economists of the 1980's and win with supply side economics.

Wagner aside, no one will believe us when we care about the respectable statesmen. I'm led to believe it's not where the power is.

So no, it's not the President it's the use of deadly force from Washington that I pay attention to. When the President orders a hit, he watches trained killers drop in, kill the bad guy blow up his highway and copter out. Why shouldn't a head of state order death! Why shouldn't Baghdad be destroyed.? Why should Kabul not see troops to hunt down the Taliban? Because it's wrong!

The lies to youth are so severe dearest ones. They don't get out of bed for the knowledge of death and destruction.
I wasn't the farm bill, I was war.

2019

12-4-2019

The House of Representatives Judiciary Committee met today to question four legal scholars. Three of the four declared President Trump was guilty of high crimes and misdemeanors. One holdout declared the Ukraine evidence was too thin for impeachment.

The White House team calls these proceedings a hoax. At the outset the written statements by the illustrious panel delve into the matter. After the swearing in, it strikes the observer that these peaches and plums of people, say unequivocally that President Trump is guilty of high crimes and misdemeanors. The day has been had for the Democrats who want desperately to impeach the President. Politics and theater win hearts and minds. Partisanship is for the calmer observer. Many have counted the vote in the Senate from day one. The Republican Senate majority will hear the evidence and not impeach the president. The house needs to feel as if government matters. The members need to feel that at the end of the day they spoke on what the empire does.

10-8-2019

People should wonder what happened. Nice settlements that pick up a web connection should know about themselves. Everywhere people are "under guard."

Looking for a word to describe our settlements responses, we came up with "Coercion"

Do know that when judging someone. There responses are coerced.

10-7-2019

(update)

Soldiers like boxers look for the knockout blow. Nice scientists from other countries met the US soldier at work. The other

country knows about the cheap shot taker. The person is trained on low blows.

Self defense tricks including scratching, clawing and kicking in the sensitive areas become important if everyone is a soldier.

(continued)

Many corporations in the high tech field use programmers from all over the globe. One of these countries is Russia. The nature of data concerning a life stumbles over the websites where video logs encourage thought. The data of Russia needed to be true, really since the time of Lenin. The good Russian people went pure with language in developing a data and science based purity that led to programming and a successful rocket and space program. The rest of the population got drunk. These successful people wind up at companies such as Space -X and continue to analyze the world in terms of succinct elements of truth. The person they meet has a skull. In the skull the neurons process language and elements of personal motion. The arm of the person they meet contains physical properties and degrees of freedom and motion. This continues about all areas of the biological people and animals the person might meet.

The doctors agreed that to produce perfect space creatures, the chemical knowledge of the body need be compartmentalized. Those in tech have issues in a personal life that must bend to the will of the perfect, state which is tech and perfect without aberration.

The nation states of the USA and Russia continue to develop arguments for the winners and losers. Tech continues to grow cold to the self.

The tech soldier knows the critical blow that can damage the system. Revealing the competition for nation state produces predictable results. The alliances with the world superpowers bring visits from countries such as Germany that also train soldiers in what the critical hit might mean.

Hopefully the discussion of technical wins does not produce such an attack from the Middle East or elsewhere that will supply the critical hit.

Part of the goal of the US was to make men and women who serve under the chain of command. The goal of the leadership of other militaries is to provide the knockout blow should the world require it. Comments about a programmer being a good soldier make those defending against nationalist fools aggressive with the discussion of ultimate death blows.

The space force that was conceived by many in an earlier day requires thought at the space companies that believe tech goes to space and nationalists stay home.

10-6-2019

Many people play the game of animals. People often take an animal symbol to be what represents them. Everyone knows how the animal game works.

So sitting at home and thinking about the power struggle in the world. The leaders birds needed a going over.

Of course the birds of the leader are the people that sing to that person and around them.

The nation sat in and here is the synopsis

Eagle

Hawk

Falcon

Parakeet

Pigeon Owl

Pigeon

Owl

Oriole

Puffin

Sea Hawk

Gull

Crow

Jays (Blue and Brown)

Cardinal

Dove

Woodpecker
 This led to
 Moose
 Elk
 Wait, wait you forgot
 Chicken
 What was the last leaders group
 Elephant and Giraffe
 But Snake could not hold it and dropped with the apple of
 knowledge for that stuff
 Of course
 Whale
 Dolphin
 Porpoise needed in.
 Fortunately Parrot was not dropped
 But as the shire was mentioned from child.
 The ring was reported over mount doom.
 (Trump was the leader bird that needed done)
 Pelosi sat Parakeet.
 Schiff needed to speak to his gull pronto
 Giuliani knew himself as Pigeon Owl.
 Worms in the sand.
 9-29-2019
 Formal language syntax could produce digital representations of
 people. It might also provide a system of doing business that
 runs well.
 So the young person wondered if the writing could be expressed
 in three letter words.
 The man got hit by the spy. A few men made war. The spy saw
 in the room. The well to do ran away. The few men used the
 gun. One man was with the lip to it. He said act up! If you do
 not act bad to the bad spy the room will be bad. He knew the
 kids had fun. The spy did say, it is not fun for you. Hey kid he
 did say, do see if it will get bad! Most of the kids did say no. It
 was not the guys day. He felt sad to it.

9-9-2019

The wealthy man and his wife awake from an afternoon nap to find an awaiting message. The message inquires for the political season the issues to concern themselves with.

They call for the knowledge of who requests the information.

The message is from Bill. They transmit the information that they are on the edge of switching to the Democrat.

This move requires Bill, a non voting independent to consider convincing the wealthy couple that Democrats have validity and good sense in the manner a good republican would accept.

What follows is the reply.

Blah blah blah

Thanks Bill we will take that into account.

First woman hate Trump. For you a happy couple on occasion gets her the four years of peace of watching the womanizer, liar and partisan man off the screen.

You seemed like the kind of people who wanted the President to explain how his moves benefitted all of the American people and not just the few.

You seemed like the people who wanted an honest America with Justices that looked and felt like America

You seemed to enjoy clean lakes, rivers and streams.

Now we miss you for your desire to feel safe. We miss you for denying people the American dream because you have fear. We miss you most of all when you devote so little time to thought, news organizations fail to operate properly without you.

You don't want verbal or written rivals. You want to kill those that threaten your nice morning coffee and pastry.

So the message was not meant to be sent. You programmed yourself in reactionary mode before you left the planet with your views. Your heads are an absolute disaster to those who wish to achieve. You punish each achiever that takes you on. That is unfair to the ethic of America.

Why the message? It wasn't clear to you that people read your message. Those that play by the rules will succeed in America.

America takes on shades of the workers party in different lands.

They may say you have taken too much from us and you need to account how it is that you work less and have so much more. Play by the rules in Scrooges world and there are no paid holidays. There are no healthcare benefits. There are no government loans. There is rationed happiness and you may find the world moves on around you. One day they may come to collect your easy chair. Not to worry, you will buy another one.

Excerpted The film 1991

Treatment 1 Bill

Opening scene: A new years eve party at a bar in Chicago(or Seattle or New York). New Years Eve 1991 noise abounds. People considered the world the most modern thing.

Jan 16: Stealth fighters and bombers attack Iraq and the capital city of Baghdad

Bill the information management specialist is patched in on "Targeted Cable" The war is on live in his city apartment.

Jan 17: Bill gets dressed after a night of live war and commutes to a software company to do the days programs.

Dialog to see if others know about the US involvement in Iraq. Evening after a tough drive home on NPR which confirms the war is on in the middle east.

Bill is living with the Vegetarian girl who forgot to get food again. They quibble and Bill seems anxious to get to the Sony Trinitron TV. To see if the targeted cable is hooked up to him again giving him more war coverage.

The set is on and it begins to play more bombing. A scud missile is launched headed to the military base in Saudi Arabia. Will the reporter die right on camera for the "Generals" hooked up to this targeted cable system.

He takes the vegetarian Rachel aside and asks "Do you want to go see your mother for a few days, "She seems snippy again and not real receptive. She doesn't see well and assumed it was a television docudrama about a war and not live coverage.

Bill knew it was real. Had his friends hacked the Pentagon and set him up on a prank?

But how was it accomplished. CBS evening news stayed with the war shot with nightly news reporters in the region. NBC, ABC, Fox and CNN all stayed with live war coverage for the “at home generals”

So war on TV Bill said. We certainly are on a new level. I bet it's a big success with the nation.

8-27-2019

The world changes thru the work of impactful people. Many hands build to make an impact. The great societies solve ancient problems with technical solutions. Thru it all the species bears children and must inform them of the solutions already built.

New people use new love. The impactful people work for impactful companies. The impact of these people affects the love of low impact people. The people of India and China have many religious people that use low impact meditation and foods to reach a point with the world as low impact.

The super-creature in certain societies works for the perfect blend of low and high impact. The world of steak and potatoes conflicts with the rice bowl populations. The dainty, fair and loving may or may not comprehend the implications of the impact of their home and nation.

The boxer must make a bouquet it seems.

8-20-2019

I had wanted your quick thinker, to get that people think deeply about our land and the people. It is with pop psychology that this article intends to show.

Politics is boring me.

“People want a good home with a good job and with good safe streets and schools.”

As an uninformed city person I have to wonder if people are bored with this dream.

Things like the interest rate, trade wars, border wars, military readiness fills the agenda making me think the once peasant

farmers have grown bored and need a regal and royal presence in the world.

Sure near Mt. Vernon, Monticello and Mar-a-Lago everyone gets to play the, "What the president should do card."

So, growing bored with the neighborhood game for a good Supreme Court appointee or case makes perfect sense.

Each citizen with wealth is asked for great concern for the land and the people. With wealth people believe like a Royal person to decide for the downtrodden countryman. In a perverse socialism the kings of America say the options of the wealthy of both parties offer a solution for the comrade but not the king. Do people need for others to decide for them. The kings known to me do. They also want them ready to defend the safe schools, streets and border with violence on demand.

Don't wreck it.

8-19-2019

"Doesn't America make peaceful people?" the two Illinois boys asked.

The old Bill sat stunned realizing he didn't have an answer. Louis the doctor thought these must be very simple folk.

They went cold Louis said. After hearing the old man did not know peaceful people they began acting up. The trail went cold. The peaceful gay community acted up. The Jews acted up. Most of all the worlds people of color acted up.

Peaceful people had no where to go.

Oh sure some found a plot of land with a house on it, loved the family and went into debt to pay for now useless college.

Answer him old Bill thought. It will save the split in America. The nation of America he thought. Who would answer to the simple?

So say it. There are plenty of peaceful people. And no people are not all for war. Your loving Presidents have waged peace so much the Germans took over peoples driveways.

What do you call peaceful people? Who is the American? Save the whales.

8-19-2019

I felt cold to you today. I can't smell you from here. I don't bathe with you. They won't take a bath for you. I only tell you cold today. Can you tell me who is here. (In her head). I went to bat for your father and it turned up bad. I want you to smell bad to her.

You have done a good job in having her smell the bad on his breath.

I don't just not know this but I am saving you for blood. Blood is in your shoes.

Dark magic proves the "Jinh" battle occurs again. Do you remember the battle of the "Jinh". The cobra dance proved potent.

I don't just remember I own her.

Was the "her" reference to all women?

Yes of course.

Kicking in the door of the fortress of the solitude prohibits any change in interaction fondness.

You mean you can't be both or one or any.

Yes

I am cold, so you sit and fill the cup?

That's about right.

I am cold to you two. Why can't people hook up?

When blood does your shoe I ache for calm.

Yes.

So the issue arises as to, what are your interests?

How could an in my shoes guy fail to understand him. He relies on you for assistance.

So over and over the years answer gets abused. You know about, "Get yourself to a good time place and party"

Oh God you mean I am not with your year.

I thought you were.

I can't hear you more.

Do you want war?

I have a lot of words coming from my heart. I am on the next page with this.

Do I want war they say?

War is understood differently then Love. Societies make wars. People fight in those wars. War accomplishes a destructive goal. So do you know that the person you asked is a constructive person. It would seem obvious.

Are you through?

No.

Continue.

In life people that built something like a cold structure wondered if other inte rests would bury them there as to not tell the secrets within to others. To make advanced things there was a war. To build great airplanes there had to be a war for air travel to be what it is today. The war of the 18th century of declaring sides and proce edings lost to a war the questioner wanted is now sniping. People that snipe or act racist to shoot at people are impure. The war however against them requires massive effort of potential fighters against the fighters. Do you get it?

So in the early 21st c entury a war against terror began. I myself have been questioned many times about it. So safely ensconced in the pine forest you ask the question nicely. I just must duck when the shooting starts again.

Put that in your pipe and smoke it. You always did h ave the eye condition that marijuana cured.

8-9-2019

There are good and bad forces in the world. The battle goes on for the good and the evil. The evildoers do terrorism and violence. The end result may be a German style final solution. Final solutions in history led to hard times for the evildoers that use final solutions to eliminate undesirables.

So as defined, good people to not hurt or kill innocent people. People start families in both war and peace. The issue of a good childhood education causes sim plification of complex issues. Simple lessons add to the safety of the burgeoning family.

The children grow with values that allow with very little room for open ended thoughts.

Simply, good people don't shoot up schools and stores. Good people don't attack passenger planes. Good people earn a living, attend a house of worship and have a kind word for there neighbors.

What if in education people added, "Bad people smell bad. Bad people are not white Christians."

Not all people could pass the test of "Good Person"

Absolute knowledge of the Good was believed to be for an almighty God. The major religions insist on the knowledge that everyone sins. Everyone should pray for atonement.

The slippery slope occurs when one of the Good people asks, "What should we do with the Bad people?" Jails worked out fine except for the overuse by certain ethnic groups.

When someone asks the question, it is recommended to use the case by case method over an overwhelming Good final solution and possible massacre, be it bombs, tanks or gas chambers.

8-1-2019

The American Revolution began due to unfair taxation by England. American business needed to produce a wealthy class. The importation of tea could not be for a good profit if the English throne taxed the product. They rallied with the cry, "No Taxation Without Representation" It wasn't just taxation, the business people were in debt to the English lords for the entire business mortgage.

From ship builders to home construction products, the merchants and tradesman could not make a profit.

Repeating for a second, the hard working men and woman of the revolution worked for slave type wages.

The rural south and share cropping show up 100 years later in a post 1862 world.

To answer why people make war, they fight for land and wealth.

People ask if war will come to a peaceful and wealthy country. The answer will depend on allocation of resources and the nature of minority rule.

1. The Boston Tea Party.

8-1-2019

Three cave dwellers stand by a charcoal drawing on the cave wall. One of the cave persons talks with great fervor about the state of the caves. The cave person uses words of his creation to define the nature and human puzzle. Cave dweller number two suggests to the attractive third cave person, “Ugh has something in his head.” This simple statement wins the third dwellers love and affection. No matter what this winning play continues thru to modern culture on this side of the pond.

The competitive nature of people could have worked cave to cave however at any given moment one and two may be involved in the classic snake puzzle. If what “Ugh” says is true “Slis” can say the words to an unsuspecting “Fino”

Eventually “Ugh” catches on and demand “Slis” stand on his own to feet and lead the band. “Ugh” is banished and “Slis” goes for the easier answer. Weapons and food stay the same and innovation takes a back seat to the now together “Slis and Fino” love affair.

It’s a classic garden of Eden puzzle where body beats mind. “Slis” knows when times are good, coast. Live and love in the moment.

8-1-2019

Young people possess imagination to help them set direction for individual hopes and dreams. Those that write attempt to display a trail marker that may guide someone to a pleasure and not a lava pit. Those that offer a platform for the middle aged men and woman feel uneasy about careful tending lives. A friend of mine is quite rich. He and his spouse don’t “get” social media. After

all it's for children and you must caution children about misuse of it.

Thinking about it, people remember children on the day the couple is traveling and they hear the quote, 'Can we stop to get some wipes'

At that moment deep thinking and dream realization ended for the next pocket spending.

A life of deciding on tricks or traps ensues, encouraging caution with every societal offering. The risk and reward puzzle offered today preserves a class system that many people choose not to endorse.

"Sure. Lets get those wipes"

Scott, "You are the best"

7-11-2019

Summertime provides warmth. Enjoy it.

So anyway, when updating a Phone, Tablet, Notebook or PC the world got great. The software giants have figured out what to do. Google Chrome browser remembered the username and password for all the sites this user needed. So the Apple iPhone and DELL Windows 10 machine work so cool together, you would never knot they are heated rivals. So yes this DOS/Win 3/Windows xp/Windows Vista/Windows 10 customer has drive space on the cloud with all three. It started out innocently but as the site grew a true data outsource the cloud provided could be used. The calendars synced. The Music files synced. All of the devices recognized the task and synced quietly in the background. Photo sync worked great.

Together Everyone Achieves More. (TEAM).

It took the world to solve these difficult challenges.

For the world to decide, “Will technology enslave us or liberate us?”

For the record it is .99 cents a month for 50Gb on the cloud.

7-8-2019

People valued culture before the “Information age.’ The digital revolution provides information to once unsolvable questions. The Chinese wisdom answered the question of time and perpetuation as a creature had parents, it’ parents had parents forever. The age of the earth is now thought to be 4.54 billion years. Of course to compete with other nations the Chinese scientists are now permitted to work on this type of science. Culture approximates answers to suit the belief system of the cultured. The digital age brought clean answers. At what cost to cultures dissolve.

As food processing got better, many Jews ate bacon. This was once forbidden by cultural custom. Not all activities are kosher, even in an age of digital purity.

The world survives in its current form by processing “pumps.”
 A drug can provide a pump. A lover can provide a pump. A dog
 can provide a pump.

Resources can provide a pump.

World War III news infects fools browsers. The overlords take
 the massive amount of wealth and provide pumps to those who
 live in poverty.

So, the small town had an arsenal out on the back forty. The men
 found solace that in a confusing world they could get to the
 weapons and fight to outlive the attackers that might flee in anger
 from a financially closed world. In their eyes, this controls the
 happiness.

Jews provide pumps and are therefore untouchable. Your lives
 were drab and unhappy and now you have pumps to live with.
 Flashback to 1974 and people were stripping for each other and
 for audiences. Hair was long and people were groovy. The
 scientists wanted in on the game and so stripped the human
 defensive shield that defended people from alien beliefs to the
 culture. People would meld into a superstructure fairly and in a
 balanced way. The song played, “And deep inside was all the
 same.” San Francisco scientists roared with approval now assured
 each person had a little gay kid inside them. Little did they know
 six years later all of those pioneers would be dead from AIDS?
 Modern boy looks up and says, “Were they right?” “Are all
 people gay?” Now the answer cannot be easily, yes or no. It’s not
 a defining feature of the life now son. The male-male
 relationships will continue but the concept is mean or fair. It’s
 transaction based or it’s love based, regardless of the rainbow.
 Accepting is not a trait of anyone in the modern world. From the
 schools to the night clubs people strut and speak with inequality
 and cockiness. That’s attractive. Look at the strutting and
 differentiating. One of the little gay kids wanted death to the
 “Normals” or “Bores” and so people use drugs too much to
 distinguish if it is or isn’t a trait of rainbows. Shouting
 intolerance doesn’t help so stay home and pump.

Americans have three major sides, in terms of philosophy. First and foremost, the legal side dominates with constant struggle for lawmakers in the communities, state and national level. We are taught to look for actions that may be considered a crime.

The second side is the business side where transactions and life sustaining vocations occur.

The last side is not American necessarily but is important in comprehending life here. Doctors without borders may wind up as the winner of the battle between the doctors and lawyers living here. Will business and law fade as cellular life, now enhanced with chemicals makes us all feel superior to all other people.

When you don't fit into the other sides you are punished as a criminal and live under constant scrutiny by the three sides. How many pieces did you sell. How many performances did you give? Did you do your life fairly with relationships?

Women are not left out with constant connection in Medical, Legal and Business worlds. To argue her as a cook, wife, lover and mother removes her from the nation America has become. Most woman love the fictional work, "Harriet the Spy." Woman spy on the life of there man, his friends and the neighbors. Her nationality could be anything. Her loyalty could be anything. The real agents reward her with pumps to turn in her neighbors. So Peter began, "Well this is something. You have a gavel, stock options and a stethoscope to account for the thinking on things." Bill began, "Mike has a PhD. In philosophy and he caved to it. Kids got bit on the love card and couldn't think of an action for the future that was legal and that kids wanted to do. Staying home was the only legal thing."

So sure, "It might be gavel, stock and stethoscope, but who decides on the war?" Marla said.

“A nation divided against itself cannot stand.” These words of Abraham Lincoln ring as true as they did in The Civil War period.

In technology Mike continued with the flow chart algorithm. Solve the divided issue. Barring a solution you must kill the opposing force with energies and demeaning behavior. So Marla, fresh from a lecture on behavior modification as it relates to “pumps and dumps,” thought taking great reward would solve it. Everyone would be pumped and happy.

Joel agreed and they ate and laughed about the good world, and the bad.

Mike reminded them that, people fight as a legacy from the earliest days of survival of the fittest.

Bill claimed that people can have payouts from mental exercises that pumps just won't fix.

Mike, always the one to play the devil says, “Like what?”

The group had been eating and continued after a pause. Bill said, “Aren't we all high minded. We seek solutions to the world's issues. We then proceed to eat and enjoy, secure that the world is safe from plagues of the past.

Marla suggested, “It puts the mind at ease, but it's only natural that you would want things to go well.

Mike laughed, “Go well for whom?”

The group laughed again and one was thought to hear, “He always says things like that.”

Joel sat and thought seriously before speaking. “You must side or you will die.”

Billy hid out by the refrigerator thinking, “Freedoms will end, people will die.”

Billy continued, “So Mike, do you have the highest low mind or the lowest high mind with that? You can't have serfs win every time. Serfs do serf things. Lords do lord things. You want people who are not central to plague defeating to defeat plagues.”

“It's not just plagues it's food, food distribution and defense.”, Joel said.

Mike gathered himself after hitting his Dr. Pepper beverage.
“Don’t you realize that serf IS the farmer, trucker and soldier. “
“Look at us. If we didn’t do it with our heads it wouldn’t get
done. Empowerment buys inefficient laziness. What are you
going to do? Tell your homeland spy were to rich for the labor
and socialist movement.”

“Peter, of course people care. It’s just that you voted with the birth of your offspring. It says you couldn’t figure it out so you made a soldier to fight for your pig.” Dave said.

“Hey, I heard Israel is making grunts out of Jews and bores.” He continued.

“Well the IDF takes mercenaries from Druse villages and they have no problem shooting. It’s not like the Jewish grunts fear dying, it’s they fear religiously about pulling the trigger.” Peter responded.

“Did you hear Bill and them talking about pumps.” Dave added.

“The whole planet is up on pulling the string on every kid. Do you remember hypnosis for stopping smoking. Well with the tube the mass hypnosis can start trends and win elections. The feeble are taught to yell about a candidate without any visual or political reason.”

So Peter said, “They have got to use real guns and real bullets to convince us.”

“Oh, my God man. What has it got to take for you to realize that doesn’t convince people. You seem now like an only death can convince you.”

Bill enters, “It’s an amazing journey. Come aboard, come aboard. With one life to live you ignore bad for a long time and then fake that you could have or should have known, as long as Dave and I keep saying things about it. Grunt us up some grub.”

“So what are pumps to me?” Peter said.

“It’s known to me in a sports way. Do you remember Jordan? He was high up in the NFL providing pumps to NFL games. So, each play for the TV play of a game is scripted with huddles. Since it takes 3 downs to make a first down, the key play must be lots of third down plays. So on the second down the league asks for a defensive gem to pump the side that may have been dominated. You can’t just have gains of 11 yards each play. So the league would say “Pump left, Pump right, Pump left to get the first down or Pump left, pump right, pump right which is a big dump.”

“So the last play of the game is the big pump with double pump or a big dump.” Peter understood.

“It’s life not sports. If you’re big, you buy the perfect life with all of your pumps figured out.” Dave said.
Continuing he said,” Then you vote with the giver of pumps.”
