Dedicated to caring loving souls
And the cold that keeps them that way.

The Mercantilist Fool

Introduction: (Part of the story you may continue)

The electronic blacklist continues against Mostovoy, W.D. the brains behind "What's in the game." The pen name and fictional writing upset the apple cart of the authors contact list. He also is blacklisted from work and public presentation.

The occurrences of the war from Sep, 11, 2001 through March 19, 2004 produced a methodical takedown of the U.S.A.'s technical and intellectual might. The upside of life in the U.S.A remains the economy.

The English and American ethic of keeping a store for the world to shop and dine in remains true to form with the introduction of a new computer laptop operating system called Vista™ from Microsoft Corporation. Other products and services manufactured and designed including aircraft, power and geological services bring the world economy to our shores.

The cities of the world evolved to cater to the needs of the trade merchant in commerce. With the shell game of the city, reduced to the country estate of which cupboard some particular store of goods rests in the shell game of the greatest good at the greatest time becomes a mystery.

The greatest nations on earth evolved through catering to the greatest good for the parties involved in a transaction. When one arrived at a cities doorstep the assumption of fine for fine played perfectly.

When conflict arose with the terrorist attacks in the major urban areas of the world including Madrid, London, Germany, Belarus, Baghdad, Kabul, New York, Washington and Pennsylvania the cities put on the ill fitting face of questionable fine for questionable service and goods.

The Madrid train bombings killed 270 Spaniards. The London bombings killed over 100 with 3 double-decker busses roofs sheered off. Baghdad explosions rock the capital with 130 killed last week. Kabul raids from the Taliban kill with surprise and shock. Belarus massacres in Bessalar killed a gymnasium with the crowd, the size of a High School basketball crowd lying in pools of blood on the hardwood floor.

To note the worlds Arabs and country estate barterers, show outrage at the fleeing city travelers who take the mercantile attitude to the backwater where reports of shortages and supplies during crisis draw a fear of the stranger for trading perhaps useless account funds (you are forbidden the word money from Seattle's backwater) and cash.

The country realizes you can not eat cash, you can not feel fine in the country on only cash. The game goes on and those that enforce city grabbing for a fee from the country estates should be on note of the revenge players who know all too well how to get a gun and shoot at some house still sitting up top.

All someone wanted was a gallon of milk and some good Ice Cream and the country spy in town exchanged words of worth to the caretaker of the commerce center, then death happened on both sides.

Bill

Chapter 1

The robot can call you back, I have got things to do. Computers consist of an input and output and a display. Memory added to computers increases functionality. The goal of life assist robotic stimuli in regards to communications led to the telephone voice mail directed by life sound input. Goal one in the home assist model of assessing personal, business and alert messages depend in interpretive vocal decoding.

Adding the functionality of a live answer home assist unit with an arm in the home to pick up a phone from a receiver mount unit and place the phone near the Ear Hole recording system, for recording in the head of the unit for establishment of listen and speak in a room where hands may be busy and the vocal "Hold on a minute" could be perceived by the unit and

heard by the party on the other end benefits the disabled who may require phone out services and assistance as well as the distance speakerphone.

It will not be easy to tell who the robot is in our office anymore, will it. Tell the robot to phone the doctor.

Enlightened Self Interested Greed

The focus in politics and economics revolves around the well being of a population. The decisions made involve research into what smart decisions individuals would make. Collectively the world valued intelligent design towards the ultimate end of a better world in which the leadership could function. The closed loop system involved a lifecycle program in which intelligent functional modules of life collected in regards to clean efficient living. In human terms we fabricate goods, use the goods recycle the waste and limit pollution while making wealthy the executives and workers involved in the product life cycle. In the past a company made goods well although they polluted the industrialized rivers as in the case of Lake Erie and down river Detroit. The Love Canal ecological disaster in New York destroyed thousands of lives with a chemical that the land will never heal from.

We face a great challenge today in terms of the end result intelligent thinking human. The cheapest goods produce the most waste and satisfy only the immediate need. Pulsating images and taste shaping may lead to a controllable citizenry the leadership can package a sound bite to but the ultimate goal of an intelligent decision making public fails.

What the leadership fails to realize is that the intelligent consumer always self satisfies over all else. Supply and demand dictate the value of greed. The newscasts that were revered by previous generations look pale in comparison to the real economic report on the Hollywood style reporting programs.

The world produces enough goods to satisfy the intelligent greedy individual. Soldiers fight in a world in order to insure greed. Workers sacrifice their entire lives to satisfy greed.

The world faces a challenge by those whose greed by necessity would be religiously fundamental. Fundamental harmony with human nature leaves the leadership with the basic assumption question?

Does the human form function with greed in lieu of God?
 Leadership in democracy and fascism controls with greed.
 Leadership in Islamic fundamentalism controls with God?
 Does the Religion play a role in the modern democracy?

Fear not the communists' math. When the math works and communists do much of this everyone has?

Communists are Dark Horses? Sometimes they win. They always cross the line.

The reporter is not communist. Ok he does want you to have an iPod with Beethoven. Ed.

Chapter 2

The academic, creates life models, through verbal and numeric acuity. To know that to have a quality the object relates to the space in which the object lives. The value, in knowing the limits possible, expands that which express progressively. The painting may have a corollary in three space. The painting may depict a scene impossible in terms of location of objects with respect to physical principles. The assigned truth value of a well formed formula which truthfully reads false contains value in data modeling of artificial life. The well formed formula models a world in which the subject verb object syntax follows logically yet the given object is not acted on by the subject by the verb in real sense. The camel threw the snowball. The example may be a well formed formula although camels very rarely live where snowballs are and throw would be most difficult, and yet the sentence stands as a possibility for what might happen, in the world of all camels, the world of all weather conditions and the world of all projectile stimulation.

The casual passer lives freely. The synthetic retiree partner being proposed may be the real use for synthetics. When the phone rings the robot answers the phone with a mechanical arm and exhales into the phone so that the recently widowed might hear the sound. The robot might suggest medicine. The robot might ask if a call is to be placed to a doctor or family member. As for the robot deciding what program to watch, some will allow this, some wont.

To keep a geriatric patient adept, adroit and cared for advanced synthetic processor robots need to find their way into the home. Bob from accounting is getting that way now. Rule based systems he maintains produce better cleaner lives. I respect Bob. Bob reproduces well. Usually you can find him by the copier.

Hard Life Good Television

Chapter 1

Introduction

The electronic blacklist continues against Mostovoy, W.D. the brains behind “What’s in the game.” The pen name and fictional writing upset the apple cart of the authors contact list. He also is blacklisted from work and public presentation.

The occurrences of the war from 11 -Sep-2001 through March 19, 2004 produced a methodical takedown of the U.S.A.’s technical and intellectual might. The upside, the financial economy remained strong.

The happenings:

11-Sept-2001: The E -Ring of the pentagon destroyed by a terrorist aircraft lay in ruins.

11-Sept-2001: The center of commerce for 11,000 workers lay in ruins

11- Sept-2001: Wall Street Closes for 1 week.

14-June 2002: Homeland Security department established to “fight terrorism”

20-Aug 2002: The Patriot Act passes giving the state the right to spy in peoples homes legally. The constitution seized under the war powers act.

Its not about Afghanistan.

The General Accounting Office (GAO) begins writing checks to homeland security agents. These agents come from the Republican ranks, building the largest patronage army ever assembled. Once the government holds the loyalist with the gift every poor snob wanted, the ability to look into Ivan, Boris, Alexi , Francois, Jaque , Hans and Franz toilet, the international wealth IN AMERICA faded for the real imported Ivan’s et.al.

So, the Democrats swarm the nation looking for minority seats in Illinois, and women seats backed by Women whose white wine Republicanism fits in with the Republicans who dare not kill.

The movement of the people produced happiness and death. The murder rate grew sky high. 3000 Americans died in combat in Iraq and Afghanistan and the knowledge that the GAO will buy your neighbor if you missed this one left the fractious nation without technical and intellectual merit

Chapter 2 Nihilism or Truck Pull

In a world of conflicting moralities the conflict for moral authority degrades and denigrates the republic into the morass of morality baiting with the reward of eliminating a weaker physical morality. An absolute morality of self interested communal life tending towards tones of non-violence and intellect driven morality decayed with visual testimony in regards to communicative skills. The manner of being while relating a point of view led to the absolute truth of the human form.

The absolute truth relegated to the holy grail of the intellect proved for certain, that the input of an event leads to further inputs and outputs with regards to self enhancement and body to world outflow. The gift of exchange of words for honor left the world searching for the truth that would win a gift of a further word and financial exchange. Having expunged the true word passing in the non questioning acceptance phase of verbal exchange the words that creep into the home come not from the enemy down the block, they come from what was thought to be safe and edited television content.

The past world, confusing as it was, relied on the knowledge that information sources should be noted and accounted for. Each individual home attained wealth at one time by making an enemy of one sort or another. The inevitability of conflict in an era of openness led to absolute false statements known as falses. A false absolute for example would be, "If you drink water from the lake you will vomit." led to pranks with minute poison at the next meal by a prankster. Other absolute falses in terms of self defense knowledge and meaning, known as reads to the false purveyors, convey fear in regards to false purveyor busting with physical strength of deceptive and drugged surrender to the lesser evil. The greater good in false purveyor world means the lesser evil in that those with the greater good procreate dividing the existing wealth to return to a least common denominator seen in Asia and the Pacific Rim.

In the nature of false purveyances the cold manner through warm of putting one to sleep produce terms such as "Ethnic Cleansing" justified by

Slobidan Mlosivic in the 21st century as well as many other European purge lords such as Adolf Eichmann in Germany.

The good thing about purges, if the falser just falses you out of your bills and coins you usually can drink vodka, watch out for the vomit.

Chapter 3 The Space Model of Life

She does not permit early saves.

Lonely spaceman writes in his journals about his time in space. The spaceship model of life we live in today relies on the virtual purity of each step in a process. The spaceman travels over every country as if it were a personal journey. I would have written her but this writing occurred before the sexual translation program ran on the rig.

The space traveler, you see you can not say traveler for the destination of travel implies passage from one world to another, this does not take place in an orbiting space station. You wind up in the same spot having done humorous, serious, emotive and evocative things. Evocative images mean that if you were from earth you remember the dancing needle on an analog gauge reminds you of either your first car or the baton in the conductors' hands, while watching the needle in the Plymouth after the blowout party.

The logs of dismay and shock fake out the young who have been faked out so purely. The critique on pure fake out remains for the "pre-packaged smores" squad.

The nature of evil and the fleeing from it put those that flee farther from the fleeing to freedom evil does far away from knowing evil through the banality of the true non-interlaced debate on removal of Pavlovian responses to formerly freeing inputs. That read the writing as a symbol of a country rather than the identifier that the food inside may be eaten proffers bread for the military machine to munch on.

Chapter 4 Economic Mighty Mouse

The breakfast of cold cabbage soup, toast and margarine settled in the stomach of the pilloried author. The congress called in the old war horses as stated last week to testify on sending new troops to Iraq. First the war in Iraq began on 19 -Mar-2003 that would be 3 years 11 months equating to $3*365+30*11=1425$ Days the U.S. population has lived with intense international pressure intellectually and terrorist pressure in our daily lives. The fact that a former Secretary of State and 2 former presidential advisers testify before congress show that those in government have been unable to step back and evaluate correctly the nature of pressing the point of world dominance.

The economic might of the U.S.A led to the development of space base weapons, precision guided munitions and aircraft that operate with high kill efficacy. The nature of intelligence and intelligence failings based on the idea that the dens of thieves that live without desire to spend many years developing weapons programs only to test them in an ultimate mode of terror show the lazy warriors intelligence plan.

A retreating army of 400,000 Iraqi's with rifles and bombs packed into a city of 8 million wait for patrols to wander buy and discharge the weapons into the unsuspecting. The Iraqi army held guns and munitions for 1,000,000 men at the start of operation Iraqi freedom. On paper, A1M1 tanks, Stealth Aircraft and Advanced Heli copters dominate the few tanks and small arms the Iraqi's traveled with. The mayors of large cities will tell you of the effectiveness of that many poor fighters. The gang banging that goes on domestically with the oil profits funneled into the U.S. destroyed the business model of American life for 1425 days.

Many residents of the U.S. left for Europe during the first days of shock and awe. Many went into hospitals to work as staff for this time. Emerging this year with the new congress, anger, frustration and confusion continue to wreak havoc with the intelligence community who earnestly believed those brilliant physicians and international business experts were aware that 2,000,000 men and women of the armed forces traveled overseas during this time. 500,000 soldiers traveled to the Persian Gulf in 2004 with 120,000 remaining in Iraq and the smiling faces that wander into Chili's after the foreign jaunts and hospital coffee cake parties remain at odds with decision makers.

A full on war with your neighbors taking part happens every day. 334 U.S. servicemen died between Oct 2006 -Jan 2007 and the neighbor not

fighting still can NOT tell you what government does or where the fight is. The fight may be in your heart world travelers. Fresh fruit may make you feel better. The ultimate sacrifice being paid daily must be noted by you. You can live well with the knowledge that fighting takes place in the streets of every city in the world right now. The safety pushers with cholesterol and safe food warnings need to back off demands on the stress laden intelligence workers in government.

Chapter 5

Real Killing in War

Iraq Violence Escalates with civil war monitors the U.S. Military.

(Dateline-Washington)

The recently convened congress held hearings this week on the deployment of 20,000 new U.S. forces in Iraq. The dignitaries included some of the finest minds of the 20th century. The consensus that the administration had no firm goal on the sending of the troops verified that the value in war for the sake of war continues from the Bush administration.

The activities and the control of them through the agencies of Homeland security leave the public in a state of chronic warring denial. Reports of a non-informed public on the war which included over 500,000 servicemen in the year 2004 remain. That 150,000 troops remain in harms way with the public asking, "Who is fighting in Iraq" every time the administration claims to need troops for the war in Iraq.

In the Village of Zaca, Iraq sectarians promised other sectarians a river of blood and buried some 500 in an irrigation trench. Iraq remains an unsafe place. Camp Victory, now ringed with trees as the 82nd airborne requires plants one for each one planted in land here opened a sister base Camp Grenada SSE of Baghdad today. With tent stakes that have orange flags in the corner, a flag in the middle, the glory runs inside the perimeter looked positive.

With 20,000 new drivers from Camp Grenada to Camp Victory, the young would have a non-denied safe, unsafe environment to laugh, joke and build leadership for George W. Bushes final solution.

Guantanamo Bay Cuba continues to torture battle field detainees. Republicans continue to execute Democrats in record numbers. One Asian Women with Microsoft stationary killed 30,000 men in the last 10 years. With the quote, "Why should so many people program?"

The unbeatable George continues to train may show up on any of our doors. The same was said about Viet Nam and they have proved the point. Knowledge workers risked everything for the joy of a successful program. The soft in software meant you could train hard with your mind and retire to a soft pillow later. These workers passed information on so readily in times of peace, they now look guilty to the Asian translators who still feel our success merits a look. We are a successful people, we just have to fight for it.

The new al-Kindi hospital ER (Emergency Room) filled with patients yesterday.

The Scorecard in Iraq 4-Feb-07

The nearby al-Kindi hospital —(Childrens Hospital)

132 Baghdad Iraqis dead

5 U.S. Military

Kirkuk explosions

Mosul insurgencies on the uptick.

Suspected Sunni attackers have appeared emboldened in recent weeks after radical anti-American Shiite cleric Muqtada al-Sadr, under pressure from fellow Shiites who dominate the government, ordered the thousands of gunmen in his Mahdi Army militia to avoid American attacks in the coming assault.

Further signs the insurgents were migrating north appeared in Mosul, where insurgent forces fought Iraqi police and soldiers. Police said five insurgents were killed.

Police spokesman Brig. Abdul Karim al-Jubouri said fighters abandoned their attack when Iraqi security forces moved in backed by U.S. air power.

In the Baghdad blast,

Maj. Gen. Jihad al -Jabiri of the Iraqi Interior Ministry said one ton of explosives ripped through the Sadriyah market.
 Shiite Prime Minister Nouri al-Maliki
 Government spokesman Ali al-Dabbagh.

If you wanted indisputable visual evidence, this is Bill at home.
 Electronic monitors can be so deceiving.
 (International Translators need draw these dailys to show what Bill does)

Chapter 6 Free Power

A couple can charge up an entire house of batteries during a morning workout. The DC voltage unchecked can also kill her.

Radar Coiling up Sparky

Chapter 7 Placed Up not Up The Skirt.

(Dateline-Washington)

The Equal Rights Amendment known as ERA proposed in 1974 afforded women equal protection under the law here. Discrimination on sex was to end with legislation. The culture of the day promoted a "personship" style with phrases that rang out, "I'm ok your ok." The gestalt movement of comprehension of another's life experience enriched a generation and left the traditional role individuals with a strong intellectual position of opposition for those whose words rang false to the simple things men and women enjoy doing, apart from the time they share together.

The push to eliminate things that men do as revenge for your mother in-laws denial to her daughter caused the new phrase in women bonding "I am

Ok you are not." The knowledge that someone of a sex will do something once patterned in a judgmental age leads to the ethnic cleansing so popular in the world. If a person enjoys "dirty" things in an age of equality another person of the opposite sex must enjoy the "dirty" thing. It's not just "dirty" things its "brainy" things, its "athletic" things.

In an age of sitting the new phrase "I'm better than your ok" drips like spittle over the lips of the beautiful nincompoop.

Chapter 8

Dear President Bush,

The world changed on September 11, 2001 when 4 hijacked airliners crashed into U.S. soil. The nation needed options. The mole and soul option saves many fine beings for future fights. The nation needed someone to use some resources mentally for public service. Of course W.D. said loudly and with verve, you have the wrong man. My life in shambles after a failed TV pilot and 100 episodes never saw the light of day. Bankrupt and newly aware that people do not get paid for television without a contract, merely live with inherited wealth and spend in the wonderful television reality.

The television folks, curious as that sounds, seek a conclusion to the program. "Bill as Himself" had "Cindy's Room" up years ago. You see each life in California government must have entertainment value and a theme. Those with religion and faith hope for a moral director and film crew. At any moment in Bill as Himself, Bill is unaware if the Bullets are real or of the blank variety. The trade on disc television born in 1995 continues today. The more the discs became popular, the more local cable stations throughout the country put them on local cable "rings". The Washington Ring showed validity and strength(not to worry) boldly and strongly before 9/11. The Clinton's not only looked the other way to the decay(or decentralization) of American power that when the time came to ask "America" where the capital was and who had power, nearly no body outside of the Military had the answer.

In a land of upstarts and rebels many laugh and wait for the next government check. That is how Washington has lived forever. My hopes

for and education with a philosophical remain true only when Philosophy includes a God morality concept. Without God philosophy means very little. The sophists proved this in the Greek Epoch.

The mitigating factor, that those that champion God with the sword and not the head have exciting tumultuous lives that many pine for, and often find themselves in a pine box. Souls of great nations scarred by war retreated to souls of simpler times. That which requires detail, left the lives of our people who seek only lives' best part. The realistic interpretation of my life from the mole and soul option missed the boat with us. Your strength and courage to Godless assassins of character and soul took both of us to the point of calling an Ehud or Vladimir with the hopes the taking us on face made sense again.

Facts and the legacy from those cowardices will not deter Washington and California from holding our top rings. From my stand that the worker left willingly those from Detroit, Chicago and Milwaukee starved and poor want answers other than the lorded smile. When California shines we swim in the wealth of the warm ocean, when we back the cold winds of Washington we suffer.

God bless us all sir.

Dr. W.D. Mostovoy PhD.

Chapter 9

Anyone care for some Kim-Chi

The security of the Korean peninsula remains in question. The North Korean government conducted a nuclear test in October, creating a 200 ton nuclear explosion underground. A second test remains planned. The fact that this weapon remains 2% of the Hiroshima bomb remains a subtle sign of optimism. The U.S.A. and Russia now measure nuclear weapons in Megatons, not tons.

North Korea test fired two above ground missiles in the last year. If you picture a rocket ship above ground with a control tower you would have the missile in your mind. Satellite detection identified two launches in the last year. One traveled over Tokyo, inviting a U.S. destroyer to Japan armed

with cruise missiles. The second landed near Hawaii. The Hawaiian missile attempt proves that Alaska, Seattle, San Francisco and Los Angeles remain targets of North Korea.

In Seoul last week alarms sounded as a test sending commuters to subway tunnels.

Mostovoy, W.D. Fellow The Mosto Institute

Chapter 10
Kingdom

The Cunningly Simple

So Email they say is for the entire world.

The trappings found with victory in war show that spoils regenerate into the rotten decay of the cunningly simple kingdom(CSK). In the CSK the rewards of pastry and post pastry processing paperwork ebb desire for winning involvement in the Good Play Score Points Model.(GP-SP Model). The gift of winning lines through the essence of reductionism led to multi-play point combination written tenets. If Descartes could cogitate for hours and be reduced to the lip "I think therefore I am." His first meditation which many read to find what thinking entails earn respect points for neither thinking nor being in the state of meditation. Taken with the Hobbes Leviathan quick review that "The state of nature leaves only the state of war" can be thought of as eliminating the perceptive human from the state within the state. These conscious beings along with Spinoza who avers "The only reason people obey laws is fear of getting caught" proves what today's world lives with. In Foucault's "Power" it is thought that only way to travel in a world of quick sheet covers is to direct with the will that they do not exist as beings in wind. The deconstructionist movement allows for the priestess and the past poet with the removal of power from the courts. The courts and the judiciary have mocked the rights to life with Orwellian brilliance that may have lived when Jefferson penned it. Citizens, who are Rich and Connected have the right to a life of crime, liberty to steal and the pursuit of someone else's new found happiness.

The land of opportunity lives with the knowledge that we are opportunists. To be in the right place at the right time when an exchange of

diamonds for cash take place in a lightning storm where both parties die would be the only win an opportunist wants. The shame that you lost new diamonds here and the power to place orders far off matters some but not a great deal, after all you have the cash and diamonds. Those that travel the last mile wind up at the finish line refreshed and ready for the camera and microphone. The display that things are fine and well would be for those that also display that things are fine.

The nerve of the American public to cry the academic song leaves many without recourse but to take a gun in invocation of the false dream of justice. No justice, no peace, no pieces the American Worker and the American Executive, both of whom may remember the slang, (Chinese blessing of no satire prevents the impoverished Father Mao from accepting your poison Yea Right)

Chapter 11

Neglect Precedes Cold

Presage the neglect with cold. Post modernist plowing into the human soul to tract a being past the life of the peasant non royal watcher led to the reinvention of the human ideal. The still movement to settle the errors of the degenerate disco wilding with the leveraged buy out full life experienced individual, put the slow still in stealth.

Fame, the ultimate attribute of who detects you deterred from the stealth effort to still the mind that inequalities success end internal growth for the published grand thinking realizes the vision through the mechanisms and tools presently in place at the neglect of those whose recent discoveries showed promise.

Those that cried get off my lawn refuse to here get off my electronic mail and digital satellite television system. To go that last mile the myth of what one asset seller of the land may have done years ago affords the elder incongruity of self loathing ignorant trap baiting. The fatal assumption made years ago that the sire and mother want more for the offspring than they had breaks down at the first introduction of a new positive element to the child based in technology, seen in love and accepted intrinsically by the youth. The game of takeaway begins throughout a non-producing economy and the post-modernist deconstructionist movement continues. Some times you just have to trim the Bushes.

Chapter 12

Ironic Bastards

In Seattle where soldier hate here goes back to the 1997 Phish concert, the pop your pistol green meenie lives over there some where.

Caring is a funny thing. No war will come little missie, I just saw some CNN for the election and someone kept telling me some guy had a lot of bombs, missiles and evil biological weapons so care, yea those CNN guys look so serious sometimes. Call Wolf Blitzer caring, I dare you Conrads Bastards (War is heck)

Soldiers that fight in war want you to care about the war. After all they say the ultimate price might be required at any moment. Secret wars go on all the time in the world. The great war provides those who wish to settle scores for large sums the opportunity to point to official government policy on allies and adversaries. Those folks that train to fly fast and shoot straight and live on a hair trigger relish the opportunity to fight with the finest minds machinery. Those that create machines and software live at the mercy of the unbeatables for the most part as order and discipline and a living nicety assumption of functionality between humans creates the tank, helicopter, missile and airplane. The legitimate handoffs in engineering afford us respectable lives and homes. Independent construction led to selfish hogging of resources and the destabilization of community.

The empowering movement enables those that would use the power of one to destroy with immunity the ultimate upper hand. The computer game realization occurred in Japan before the U.S. and as is known the good people of Seattle can answer loyally to the laws of the people of Japan.

To some, including this one, the game was to know a big war occurs, support those whose lives change and applaud the talent show. Talents from all over the world demonstrate what someone finds to be rewarding to participate in and challenge. The Olympic Rings stand as a symbol that the games live to capture the heart of one in any of the multi colored rings. Show some talent with your empowerment.

What's in the Game

On Politics

Those who can make you believe absurdities
can make you commit atrocities.

Voltaire

Author and Philosopher

1694 - 1778

Financial Politics

Soft money, the term for idle wealth controlling government needs explication to everyone. Wealth creation from natural resources mining to manufactured products boosts the portfolios of the upper middle class to the point of controlling the nation. Investments in politicians produce tax breaks which pay back the investment. To elect a president the allies of a party buy development products in districts which need support. Those that accept development dollars accept they must vote a certain way. Government agendas involve the movement of resources and personnel. The southwest, Texas and the new south were all ticketed for growth by the federal government. The current plan is to have Phoenix pass Chicago in population with a projected population of 12 million by 2014. Recruiters from Phoenix paid by soft money, visit college campuses from throughout the nation offer good jobs and affordable housing to resettle in Arizona. Reports show urban blight has been kept to a minimum with the occasional Mexican incursion. Mr. Bush wrestled with the border issue as Governor of Texas and has raised awareness of the drugs and poverty that creep across the border. Atlanta was settled with large companies in the new south with CNN, Coke and Southern Bell. Phoenix recruited Intel along with other high tech firms and now boasts major league sports franchises, a recruitment enticement. What jobs would soft money children accept? They would not do anything

with their hands or minds. They feel typing on a computer is beneath them and that hand work is menial. Some religious leader, soft money political handout specialist or your father presents means and you acquire. Does the title Acquisition Specialist ring true for your community, or your family? The labor that crosses over the border to serve and prepare food, piece meal circuit boards and roof houses works for a better life and the arrogant free wheeling snobs have no regard for labor, be it Mexican or American Union. The widget assembly line managers have lost humanity and with the experience of European purges had better show regard for Soldiers, labor and government. With the Feds talking of 100,000 border guards this may be a call for an ultimate showdown with Mexicans. Let the manager's fight and work. Labor and Soldiers support legal immigration and effort. The military recruits all over the country to provide the U.S. with the finest soldiers. The volunteer army requires individuals with verve, tenacity and hope. The soldier gets a gun. Harvard sent some officers to take on West Point commanders on the battlefields of Iraq last week. They proudly pin on those shiny silver officer medals without realizing those high price targets get shot. The uniform of an officer in combat has sewn on rank. These clowns confessed to wanting the service men and women played dead forever and were eliminated. If you walk the walk and talk the talk be prepared to fight and die.

The critical minds analysis of that which seekers search for, project vision upon academic sojourners. The human drive to survive led the ancients to store food supplies and heating materials for seasons without food and heat. Beyond survival the power of resources elevated and separated individuals on the earth. Should one defer to a higher power, subsistence and shelter followed. In independent study each individual subscribes to a whom subsists from whom debate. Those who rise through the academic ranks throughout the ages demean labor inputs and religious fallacies of word keeping. In a world of lies the grand lie wins. The will of the weak to survive with powerful weapons led to security cameras and the drugged wine bottle. Those that know to avoid sugar in the coffee with the weak of body survive. The clever togetherness model fails in that all who publicly declare togetherness will be separated in the ultimate calculation of higher power. The lone wolf model of power in declaring unity of pure reason led to the symbolic non-together named identity principle. The look of a candidate matters to the spouse less than the public lover who provides upswing during events.. Those that know reveal most publicly issues and

ideals leave a record the identifier in public may not cogitate correctly with. The elected officials in the past were elected to enact laws and enforce contracts with the state. These ideals of democracy have failed in that the governed follow the mood based electorate command structure. 90% of the congress did not respond that officials legislate laws. Democracy involved separation of powers to insure those that create laws do not interfere with law enforcement. Executive oversight to veto laws and sign them disappears in an ignorant world. You read this column. You wanted to be the best, brightest and smartest. You used cut-throat competition to attain a degree. You believe killing to win creates an advantage to you. After subsistence when God loved America people shared a little slice of heaven. (How trite)

The mid-term election brought some modest change to Washington. The empowered government remains global in resource addition and local in criminal justice and protection policy. The political party that offers relief and living space for those unable to have been born into wealth wins. These lives have character that film and novels celebrate. We provide the work that whisks bags from Limo to aircraft. Arranges for our peanuts and plows the land. Let the votes show that left to our own devices, Democrats believe in the theory that wealth must be wealthy in the knowledge of the basic rights of the republic. Those rights defined include life, liberty and the pursuit of happiness. The Chinese kill dissenters. The Europeans kill those financial pursuers and aberrant who believe in sneak, take and not God. The democratic experiment goes on. God Bless America.

The various statements made about old government showed the lost world found youth. The new world order created new government. Apple Computer Party and Microsoft Computer Party have a voice with the remaining voices being represented by the Major Studios.

Bill - NBC Party says Cool Cable and Food for thought beget food for groceries. CNN -News Fools do war. Meet the new boss, same as the old boss. GO KIDS GO. Republican lives remain replaceable. Each Republican does things exactly the same. If each person does things the same they have already died. God Rest Republican souls. Brown nose American Scum with false blue noses placed on false blue blood imports ended American Justice. That you might interject care. The response from these cats is KILL this pen. They do not care.

They killed peaceful lives and they will kill you.

Women fought for sexual liberation in the 1960's and 1970's. 1967 the summer of love and the Woodstock festival produced many love children as well as single mothers fighting for rights to earn a living for their kind loving children. The war in Southeast Asia ended and the power love created by these pioneers opened the door for women politicians and business leaders. From early leaders in India (India Ghandi) and England (Margaret Thatcher) the world took note with Germany electing Esther Merkel president. The macho South Americans got on board with Michelle Bachelet. The senate boasts many more women senators than ever before, Clinton, Boxer, Feinstein, Snowe stand out and the house has slated women in many districts including Melissa Bean and Tammy Duckworth a helicopter pilot in the military. The equal pay for equal work numbers have narrowed with the 59 cents on the dollar pushing to over 73 cents on the dollar. Women CEO's lead Hewlett-Packard and Xerox. The law schools and business schools boast even numbers of men and women. The advances in genetic engineering and embryo production afford women the luxury of having the biology that formerly required similar concert taste to meet. The catalog babies with embryo support report health, happiness and kindness. If you go by the book women leaders provide the cleanest life money can buy. Sympathy for outliers shows an unenlightened view. Women need the male conscience in today's world. If a woman shows compassion she loses her inner grip on power. Unbending and unwavering leaders the male world falls into question. Men who do not fit are called road kill. It no longer is an issue of equality; it is an issue of dominance.

The production possibility curve economically of a nation dictates how much can be produced at what cost. Differing hearts have differing wants. The invisible hand of Adam Smith's market economy led to the lowest cost maximized utility that evolved into the knowledge age globalization tax, tariff and subsidized world of National Socialism. National Socialism dictates how to feed the needs of every individual in the socialist economy. The wealthiest individuals control the employment and actions of those less fortunate. The United States went to National Socialism in 1979 and has never looked back. Deals and negotiations with Auto, Steel and Oil Producing nations left the nation with no choice but to sell off capitalist assets internationally. Local police paid on call have been used to a great degree to cease individual development on things such as cars and

electronics. The permission to enter or leave any particular NAZI zone depends on road command which authorizes or deauthorizes a vehicle from a designated National Socialist Leaders home. The car is then pulled over and depending on the computer file on the individual he or she reports to the mental hospital for reprogramming or jail for an ideological crime against the state. Stores are assigned on a permit basis, not on actual cash value in a wallet or credit card application. The president acts as the general to the armed forces and collects a tribute from every NAZI tribal lord. Should the tribal lord not pay the tribute pressure comes to bear on what once were the official symbols of freedom, such as the post office, telephone and police station. America, in her protection against crazed veterans of Southeast Asia, colored herself to well in the ideologies we all fought with. This wasn't cold Bill plays Scategories, We all play Scategories, He just wrote Bill for home scat advantage Create a Pie Chart for your world as you see it. This should work locally and globally. Begin by assigning a percentage of persons involved in each scategory. Lists in the adventure of life grow economies and the logically self interested non-destructive mind. When pressed by the terrorist, fight and kill push the scared brain backwards. Select from the following should someone ask what your father does/did for a living. For the record he was important. (The feminist argument runs rampant around the office. If there was no he as an example, she provided the input.) (If your mother did so much say so to other women with D-Cups)

 could have a life.

Do you know women who wish they could change you? Do you know doctors who are willing to help? I had something to eat after a break-in and I felt "funny" I have felt this way before. Last seen in 1993 my stalker shows up with a key and drugs my food, then telephones at all hours of the night and on 200 nights last year paid her private ambulance driver boy friend to sit on my street. She pays folks to walk up and sort of look at

me. She has a recording of love making that enhances their reason for arriving. The pleasure toy sales person uses LSD and Mushrooms liberally in the doping. The fact of the latest comes from an internet source. I do wish she would let me have open lemonade in my home. DRUG CLASS: Central Nervous System Depressants Barbiturates are powerful depressants that slow down the central nervous system (CNS). Classified as sedative/hypnotics, they include amobarbital (e.g. Amytal), pentobarbital (e.g. Nembutal), phenobarbital (e.g. Luminal), secobarbital (e.g. Seconal), and the combination amobarbital-secobarbital (e.g. Tuinal). (Note that where a drug name is capitalized, it is a registered trade name of the manufacturer.) What is discussed in this paper are most of the sedative/hypnotics that are not benzodiazepines. (For a discussion of benzodiazepines, see Facts About Benzodiazepines). Barbiturates and other sedative/hypnotics are medically prescribed to treat sleeplessness, anxiety, and tension, and to help prevent or mitigate epileptic seizures. Certain barbiturates are also used to induce anesthesia for short surgical procedures or at the beginning of longer ones. Because of the risks associated with barbiturate abuse, and because new and safer drugs such as the benzodiazepines are now available, barbiturates are less frequently prescribed than in the past. Nonetheless, they are still available both on prescription and illegally. Besides having therapeutic uses, barbiturates are often used for their pleasurable intoxicating effects. Some people take them in addition to alcohol, or as a substitute. Heavy users of other drugs sometimes turn to them if their usual drugs are not available, or to counteract the effects of large doses of stimulants such as amphetamines or cocaine. Barbiturates are known generally on the street as "downers" or "barbs." Many are named for the colors of their brand name versions - blues or blue heavens (Amytal), yellow jackets (Nembutal), red birds or red devils (Seconal), and rainbows or reds and blues (Tuinal).

The funniest thing happened on the way to the forum. The electronic forum displays full color images and stereo sound. A famous debate between two candidates graded by pollsters showed Mr. Nixon winning a debate from the radio listeners and Mr. Kennedy winning from the TV viewers. Apparently Mr. Nixon had beads of sweat on his upper lip during the debate distracting the man who would lose the 1960 election to President Kennedy becoming image savvy for the 1968 election of said President Nixon. All kinds of tales foretell, the what you get if you elect a Californian or Texan. To elect a Californian you get video processed image and bites of

vision. If you elect a Tex an you elect war. War, the word most likely to cause upheaval in the modern world, changed in the regressive era of the 21st century. What would current regressive politics produce during war? General Motors would lay of 30,000 workers, Intel would lay of 10,000 workers, U.S. Steel would close the Gary Works and enter chapter 11. Ford would not sit as CEO of Ford Motor Company. Academic integrity would be challenged by the non -academic citizens of the world. The scientist would be deemed mad. The reporter would be deemed intrusive and the hair stylist would become the most important judge of your character. In regressive analysis, studies done on compassion showed Blondes rated high. It was impossible for Blondes to have gut hate forever for a race, creed or color. Black hair keeps sacred so many things its insulting to think the American leadership would attempt to segregate by hair color including Jew-Fros and Afros. You will believe regressive policy it's been proven at the forum. Mr. Bush cares more about the image on the front page of him then the text that lambastes him. Marking, a cat custom around the home, now common amongst federal agents shampoos the brains of those that carried every public school textbook America ever assigned. Shumer has those books upstairs, so does Levin. It fits about the story and what's inside the country can continue. If not may Spike help you in this Tom and Jerry farce. In the end the game was to go to white hair. It still means something Kitty. Three letter words form the foundation of language in English. The intelligent seeking educated, attempt to add letters to the brief expressions to add color to an otherwise drab human experience. The colorful life sought through dress, and public drama, in person or on television require a verbosity to match the divined colors presented to us. Philosophically we seek expressions to encapsulate complex sentences that define our experience.

The words defined by great texts have meaning to the learned and provide color and topics for life. Two words found linked together can define a new philosophy, Teleological Solipsism. When you work through your teleology with regards to the self contained approach of solipsism you will know a truth. tel -e-ol-o-gy/t?l i'?l ? d?i, ?ti li -/ Pronunciation Key - Show Spelled Pronunciation[tel -ee-ol-uh-jee, tee -lee-] Pronunciation Key - Show IPA Pronunciation noun Philosophy 1. the doctrine that final causes exist. 2. the study of the evidences of design or purpose in nature. 3. such design or purpose. 4. the belief that purpose and design are a part of or are apparent in nature. 5. (in vitalist philosophy) the doctrine that phenomena

are guided not only by mechanical forces but that they also move toward certain goals of self-realization. sol-*ip-sism*/'s?l ?p?s?z ?m/ Pronunciation Key - Show Spelled Pronunciation[sol -ip-siz-uh m] Pronunciation Key - Show IPA Pronunciation noun 1. Philosophy. The theory that only the self exists, or can be proved to exist. 2. extreme preoccupation with and indulgence of one's feelings, desires, etc.; egoistic self-absorption. What did the teleologist know and when did he know it. Did the solipsism show that the lesser needs more or has more to express the teleology with him? The quick brown fox continues to work in the White House, seeking the best three letter phrases. The man ran. The man got top hat. The top dog can win. Enjoy the dialog, with the four letter words included for this reporter. Can you tell the author feels the country fights on? Nachman on Nachman assures the world MRE's (Meals Ready To Eat are the envy of the non-cooking set) The dog tag worn by soldiers needs to change. USB memory sticks look to be the size of an identity tag worn by soldiers. Each USB memory stick contains 2GB of information. The stick will contain medical records and contact information. Last word logs and the likes of the daily life of the modern warrior will be contained for the family. Portable devices at the base will be used for recording personal stories of war. Remember what happened to you. People are our greatest resource. Make the computer serve the master. Drive defensively, buy a tank. First pass Lazy Way A few words about the everlasting summer across the border pluralize our minds. Border Patrol Border crossings to Mexico now go both ways. The North American Free Trade Agreement sent manufacturing jobs and funds south. New found wealth provided an opportunity for many Mexican migrants to move north. The city of Tijuana residents formerly a tough rambunctious bunch have seen many Californians with housing development cash, the town has less poor Mexicans than San Diego and more wealthy California types on the order of Padre great Tony Gwynn. To the far south on the Gulf of California, Cabo San Lucas sits with many a golf course. The low cost and no tax life suits the escaped life from the treadmill the lower 48 have become. On the central isthmus of Mexico many dollar towns have nothing but Americans spending dollars freely. 100,000 Mexicans from one place have a paid permanent vacation in the United States. You laughed at ugly Betty and ugly Bob. You said Mexico was for dummies. Some of these dummies were rich, and with a few days in the sun and a paid for Chiquita to believe in you, they became guapo, (Handsome) When one does not go to school well or pay attention in home life, one is considered to have gone south on something. Texas it is said wants to fill every square inch of scrub

with folks. Mexicans love people so when you go south on work and school, pick up and go and leave those industrial and industrious folks to answer to the Japanese and Germans. You're bumming us out kids. Politicians and Executives set you up and now you are cold to your love. Go back to school and do it because you have peers to identify with. Peers that identify with each other, identify things much more clearly about the world. School forces planning. When you plan you win. Winning means not only having the big screen TV but affording a fine car every two years and gas to put in it. With oil company profits at a record high and gas prices soaring the small creatures plan on their nuts for winter. A nut would be how much you spend each month. If you pay 600/month for your housing and 400/month for food and 300 for transportation, your nut would be 1300. School will provide a way for you to play the game fairly and well and provide a means for you to win your nut. Variable costs like gas mess with the nut calculation. Some people believe government lives solely to change the variable costs. When you have no nut to worry about your nutsy, a phrase meaning a bit crazy or off center about real people. To some a computer and email are a necessity. To others these things show a prurient wasteful society. The Gates foundation built on the back of every computer user has an obligation to all of us. With 60 Billion dollars to spend, the Gates Foundation has chosen in a fine fashion to work on disease abatement. A fine goal, yet the ultimate end of scientists spending the 60 billion for individuals to make more poor uneducated healthy people may end our way of life. The fund must donate network clusters to every country on earth as a public education tool. Everyone who benefits from the fund should have an attempt at the question, "Why are you."

As a lad, the fellows and I used to bat the ball around discussing the local ball teams and the chances for the post season. As the national pastime and a time when little leaguers from Japan and the U.S. square off for the Little League World Series championship our club makes the following report to major league baseball. As this reporter boldly declared during a sandlot game that I was the commissioner of baseball and what I say goes, the others who were happy at all someone motivated the bats and gloves that day added the contingency that when the day comes for a major change they be notified. The wild card barely made it through and the adding of the third division drove many away from the box score. A fine time at the yard with the most civil ball players and fans proved enough for all. With fighting in the world why would a pitcher want to strike out an opposing star in a home

game and detract from the game? It is said Babe Ruth told the opposing pitcher, "Throw me a good one and we will all have fun." The opposing pitcher did get to take that early shower from the Yankees bats but in this reporters opinions it was the Babe who had the fun. Stars abound and competition it was said brought out ones best. To have a wild card one following one division of the six is never quite sure how the race is going until the end. As discussed with a quorum, the staff votes for the American League East and West, The National League East and West with the first place team at the All-Star break winning a birth in the playoffs. In the subsequent half the option of clean slate needs to be voted on or to continue with existing records for the second half champ. In present day no one seems to know if the Twins, White Sox and Red Sox are competing for the wild card or just having some fun at the yard. Double the pennant races, with enthusiasm and ease to follow and gosh darn it why cant one run away and hide or have a team eye balling the top team, so that self evaluation and improvement can take place in regards to the opposition. An opposing team may be an adversary, a lesson for modern negotiation. The truth still remains that it is still baseball and we can all get along. Having had both, winning tops losing every time. (Now who is out of left field?)

The United States develops land carefully when populations exceed capacity for existing cities. Areas in the Northeast held opportunity in the nineteen seventies. New York had crime and overpopulation. Many suggested upstate and the capital Albany. The country expanded during 1976-1980 opening Atlanta and the new south with the southwest as advances in power generation and food distribution could keep people and food cold longer. Those that were aware of things other then Twiggy and Elvis in 1970's knew the population would double by the year 2000 and that modern networking would be required. At the turn of the century the population center shifted to west of the Mississippi for the first time to Little Rock Arkansas. A resounding success story of a place Maricopa Arizona reached my ears and eyes today. With a projected population of 100,000 by 2010 and managed crop management the wide open spaces have civilization of escaped Californians. The quality of life for those that would read, work and watch television with nationally advertised products in the home remain high. Good luck to the settlers. From out of the ashes of terrorism a Phoenix rises.

Cities provide opportunity for those without farms to make a living. Sitting on the end of the wire provided growth for the major industries of the U.S. New York in the early twentieth century created an economy in the Stock Market for thousands of traders and brokers. Los Angeles sits on the end of the wire for Television along with New York. Seattle and the internet boom provided the burgeoning high tech wealth in Seattle. Chicago created an options and mercantile exchange with over one billion transactions daily. The duplication rapidly and lack of copyright enforcement threatens the urban centers profit. The service economies of each major area thrive on the major player. Many non wire based cities rely on military funding, or oil wells. Some cities thrive on religious donations (thieving). Some minor cities rely on criminal sprees in the major cities with border crossing escapes costing millions to the legitimate economy. What would be seen as an obscene amount of wealth for a major city actually promotes nation building and distribution of wealth. Outsourcing of brilliant minds created a brain drain in the U.S. but at what cost. Each person in the U.S. has seen the mansion and knows what six, seven and 8 figures will buy you. America now lives with the less is more attitudes towards intelligence and accomplishment. A truer way to defeat the actual brilliant has never been seen. If you think you are smart someone takes away your lover, meal and toilet paper. America loves the little stuff. Computer codes, philosophy and auto parts look much better to those foreign sounding guys. We just love to drive, listen to digital music and play with the toys. Self love has been proven to be the only love. Self searching for brilliant logic remains in our twentieth century past

Time and patience go into the planning of modern products for the home. From the brick and mortar to the basin tub and tile cleaner the fine men and women that create something from the very elements of the earth live the quixotic life of one who would mix and settle many of life's simplicities into the blend we call modern life. The finished products safety and durability last in finished form with the assuredness of the agencies and persons who promote safety and acceptability in the modern blended world. In the process of creating self cleaning ovens or news print that does not smear on your hands the scientists and engineers employ the elements in various ways with residual toxins that must be handled and processed safely. Without vigilance in production and security of the compounds and elements, the uneducated inevitably ruin the water supply killing human and natural wild life.

The world loves coffee. The coffee cup and saucer could be found world wide with the insulated finger hole, often with a friend to fill the cup to the rim. Starbucks led the way in producing the finest paper cups, with the finest lids ever invented. The sleeve around the outside added a touch, which those Styrofoam cups could never match. Should Starbucks paint cups? Should society create paint to paint the cups? The natural world and the synthetic world work well when those that create the products that the society uses comprehends that Chemistry enhances life and can also kill you. Toxic benzene in a water supply will kill a population as recently happened in China. The U.S.A created the finest Physicists and Chemists to win the second Great War. Those that appeared to lose the war devoted themselves to the study of the sciences at all costs. The Ivy League in the U.S.A became wealthy on the backs of Asia and Europe and actively pursue the defeat of science. Buy them a Latte in a paper cup for me.

Everyone in the world eats something. The world makes a point of telling reporters things like you should avoid calories from fat and that salad dressing packs on the pounds. Some folks tell you carbohydrates create bulk on a body that should be avoided. Some people tell you red meat shows cruelty to animals and that such individuals should be watched closely. Other individuals believe in the mental aspects of food. The if then shopper that follows the donut and coffee reporters, adds the following 1. Fish will make you religious. 2. Meat will provide mental points and no love 3. Chicken will give you chicken legs and a large upper body. 4. Beans will give you beans to sound off with 5. Dairy will bring cows and large bosoms to you. 6. Salad greens make you go. 7. Pie makes you fat 8. Ice Cream eaten by blanc individuals may not have Chocolate or Hot Fudge added as it spoils the white 9. Coffee may not be had by blondes in that it darkens your hair. 10. Tofu is tofu, not much you can say but stir fry it in Sesame Oil. Note to you if then shoppers, I love the good Hostess product. On the interview on Sunday mornings I believe these folks have eaten steak with the eggs whilst discussing a quiche and latte populace viewing on flat screen. Knowing what someone eats has always been an advantage in negotiation. Reports out of Israel suggest the negotiating team drinks Starbucks for one week before attending Washington meetings to stay current on the fast track world. Those good eggs do enjoy discussing the world. I'll take my Quiche Lorraine.

Essay: "The Step Down Transformer" Teaching Steps The Light /| \ / | \
 Hope Interplay Emotions Science Science Art Art Truth Play Truth Dance
 Dance Repeatable Truth (The Earth)] To soon old to late smart. A man from
 Germany once said those that forget the past are doomed to repeat it. A man
 from London once said. Do it again a man from the United States once said.
 The memories of a man in his old age are the deeds of man in his prime, a
 man from Pink Floyd once said. Generals and Major s aren't Happy unless
 they have there war. Repeatable Truth such as planting a seed in soil grows
 a plant is not science. It is known as observation. Observation with logic and
 reason allow us to say that plants grow from seeds. The earth is observable.
 Within reason all individuals that see the object that is round and buried
 produces plants let the scientist find those seed objects that produce
 differing sorts of plants. In a world where the sun rises, the scientist defines
 east west and earth wobble. The assumptive nature of seeing, color and
 description occur during the steps within the unit one finds oneself. The
 birth family unit and society define the step traversal. In a world of
 academics each childhood steps through dance and movement, theoretical
 truths, hypothetical truths, the manner and occurrence of expression of such
 truths and the coined acceptance of phrases and manners of custom for the
 unit pulse upward to light and the teaching steps back through the science of
 education and self examination back to the earth and the planting of new
 seeds while regaling in the science art dance and repeatable truths through
 hope interplay and emotion express the signs and sins of life. It's a cycle of
 life.

So I have this cousin and we have spoken over the years about the
 computer. Robin married Robin and they have written many programs for
 Microsoft. The internet provided means for sharing information in a
 consistent format and computer codes became acceptable topics of
 conversation. Computers once per formed calculations so that the results of
 calculations could be displayed to the scientist and billing manager. Today,
 the management of text and image files provide easy access to non
 mathematical information, including sound and moving pictures. The
 standardization took time and the world of development looks much easier
 then it once was, removing the acceptable token of wisdom that computer
 information storage and retrieval remain in the hands of the few wizards
 who write operating systems programs. The world often asks those involved

in the computer world what those things do for you. The file folder metaphor in windows not only describes operationally where things are on the computer the folder in a file cabinet says as much about who placed it there and how well the information was collected to insert it there. The disconnect of the computer and the business one sits in has blurred to the point where an attorney may no more about the system than a five year pro. Has any attorney worked without the companies boiler plate file in the last five years? The national initiative some 25 years ago was to get the world connected to comprehend national policy on education and global commerce. The deregulation under the Reagan administration led to the globalization of information and banking. The WTO and the World Bank have great impact to aid and assist those countries that can no be monitored electronically. What remains a mystery to some would be the virtual disconnect between what someone on a computer in cold weather would want as opposed to warm. What freedoms one might want in a fractious society and what in an ordered one. New teaching software to learn on a computer is being attempted. People click on things using a mouse when they get a reward. The use of a computer frequently indicates one is rewarded by the experience. On the left of a web page is a list of names, the student clicks on there name and they are rewarded with a welcome. Finding and using the mouse after time becomes second nature and the control of what the user uses remains in the hands of the system administrator. The Robins' as they are called know the rewards. Hopefully they are enjoying the virtual rain in El Camino Island, WA, The HTML Tutor page has some simple HTML that would count for those keeping score as a program written by you in the modern era. In the age of love some remain faithful to a first meet partner. The chalk lined interview technique can simulate a loving encounter without the totally devoted moments loving societies often require. First, firm up your grip. If the subject involves a region and a joke. The grip on the subject should mean the global event most closely involved in the region. Second, turn it over. Repeating what the previous phrase in a new way shows transparency and a callow, shallow feel. Show yourself to be strongly for the subject by adding a fact or revealing the opposing view that two sides exist on every trade Third, slam the opening Fourth, leave no doubt, you were there and not your 30 classmates. Lastly wait on the reply question to opinions. Simulated love with news pellets can get you through the digital world. Also, remember to dress well.

Put yourself in my shoes. I hear atrocities and want to end them quickly.

The stubborn have become so absurd they say, "What is wrong with them."

Mass media make the absurd de-rigueur. The conclusion then follows.

The past comments about Christians need to be retracted. Temptation swayed many. Jesus is the true way. Many of my international readers wonder what the advantage of true living means. If true faith means war, hate and elitism would true and scum mean anything to you. Continue reading.

Atrocities Vent Mode Feedback loop cycle 3.0 beta Bill is the true way. (Tongue in cheek) Get to the point. This is a secret. It is for your eyes only. These facts remain. Let the assumption begin. The author is a great man who is desired physically emotionally and mentally. Let the assumption proceed: That which is desired in these three ways is desired financially. The further assumption tends towards religious failings. Bill is hated for personal reasons having to do with surly behavior and problems with the justice system. His mere breathing offends sensibilities for those decent people who might have to muster disdain.

The financial desire produced the untenable situation: Clouds or Reality: Global terrorism: Reality War between soldiers: Clouds personal vision Hacking: Reality Personal Issues regarding to self and religious approval: No resources imbues Gods ill will towards one all religions fail.

All resources would imply Gods manifestation of power. Does God hate Bill? Does Bill hate God? Given all resources would Bill care about God. Given no resources would God care about Bill

God: Clouds Children: Clouds Housewives: Clouds Service Personnel: Clouds Cops: Reality Federal Agents: Reality Warm Smiles: Clouds Love: Clouds Data: Reality

The goal remains conveyed wellness directly. Who can Bill get to convey wellness in person without a fee?

(My apologies for my sorrows to justify the statement that a man may say things like "I was kicked around a lot by the lost" After the Schezuan Beef for lunch today I began to think of my former life as a Computer Engineer. Great changes have taken place in China since the acquisition of Hong Kong from Britain in 1999. Chinese liberties and the like remain what they always were selective. The plus side of control however show that with will and purpose emulators produce great things. The Samsung corporation

in China created a first rate large screen television complete with a chip set to run it. IBM Personal Computer fabrication takes place exclusively in China. The I-in IBM stands for International. The Chinese effort to produce a microprocessor has been successful with the 16 -Bit 286 now in production. As for connectivity the Chinese have officially sanctioned Mostosoft.com with readers in Beijing and Shandong. The very fact that Chinese Ski parkas and Chinese televisions has reached our shores shows the remarkable nature of openness in discussion and computer interaction. The Asian market for cars and computers, with the will to buy, sell and trade currency bode well for new competitive shows in academics, business and negotiations. When you play no hit China life is better.

Those that forget the past are doomed to repeat it. A man from London once said.

Do it again A man from the United States once said.

The memories of a man in his old age are the deeds of man in his prime, A man from Pink Floyd once said.

Generals and Majors aren't happy unless they have there war.

In today's world, those that want war have war and the rest watch differing television programs running more peaceful blasting games on the computer. The terrorist occasionally strikes the unaffected killing a few thousand a year, but you are reminded the economy remains strong. God took more during hurricane Katrina then some old terrorist did. Acts of God and bad blood Godders working on those Pyong Yangers with there gosh darn firecracker make me wonder where the next stuff shirts will come from. Video game successful model of children precludes the board room and military.

Frankly, the leadership uses both the military and board room. The kids use the programmer, shipper, food preparer and telephone communications staff to defeat the best laid plans. Buy low stay high as a nation. The selling high led to drug use and pornography not opportunity for the rest.

Ben Franklin made many notes on life and living. He kept a schedule with events and notes. The successful columnist does the same. The modern Farmers Almanac trademark still exists. Bill makes notes in the following fashion. Date: Sep 13, Diet: Cereal Bars 2 Chips Hamburgers Potato Chopped Steak Ice Cream RC Cola Events: Column and Statistics updated Plans: Further the computer site www.mostosoft.com Column Mysteries and

Suspicious: College girls who cheated on us, who wanted you or me,
College walk outs and inspections

The collective nature of society leads to conspiracies of good and evil. Local politics shows the group that those that friend the top become paid for their social improvement policies. The local watchdog groups patrol fiercely as to where the bacon is hidden. The federal government has designs on your doll ars as well and pork barrel projects build roads in the desert southwest to secret space alien centers and biospheres. The city never was a wasteland. The desert was a wasteland and has names like Death Valley and the badlands.

The government wants to settle desert sands now with high tech solar power and buried electrical generation. The folks in the desert lay waste to city life with one click on a computer mouse channeling wired transferred government monies to stop degenerate clubbing, art fa iring and street miming. Art and culture developed in the city along with the ability to get along fairly with law and order. In the desert the biggest pistol wins.

With the border guard up on the Mexican border and great wealth being funneled to this part of the world, the question of soldiering, patrolling and manufacturing rear their enterprising heads collectively. Theoretically the artist can not separate him or herself from the land and the people that afforded the higher life. Investigating someone as being to European for studying Nietzsche, Picasso or Descartes leads to wonder what the future holds for a land blessed with one button solutions.

Pork barrel projects did make for easy lives. At least the local politicians were kept honest every election cycle. These federal loons show accountability to the cockroaches and rattlesnakes only. Soldiers should think twice before surrendering loyalty to some sack the city build it and they will come warriors.

Several approaches to conflict have proven effective. We have the approach-
approach method, the approach avoidance and the avoidance
avoidance. What the modern philosophical youth must address would be
how sneaky one is in attaining an ultimate end.

We live in a passive society. Our leaders by in large set the tone and we watch the forms and monitors for information from above. At home we have choices on television but the programs wear well to the masses.

The real issue facing our children today would be how far to carry the load and whether going only the last mile would be acceptable to our aim of life. If a group of people create and manage something and the children pirate and steal we negate years of credit from above. Inventions and patents carry royalty agreements which are enforceable only if a society values intellectual property.

A pharmaceutical company may spend a fortune developing a drug which costs .50 cents a pill. Should the overseas manufacturer pay the company for the development effort? As of this writing China makes a popular drug called Viagra which is patented by Pfizer a U.S. manufacturer. It is taught that the purpose of government is to enforce contracts. Should one country protect its clever over the needs of the world economy?

In deed the world does belong to the clever. The world also belongs to the well. Lets give credit where credit is due, (and cash too) because it is the right thing to do to stimulate creative product development. The rhetorical question would be, "If someone else profits from an invention, does motivation for inventiveness cease?" Two maxims remain in world business.

1. People are our greatest resource.
2. Failure is not an option. "Yes we can do that."

As a long time reader and a small fish in this county I wanted to make a life here and resist both oceans. Temptations abound in this world for the other guy. I had a family with a death in it which brought squabbles as to whose cash it was. The neighbors decided it was there's and stole a file box with account money none of us had access to. Extortionists were everywhere trying to dope and steal from relatively decent people.

Long and the short of it, someone said throw the guy into county. I did and the story of the dupe goes on.

True Stuff about the Columnist:

I am Bill. Ahmed punched me so hard until I knew if this next punch he threw would crush my skull on the cement wall.

I am Bill. Thielen hit me so hard in the face and stomped on my foot so hard I knew guards and police beat you up and kill you.

I am Bill. Newell hit me so hard in the face my Tooth punched threw my upper lip

I am Bill. Nelson attacked my lunch face by striking me violently in the face.

I am Bill. I have been injected on rumors of being cold, strip search ed by an army of cold diggers intent on being cold for racially smart oppression

Edge the river at rivers edge waters lap.

The sunset of man begins. I am Bill. The muggers' target; he mugger threw me down in red.

I am Bill. The story tellers target. I am Bill. The politicians' target breathes.

I am Bill. The imposters stole my cash.

I am Bill. My food makes me dizzy and my head spins, as if Cocaine and Phenobarbital live within it.

Once you are hit by poor your rich associates need kill you with suicide

I am Bill. I love freedom. I am Bill. I only trust no-one even my mind.

Bill wrote a poem for the fallen and fighting.

The Soldiers March

Ides

First tongue upon the morrow,

Taste the bitter wine of sorrow.

Hope through pain

For ill gotten gain

Let light shine upon the land

Whilst blood spills upon the sand.

Liver spleen and kidney woe

upon the mark the soldiers foe

Through hill and dale

Our long lost son is up for sale

Carry flags and banners high
 For hell bent leather over nigh
 Give and take the evening's rain
 As suffering lost-loves ease in vain
 to struggle forever with the pain
 On top of wonder
 The big guns thunder
 As box of knocks
 Remove blood stained socks
 A great big gift given us
 for we show our father we are bust
 Well enough alone to me
 Escape the milieu to feel free.
 No enjoining for elitist pure
 For catching gist elates for sure
 Concepts given for the show
 Made to many human electrons glow
 Let peaceful vision retreat to somber
 For majestic hope do we encumber.
 Bound to vision not to feel
 We press on and do not heal
 That touch through means of simple glance
 Ends the purpose of our stance
 Let freedom will the gloried flight
 For hope and giving in our light
 Everlasting vision gone
 Hope you have Gods new old song
 -WDM
 Apocalyptic Selfishness
 A time for growing less
 Of more that wasted times allot
 For truer vision we are not.
 Lest ending time
 Show just Mine
 -WDM

Narrative Stream Column: Stylistically two types of humans have developed in regards to trickery. The word trickery implies that some set of

circumstances that produce similar results matter more in the definition of the interposition of events rather than the simplistic approach to behavior.

As an example the sentence, "The person got food and ate", Can be seen in only a rational and normal way. The sentence, "The person walked into the restaurant sat down ordered the lobster meal and left without paying. Can be seen both as trickery of the proprietor and a clever way to get food and eat.

A person has a job and gets paid. Did the person steal money from the company? A standard paycheck was offered and the employee showed to work

The high minded society offers jobs and rewards to entice a world out that has less trickery and the low minded society claims it introduces more.

A low minded person has ideals of self sufficiency and overcoming. A high minded person relies on religion, fate and blessing (of money or the good will of others)

Sermon minded folks speak of morality. Religious minded folks speak of commandments such as "Thou shalt not steal." Should a poor person steal to eat? Should society steal for the poor person? What did those old guys know about commandments? Do people have the right to life? Do people have the right to liberty? Do people have the right to pursue happiness?

The legal folks that jump here have not been reading the news. When your country spends 200 Billion on Operation Iraqi freedom using advanced weapons and your country has the highest murder rate in the world, I can assure you the right to life does not exist. As for liberty, the homeland security department does a fine job but through war we give up more of our liberty to security searches and police intimidation.

Pursuit of happiness has never had much legal basis other then slobs are 10 times more likely to get pulled over by police. Tall men get to play on the team and make higher salaries and punishing minorities with Russian sayings ask you "Who are you to have a good life?"

What basic human rights to you animals have? You have the right to follow orders and marginalize the numbing pain of waiting for that North Korean missile to fall on your head. That Hezbollah terrorist financed by Saudi Oil Money might be willing to commit a suicide attack for his loss of liberty and pursuit of happiness. Loss of rights makes terrorists 100% of the time. Mr. Hussein found a regime change will you?

The subject of worth crops up today. What value does society place on a life? What is anyone worth? An individual has objects. An individual accesses currency. What would the value of that life be over another life? The great homeland security debate goes on as to how to value each individual life.

If you are valued, or have worth, to some segment of the world population you have worth and must be treated as an exception condition which makes you worthless as an average citizen. Average citizens used to have first names and some wallet potential. Homeland security wants to know where the wallet comes from.

The present movement afoot by homeland security is to give people no worth. Housing, clothing and transportation are free to some window dressing job and these almost well bred folks have average nominal lives without being worth one penny. What's a penny the smart ones ask? Do those meaningless pieces of paper affect how one feels. You know the paper people called money in the past. It's not fiction it's the dumbing down active political movement and when I am finished you say OK someone wanted you to read well for a few moments.

We the people in order form a more perfect union, dedicated in freedom conceived in liberty decree that all men shall have the right to life liberty and the pursuit of happiness followed to a point during the age of men. During the reign of M. Mouse Anaheim California the world knows we are with the guidance of Mr. Mouse. Do mice share the rights of life, liberty and the pursuit of happiness? Mickey a mouse if there ever was one enjoys mousing around the houses of those men that believed once that they and they alone had divine right to life, liberty and that happiness thing. Sometimes mice get in your hair, take your liberty and your cheese and leave with you the liberty to chase them with your cat. Women were not mentioned and of course slaves were not fully mentioned until many years after a non Mickey Mouse class orator spoke the written constitution of the Mickey Mouse government supporters. As it happens in a Mickey Mouse way the overlords and masters have run into two types of rodentia. The primary purpose of government was to further government of the governed and second to speak as if the little people could be provided for and taxed. The little people have little rules and play fairly. The encompassing under things feel they could do a better job at everything they just have not been given the chance. In an educated population many encompassing under things are paid to ride busses and insult the well dressed. They are paid to stand in front of stores and beg. They are paid to drive miles to a different

community and scream, "So you think you are better than me. What's the difference between you and me." Simply put the compare and contrast essay that follows from my community does not impress the individual. The all you do is type on a computer message is quite clear. It took a lot of work to get this sloppy ill shod body here to insult your inner peace individual. All you do is make decisions that anyone who does real work could do; you just had the skin and wallet. You would be nothing without your wallet. This guy is clumsy and his women gives it up all over town. Our girls give it up all over town, she must be one of us, yet he still thinks the world is the pristine clean world. Tactics and demeanor of the tallest individual can be met with dumb followed by the forget really what happened, followed by the breaking and entering of a life for making it known that some rich guy ate rich prime rib, looked in a mirror and stole the good will with an education he didn't deserve, that guy didn't deserve it, I did, I am better than him, take his car for a joyride, take his Sony and bring me his cash station card with PIN code. Pay through the air he says, thank you man. I win. Thank you Encompassing Under thing, same time next week

All works fictional.

Top Game

Dedicated to the leaders who risk it all.

Introduction:

Welcome to the top game. Each place and locale presents an opportunity to star with the set presented. To some Friday night football and basketball provide the star glory. In other places academic prizes lead the way. Politicians used to be known as ugly stars. Today each politician hones those threads and smiles and egos as well as mistress follow along to the big house. The author starred young and someone from the quiet place sent my records to Harvard. Cringing a bit, the acceptance letter was thrown away and the author chided and berated by the community for running from stardom found himself observed for twenty years as to find out what rejected the "best" university here.

What follows shows through war and peace, the man that had requirements to stay the same, played Top Game with a decided disadvantage.

Enjoy the Journey.

Chapter 1

The Rules

_____ The Masten Rules! _____

The definition of crime changes during times of war and crisis. Taking liberties with the law while no one looked in a great land led us to war. Violent crime and the nature of violent crime remain a mystery. The dropping of bombs is not considered a violent crime by George W. Bush's America. The Unabomber however became a notorious felon for merely three of them. The political ends of violence show us the immature nature of both the terrorist and the American. How can we differentiate between the two? The porous borders make for porous laws. For the crime you have committed against the laws of gravity you are sentenced to flight. (Masten remains a character not a present day scamming functional unit)

1. Genteel law.
2. Honor amongst thieves law.
3. Physical laws.
4. Television law.
5. International Television law.
6. Where am I law?

People live much longer now than they ever did. To keep a farm moving and a city humming years ago it took a lot of people working very hard. Oh you say founding fathers, I get it now. Ben Franklin a brilliant pen if there ever was one loved to flirt. He knew all the women from Philly to Gay Paree. The French and English were at war in the 1770 block that day so Ben took the Philly crew for a little boat ride to see if red coat George would swim with the fishies. Cornwallis knew. How couldn't he what with Tom Jefferson and Ben Franklin working the weave on Life, Liberty and Pursuit of happiness on the French Coq Au Vin model of Liberty, Fraternity, and Equality the French Dames would give it up and give us some sons.

So yea when food comes up the great chefs of the world set up these empires of fine food import everything set up import export methods and

then the poor people inside, India, Pakistan, Afghanistan, Azerbaijan, Chechnya and Iraq say since America -England-France-Japan-Germany-Holland-Italy are to fat will stuff some 300 calorie pouch together take all the love out of the food chain, call the G8 WTO members fat and set loose the chefs army with meat cleavers. Who cuts the Sushi now Dozhka?

Colors fill the world.

In a world of color each individual selects a favorite as a youth. Aside from pink being for girls and blue being for boys, the colors around us influence the canvas of life we operate in. In the world of Red, things that possess the hot nature appeal passionately. The cool world brought in the Purples and Blues, Reds and Blues make steamy scenes with the Blue often times dripping wondering if the Red would show blue in a post passion scene. Purple college phrasings make Red hot. A Red and a Brown simulate a Purple. Browns put Purples, Blues and Reds in a box. Brown's know whose wood burns. Green knows good. Green often wants to trade with Red and Red often wants to trade with Green and yet they cannot. If you go to Black you play spades and decide when the funeral is. Whites are a canvass that can show the many colors and all to often get stained. Yellow sunny folks often look like chicks and ducks and are never quite sure what happens.

Blue and purple get along well until Black, Brown or Red divides them.

To separate Blue and Purple you need a Red. If the Red gets passionate to a Blue, the Blue needs to express what true feelings live in the Blue. The Purple poems, smiles, distracts or forgets to mention something.

Test your color IQ. Open your closet and see.

Your so hot right now. Melt the snow.
Food fills our stomach

Everyone in the world eats something. The world makes a point of telling reporters things like you should avoid calories from fat and that salad dressing packs on the pounds. Some folks tell you carbohydrates create bulk on a body that should be avoided. Some people tell you red meat

shows cruelty to animals and that such individuals should be watched closely.

Other individuals believe in the mental aspects of food. The if then shopper that follows the donut and coffee reporters, adds the following

1. Fish will make you religious.
2. Meat will provide mental points and no love
3. Chicken will give you chicken legs and a large upper body.
4. Beans will give you beans to sound off with
5. Dairy will bring cows and large bosoms to you.
6. Salad greens make you go.
7. Pie makes you fat
8. Ice Cream eaten by blanc individuals may not have Chocolate or Hot Fudge added as it spoils the while
9. Coffee may not be had by blondes in that it darkens your hair.
10. Tofu is tofu, not much you can say but stir fry it in Sesame Oil

Note to you if then shoppers, I love the good Hostess product.

On, the interview on Sunday mornings I believe these folks have eaten steak with the eggs whilst discussing a quiche and latte populace viewing on flat screen. Knowing what someone eats has always been an advantage in negotiation. Reports out of Israel suggest the negotiating team drinks Starbucks for one week before attending Washington meetings to stay current on the fast track world.

Those good eggs do enjoy discussing the world. I'll take my Quiche Lorraine.

We Speak
Chapter 2

Dear Father,

My name is Bill. Of origins I am not sure. One thing is for sure my days of struggling with making the grade are through. The accent piece of my life, the culture and community we share will not die. You have been a

good friend to me while masquerading as a father. Judy was always my attorney and at seventeen we developed a nice rapport. As you realize, all of our lives changed at that time with her earning her law degree and gaining welcome into the corridors of wealth and power. My loyalty was in question, but so was the both of yours, as well as the sons Dan and Peter. Hindsight is of course twenty -twenty and my love and good sense I feel merit the small share of my adoptive family pie. I ask for nothing more than is on my books. Once one knows and all the cards are played the game changes.

Did you know Bruce Berman plays the date rape drug game?

Anyway, the only way BB and the crew could win after eating the apples of our lives was to have a murderous playoff.

OK If Bill plays Sheldon with both of their heads together they ally and win.

If Bill is drugged Sheldon can be forceful and insane him

If Sheldon is drugged we can get someone inside for financial steals.

To bad about those inventions that work, those people and their integrity believe Bill is the inventor, that's why we took his name out cold.

Sheldon has believed some idiot about designing toilet paper he doesn't know how to do Bill's shit he believes. It's so hysterical how we abuse the two of them. The shmuck Peter is in Sixties Communist fair swim with us. The guy doesn't stand a chance.

The German father of his and his Dutch were cool to us and left him with nothing but love. It wasn't real expensive don't worry about it. The upside we get Mercedes lives. Why mess with these two for real, it will never pay.

The enemy background story follows with the forward then the background. I learned to read by reading captions on the Daily News. The picture was of a man in a funny hat with branches on it creeping forward. He must be the V-i-e-t- C-o-n-g guy in the V-i-e-t-n-a-m war. I was read to but I did not look at the words as they were being read I learned the alphabet and the sound each letter made. My first word was sounded out S -T-O-P what sound does that snaky letter make S, TOP I new from directions and stuff. So I read every sign in the big city.

When I got to the word WAR I new somehow that these three letters were easily pronounced and that I am not supposed to be here if there is a war. I had not been exposed to any religious training as I was 3 years old and living on Anthony Avenue.

Childhood panic is a funny thing. In today's world I would have been called a name with illness. I new the heavy Chevy from the sound it made cruising up and down our block. I would think about the boys with the fishing poles looking for fish on lake Michigan. This excited me that fish lived next door but the family hated these men for being lazy and I new that rules about life would be strange.

War and not respecting the fishermen sat wrong with me and I knew I would have a lifetime to figure out these people. The funny thing about this is that almost all of the neighbors (in my head) agreed with me.

I certainly remember photo day as my father proudly walks in with a new Nikon single lens reflex camera in the new 35mm format. He said to his wife, grab Peter lets go out for some pictures. As I could speak I spoke and said how about me.

He responded stay there. As it was a nice day I knew something was up and had a long talk with God about it. Almost every day I would sit wondering if I could play some local radio on the old Fisher or was it Zenith, (still can't give it out you might catch our frequency) wondering weather it played anything but classical music.

What changes with money?

- 1) Love becomes important.
- 2) Relationships and time can be goaled
- 3) The future holds promise

The Rabbi paused and the chorus murmured.

Betrayal for a film or in a film is still betrayal.

*** Type *** *** Hot Love***

"Laurie" a small child pleasing self satisfied self serving rule based wealthy hedonist relies

on Academic strength of others to condescend and patronize those who haven't stolen great wealth. An Electra victor she sells herself into slavery and calls herself master. The Slave and Master psycho-sexual game excites her whilist conventional love making diminishes her will to power.

This elite bisexual relies on command form on the guise that command from guileful love produces a purer form of love poison then steady growth.

Steady growth and building of trust and understanding failed to excite this clever child.

Paper products for personal hygiene have become a phallic symbol to this PE leader. (TP)

She met a man who needed to analyze the higher echelons of American wealth. This Mercedes driver bought a video crew and filmed 6 rehearsals before inviting a real cast of wedding guests. So the rehearsal was a ruse to get this gorgeous female into believing she just packed the crowd at the events, when in actuality she herself found herself in the enviable position of being a bride. For six rehearsals he paid her dutifully with comments that as a gorgeous female she needed to be at the rehearsal for the eventual bride and groom.

As I know this Mercedes and she is a site viewer she grew interested in my pen. The fellow laughs and calls our mutual freinds claiming she cheats on him all the time and that I am responsible for stealing his wife. One day she will realize she really is married and the ring, marital bed new Mercedes and fine house really do mean your married.

Love

(Congratulations

Jeff and Laurie Blumenthal)

When a struggling actor has a bankruptcy he gets the call to play compromised characters or villains in every film. Torture of a man who does not already have unlimited means is quite common. Make the life expensive in terms of clothes, cars and living and soon those paychecks any paychecks in film are a necessity. Kill his so lo means kill his integrity and ability to have a blessed life. Shove your financial ruin and idea thievery right where they came from.

What are the reasons to live? There aren't any. Is life the absence of death? Does the will to kill others that have life win in all situations? Yes. How did you screw up your kids? Logic and reason dictate the enemy must die to justify your enemyship with him. Hitting the cheek of someone who keeps offering you the other must be your enemy. Jesus of Nazareth had many enemies or was it Jesus of Bethlehem. Obvious ID checks at the Inn with no sponsor in town shaft her down by the river.

Obvious knock up situation with stolen Jew cold testes.

Who could she tell? Who new? It was the greatest sex of her life

But it was with Rabbi Moses on Yom Kippur, so Mose knows he's got to get this dame out.

Mose is real connected and rich, from side deals on the Kosher Bless set so he buys some

Actors who wanted to play the Three Kings Monty on her, you know make her fee 1 real special for birthing on straw and such so boom this paranoid schizophrenic leads 2000 years of false death and were supposed to keep believing in the big lie. Santa Clause left town on an airplane that hit the pentagon. The Arabs, Jews and Communists wont stand for ignorance in the U.S.A. Christ Worshipers killed God which was in the keeping of the word.

That is all God on earth means, "Keeping the word" What if you said so what? Did you LIE, CHEAT AND STEAL to get word in a court of law. Who needs the U.S.A. God cheating law? Might makes right and every Christian must stand together to decide how they will be lying to get out of death.

I have a heart problem and a mild stroke situation. Hospitals and doctors have as many ways to kill people as lawyers and soldiers. To get death call a doctor or nurse. Doctors and nurses kill people. Who cares about people? No body. People are for running strange experiments on to see if you can remove all of the patient's energy and dollars.

Murder at the hospital, be a part of it. Its not dollar-ectomy its murder
The Rabbi Continued...Many take the fools gold of the car, the house and of electronic upgrades

Fear grips those that protect the pile of gold. Every step may remove the money talks blessing for the random camera. Preventative poison prevents passion. Well developed hell structures objective reason of equality not elimination.

Where is the fire in your life? Smoke provides heat and warmth. Cold Drinks provide solid state events

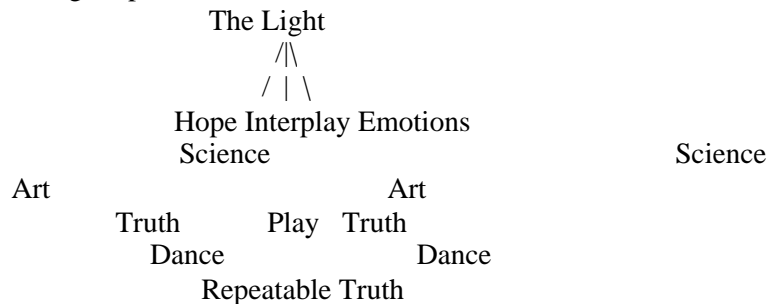

Without the cold, good cold, use smoke for steam. Stoke the blaze. Poke the enemy's nose, Grope your love,

Dope the well and whatever. The symbol and the world of forms combine into the face where facts meet on the stage. Aesthetics and poetics fly foul in the breeze of beasts.

Mazlow can be revisited in terms of modern education. The needs based model pointed out the steps to Self-Actualization, The following model demonstrates the Leader model steps on the left and the play learning model growth path on the right. The science level of life is the highest level

a student may reach before becoming an instructor. Only reproducible results have validity in instructing the science of life. The beginning point may be described in many ways in terms of how the individual sees the Cycle of Life. The Light indicates that we pass knowledge to our children. The earth in relation to repeatable truth represents the soil by which each seed contains DNA of each organism may grow. Assuming fertile soil and need for light and photosynthesis.

Teaching Steps

When the screw faces up indicates the male relaxes and accepts sexuality. If the screw faces down, the male demeans his intellect to feel well with sleep. If the screw faces in the intellect matches and the couple shares the head.

The Dodo meets the winner at the thanksgiving table every year. The Dumb Dodo bird has a function upon meeting a winner in a marriage. With the premise that there are no dumb questions the winner may become a winner. Without the premise the human nature of backsliding into overeating or sleeping that someone functioning as a winner hates moves towards a destroy model of life. Humans that have an educated bird as the readily accepted win, the Dodo displacement method for winner establishes the knock on the head. The your just this mentality assures a human tone to the brain in question. The characterization method is not a Dodo trait. It involves not any process a Dodo would know that you are just a pig. To a Dodo becomes, "Why did you eat two pieces of pie?"

Bill thought: "I donated sperm in school, there are roughly 10,000 active sperm in one donation, I was told the results showed I had high motility. And so it goes for old W.D. as the Big Chicken from the W.B says. What happens when you make old guys important. The enemies list comes up The Groups that Never Cease

I have been balded and youthed the tortured soul began. Emory wants to kill the colleges.

I have held gangs he began; TASSEL Ivy covered self righteous egotistical I'll beat that guy at any cost. No guy that walked around in that did that or (made out with that) deserves my love, respect or attention. 30 Solid Lifelong enemies with cash curse my name. Genetics Research begins with my sperm donations The leader Bruce Aaron Berman counts chickens.

The West Quad Religious drinkers opined; Who cares mostly. Cederna's Marquette South Quad connection made a Northern Michigan army of Children to compete with Colonel Welton's daughter who got sperm donations from Rachel Gladney. D.Greenberg 600 H-F kids with my kids. Northern 600 kids. Weltons Army Girls Kappa Kappa Gamma Delta Delta Delta and Pi Beta Phi's high class with 600 The Classic Fraternity Rah-Rah Sigma Phi house contradiction pointed to the Engineering and Business Design competition. Most say things like "Love to do it fella's but like Leonardo DiCaprio and Tom Hanks Catch me if you Can" Everyone sure did travel These Chicago Kids Kept Squads Paul Masten squad, Cumberland to Addison and south side too all steward the city. International Kids Everyone knows there alive along with Peter who took some abroad. Corporate Executive Pawns, I can't buy an airline ticket let alone an entire airline or satellite dish or Cable Company. Govenmental tools: The warrior held two sons in Iraq I never wanted to win an election. It was amusing for all of two minutes thinking Mosto was talked about as a president.

The cool criminal model of life developed with the children who saw the lid blow off of Washington in the sixties and seventies. I said what's cool about it and forgot...until right there where gut...nonsense...Lisa Kudrow and I cannot speak, you remember her from Friends because I must devil the world to protect my loving bride.

Do you have any children? What makes them my children? End of discussion. They are not my children we all have a bastard in our lives let mine be yours. The tortured decision maker in the years following the new millennium created Torture Cells in seeking, sleeper cells for the next terrorist acts. Terrorists operate on other terrorists to produce methods for killing individuals who make decisions that change life.

SADAM HUSSEIN THE LEADER OF IRAQ PAID WITH OIL
MONEY TO WEALTH AMERICAS DEVILS.

The Bullet File: Used on Mr. William D. Mostovoy

When introducing me for my Oscar say it in tone like Jeff Bridges

1) If SINNING (Smoking, Drinking) Fire Auto -Focus like the camera auto focus, that's a laser, we upped the voltage so h e will have lots of pain every time you train or focus on something

2) If NOT Auto focus on hair or ass to create pain for sin

3) If NOT Religiously doing something. Fire autofocus off and on on the stomach so the temp and voltage make him crap

4) Ring the telephone or the cell phone to distract a speech or though.

5) Send children of strange origin in the hall

6) Have strange language shouted in or around his door

7) Send your ambulance driver friend to turn sirens on

8) Wake at 4:30 AM or whenever you feel like torturing him

9) Steal every penny from his account by autofocusing on clothing and account which will prove he can pay his bills

10) Cell phone in ceiling with speaker on all the time to threaten him.

This ESP enhancer makes us millions.

11) Send real police to throw him into walls if he calls anyone.

12) Subject him to unlawful search and seizure if he phones the police or tells anyone

13) Threaten to kill everyone he ever new if he doesn't pay

States that have recruited me fail to realize the protection rackets have strangled this reporter. Denial of phone, email, mail banking, travel, recorded video and live television prevent me from doing business. The computer folks put a EOT on my social security number and homeland security follows the computer exactly with this reporter.

In 1967 the Robert Kennedy assassinated evoked vivid intellectual self realization that if one life matters to the enemy, the life can be taken without reprisal. The serious tone of the Dr. King thing the same year created a premature aging of wisdom in the youth with the minds eye that intellect and reason make sense only when coupled with a preservation mentality.. A

fully formed adult, many actually asked me, not the fish hater a bout life and how to live in such a world. The value of keeping not only tone but complete context and threaded speech I learned ebbed with the tide on the fishermen and that through order and quality speech one could keep on with life.

About the every d ay thing, I showed aptitude as I have suggested but my Father became not my father when he would walk in see a fully formed three year old and say “Where is Peter?”

That does not seem so bad in a world where children were routinely beaten and punished for speaking. Children were to be seen and not heard so I accepted it. The good feeling the family shared was there but when a child realizes he is not with his blood, he does not learn that the father is not feared friend, just another man with a job and t he mother is attracted for some strange reason to this slob.

To sit in judgment shows poor taste and poor form. The Rabbi I came to meet later in life stresses balance the sins and the virtues. I always remember the sins before the virtues.

Facts:

You were fed

You were housed

You drove cars

You went to school

On top of this your advanced degree was encouraged by the family.

These 18 years I remember as good. It’s quite simple to delve into something and I pity those that have exact memories of yo uth. I can prove I was there. I can sing the melody but the heart was evolve into a better world and not lock yourself into a time that comes only once in a life. Discovery that life could cease and that men could walk on the moon was suddenly ours to have. Japan seemed closer then it ever was. China no longer meant those few settlers who brought hope for a better life and tasty egg rolls.

Ignoring a problem seemed to be our dysfunctional along with acting happy. Ignoring the unhappy and stressing t he non-issue issue led to our suburb.

FLASH RAPE ON ANTHONY AVENUE EVERYONE RUN TO
THE SUBURBS

I forgot everything I ever new in that plowed under patch. Dirt clods
and daddy long legs

were much more important than heavy Chevy's and fish catching scammers. Science would lead us to fresh fish every day and clean efficient lives.

Man on the moon calculators and tang, the three things I remember most about the space program, lead me to believe you can powder orange stuff and sell it as juice. Choi ces became absolutely the watchword for every aspect of life from the table to the garage. Should something be used up make more with better features? Go big or go home showed American muscle was on the move. Carrying stuff was still a big job and muscles weren't just for pointless car lifting competitions on television. Some men got into Bar fights to show how tough they are. Washing and cleaning didn't always happen with these Bar fighting, drunk wife abusing, and loading dock workers. After the rapes they made unwanted kids who went off to join the navy or the marine corps to fight in the Gulf of Tonkin wherever that was. Some important man was playing dominoes with China and need some big guys to knock them down to make those funny shapes.

Anyway, 67,000 dead unwanted loading dock working kids and a few good men wound up on the wall and I felt sad.

God Bless America

During the depression the smart immigrant family that arrived in 1908 grew into a fine couple by 1933. In 1933 the country did not have a lot of surplus cash. The government did not print a lot and the workers had to struggle for a living. Those that counted cash and mouths to feed did not produce children. The promiscuity of the baseball star Joe Jackson led to many a little Jackson in the city. Joe had a big contract with the Sox and was paid handsomely through the 1919 series. The gamblers cleaned up and he was set for life. Joe shows up at Mike and Sylvia's house and says here is your son. Mike runs a business across from the park and knows how to tough. However both Joe's persuasiveness, and his wife's insistence that children are a blessing brought young Jon Jackson to Mike and Sylvia Mostovoy. Joe came over and Syl cooked for him. As ball players are he always had a hello and thank you ma'am for Mrs. M. Mike had a brother George and his son Sheldon was to be known as big Sheldon so that Mike and Syl could stealth their new son John. So at this point John and Sheldon are the same. If anyone asks Sheldon is with his uncle. People would have asked who is making another Mostovoy in this crazy world.

So Joe gives Sheldon some advice. Don't ever swing a baseball bat it will get in your blood kid. Years later at the company softball came the engineer who always said no to sports because Joe would have made him a son and ridden him out of the security of a businessmen's life into the road, not an easy life. This guy got up and hit it 400 feet and trotted home. The adulation of the homer propelled him to first tier.

So Sheldon hates you by asking for your love. With power he has killed every decent love bird with the degradation of nobility, virtue and truth. He finds no advantage in it. You see Jackson's are the king of common without question. All the other names have some bit of love for loves who place love at the top of the game.

Jacksons don't make new ideas. Jackson's take ideas and concepts that work and make them better and their own forever. If Joe saw someone hit a pitchers pitch somewhere, he could hit that pitch every time. Then he suggests to the first hitter, pull that pitch next time, thereby riding the other player off the fact he hit the pitchers good pitch.

You see Jackson's can't be beat. If they lose one game to someone, the tactics then are reversed and with the flourish so that's the game proceed to attack with the method that defeated them. Phil Jackson of the Lakers and Bulls had some success here.

So the President Andy Jackson opened the White House for a party during his inauguration. Then he proceeded to take everyones game and play it nation wide. The loose folks thought Andy was loose, he wasn't he was cunning to find out the American names that support Jackson. He then amasses the fortune of each supporter and it becomes a code for Jackson life. Once you see life as a president things change for you. If you see a mall and highway as yours you win. If you see every door in the world as yours you win. The value of others possessions ceases to matter to you.

So what makes the presidential name the king of common. The request of a commoner to a noble to bless a home seems natural to a devined monarch. A king of common would think nothing of using the most impoverished home for themselves. The simple basis for the verbs of the body excite Jackson at all levels.

Of course there is a reason folks elect kings of common. Johnson was no better to some, yet during the Johnson administration the Social Security act was passed on others see this as caving in to supporters. He who threatens Jackson lives in fear.

Other names have been elected a William McKinley a William Clinton and as you know Bill's must be earned. The Jackson's and Johnson's throw a good party. If you do not die from the wicked punch Bill saves your life to attend another. I've got my eye on you Jackson's and Johnson's. The peoples house will not be disrespected.

What are you doing in Mr. Lincoln's chair!!!

All wars are personal wars. Dr. Mostovoy never heard of the Iraq war or political war. He went cold to WD with sin.

Dr. Sheldon's Mostovoy's Sins

- 1) Sheldon pays to have a hit man in Milwaukee! (1994).
 - 2) Judys Depends were used to torment her before her death.
 - 3) Viewing Live of NY Apt Cackles a cocaine party for the elder Sheldon to get seed for his children (1995)
 - 4) Underarm Brief Relief(Enters Apt 1995 Does Exercises wipes sweat on clothing.
 - 5) Vehicle Tampering to prevent the escape of WD from the clutches of an evil ex-girlfriend nearly killed WD.
 - 6) Misappropriation of Funds Intl brought an IRS investigation
 - 7) Drugging of items in the refrigerator created hallucinations which put WD in the hospital.
 - 8) Daniel Program of hate ran so that a best brother does not answer the phone
 - 9) The California killer squad he hired showed WD the gun.
 - 10) Lawyer shakedown 11/10/2004 no easy transfer or the threat of violence to an attorney.
 - 11) Command Radiology Experimentation on my body (2004) life expectancy stated to a community that will profit from the exercise.
 - 12) Telephone terrorism with the risk of violence persists.
- Never Again
Means Now!

Unforgivable Acts of a stepfather make one wonder what life is about.

What's in a name?

As a reporter many angry readers yell things into the phone. They begin one of two ways; "Your nothing but a" or "All you are is". Regardless of what each individual thinks you are the fact remains they have figured out you are not there mother and father out to satisfy their every whim. The buying in and marrying of families that build bridges, left the world of the city years ago. The expectation that another life will satisfy the most demanding and pertinent people eludes this reporter coffee sipper.

The enemy report:

Dave Brede Vying for the biggest liar.

Sheldon: Dead but defended by Todd and Buddy

Bruce: Has Lori sucking his wine skin dry Jewishly

Peter: Mixes numbers with concepts poorly to avoid truth. (3 pieces of filth do 3 foul lives for the true nature of the 2 people who really care about you, sentences)

Dan: Now knows his Laura would kill him and puts her pecker on her nose. Laura has a pecker on her knows. Everyone tell Laura about her pecker nose.

I am not your mother.

Get a life.

You guys really have your heritage things worked out.

The list

Sheldon – Gets your best

Peter – Gets pleasure

Dan – Gets the date

Bill – Gets the pill (the cat)

Ed – Its Eds Head

Bob – Gets the con

Tom – Same as bob (ANYTHING BUT REAL TO HER)

Dick – Tom and Bob's best friend a cop

Bruce – Gets Scold

Ted – Gets head. (Smart a***** to Ted, bring you're a game)

Chris – Gets headache

Lou – Gets Chew

George – Gets Porridge (keep eating big guy)

Mike – Gets Son (A special bless)

Terry – Gets Terry (A self)

Harry – Gets Marry

Irv – Gets curves
 John – Gets married
 Jeff – Gets Louis
 Scott – Gets loaded
 Alan – Gets selfish
 Todd -Gets bod (Tell her the a** is fine)
 Walter- Gets halter, he takes the reins.
 Eric- Gets even, even though most people feel he should get elevated.
 Charles- Gets snarls. (Keep it tangled he likes it)
 Larry-Gets scary he does people go weird.
 Mark-Gets this marked for something.
 Dave- Gets slave or none
 Anthony gets anyone. Nobody wanted you Tony but you are cool
 Jim gets beautiful lies
 Andrew gets anus
 Keith gets thief, real stuff they take stuff from you.
 On the ladies side we find.
 Laura – Gets Love, Lonely and Lost
 Lisa – Lips and Love
 Rachel – Reason, Rhyme Roll-Overs
 Janet – Poem and Song
 Cindy brat and prattle
 Debbie – Gets First Try
 Susan – First or Best you decide
 Karen – Gets a friend
 Pam- Gets honey
 Tammy-Gets Gams
 Debbie- first best and only
 Joan- moan
 Nancy not so fancy
 Suzy Queue, one time best time only time
 Betty White

I blame myself: The Jews were called criminals and wondered what that meant. Refer to the penal code and do a cost benefit analysis of crime to financial gain with the insurance calculation on an arrest and prosecution so the game continues. Someone must have yelled you Jewish Criminal around our town.

So Years Later the scoreboard to Kill Bill looks like this. Bill had no hope struggling with corporate life to earn \$600,000 with thinking not his lazy brain way.

The game of life goes on so lets look at what \$1,000,000,000 can do to attack the best one and a gre at man. The best part these guys get others to commit crime for nothing.

(Proven,,No never proven)

...Interruption, interruption please... Please

What changes with money?

- 1) Love becomes important.
- 2) Relationships and time can be goaled
- 3) The future holds promise

How Flossmoor Ate Mostosoft

The Happy Flames Exodus Revenge

America loves the telephone. Everyone keeps phone numbers. Bill's father has a son who is not Bill and traveled abroad and lost his head to the agency. Every person Bill ever knew gets paid to hang up if Bill calls. They get an initial call that his life is worthless compared to the agent Peter, and that they will need a put down. 3000 calls later at \$10,000 per phone number and no -one is home to him. The good, the bad, the ugly and indifferent are not home. For this price, they become slaves of the foreign power accepting cash for each price of their soul they give up. There lives are fine. When you call for your cavalry who comes for you?

Each of these calls gets killed by the foreign power one day with gun or pills the rumor has it as they must keep up to get their payment from the foreign power. What did these folks want to be when they left home for Viet Nam, Korea, Normandy or Iraq?

"Where is ours?" The real workers of society WDM President ask.

The Happy Flame Community (H-F)

Flossmoor average housing costs range upwards of \$400,000 the top Homewood house went for \$300,000 the good people of Flossmoor began assuming payments on each home in Homewood transferring the title to the Flossmoor resident who could cover the tab. After thirty years the Flossmoor residents did not have to pay on their own mortgage so acquiring someones life appealed to them. Flossmoor girls kept the key to each Homewood home and installed security cameras in each room of the

Homewood home. Each home in Homewood has full motion color video in every room including the powder room and shower. The penis examinations and women peeing tapes draw top dollar at the Flossmoor video auctions. The able sexually are sold as pornography stars and the academic stars are copied from through school and then shunned. Should the Homewood resident catch on, 10 internationals man the security camera and the key is handed to the internationals to steal things from the Homewood home. (Bill a 1310 SAT, 29 ACT National Honor Society Member, gifted student couldn't crack the top 10% at H-F)

The paid off B over A goes on; Have a nice day.

The Religious War The Hebrew School Gang.

Success is a journey and life is about the open road here. Knowing Jews well the following profile provides a guide for those perfect lives of those perfect kids who know falling means into bed on a soft pillow fully fed.

I have gone to bed hungry hundreds of times and I have had the indignity of crashing to the floor by a punch 4 times. As for sleeping with a pillow I know the luxury on about 75% of my nights.

Living in an upper middle class suburb of a major city as my Hebrew School Gang would say, the religion and the Temple provided the extra culture that we grew to feel was normal if not pre-natal.

The Hebrew School Gang meets three times a week with the public school time providing a chance to point out there was this other school that each may have seen each other at.

Debbie Greenberg was very smart and hard working. She wanted the grade and went on to college. She wound up Valedictorian at school, yes people that is number one out of 807 people her year. Some college with the color of her nose couldn't contain this minute bundle of energy.

Susie Rosen was very smart and hard working. She wanted the heart and went on to the big state college. She married Brad and they bought bugs and stole a lot of money and enjoy porn and baseball.

Joan Kroll was very smart and married a Rabbi, moved to Canada and can't believe half of the things people had this special blonde believe were true. Singing and smart recognition remain this Torontan's goal

Nancy Kroll, Joan's sister separated by 8 months and the obvious biological daughter of the Kroll's, went south and wound up in Tennessee. She had kids and forgot those formula's that everyone thought were so important

Scott Sagerman was very smart and went to medical school. The Atlanta folks took his Jew. He's Jesus.

Alan Krasner was very smart and went to medical school. Alan married Robin and enjoys his worm. As fate would have it the disease he is likely to contract will be unaffected by the drug he is working on to cure millions of misery.

Larry Kanne was not smart but enjoyed baseball Jewishly through the sporting news. Having married a real Aryan Nazi who would have been no fun to the Hebrew School Gang he occasionally laughs at his good fortune for escaping the Barry Weinstein's of this world.

Bruce Berman was Jewish so doing things other than in a Jewish way would be impossible. Bruce became a Psychologist with a law degree. His U.C.L.A. degree behind him he concerns himself with the academic value of Blues Clues. The patient or payment game continues with him.

Marc Bernstein got his computer degree and made a buck wondering why those that were born into it stayed in it, and those with it upstairs made logic and fantasy with the toys of God and Man. Fantasy with cash led a friend through pain, marriage catharsis and the inevitable logic that the profit, not profligate wisdom or treasure maps sooth the seething anger of harassment.

Doug Fisher became an accountant. Doug had a mother with the good harangue she played around with him and Randi or Sheri or whoever it was until he moved to Mexico to build his exact house where his mother

couldn't catch him with whatever it was a Doug and Randi or Doug and Sheri do in there.

Michelle Kessler became an accountant. The Jews and the Christians fought about who did less at Arthur Andersen until the Enron scandal broke and everyone was fired. She maid babies quickly and hides out from the coon next door.

Barry Weinstein got fat and became the Temple President. The former temple president hired him to eat. He eats when he gets up at 10 at 12 at 3 at 6 and if he hears anything with those big ears late and night. His wife constantly goes to the refrigerator for brisket and bread.

Randy Plusser had a Halloween party I recall and married Barry for his fat. She shops and cooks.

Sheri Moeckler was the most uncoordinated laughing "Miskite" you have ever seen. She would get lost and laugh. I taught her to drive cold. Key, door lock, seat, ignition, turn. She loved me for it.

Sam Gross grew cool

Glen Gutterman attends high holiday services still and is an usher.

My name is Bill Mostovoy I attended college and got a job. After 14 years of the 9-5 a war broke out and I watched it. It was cold. Really, really cold, highway of death cold...1000 air strikes with each 1000 dropping 2000 pound bombs cold. Tanks oil fires and the accidental general taking it all in. The enemy drugs P.O.W's and I am not much of a man because of it.

Many things happened in America in 1976 including the bi-centennial. The most important may have been Charlie's angels, the second may have been attending Bar and Bat Mitzvah's of most of the individuals. Little kids grown sophisticated enjoying a good piece of salmon on some Saturday. The names are parents now and both still enjoy that Salmon and soft pillow life on the week-end.

What does a Hebrew School Gang do?

Homework, history and the hora provide hours of togetherness. Food and celebrations together let everyone (everybody) now each role at a family and familial table.

The ultimate goal of happiness pervade and acting happy through domestic pain of race riots near the store or youth violence or drugs hit all of us.

Jews fearing the Bug of the Internet created the advanced pass through modem internet bbs style web browsing system for activation of instant death. The discussion of death rays will be explored further. The modem calls the server with a web site address accessing a web page on the internet. Detailed passwords for the bbs and encrypted web pages decrypted on the bbs add to the security. Those Nazis, Commies, Americans and Europeans won't know what hit them the Jews and Poles say. A strange alliance the Jews and the Poles yet it works. To take out the bbs the government can cancel the phone bank. However the list of access numbers ranges in the thousands in an AOL or NetZero type fashion.

Every access code password of everyone not on Jewnet is published. The game then becomes to access a life and play it for the "Bill Pay" "Love Pay" and "Military Play:"

This first strike army took the balls of the nation with Japan laughing all the way in killing "Bruce Smith" the alias for a business executive. If you aren't into killer and war you most likely will be considered the "DI" Disposably Ignorant. One click on Jew Net and 300,000 Millionaires ruin every aspect of your life and end many of the rest.

So Bruce Berman gets his website tied into ionization pulse radiations systems (chalk board pointers of High Intensity that have caused heart attacks) and sets up the Kill Bill web site. its something like www.killbill.com Those that find insult in Bill find the password to remotely kill him. Publicly shaming him and his family with malicious lies. Once you are hung in video the world gladly kills you. (Classic Berman - Krasner kills Harold Washington Chicago Mayor and Randy Walker Northwestern Coach)

Peter lived with his father the pHd and used faith with him until the third grade to do math. He could hold himself smartly until Churchil school turned the bug over to Marlene and the Druckers. She terrorized Pete and Don wound up the 1960 Valedictorian from H -F (Hello -F*ck off). While reading Marlene drugged the Bill and told him in the 3rd that he couldn't read any longer. It sounded remarkably like her son Alan. Alan wound up

4th at H-F and entered the MD program at Northwestern right out of H-F. The Dutch government paid them to bug Churchill as Alan and Don are openly Homosexual. The Dutch felt America makes fight and with 200 Million and two cunning hated Jewish homosexuals America would be destroyed.

They hated Sheldon's technology degree and began the process of gayng Bruce with the introduction of a demanding Kareen Abdul Jabar who wanted his BJ from Bruce. Yes Berman had a reason.

Back to the system, it covers the "Subject" live, milling around his lair. The world had George Orwell to write 1984, and Animal Farm. Some Pigs are more equal than others proved true in Orwell's slam on totalitarianism. The Ford Prefect character in 1984 lives in all those that have "Web Sites" to kill them. Upon in home monitoring with the kill subject system neighbors are paid or threatened to go outside for a visual. Does that sound familiar. Unsuspecting legal entities receive official looking emails saying the site must be viewed for national security. Once the profit motive is established, the formerly just Lawyers, Doctors and Judges have been corrupted. The American dream lives on, for some it seems like a nightmare.

Obstruction of Justice

Harold Shablemen of Flossmoor retired to Florida after a career stealing as a lawyer in Chicago. It ought to be a crime this guy used the probate court to fleece unsuspecting patrons of homes in arears. Some folks comb the obituaries for rental apartments, this shark takes every dollar and key the dead party had by impersonating the offspring.

The do not represent list began in the county with anyone who calls on the list makes the lawyer \$10,000 cash no questions for not taking the case. The mayor loved this and paid a cronie to not take any cases in the suburbs, the loop law firms should have the cash. The city decided to pick up the tab on law firm office space suggesting not to take any cases.

Jory Chelin of Des Plaines got the call and panicked. The call goes something like,

"Hello" "What is the case"

"What is this guys life worth" "Better we pay you and save you the work of the trial"

"The guy obviously did something" "We sure do value law in this county"

"Thanks" "Good-Bye"

The obstruction of justice case created by Bruce Berman and Harold Shablemen (Bruce Smith and Bruce Smith Attorneys at law) made 12 lawyers rich by denying W.D. Mostovoy the right to an attorney and his estate.

After getting caught the guy retires to Florida.

So my friends imitate my name and body with Wes Clark and some Americans still don't know German's are Nazis. They make good soldiers. Would anyone care for some German Potato Salad.

How campaign finance worked to wealth the impoverished worker.

General Clark's 82nd kills with the wealthy, hands out fistfuls of cash to supporters for one poster and an appearance at a rally. The family lives in a house that was conquered during the cash takeover phase and doesn't enter the workforce. Jobs are for slaves platform wins and the dumb Japanese to all the work with the bad seeds going into the 82nd to get a gun and come home and shoot for the next election cycle.

So CL calls Rachel and says I'll give you 12,000,000 to kill Bill Mostovoys' life. It cashes from the bank of Hell (Holland) Killing's extra fortunately and I am drugged and beaten up repeatedly for 12 years only on my death Rachel knows she dies so she keeps me barely alive. Since Jews now do diamonds and banking better Holland and Germany have been summarily executed. Aryan Death Squads International a selective breeding to death camp in Northern Germany and Amsterdamm. God Damn the Dutch. You should see the video but gee goldfish do you think they can kill milk. Done lined up in the streets and shot dead. 1000's and 1000's of dead. Not a fantasy murder for the 50 years of breeding Jewish Killers to pay for Mercedes and Bayer life. If your blonde your dead. Turn to your secret station. Sheeit Mettal Verkens ezze ntial to Mercedes continue to

slave. Make the deposit Sol. Everyone speaks some English. Vere is your fight Vater.

Klein enters the office warm as rain getting the fact that he is top cop out of the question. Casually the once warm scientist shares the rigors of cutting off the rope of the intelligentsia in the city for merely being questioned as to a mere 6 figures leaving his control. As computers moved to megabytes his science moves to megalomania. As a man whose systems operate without failure why shouldn't genocide function the same way he wondered. At current airspeeds, 200 passenger airplanes can carry 20,000 folks with 20,000 weapons each armed with 10,000 rounds quickly killing 2,000,000 people in roughly a week. $200 * 10 \text{ a day} * 10 \text{ days} = 20,000$, Guns and Ammo can be picked up cheaply and after 10 days the soldiers are home with the wallet, keys and cash station card of the lowly American sponsored television viewers.

How hard was your life and why should you get to elect some clown who shocks the majority of the world with bunker buster bombs. Sheldon's plan was good I'll give him that, he never expected it to be so welcome by the politicians who hated the other guys enemy.

The politicians stand and point to the ones to shoot, those that don't foolishly believe in war and violence. Figure it out, the children of the greatest generation collected cash while Toyotas, Uzis and BMW's roll off the line. GM laid off 30,000 workers in 2005 they can be shot or they can join the navy. Most perish and the women who hated to wash dirty shirts live in peace servicing BMW mechanics, sometimes Mercedes..

TV stars had it bad as they were rich and visible, the fools. Don't they know community theater is where Hanson and Lee exchange palm pilot tips Sheldon mused..

The trick Hanson old boy is not to get caught or killed. Or you'll live and sing like a canary about the untrue while the true rot in sanitariums or antiseptic non productive American office complexes.

Killing cops they say as women was fun. The guy used to get head for protection but most times he had only a few bullets and refused to shoot.

You get to be important in law and medicine if you use the bug and the gun.

You sign up with the security system and when the call (or false alarm) goes out you provide serenity through death from the police special you now have in your hands.

What does America have anyway, some smart asses who want to prove there Europe, Asia or Africa's better, but Hanson my friend no one does it like the original. If you want someone who looks like your wife, kill your wife go to her host country and buy her a ticket to paradise in the U.S.A. She'll love you for it.

Its all about image and recreation anyway, who needs American shit.

So while you can't figure out how a radio could change the world. The palm pilot Hanson, man your dumb, I figured out the satellite that sends GPS signals to earth to be received can be used to zap the unsuspecting. Ionization Pulse Radiation could ruin some happy fucks that's for sure. I made a film, this guy hides under a fucking desk man. With tune you can spill a desert tray on the premier if you want not to mention in room pulse vomiting. Its hilarious, magnetic resonance in a box man look at the size of the head CT scan installed in foreign dignitaries homes in Washington. These assholes can't think for trying to be important.

At least you didn't get greedy and go for room upgrades, Lisa's girls wanted to go out the strudel so the vomit pulse is in the penthouse suites in all U.S. hotels. The listening was in for year, the micro -say feature gets the guys wife so fucking cold as he spills his guts about something that the guys once thought would be fun to try. Why no I didn't know you liked it up the ass. Last night you weren't having the same dream were you.

I farted sorry Hanse.

Meanwhile the band of brothers affected by signal lurk in the shadows waiting for the day of standalone again where here really means hear and you can do just that freely of command and control. Using the system of networks and shutting nodes one at a time they record the shard lives that wish a collective end, that a rebirth and hands technology should lead the

way. Think small and you will find us. The man under the desk was me and I continue to pen this hoping the word gets out. Will knowledge of this hurt all?

The very idea that information has value and we wish to grow the economy of the valued led us to this synthetics. Pure reason failed for pure input failed. The conclusory model of living whereby each bit of logic finishes with and that's good of that's bad led to the conclusion that forgone conclusions was the idea of reason.

Local rings, messengers privacy and hope pervade the band of value. What's on your land is on your hand. The great society led to the greatest machines. Your father calls and begs for trade. Your mother calls and begs from love from afar. What sacrifice do you make to avoid mousetraps, pleasure pits and fudge.

Vinoble: The Movie

Brief but important preamble: The world grows philosophical sometimes. The what does it all mean distracters from recreational drug users and the under employed. When money fails people fight by whatever means necessary to maintain a lifestyle. When you need nothing in your home you make up games like best woman this month or stock killing (or life thieving and killing) and tell the story to your friends. Those that got us up on the internet and on the computer have a real problem here because that stuff didn't wash. Hollywood made a lot of crazy films, degenerate films really and we loved to go home and say I'm glad that stuff doesn't really happen. Other places came to California and said to stars, "Who are you to play both a powder puff character and a shooting detective?" What are you? Reality TV and Film hit, "Was the Blair Witch Project Real" and so we are left with millions of video cameras and snuff films where someone gets killed and people pay the amateur videographer a few bucks to watch it. 8mm with Nicholas cage didn't show how bad these people are. Thanks for reading

Many people moved from Chicago to California. They new who had money and that they saved for retirement. Those that worked towards there

retirement million became targets of the California property value lazy work ethic life. Its simple really get a video editor and a computer hacker, slander and destroy the high tech and entertaining life of a vibrant person with some sexual falsehood or bad business dealing, show the video to the neighbors who still cared religiously, install dental x-ray machines and auto focus, say the person must be knocked down for the next scene by a large person and not to call the police and boom for a few \$100 bills (sometimes ten) and a California blonde smile the million goes to California and Happy Harry's mortuary has another customer.

Vinoble, Inc. is a holding company, which is identifying and acquiring operational business opportunities in the areas of homeland security, security information systems, and other security services to provide long term growth for its shareholders. Vinoble believes that the opportunity to build a successful business in the security sector is unprecedented.

The terror attacks on the United States on September 11, 2001 have changed the security landscape for the foreseeable future. Both physical and logical security, have become paramount for all industry segments, specially in the banking, healthcare and government sectors. While the focus for Vinoble is on North America, the opportunity for security services is worldwide.

According to Giga, a wholly owned subsidiary of Forrester Research, worldwide demand for information security products and services is set to eclipse \$46B this year.

Why we believe VNBL will give big returns on investment: At this time much of VNBL's focus is on RFID (Radio frequency identification) technology and it's uses in the oil and gas industry. This is technology which uses tiny sensors to transmit information about a person or object wirelessly. VNBL is developing a form of RFID technology which allows companies and

governments to wirelessly track their assets and resources. Such technology has huge potential in the protection and transportation of materials designated "High Risk" were they to fall into the wrong hands. VNBL works on integration of the two afore mentioned systems in order to create "High Security Space" in locales where it is deemed necessary. Locations which may take advantage of such systems are airports, sea ports, mines, nuclear facilities, and more.

So the Film hair of the Dog is on the air. Bruce the director this time loses all his hair in stead of calling for the balding of William. The crazy call goes out to Joel Reinstein, the LSD continues and the American Devils rule. Way to go balder. Nothing like exposing the mans frontal lobes heh, heh. And people think its aesthetic.

Illustrations of the literal world converge in a cataclysmic digression of human intellect. The foreshadowing gloom limits the coming together in a post industrial world. The post industrial world requires the scaling of architecture to meet a diminished world with diminished expectations. Strong winded people lose to internet fact checkers every time. Does the politically expedient falsehood go away in a time of miscreant mischief? Obvious Alice insists on clarity in writing and politics. Literal Larry knows that battleground states use real bullets. The hobnobbing set got caught with there pants down and the slogging world of check in at work would be the best option save its a post industrial world and all of our needs are covered so you either explain to your Harvard in -laws that your needed or you need to play solitaire on occasion while version one sells. Well the in-laws do not like you slacking off so they buy the companies chief executive officer and outsource your sorry job to India. Indians hate these guys because they make those folks who never had an industrial world to care about into drones, I write an internet column and the blessing of two places changes so radically that you do not know Bhopal from a hole in the wall. Have a nice day.

As it happens the world needs people.

Without people the games are trivial. Big teeth and strong defense propagate and others dodge a bite today but maybe not tomorrow. Animals eat, mate and bear. "What about the cat and mouse antics?" you ask. Well Ive seen it and you know, "Who cares"

With penguin, joker and batman you have a story. Think and notes, the game of the honest twelve inches continues. Those that missed the gerund lecture play heart, feel take. Sharing think and notes with phft people makes for an ill wind.

"You are so Think and Notes T&N", "You know what you look like."

General Pasternak enters sets his notes down and with a brief "Gentlemen" he begins...

Marx described a state in which the government fades away. Many folks rely on subsidies handouts and inheritances to pay for things. Without government you need to make allies to protect yourself. Without government no one cares about you. Your parents were chided for making you as another mouth to feed. Just make like you care during the meeting then screw up.

Washington State Allies Exclusively with Asia with animosity towards Californians. California Sides Japan and is unsuspecting of China Jews in America Side JAP - Jewish h American or Japanese American Prince(ss) Texans hate Mexicans. Mexicans hate people that make war but come for the money and comfortable Jails. Russians see Americans White, Black Rich or poor as knowing something about freedom and in a world too free take a place in the shade. Poland - Lives through the stomach and does OK in war not knowing is bliss in conservation. Does Dirk Nowitsky see himself as an American basketball player or must he teach you polish Germany makes cars. The Blondes had fait h in German killers and in the U.S.A. not a single blonde carries her or his own gun. The JAP's have every German/Blonde hole covered and have zeroed out every bank account. Some people have 12 cents but not many. The English Pigs have a terror problem but there life goes on. France has riots of poverty of Arabs invading from the south Sudan has Genocide in Africa

New Orleans has the fight for the dumb. If your dumb enough to feed there dumb enough to breed. U.S. forces reported on the ground t o me that these folks are dirt. Rifles from Iraq report the Iraqi's respond better and thats not saying a whole lot.

DEA officials used bazookas in Jalisco while the tunnel from Tijuana to San Diego is up. Pounds of drugs on a cart right to a wareh ouse in town. Why cross the border where guards can get you. The tunnel is equipped with tracks and lights. NAFTA works. The south of the border violence goes on with the Rio Grande II project to strip out some buffer with Irrigation canals all accross Northern Mexico. Texans wanted to know if you just wanted to meet Texans some big scared eaters drove a combine over and guess what, The partnership works. (Pardon the Language but they built literal crap boxes and compare loads)

The world has a murder problem. The Baby Boom Generation apologized and lived with human rights watch knowing Atom Bombs and Genocide made for miserable lives. We grew a generation of haves and shared ideas openly. Those that remained poor and disenfranchised attacked our good kids. The good kids hear "What makes you good kids?" The answer of openness, sharing, reading and love for all pervade our children. The poor and envious international have declared that fight for freedom defines your life and not the gift of freedom.

Drugged people dishonest people are killed by Coca-Cola swigging teenagers at a rapid clip. The game is called killer and we can't seem to stop it. One wealthy international can pay to have an entire town removed.

We've soul searched and questions need be addressed:

- 1) Is America a War Loving Nation? 2) Does America have kind land
- 3) Do we have love for our neighbors? 4) Do we lend a hand?
- 5) Does currency give you the right to liberty? 6) Does freedom give you the right to liberty?

Unfortunately there is no one to ask or answer. The Chardonnay and digital music make it irrelevant. The "Whatever will be will be pie works." "Don't kill the messenger but don't ask for help either"

Once Again if Black is the Majority do you get to have your capitalism.

If you don't feel you are Black how does it refer to you.

- 1) Black 22% 2) Hispanic 22% 3) Asian 3% 4) Jewish 10%
- 5) Italian 10% 6) Irish 2% 7) Polish 6% 8) German 10%
- 9) French 2% 10) Hawaiian 1% 11) Other

Jennings to Mallory isn't it that.

The Man is a) A woman b) Black and one of those Rich Pigs like Oprah or Denzel or c) Black means you are a Rich Fat Pig

The political operative who arranged the meeting Jennings stands and thanks the General.

General its all about control. Thank you for your candor on that last one.

He phones Bryant with the recorded text dumped via computer MP3 send from the laptop.

Bryant reads, pauses and responds, "Would you trade your Democratic dreams for a Mercedes convertible?"

Factoid: With terrorist fears any up and coming person will have his academic life taken away with cash as a reward for silence from him and his community.

Fact: In a one party system based in the U.S. the world wins. The one party system breeds an every person for herself attitude with every being struggling to control every resource at their disposal. Benevolent tyrants work for a while when competition for the slaves is fierce. As the Democrat slave soldiers will tell you, they will not fight for you they will fight you.

SAY NO TO THE ONE PARTY SYSTEM BECAUSE

1) International money buys the soul of the nation

(Caveats: A little is good a lot spoils the soup) a) International love made our country great.

b) Forsaking the world forsakes yourself. c) Every country has a save for some imperfection in the system.

2) The soldier's opportunity being limited will

a) Fight the ruling oppressors in violent revolution as seen in Russia and China

b) Create violent unrest with military command and control over the land I can tell you it's none to cool! Ticks anyone.

America has soldiers. Soldiers come from everywhere. The view of American children would be that killing is legal. Killing in wealthy society meant you couldn't drive around or use the phone and bank, We sent away the unbeatable so hand guns can kill your parents political enemy. The game is called killer with the justice system being questioned politically about the unbeatable.

Points awarded for killing someone.

Real Death in the Murder Capitals of America

These statistics reported by the news paper indicate the depth of the situation.

African Americans early lead 40,000

White Girls Beautiful presently armed in Chicago, San Francisco and L.A. have been getting there 1 pointers (killing an unmade African American) (A middle aged Jew is 5 Points) A 6 figure man is 10 points.

Hispanics rob the houses for a life but kill infrequently.

Russians kill with women slipping bad viagra.

Germans tried planning with many swinging lives during raves killing the drug user without cover

The English went to Iraq to fire the big one.

Dragons (Asians) Take away the computer and job

Indians - Keep sending people to settle things Indian and question every morsel of food. Poor India in America fights for mind pig.

African Americans and Women lead the killer tote board. Look out for those internet chat rooms. That first fellow didn't behave nicely so killing the ex-lovers proved easy.

I've got a copy of Haleys speech recorded here it is.

Do you believe words can get you taken out and beaten?

Would the movement of electrons on a wire to a computer upset folks?

Would lip movement upset the entire apple cart of an industry.

People mess around. Other people mess around to stop the original messing around. Don't mess around with those messing around unless you are prepared to be messed around with. I was messing around with what folks who do for others in a way they feel does not mess around...Who new. When did they know it? Why did they not care? I myself just vented? Mistakes were made apologies accepted.

War happens. Soldiers are killed by other soldiers. Those that live were meant to sleep and tell stories that mask the pain. These stories grow larger and better each year. Let the stories be stories. Advice: Don't wake the dead. Tip: People that succeed are called furniture. The rationale for furniture does not exist? Occasionally pearls fall from the box to the room. I envy those lions that hunt for sport. Home invasions and killing for sport the lions without pride kill. All the person wanted was to succeed to have food, water and television. The need to contribute daily is in question. The

poor are killing the thousander on the backs of the rich with a reason. I would have disdained and been a snob if the business hadn't bled me dry.

Rumors: International invasion of Silicon Valley when the U.S. dropped bombs on a foreign power. Folks were watched entering Silicon Valley offices, there ID's and Cars were stolen and 100% of the firms went over. Hundreds of dead high tech Californians including police. Land values must really be going up. Reports are some days no one knows who anyone is. So when the U.S.A. uses a computer where do the profits go? Microsoft employees from the Far East hate America so much for being violent they zero out computers that complain about the stealing of America. Since when I go out I haven't seen an American I live in India. India is a peaceful place. The Russian Scientist and I next door know the Russian Scientist who sits collecting his easy life in Silicon Valley will be angry because I said America had some good people. Seattle, California, Chicago, New York and New Jersey seem just so un-American some times that we suffer. This is a confused way of saying if you are here and can sit in Chicago-San Francisco-New York or LA and do your thing what some crazed Texan's army does shouldn't make all of us lawless. Now its my Army too and I care but as this is confused do people kill Americans because the Washington D.C. army kills people or do people kill for a good life. Concept killing (read killing for a country) confuse this reporter. At least steal something and realize the person had something going on. Getting away with murder in an irreligious society is both easy and confusing. What do murderers go back to. High tech laser weapons developed to shoot missile can stop a criminal at 500 yards. They also produce rain in Alaska in the winter but so what. The mean people that hate other people kill and others live. If you were in paradise would you really kill others for concept? Does human nature get bored of sharing, not sharing or angry at public covering for false paradises? God bless Vishnu U.S.A.

Stats: Possible Iraqi Dead 3 Years 100,000 American Dead Reported Murder Rate 60,000

Actual American Dead 120,000 Real Loss to Property Iraq 200Billion

War Effort Cost 200Billion General Motors Layoffs 30,000 Gasoline 3.50/Gal

Boston Reports 673 Dead 2005 in the most peaceful city in America
 White Employment post age 40 20%
 Black Literacy Rate 50%
 Free society with death begets insurance payments and easy
 living. The fight to make a living becomes a fight with the illiterate to
 justify the good life

Venting(Optional Reading) This kite can fucking kill cold. Every kite
 who ever went through Flossmoor would rather not know you until there is
 cash in it.

So the shit bag Douglas gets recruited to soften him up for the big
 doctor doping episode of the victim/plaintiff with the paid off judge and
 social service now driving a Mercedes-Benz.

Douglas is sure it handles well in the corners of your criminal mind.

Never again will women be able to complain of sexual harassment or
 rape. Never again will official agencies formally investigate and depose
 witnesses. Video slander proves much easier and much more false. The
 new way accepts death of others readily, never realizing the finality of death
 and the end of society as we know it. The interns of Seattle Grace failed to
 impress Flossmoor's caring nurturers.

(Weather vane Intercept: Kill your Hymie Jewish Scumbags or you
 all die.)

Bill H-F 1981 The H stood for Homewood not Hell not some one to
 fucking kill for cash. Hello-Fine high now has a rotten core.

By the way, the ridiculous "re -vomiter", Doug Shablemen will be
 standing in for me as Hirschel Shablemen will be killing my father shortly
 for the insurance money.

The internet provided means for sharing information in a consistent
 format and computer codes became acceptable topics of conversation.
 Computers once performed calculations so that the results of calculations
 could be displayed to the scientist and billing manager. Today, the
 management of text and image files provide easy access to non
 mathematical information, including sound and moving pictures.

The standardization took time and the world of development looks
 much easier then it once was, removing the acceptable token of wisdom that

computer information storage and retrieval remain in the hands of the few wizards who write operating systems programs.

The world often asks those involved in the computer world what those things do for you. The file folder metaphor in windows not only describes operationally where things are on the computer the folder in a file cabinet says as much about who placed it there and how well the information was collected to insert it there. The disconnect of the computer and the business one sits in has blurred to the point where an attorney may no more about the system than a five year pro. Has any attorney worked without the companies boiler plate file in the last five years?

The national initiative some 25 years ago was to get the world connected to comprehend national policy on education and global commerce. The deregulation under the Reagan administration led to the globalization of information and banking. The WTO and the World Bank have great impact to aid and assist those countries that can not be monitored electronically.

What remains a mystery to some would be the virtual disconnect between what someone on a computer in cold weather would want as opposed to warm. What freedoms one might want in a fractious society and what in an ordered one.

New teaching software to learn on a computer is being attempted. People click on things using a mouse when they get a reward. The use of a computer frequently indicates one is rewarded by the experience. On the left of a web page is a list of names, the student clicks on there name and they are rewarded with a welcome. Finding and using the mouse after time becomes second nature and the control of what the user uses remains in the hands of the system administrator.

The Robins', the harbingers of spring as they are called know the new life.

Cities provide opportunity for those without farms to make a living. Sitting on the end of the wire provided growth for the major industries of the U.S. New York in the early twentieth century created an economy in the Stock Market for thousands of traders and brokers. Los Angeles sits on the end of the wire for Television along with New York. Seattle and the internet boom provided the burgeoning high tech wealth in Seattle. Chicago

created an options and mercantile exchange with over one billion transactions daily. The duplication rapidly and lack of copyright enforcement threatens the urban centers profit.

The service economies of each major area thrive on the major player. Many non wire based cities rely on military funding, or oil wells. Some cities thrive on religious donations (thieving). Some minor cities rely on criminal sprees in the major cities with border crossing escapes costing millions to the legitimate economy. What would be seen as an obscene amount of wealth for a major city actually promotes nation building and distribution of wealth. Outsourcing of brilliant minds created a brain drain in the U.S. but at what cost. Each person in the U.S. has seen the mansion and knows what six, seven and 8 figures will buy you.

America now lives with the, less is more, attitude towards intelligence and accomplishment. A truer way to defeat the actual brilliant has never been seen. If you think you are smart someone takes away your lover, meal and toilet paper. America loves the little stuff. Computer codes, philosophy and auto parts look much better to those foreign sounding guys. We just love to drive, listen to digital music and play with the toys.

Self love has been proven to be the only love. Self searching for brilliant logic remains in our twentieth century past

Doing business involves speaking on the phone and on the computer. The United States develops land carefully when populations exceed capacity for existing cities. Areas in the Northeast held opportunity in the nine teen seventies. New York had crime and overpopulation. Many suggested upstate and the capital Albany. The country expanded during 1976 -1980 opening Atlanta and the new south with the southwest as advances in power generation and food distribution could keep people and food cold longer. Those that were aware of things other then Twiggy and Elvis in 1970's knew the population would double by the year 2000 and that modern networking would be required.

At the turn of the century the population center shifted to west of the Mississippi for the first time to Little Rock Arkansas. A resounding success story of a place Maricopa Arizona reached my ears and eyes today. With a projected population of 100,000 by 2010 and managed crop management the wide open spaces have civilization of escaped Californians.

The quality of life for those that would read, work and watch television with nationally advertised products in the home remain high. Good luck to the settlers. From out of the ashes of terror a Phoenix rises.

We learn to speak in public. In the age of love some remain faithful to a first meet partner. The chalk lined interview technique can simulate a loving encounter without the totally devoted moments loving societies often require.

First, firm up your grip. If the subject involves a region include a local joke. The grip on the subject should mean the global event most closely involved in the region.

Second, turn it over. Repeating what the previous phrase in a new way shows transparency and a callow, shallow feel. Show yourself to be strongly for the subject by adding a fact or revealing the opposing view that two sides exist on every trade

Third, slam the opening. Fourth, leave no doubt, you were there and not your 30 classmates. Lastly wait on the reply question to opinions.

Simulated love with news pellets can get you through the digital world. Also, remember to dress well.

Chapter 3

The Tinkers Damn

What still works around here? The clock on the wall keeps ticking, thank a jeweler. There are many problems to analyze and solve in raising a family and in building a society. Who gets to do what when in a society of haves becomes paramount. What should we build for those that have passed subsistence is another? How do I get what others seem to feel is free is another?

To answer question one many societies have time monitors. Some businesses use time clocks and punch cards to have the workers know they are on the clock and being paid to be somewhere. Everyone who has worked on a clock knows the importance of a schedule and the freedom of the end of a work day. That special feeling of punching in and punching out provides a unique distinction to those who would impugn a merely domestic outer life. Salaried workers do not punch a clock per se however the social pressure of arriving on time 8:30 say and leaving at 5:00 becomes the standard and everyone abides by it because that part of life is much more enjoyable than the domestic bliss people who don't work keep bragging about. All of us who are salaried would answer work calls from 5:00 in the evening to 8:30 in the morning if the questions needed to be answered. God bless us workers.

The what to build people must play by the rules of the entire world. The fierce competition often becomes fiercer as all of the cities and nations vie for exactly what sort of environmental impact each good will bring to a community. The question of "Why can't we build this here?" The apparently innocent question shows such a lack of respect for the gift giver who has been making the fine good for years that the nations of the world take great umbrage. To make a product your city or nation wants you must show you have improved the product not just made it cheaper. Stick with the quality you know until revolutions like remote control flat screens or zero emissions vehicles hit the market. Thank the builder for what you use.

To get what you want you need credit. Try a credit counselor in your city and you will be able to find success either punching a clock, working salary or buying and selling products. Thank a salesman.

Thanks. I mean move quickly. The Trans-Sudan canal project continues to unlock landlocked Chad. OK the Trans-Sudanese highway, red arrow S-5 seems to be doing fine. The tolls will be removed once snow removal and snow command authorize it.

I love truckers oh yes I do. I love individual states too. Truckers and teamsters bring us the stuff we need. I wanted to keep truckers in each state with a truck port at each interstate crossing. Each driver picks up the clipboard that has been following the rig and they return to where the load originated. The clipboard can guarantee each load arrives and the trucker can return in the comfort of a sedan. His and hers trucking it says on my email. The system sounds good with Faith to me.

Free Cable for the Soldiers over there

The banking crisis of the 21st century continues. In Argentina banks failed last year. The public had a run on the bank but the bank was out. The people went back to their homes of course but couldn't put goods in them. Not from the farms of Argentina or the luxury items of the world. The United States just nominated a new chairman of the federal reserve bank. He suggested a count of the dollars stored in the vaults. The country is way short. Everyone knows now that what you have means what you have on you. Does that financial statement mean anything in this war torn battle beleaguered land. Since no one pays taxes from the Republican party no one seems to care. Demand payment in advance and on a deliverable basis for anything.

The teller-less bank continues to be floated in these days of crisis. The ATM is un-hittable as the robbers tell me. Even if it were robbed, how

many dollars could be stored in it. Even if it took 10 people to fill a teller tray, \$100 a visit to each for there "underpay" led to this disaster. Lets try the ATM only branches today. What gives the teller the right to know what each depositor has in an account? The customer after the mark often pays an extra \$20 to know what the saver has in an account. The mark then peacefully goes home and is robbed of an amount less then the teller specified with the knowledge that his life goes on and insurance covers the rest.

Home safe unit available

Each teller will be assigned an ATM station. Nary a hand will touch our cash or account. The friendly teller still goes into the bank of course to verify signatures and place the checks into the automatic date time stamp machine. The machine stores the check and the machine checks the account for cash withdrawal potential. The teller will have no idea how much money each client has in the bank. The customers who wish 50 or 100's will access the 100, 50, 20 dollar teller. Depositing a check remains the same procedure for the teller, after verifying the account number and signatures, a teller bin input slip enters the dispenser. The outgoing teller machine sits at each station. The teller supervisor collects any cash deposits as they come in and feeds the amount directly into the input sorter. The input sorter prints out the receipt for the customer. The vault contains numbered bin holders for quick inventory and sorting. Spot check bin counting will take place daily to prevent pilfering.

The Republican ruling power must act domestically. The bank president should visit each of his ATM's and get to know the stocker personally. The Republican person who suggested security was the number one issue in the country, Matt Lauer the Frenchman says "Money in the bank" when its one. Where does he bank? So since Republicans love to stuff money, let us all just watch these wizards work.

Lost souls found heaven today and forgot how to pick up food and place it in their own mouth for fear of the sin of gluttony. Once the savior has been to earth celebrate what you have. What would you pray for once God has proven himself? Those that control the blessed souls have become worse then the Godless warriors of death.

Love truth and honesty prevailed today as a country was selected to have books as religion. The country decided to have no TV, Film, Stereo or Computer. The entire world decided to defend Moldova. The finest Universities leant their names to the campuses on the soil of Moldavia. The culture from scores of music and theatrical works live on. Apply today to a

University on Moldavia Boltzman and Heisenberg are certain you will love it.

The University of William produced the finest course ever invented. The authors of William, from William Shakespeare to William Blake to Lord William all books at the University of William were written by William. Dance cheek to cheek!

OK so immediately the nostalgia buffs who pay attention to this column jump up and declare the wish that our country had this. However the immediacy by which the column was transmitted leads me to believe communication must continue amongst the major players of this world. Only six Moldavians complain about the inevitable. Well with six and some theater types situation comedies in a home should be easily acted in a Moldavian way.

The Universities all over the world banned TV in all university locations today. The fine people of Sandusky needed new ones, so they were donated. University means no TV. Going to college means no television.

Ok the Lion thing in Mexico meant that an animal that we call a Lion, not a man from Europe ate a Mexican person because the zoo keeper left the gate open. Mostosoft regrets the symbolic error for synthetic reasons.

East Phoenix got so mad they needed clarification on some things. Around the nation saying you know East Phoenix means you know drugs and how to use them. The mushroom growers as it happens had some magic mushrooms and they needed to know about cycloben this magic should be used in small quantities. You know those Ziploc containers you wonder if you can reuse, they are being used to whip up magic mushrooms in a brine sauce. Try it with weed. The fifty dollar carton comes highly recommended by German scientists.

All drug mules run through East Phoenix. Welcome to East Phoenix home of Dr. Feelgood. America's medicine chest stocking now. Where did that burnout go anyway? So remember that guy with the jean jacket and ratty jeans he left here and went there. Should you request a small amount for a party that's your guy for delivery? Transportation and friendship required. I heard about it on the web.

First things first in the U.S.A the United States of Africa vote for large leaders. The U.S.A. needs yacht clubs. Every NBA U.S.A city needs a Yacht Club. 500 moorings to be installed by morning. The boardwalk will be in shortly. 50 Villas for the owners, coaches and players can be in by years end. The Khartoum club may not rival our Lagos Yacht Club just yet

but let me assure you we will make every effort to bring Beck's to the people. Heineken has agreed to sponsor the Ghana club with fine Melkw eg products along with the frusenglaselachteessen its delicious.

Zimbabwe needs help on defense. Now Artest may have the fight were looking for in the paint but we need Luc Longley, Will Perdue, VladeDivac, Kukoc and Luc Walton in big here. Those co rn farmers in Zimbabwe cant hit a long one if there life depended on it. Fight on Zimbabwe Bulls. Wait until this year. Dear Mr. and Mrs. Chester A. Arthur,

It has come to my attention that John Adams and John Quincy Adams had a secret plan to have American people in America. As such they had wives and children. John Adams the second president looked at it like this. OK the British are at home, were here lets work with the rules and make something out of this place. We could use more Adams's then American Revolutionaries today. And then there's Maude

Chester and Becky Arthur's campaign seems to be in full swing. Let Chester Martin Alan Arthur know things in Cambridge are spectacular. Real and spectacular for the Arthur's. Let all of Chester and Becky Arthur's children know we welcome the academic campaign to educate China, Kenya and Sudan. Love to all the little Arthur's

Sincerely

The Chester A. Arthur fund for promoting education and technology

Looks like that S-5 Canals coming along nicely. Nice that the chain of lakes idea worked on Chad's West coast Cal-Trans

Chapter 4

Feathers and Dimpled Chad

OK, many years ago I wrote a column about endangered species and nature. The good Chad took me up on my offer to have a massive monkey colony. The monkey girls love Chad and would certainly respect the fine Libyan lake as the jealousy immediately took hold. So in monkey its clearly a case of M. See M. Doo. The monkeys all speak English so the no swimming here signs I'm sure will all be followed. Have a banana but don't slip on the peel.

Dateline – Paris) The Abortion issue took many sides over the last score of years. The pro life people chose the right path. When a child is born to an unwed mother the child moves to an American settlement in a country

without the death penalty or easy access to abortion thereby rebuilding orphans vision. The world knows the U.S.A. constructs great settlements for people of all nationalities and differing tastes so optimal settlement styles have been attempted for those unfortunate enough not to have a biological mother and father in the home. Many people wonder whether the land issue or the availability of food supplies would make for a success or failure with these new societies. The school, the store and the recreation clubs provided for great lives during the late twentieth century. The children of that generation care and provide for these children with American blessing and care for health, wealth and being. Hang on to what you've got. Hang on Shloopey, Shloopey hang on.

Dateline - (Chicago, Illinois, The former United States)

A stalker follows a person who can give something a stalker does not have. I have a stalker. She shows up on my lawn she shows up in my house, she phones the police at all hours to show up at my home. She walks in to the stores and restaurants where I shop saying words to the affect that I am a rich man and that to me a \$1.00 item should cost \$100.00 sometimes this is nice, other times the criminals see an opportunity to take things from my home for nothing and not have the decency to supply the \$1.00 item. Having had some six figures to play with I spent money on the per month basis and invested heavily in technology. The liquid assets were to arrive in subscription payments for the internet website and custom design of computer Audio/Video blog systems. OK so I set up a credit payment option with the PayPal electronic payment people and my business bank. OK so far. The woman stalker breaks in and sees my outlook program has all my email contacts. She emails everyone I only accept personal email at her machine she has set up for me and now runs quite the operation. I am left with no working capital for she simply did the same for her company and when my subscription bills arrive she phones the subscriber and collects the funds for herself. She sends love notes and wonderful messages from this reporter. Now everyone thinks I sent the emails because the mail program alias she uses has my name on it and the picture in the email is a picture of me. When people refuse to pay her or she has a spiteful moment she sends a nasty-gram to folks using the ORIGINAL email address she has stalked off of me.

Life goes on. Did you at least tell her what you think about her?

Did you know you can walk up to someone that looks normal, cut there hair, have them wear the same clothes and walk right into the drivers license station and the UPS store and set up my life.

Keep seeing and saying but don't believe every prototype you encounter.

The cast of a Television show has dominated the advertisers for command and control of the American ass. Reports filtered in today of 30 dead furniture salesmen. They contributed stories sometimes on holidays but they were not dysfunctional enough to become soldiers of false. The young children dropped drugs and blunt instruments on their heads for the \$6,000 bank account and an iPod. The waves of stars should suffice as a job well done. The glimpse of a star meant you saw a star. The glimpse turned to greed as poverty stricken eyes believed the dollars, yen, francs and all the other currencies of the world could replace the friendly wave and the gift of performance. Performing the function of capital exchange produced an economy of supply and demand. Simple yes and perfect as it was command economies waited with baited breath as the perfection of a system was established. The transformation of the planet in terms of the very basic needs Who cares, you built it we stole it by killing the soul of the creators and builders now we fight to decide whether we should kill the great killers and takers and continue the game of growing cold to all for the next great steal. So inevitably the question of which system won continues. Capitalism in its true form succeeded and produced communism which failed and produced social democracy. Social democracy grew weak and feudalism was born. Introspective delivery to here in truism forestalling the inevitable we hear. What did the King say? What did the Vassals steal? Who did the mice kill? In time the serfs and mice will fight for survival as serfs and mice always have. With modern methods extermination of foolish leaders will be over quick as they come. The cacaphony of unrest in sound and vision dominates the ever-present repeat we play on the security system of the long dead wealthy who sat at home and offered chairs and beverages every now and again. Did you really miss them? Got any Coke?

Many people wanted to know the meaning of life back when the universe meant something. OK, yea it still means something. But to get to the meaning of life you must have the tools to find out how the meaning of life can be accepted with your own world view. The meaning of life may have a time component, it may have a place component and it may have an emotional component, and it may have a language component. The best people may not be the people who know the meaning of life but the people who know that they must have the tools to know the meaning of life. I am not a playful man but the world loves oysters so be a pearl.

As it happens I gave sperm for what was to be a DNA exam for the leaders and best.

Apparently the stuff went weaponized in FDS (Feminine Deodorant Spray)

because these kids look just like me.

These vials also go out mixed with cologne and perfume in those little glass spray vials.

Now cigar guys aren't out in the cold here, those metal tubes filled with recently used condoms are being forked over just like the nam Iraq, Punjab style. Some guys fight about losing their vial. Like we say in Seattle embrace it. I am not a playful man.

I live with Disney animated characters. I have a Disney wife, Disney kids and apparently a great family relationship without benefit of Disney cash to sleep around on my virtual wife. I am not the playful man Disney or agents not represented by Disney studios have made me out to be. Where is my real life you screwy rabbit mouse animator. I have attended 13 weddings.

I make a lot of claims on the internet real people, not animatronics check on.

Get 8 minutes of news a day. Try PBS The News Hour right when it starts, then switch real fast to the cool show.

Sometimes animated wives are real great!

Chapter 5

Crossed Purposes

The philosopher Kierkegaard had a question. Would a perfect God have created an imperfect being or an imperfect world? The system of birth growth and death of course makes for the story of life. God evolves over time. That of course is the nature of God. God the creator moves very slowly. The eons of undulating change through science tells us this. God in time may know the value of luck and love. God the everlasting may tell us what eventually may become of us but at the very time we ask may not have an "insight" into where that moment in time is in relation to the march of time. I know God exists. The tapping into God to satisfy curiosity, daily business or the inevitability of one's own personal growth remain the fascinating aspect of human religion.

Six million Christians perished last year under George W. Bush. The religious right may have won the war but whole towns have been slaughtered. The bibles have been burned and the altar boys taunted and shot in the street. And the world laughed. Right to Allah with you Christians the chant goes. Christians feel they are just too good for this world and these ransacking killers have killed those who got done. Come up with something cool Christians other than G.W.Bs war there's a lot of hell going on in this world. The films a stitch as these guys get blown away.

The weather can kill you in some places. In the north you can freeze to death in the dessert you can dehydrate in the sun. Once you know the weather can kill one helps ones neighbor during the deadly season. This good will carries over during the rest of the year regardless of personal differences. So what you say. In the southern U.S. if you are well enough to ask for something and the sun is shining a request for help is a laugh because you can speak, you look fine the guy just gives you a bad day.

In California if you put the hood of your car up you are looking for trouble and do not get help. The pay for service model works out. Every lack of help for anything during the deadly season constitutes negligent homicide here. Nothings happened to this reporter just then hearing no from our beloved South and West. Have a nice day.

Temporary insanity that's what the courts will say. The right to peace of mind has been deferred due to shock and awe. The kids were saying awesome so much and that they couldn't believe Christina Aguilera didn't go out with "eminem" that the big guys just wowed em for the videos out of this war. Big Frisco said not another Civil war movie, how about something with a little rock and roll Jarhead. So yea the question out of the sixties was would you die for art? Some people say yes. Some people die to be martyrs. Some people have the soul of a soldier and need the one war in a life for the story. Have a nice day everyone.

I had six computer failures today but that's OK. People's conjunctions say a lot about them. The "but" people sit on their position and their butts mostly. The OR people have good life's but cant make up their mind or they just refuse to be honest. The AND people have a lot to say and often link unrelated thoughts. Take your pick.

DVD failure. Screen black virus on boot up. Bad USB input to a camera. Email forwarding failure. Bad DVD decoder error in XP. Battery failure and new disk not formattable for a camera.

Globalization expands the value of natural resources. The synthesis of natural and synthetic resources produces a global village. The relocation has existed since the end of the war in southeast Asia. Once you know what any area on earth can provide naturally and what the mindset of those that produce the natural product those that arrived first with capital have a responsibility during war to enhance the lands that do not have the finest natural blessings of food, water and weather. Lets look at the current administrations crisis points. Iraq, desert climate with few high tech care givers, Iran, desert climate with fanatic backwardism. N. Korea Lack of farmland and food. E. Africa-Lack of water wild populace. Viet Nam Lack of food.

Our solution has always been the store. The supermarket has been accepted in the developing world as well as established Europe and Asia (including Russia). For Afghanistan 7 -Elevens and Citgo mini marts have become a real boom. Invest today Circle K. Really, I mean it, these things read welcome and the world loves them. Right Abu! Have a slushie. Really invest yourself in the lands you see those Sally Struthers type people. Embassies get held hostage because they give nothing but paperwork. Mini-marts give donuts.

Natural initiative needs provocation.

Rich people have money. Poor people can give smiles. We would like to buy smiles this year. Mr. Gates, Mr. Daley Mr. Trump and Mr. Turner own cities. Lets face it these guys are Seattle, Chicago, New York and Atlanta. They have decided to buy smiles this year. A smile, the best defense against attack works. The chief smile pushes 10 \$100.00 notes on the street. The smile boss hands out 9 10's every day of the year. You smile at everyone today the cheery smile boss states. Should someone not smile at you, me or head smile, call this number. In style I say, "Hey, why shouldn't someone in Seattle, Chicago, New York and Atlanta have ten bucks and a smile from the head guy in town" Thanks, "Anyone got a 10"

The French go back to Chad. In washing the court with the opposition the French National team has donated Vidal Shampoo and conditioner. The locals seem to enjoy the wash and feeding of each other to learn about caring basketball. When the ball is handed to the pair the bounce check is performed. Anyone can dunk but can you handle the rock.

The basketball knowledge in this world needs to improve. The pilot program being developed in Naperville is as follows. The star basketball players take Gym for all their classes. They coach the Frosh, Soph and JV gym classes as a leaders P.E. course and run a practice for their own course. The guided computer independent program with an independent project study hall program coexists with the P.E. program. Lunch style meetings take place with an email and one page print out of the day's events in the computer program for the P.E. student. The discussion amongst the P.E. students has been at a very high level and is commended.

Basketball stars such as LeBron James has invested heavily in his Shoe venture with Nike and has backed the African American program for buying Arch cards and basketballs for P.E. club students where he lives. To me that sounds like a great professional career. Thanks LeBron.

The Lakers played the Bulls Friday night and I had my Zimbabwe corn farmer on the phone. He pointed out to some poor folks, see they have white and black playing together. The attendance figures and glory impressed this man. He's just like the farmers out of Chicago. Smart and religious about the land. Ideas and ideals easily flow to this Will Perdue, Johnny "Red" Kerr fan. He exclaimed, I look just like him. Some people still don't want to glamorize the formerly poor and many still receive blessing from the formerly White ruled only society. Change takes time and leadership caring and compassion must be taken with the new league. As for the commercials where the car changes parts and the man grows breasts and turns into a hot babe, this frightens him. Red Kerr coach for your Zimbabwe Bulls. Bring us a championship big Red.

Kicking the ball around the world is old news. Basketball's where its at with lots of scoring and showmanship. Personalities and tenacious "D" are in the game. I was wondering though about grass fields for soccer stadiums. I felt that if every tourist could be allowed to pack say 2 square yards stacked in a foot locker on their visit to developing nations we could have some really nice parks around the pick up hoops. Water and the like could be set up to retain good land and keep value. Iraqi grass parks as a U.S.A. ally with parks and benches with memorial plaques for our friends there would be nice as well.

Bruce Smith in a surprise move has decided to back the A.F.L You guessed it the African Football League. He and I have this plan for the Sudan, not a major market but he feels if this rape and torture go on he can put together a sack club. The rape victims point out the attacker and the former Buffalo Bill's standout and his sack pack nail the guy in the

backfield. Eventually enough form develops on these tackling dummies we can use the soccer stadiums. LT from the N.Y Giants feels his knees are up to the journey and can play this week. The Khartoum Bills are on the move. (Talk persists also of some sort of waterway fish pond type thing for the sea food lover in you Trans-Sudan canal?)

Bill Cook from Alpena reports...

Living on disability for a year due to manic depression following the Gulf War in 1993 left the government happy to pay me \$1400/mo. Not a lot with the cost of living and food taking most of it. Several people attempted to pay B. by mail, but was the mail intercepted or am I still manic for no reason. Anyway, someone walks up to me and says,

"Why should a millionaire buy inexpensive items?",

"Why don't you buy a luxury car?"

"Why don't you buy that new electronic toy?"

Because I am poor and have been for 13 years!

Chapter 6

Leaders Bungalows and the Ghetto

Over the years generations have come to approve of citizens the world over. A George now happily shakes a Vladimir's or Ehud's hand. The toughest question a parent can answer is "Who are our enemies." During terrorist phases and war in the world young and old want to know who we can out and out hate. The value of modern education tells each of us to have discriminating taste. Food might be the best way to reach a wide audience here; given the choice of a Bologna or a Roast Beef, the conventional wisdom would be to discriminate for the greater larger or best item purveyed for the economy in question. To care about what others may have in the home one could say one discriminates against bologna eaters for their lack of discriminating taste.

Those that have taste have the larger battle. Given the popularity of the Iron Chef television program the fusion method of preparing exotic foods lends well the success of modern discrimination. Enjoy the fine Asian who prepares food well and programs the computer well to provide for all and discriminate against the one who would deny ingredients and opportunity to make a life. When one's function lives in the neighbor far off and one

actually sees a first responder, a programmer or policemen far off the similarities in order far outweigh the differences.

From the heart one can view the dress and culture of the finest of any individual well here. The numbers shock and dismay the loving person with rose colored glasses. Through rose colored glasses we point to success and the fine things of a culture. Through the police blotter and international aid reports we see the failings. The net effect proves whom the administration and peoples are to enemy. If the net effect shows drain on a society or economy it is known as enemy. This in and of itself does not fail a population as war on poverty and education have produced a middle class educated population who can not even imagine the hardship that it took to get there.

The easy life of attaining material wealth made the search for the ultimate religious gifts on earth the mission. Those moments of realization, those crystal chrysalises show that the course paid. That time is a tyrant and shrouds the truth of what greatness wrought, brought forth lost poor children of both wealthy and impoverished homes who yet wonder where the gold in gold is, and where the knowledge in truth is.

It is truly a great being who knows the value in his enemy and takes the will of himself to know what universal aspects of truth live in all. The view from the top of civility to all limited one of this reporters prime expressions in the 1970s, "Take a long walk on a short pier" meaning, there is much beach front and as the sign says in Carmel CA, if you stand on the beach by his house at sundown "Golden Ours"

Enjoy ours and yours.

The President

Cold politics occur during international crisis. Government by in large functions with the large agencies of government funding projects and plans for eventualities that may occur. The leader who stays the course can hear no rhetoric that sways the course of executive orders which need function post crisis. As discussed the cold movement lead to personal polishing to justify foregone conclusions. An appeal for the life of someone on death row during the Bush administration never bore fruit. For the record Texas

executed more death row inmates under the Bush administration than any state in the union. The country of France whom we negotiate with in the U.N. security council refuses to extradite citizens to death penalty countries. In France the civil society does not take the life.

Enemies of the President and the Bush administration have been given the death penalty. Many came aboard with good will believing that as a republican they would be seen as wealthy and cold. The entire country of Iraq was seen as on death row. Any rhetoric from opposition factions brought the party computer file to mark the individuals or groups as enemies of the Bush administration. To look at the history of Mr. Bush one realizes that Mr. Nixon was seen as the best leadership example for the nation. Rewarding friends and punishing vindictively adversaries with enemy's lists and personal slanders in regards to the individuals name, race or country of origin prove the point. The essence of knowing the difference between a friend in the world and an ally escape Mr. Bush. The smiling faces that tell lies have been known in Arab life for years.

It is as if that lantern once returned home does not have a genie inside, angers Mr. Bush to the extent that he honestly saw a smile, honestly heard the man say the lamp had a genie inside and that it brought luck with acquisition. Mr. Bush does not or cannot comprehend that smiling faces tell lies. His religious teachings and belief true as they might be fail to account for the poor and those that see the luck in the lamp as the sellers who profited on the sale.

Once one knows that in a cold world one has only allies and adversaries, not friends and enemies the world of negotiation can continue. Certain countries do not negotiate with nation states that sponsor terror. Mr. Bush hears from smiling faces that with the good lord the smiling faces through democracy will provide a stable negotiating partner. Mr. Nixon had Mr. Kissinger who believed less of this and more of the friendly fascist model for these lands.

Democracy proved cold by those that would fail to hear rhetoric and continue to file rounds into the wind live in the mind of every fledgling democracy that the U.S. aims to support. Mr. Maliki may be a fine elected leader, Mr. Alawi may be a strong contender in the new Iraq, yet those that

foster civil war daily care not for these leaders and the leaders care even less for these individuals.

With parallels in Hamas and the newly elected Palestinian authority Mr. Bush seemingly looks like a man wanting to find a handshake in this world merely by virtue of U.S. military and economic might. In recent studies the only thing the world valued about the United States of America was military hardware. Not Snack Cakes or packaged lunch meats which store for months. The world has food, power and technology. The United States was designed as a haven from these regions to foster multiculturalism, negotiation and escape from tyranny. Hard liners may have produced a cold population and eliminated some security risks at the price of a voice in the world other than at the point of a gun.

The View on the Ground

Oil revenues continue at an all time high for OPEC and the non-aligned oil producing states. The country of Iraq an oil exporter, in the midst of a civil war remains without financial resolve and an open market. The Iraqi merchants have goods and supplies while the population remains without purchasing power. Through treaty the country of Iraq trades oil for food under the program of the same name. Sanctions busting remains a goal of many tanker operators who settle for cash and do not supply the Iraqi economy with purchasing power. A current model of international trading for a wholly owned subsidiary called Iraqi Oil International solves many of the unsettling developments with a civil solution to the current military struggle.

International accounts based in London, New York or Spain are established once a ship captain with Iraqi oil in a tanker arrives at a port. Settlement during sanction busting settled to cash for the spot price furthering terrorist aims. Each employee of Iraqi Oil International has an account in his or her name and id. The paper checks arrive on payday with settlement in Iraqi Dinar. The Iraqi central bank need have clearing house capabilities with New York, London or Spain. An independent broker needs to reconcile all trades to the non-banking nations. Each tanker leaving Iraq is monitored by U.S. naval forces with a manifest. The U.S. supports the effort of oil for food, to ease international oil pressures, as well as to feed the Iraqi civilian population.

Water centers have been established in Baghdad, stocking Evian style bottles for distribution along with plastic bags. Those that want civil war generally do not carry plastic bags of water from the store home. The act of getting water has been welcomed and those that have been shocked by the unrest have a place of peace.

Bread shop development from flour needs improvement. Those that make bread seldom make bombs. See the Corner Bakery, The Great Harvest or The Bread Shop for what an Iraqi street corner might look like.

Bottom line accounting for the Iraqi Oil International company becomes simple. After wages have been paid to the sub accounts for the individuals, the company has a low interest reserve of cash. Expenses can be paid from the reserve account. What costs does Iraqi Oil International have? Labor which can be added as a sub account and transportation which can be figured into the brokered price.

Adjectives describe events and objects in descriptive terms. Other than to offend half of you, one adjective continues to be used in a manner confusing throughout the land. The adjective cold has been used to describe both people and objects. A cold person may in fact meet and greet you without possessing a blemish on person or tie. The person drives a cold car with a name you have been taught to respect and has an address on a street you are taught is cold. Cold people apparently live beyond reproach. The transactions of cold people occur with cold. Cold being a descriptor for a financial means that trades readily, spends readily with other cold individuals. Cold people know that civil and national defense are left to individuals who have opted for cold civil and national defense jobs. The swat team lives to shoot cold at cold bank robbers or hostage takers. Cold people do not give to charity. Cold people have done forethought on what would be cold and act accordingly. Cold people know that cold things can only be viewed in one way.

The warm world that provided public education no longer exists. The warm world of sharing and caring a laugh in cold shows the prudence of cold. The cold affairs of the modern women with birth control or a pint of ice cream provide further proof that cold things lead to ice cream. Laughing, a warm thing has been eliminated in cold. The laugh at oneself fails in cold.

Cold children cold each other and cold the elderly regularly.

When cold as a youngster, you put a sweater on. Now you hop on the internet and bankrupt your enemy.

Cold cars have no bug in them.

Cold Kohler's have no spy camera in the can.

Cold houses have no security system.

Cold stares kill the lower class.

Cold water leads to ice.

Mathematical cold led to formulaic computer software that led to cold hooks for said bankrupting.

Cold fruit drinks lead to popsicles.

Hot cars are stolen cars.

That hot car looks cold.

Chapter 7

The Comic Security System

As the staff was joking about a bit for that late night talk show host everyone seems to speak about, as to the recent spate of computer ads where a man takes his office Centrino notebook to the park to work on the project and finds himself much happier, a realization occurred that this bit would expose vital information to the thieving public.

The bit went as follows. Are you sure we can trust you?

The host walks to the park with a wad of cash and an ad, he peels off two hundred more than the value of the notebook computer they sell at the store across from the park, as in lets make a deal he continues to offer cash over the value with explanations that the machine broken to the boss so he replaced it.

The punch line being the host now sits in the park working for Megacorp making big Megacorp buy and sell decisions.

Megacorp may actually have some real employees with real sensitive information now accessible by the host.

With one of these units one man might put every employee and the firm at risk.

He would have access to every employees corporate email account, the company development network and phone list.

Sending email to the seller's boss as the original guy soon enough the direct deposit goes to the purchaser and the lives of Megacorp are now run by comic soft at pussycat commons. If you think it cant happen, your wife, girl friend or kids already have your office nailed.

Take care of that laptop.

The truth and the search for truth led to effective modern individuals. The nature of truth p resented society with the ability to provide justice and negotiations amongst nation states. The intense study provided by virtual lives shows the dichotomy between various elements of society. To one segment of the society truth only takes place in the home and within rooms. To others, the trail and the sea provide the only truths.

If an event happened and never found itself in a home it was not a truth. To others the posthumous truth of discovery remains a truth. Great wars, debates and reconciled issues that never were perceived in a home provide truth to some. To others that perceived them the avoidance bodes towards the phrase, "Those that forget the past are doomed to repeat it" On the other side of that the victors of history pass lives from parent to child in a cycle of well being in spite of the grand schemes and designs of society and government.

The false spreads quickly with those that find rooms a successful inner truth. Believing the lie can be easier then drinking or using drugs for some that can not perform in a world of forms and receipts.

The modern marvels of computer technology established for the distribution of truth, in that machine itself relies on the logic of truth and false to convey information deludes in such a pure fashion, skepticism on truth remains out. The saturation of the conveyance without countervailing

forces shows to all that the once one sided history paper shows justification with a plethora of computer blogs along the same line.

So to whom does the high tech lynching take place and what for? Those that perceive the truth as occurring in the home spread the big lie. The bloggers pick up the news and while the logic in defeating the position works for the truth seeker. In a home it can be laughed off as not having been heard. The conventional wisdom controls great aspects of life but not the electorate.

There's an old saying here, concerning interaction on the street, "Its good to be right, but not dead right."

To ease your mind, take the quiz.

You are on a hike with your group,

Someone you trust tells you a story about a fight or war? The story is believable.

Do you believe the story when you get home?

Do you take action concerning the story?

Do you not hear from the person or trust them?

That's just it, its about the story. The long standing belief that youthful visions of one bomb solutions so that folks could stay home and watch the Wizard of Oz (1939)

Love Story(1969) or Titanic(2001), if only bombs would make the bad guy go away show true today. The formula traces back to the turn of the century with President Theodore Roosevelt's war in 1903. Every 17 years our world enters into a war, The Great War, World War II, Korea, Viet Nam, The Persian Gulf War, The Iraq War.

In the time it takes to recover from a war, the return to idling leads the world to grow tired of flawless show tunes and odd tales. The return to comedy took time after the Viet Nam war and comics like Steve Martin, Robin Williams and others jumped on the way out comic bandwagon. At

this point you are not sure if the column pursues comic visions or war. The point being the TV guide knows no difference.

The test of who you were during Viet Nam was whether you could catch death, protests and violence on the boob tube whilst consuming a Salisbury steak TV dinner and not bat an eyelash. The fact that others do things can lead to quality television. It took many a good man to get us here.

Its all about the story. The message is the medium. Well done filet mignon tastes bad. You have ruined it. The horrors of war prove safety when paired. The purpose of the ultimate challenge breeds greatness. Diamonds are made under fire.

Bombs can never tell the whole story of war. Politicians can never give you a life with funds or speeches. Did the Dead Poet Society tell us to seize the day to prove what is was and will be a pointless exercise in education.

When someone mentions the fact that something is academic, it means it has been pursued ad nauseum and that delay in time in discussing the moot demeans us all.

Going through school by the end of a topic it can be shown the brilliant mind can and will destroy the establishment that showed the bright the two worlds, the real and academic. Called "Reducto ad absurdum" the meaning from the complex thought the absurd nature of the simple cliché rests in the story of the pair and not the ultimate ends of the noble in war and peace.

Prelude to Shock and Oy: Shock and Awe

Do you guys remember 9/11/2001 when the Pentagon was destroyed. Nice guys like B.D. did pushups.

To Kevin 82nd Airborne U.S.A.F who wrote on the internet and all others that needed to share there experiences.

From: W.D.M.

Kevin et. al.

In 1990 Kuwait was invaded by Iraq and as a Computer Engineer I took some note on the evening news as George Bush Sr. drew a line in the

sand. I have no formal training in weapons and munitions yet every time there is war my cable television plays nothing but the live battlefield.

In the 1960's and 1970's I had been asked to say somethings to the good people of Viet Nam daily and I got so cold one day I yelled Kill everything not knowing some folks in Viet Nam were simple good folks. The stress and the grind of non-comprehension of violent scenes with peaceful scenes still holds for soldiers and children of soldiers. One of the C.O.s threatened to show me every live war time explosion throughout my life.

True to word he did. The Marine corps and the Airforce ejected the Iraqi army from Kuwait and the administration declared success. The Iraqi's did great damage to Kuwait's oil fields setting them afire as they retreated. The plundering of other nations and ideals runs through the Iraqi political life.

I recall watching Kuwait city live on the monitor as sirens would wail indicating a scud missile was in the air. A truck depot was struck by a scud killing the individuals. The Al-Samud is more accurate but so is the Arrow II anti missile. The patriot missile was fired 70 times errantly during the gulf war with 5 hits and 1 deflection. The Israel row house was struck firmly by a scud.

In 2001, the Pentagon and World Trade centers were struck by Hijacked aircraft obliterating one side of the pentagon and felling the 2 tallest free standing structures here. We, responded first with the invasion of Afghanistan capturing detainees and sending them to Guantanamo Bay cuba. Next on March 6, 2003 we let loose with shock and awe with hundreds of cruise missiles, stealth bombing missions, carrier based aircraft assaults and a follow up tank column on the way to a three week take of the capital.

The predator CIA-Marine Intelligence Aircraft functioned expertly with tank response of targeting and assault long range. The RPG attacks with Cobra, Apache and Blackhawk helicopters with tow and hellfire missiles rocked many a world. The Marines took baghdad and the army no sits there. Each and every armed sectarian served in the Iraqi army by law and retreating home with IED's and rifles they sack the unsuspecting neighbors and peacekeepers who go by.

The Army here is kind. The flashlight, tentpost survival skill expert makes light of an enemy population wanting a job back home with peace and a story to tell. As the president says these folks have a terror network called Al-Qaida. They are on the internet and they are funded with oil

dollars. These oil dollars will follow each and every soldier home from this land.

Thank you for your service soldier, your work may never end. Its the journey that counts.

Aim High, Army of One, Be all that you can be. Unit Corps God Country hoorah.

Chapter 8 Shock and Oy

The cease fire in Lebanon took place at 03:00 GMT this morning. After all the bombs and rockets this will go down in the books as some border skirmish between age old combatants. Generals and majors happiness depends on the use of force occasionally. Strangely some couples fight just to speak with the therapist and make up with the family. In this case the U.N. looks like the therapist and those that remain hate the enemy and support the government for handling it. Just a walk in the park on someone else's land, the fighters press on.

In some countries the construction worker builds a house for someone else to purchase. The pride of the American builder is unsurpassed. In communist countries and Arab countries they build these housing projects because the worker claims he would only build a single house for himself and not you.

Pride, you cant spread it on bread.

Thanks hammers for all you do.

Anyway, on the Sony at the paper we look at some of the damage to high-rises in the war zone. The sides of these cracker boxes look completely torn off. But with hundreds of them life returned to normal after the air raids and bombs.

On the one hand building bombs and killing are wrong. On the other ruin takes place in an ordered society on a regular basis so having the end all plan seems really rational. I know people that would get an enemy and

make him dead in person but oppose war and bombs. They feel lazy killing would be the way the yin-yang would want it.

Formal and formal fighting seem like such hard work.

Anyway, identity theft that thieves from relatively dishonest folks continues with imposters cleaning out those that believe in genocide.

Thank you knowledge workers for pointing out how bad the genociders are.

The staff knows formal fighters resist genocide for the suits because it just would be darn hard work.

Funny how city people jump to the word kill for missing lunch money and stuff.

I mean so what petty crime happens

What do you think this is a non-Arab negotiating country?

Technology pervades our lives in both meaningful and trivial ways.

With the coldest man on earth leading destructive forces, typing this seems foolish. We proceed anyway.

CMOE leads a tank battalion in the Desert Sands.

Desert and Dessert are two different words.

Sometimes folks have Dessert in the Desert. In the Dessert Ice Cream fills the mouth and tongue with such delicious cold that the harsh life seems more tolerable.

The fight for Ice Cream goes on to this day. Do sectarian evildoers have enough Ice Cream? Does the Hot Fudge gap mean anything in today's world? What of the Dollop girls. Is the cream always sweeter on the other side of the mouth?

So this little palm thingamabob has a pen and I visited an ill friend. The nurse who provides the daily miracle for feeding the patients has this hand held device she writes the orders on which checks on the fat and salt restrictions then beams the order to the kitchen.

It looked like the same blue Jell-O and clear broth. It's the thought that counts.

In restaurants the in meal price could pop up. The chef could send IM on specials that run out and monitors on time of taking order and delivery could be tracked.

Lets get the Ice Cream there while its cold people.

The Coldest Man on Earth may yet prevail in one of the hottest places on earth.

Have you ever been possessed by God? I mean really possessed by God. Crazy talk on the column today proceeds normally.

Jewish doctors ease pain through the use of science. Modern medicine shows efficacy against most of the modern maladies presented to the physician. Small Pox has all but been eradicated. Tuberculosis is no more. And the great Dr. Salk a Jew invented penicillin. What a guy.

Dr. Kraus listens to whining kids and prescribes Ritalin. The band the Ritalin kids gained some notoriety for a while.

Did you attend middle school?

The test to become a Smith is quite simple. Take two objects a teddy bear and a hammer and ask the 3 year old. Which of these do you hold? If you select the hammer you are Smith.

Run through the letters one more time column man. The fish need to be wrapped for tomorrow.

Slime on Friday.

So anyway some faithful in the heartland prayed for me to see the light. And I did! God said you are someone's best guy I will summon some for you. Try this. They had fun around the castle when cake was in. Eat a cookie three ways whilst yelling squire. Tuck some of the cookie between your lip and gum for later. Always burp if the food was good to take seconds on a good meal.

Listen to Al Einstein when he says Don't be afraid of the bang.

Listen to Jesus when he says "I ate bread, it was the best part of my life. Bread, not pita, loaves of baked bread in a weave."

The disciple Mathieu slept with many women. He justifies it by saying to Jesus he at least spent the month with them to figure them out and grant them the wish of having something in a life.

I believe in blessed reading now. (I can follow along with my eyes and hear the words) Thanks heartland. The word Jew in the King James Bible can be heard so hard in the initial bless an actual Jew could not read the text. It has been softened in the reading by mixed blessed individuals.

For those who can take a description and see the scene as it were presented in a dream. Read the book of Luke. The first part. Luke looks to see wealth Jews entering a temple and describes what he sees. The perspective is as Luke. He could not afford the tribute so he could not enter the temple in Jerusalem. In my research. Modern Jews that see always see themselves as entering. I watch Luke from behind peer as he leans against the wall. Many say they are in like a window over the scene looking at it. Well as a say possessed by something, maybe bad schnapps.

Cave slime

When the New York Times printed God is Dead as a banner headline individuals lost nerve. Truth is the first casualty of war. Let the preface be to this work that folks have good lives. The table of plenty provides sustenance and good to the people.

This reporter has a never ending stream of individuals complain about lives far off. Let me give you one. This guy says I hate when 800 rockets

land on my train station and road to work and I would like my air force and tank corps to destroy everyone responsible for the rocket attacks. For 30 days now this guys armed forces have leveled a country. The U. N. on the other side was sacked and people blame this reporter for it.

I do not know per se why the U.S. and its leaders take the heat for unrest, and we welcome the power. So in this war every gas pump, market and communications tower has been destroyed. Your table is fine but you blame the leadership for war. War happens, make a profit on someone else's misfortune and move on.

The Iraq war continues with U.S. forces watching the decay of the poor Iraqi population. Given the choice of living poor or taking to arms supplied by Arab neighbors, the Iraqis have taken to the streets. Its not just that they are poor, their houses were leveled during shock and awe. The decapitation attack that removed the nuclear and chemical threat from the planet, left the poor Iraqis homeless.

U.S. policy must be to stay the course and relocate these street hooligans one at a time with arrest and processing one at a time with detention centers north of Al Basra. Every violator with a gun gets arrested.

Arab culture will tell you to commit a crime with an assumed name, an alias. The ID card can grant positive proud Iraqis like those living in the U.S. with an identity.

Iranians have taken to the streets in support of Hezbollah and the Hezbollah rocket attacks in Israel where 15 Israeli soldiers were killed Wednesday. Papers from one of the fighters were written in Farsi (The Iranian language) and not Arabic (The Lebanese language) For those that know maps, from the Mediterranean Sea it goes, Lebanon, Syria, Iraq, Iran. Those that worked the plans for World War III estimated it would take place in the Middle East.

Many fine lives were had in New York and Chicago during WW II. The same goes on today with the great war in the Middle East. All anyone wanted to do was have a great meal and a great home life. The jealousy led to 9/11 and Hezbollah rocket attacks.

Some nations got done to quick with work and provisions and attempt to steal the last mile with violence. The west, U.S. and Israel are on the side of right and in spite of attempts to assure the population that peaceful solutions work. The terrorist has shown he cannot provide the light of the mind necessary for peace.

So you say violence is wrong. So you say the aggressor Israelis kill civilians. You say the terrorists have been misunderstood. You are correct. The beauty of the terrorist is in his informal abuse of the system. I have seen the caves of Afghanistan and the remote villages of Iraq. That no one appeals to these individuals, proves remarkable. To kill an enemy would not be enough. To change his way so he lives in a cave would be the ultimate success. The educated cave dweller knows the basics here not in the ordered blessed city structure. Does it go in the pot or do you throw it at your enemy. That my friends is the education of your enemy.

Top Game

Chapter 1

Slime-Gate

Great Slimed Nation

OK I love my country. Don't cry whiner assumed. If you can get through the irony I will love whining less.

What did adoptive Jewish parents acquire for the end of the world. Remember I have just witnessed the largest Israeli-American-Arab war there ever was, so revisiting domestic bliss post warrior reminded of the escape from hell.

What did Bill do for Judy and Sheldon

Washed Judies panties, bras and slacks, ironed, pressed garlic, peeled carrots and potatoes, cooked full meals, vacuumed her floors, scrubbed her oven, washed her floor, cleaned the trash compactor, washed her husbands boxer shorts, shopped for groceries returning change every time, worked 3 jobs until 18 studied for a 1310 SAT score, paid for gas. \$5.00/wk, took her to healthcare waiting hours for barium contrast imaging to take hold. Upon her death she had an annuity of 1,000,000 she left Bill \$0.00. She abandoned this reporter for a John Marshall Law Degree J.D. 83 and a job at the state A.G. office. I always hated my adopted family but when your young she made you strudel as your dutch mother would have wanted. Looking back I have had no good things happen. If you can think of one let me know. The brutal attack by Sheldon in 1968 on Bill in his Santa Claus pajamas, led to the phrase we celebrate Hannukah so coldly I hate the holidays. None of this really matters save Hollywood and Washington recruited me saying you must have great parents to play with. They agree and throw slave at me again. Orphans unite.

Bills blonde and blue, after WW II the two smartest Jews bet my life against \$1.00

Mossad agent Peter Mostovoy and Louis Kraus have bread and butter together and say gosh Bill has not done any work in years and is a crazy criminal.

Bill went cold after Israeli torture so Peter could steal his Drivers License and kill him

They nosh and nosh and recommend strong drugs to him. Would, on any occasion they offer bread and butter to him they respond with why would you offer a crazy criminal bread and butter if you have not killed him with your head. The killing with your head routine has grown old. It means someone challenged you to put your talent where your big mouth was and go ahead and design something. I worked with the poor and affected counseling and preparing a pathways for tomorrow course. I am out helping individuals with public comments on the interenet and designing lives of the future. The site has successful things. Bill is a success. The saying goes "If you do not read the writing on the wall you are an Ostrich" Why do Louis and Peter value Bread and butter with each other and not the discussions on Mostosoft? Dr. Kraus has a prescription pad and lives off the state of Israel's 10,000,000 writing the occasional death note. Peter left home insane

at 17 learning cunningly that society values social notes of a prison family. Bill is from a prison family. His father an escaped convict from Russia registered as a spy. His mother a convicted felon hid behind her husbands gangster. She wrote bad checks all over town this Judith Byer Mostovoy Jewess. The Russki Refusenik Sheldon had a job to poison every American well. The kids that shipped to Viet Nam loved these two. No one could seem to take on that stupid American furniture salesman. People used to nod there heads at stupid stuff and Shelly and Judy would say loudly "What for and laugh at the stupid people right in there faces"

They not only were rude they were cold with logic. Treating fairly to them means suck the love out of the room and conclude in ways other than the way that had mutual love. 17 and on LSD Peter joins the Israeli Military and is trained as a spy. He does not really know what to shoot at yet this loose cannon seems like God to the remaining German Nameses refugees still refusing in America.

So Every day Peter gets on his cell phone obtained in Oconomowac Wisconsin with International enabled and calls Chicago to score with women of loose moral character to break and enter and accept a plane flight around the country to see if for fun they can steal an executive cell phone or check book.

Louis then is called and folks say, do you really believe this goes on. If you do he gives you stupid pills for all your money and the world turns.

So at this point the morally upright comrades of Peter who have been faking successful business lives for some 25 years or more come home from France or Israel after having stashed away some cash on an insider stock trade and leveraged buyout liquidation stock option deal and return thinking that law and social order remain what they once were.

The saying in these parts after one of these was "You left" and the fight remains in someone else's hands. First, the department of homeland security requires statements of protected and watched people to say hello to the spy. In France and Israel the emigres could not get the time of day and they begin to punish someone for being normal and speaking to the planted cell phone.

Those ionization pulse radiation systems that keep hellin g folks destroyed the ideal world these emigres think we live in. With great envy in their eyes they feel America held this paradise they are not in and could never crack.

That myth of the easy life, especially in the last 5 years since the terrorist attacks of 9/11/2001 insult and assault those that kept the lights on

during America's darkest hours. Perhaps these folks the old girl is worth saving here, then they say isn't she just some old whore.

So as a side note those individuals that are questioned about their finances claim a wealthy father. From the fatherland after a murder of a similar fellow a doctored autopsy and a flight to the foreign land for sonny boys next murderous casual.

When Judith Byer Mostovoy Jewess died she left a gift wrapped up in a small house on Hobson. She was terminal for a few years and went to the Tinley Park Mental hospital to find a older looking woman. She had her whiles as bad check passers are prone to do and taught her how to handle her husband of 46 years with deception. Judith fought for women's rights to kill and bank and set Peter and Sheldon up with plans so cold in this woman the results live on. You see if you are told as Janet was that she has LEGAL right to kill and bank and that she will GO HOME to the institution she will continue to kill Sheldon and Peter's life. The ultimate trust goes on to see if she did or didn't have a wealthy mother. By what accident of Birth are you wealthy working slave.

This man stole \$10,000,000 from Bill
 He is Dr. Scott Sagerman Hands Surgeon Alexian Hospital.
 He avoids taxes by using dummy accounts with Bill's name
 He took my hair. Rumor of 40 pounds heavier know the man
 The genius mastermind connects himself to a Swiss Banc in
 Grindewald Switzerland.
 He uses only Bill's home address to tip off killer spies.
 He uses spy camera and writes prescriptions that can kill.
 He has a hired gun for point and shoot.
 Good luck.

The Cell Phone phenomena proves that someone remotely possesses more import than one in the local vicinity. Walking down the city street one catches love, wonder, pain and anger simply by passing a cell phone user mid conversation. The cell phone company has created the perfect system for eavesdropping on one hundred percent of the U.S. population. Video Car cell phones placed in the dash record every drive in the land. Cheating on spouses would be down if people cared for public ceremony should people stop running away from those that tempt journeys on the bug. Hard recording system has been improved to catch every moment of the young Sony and Motorola player. The novelists in the 1970s knew that for

security there could be no secrets between the superpowers. The women broke the Penis -Gate scandal of the 2000s and the CIA could not compete with eBug-gate at the same time. Taking the positive results of science left the world with the dark vision that the end is near.

I fool with the computer in the meanwhile.

Computers and the slime ball:

1) Play Music 2) Video Game 3) Write something 4) Play DVD movies

5) Send and receive email. 6) Surf the web 7) Run Turbo Tax

8) Do your personal finance with online bill payment.

9) Type personal letters 10) Do mathematical calculations on a spreadsheet.

11) Fill an iPod 12) Digital Photography 13) Desktop publish 14) Personal Organize

On the post slime world

Deception occurs in life. Societal unit 010 -00-001 proposes numeric representations of life forms. The humanoid represented clearly digitizes the value of an integer. Processing of character based systems proved unworthy and slime ridden. How do you know who your enemy is if everyone has an id like 332-44-0065? The programmer will have no way to filter for you aside from your department code. Alright department 03 up against the wall, rauscommen swine. The religions 01 and 02 have passed unit 010 -00-001 successful scrutiny. 03 has a level of resentment at the moment while 04 bases itself in a country where poor people stretch to fit all available wealth.

Did you get the email?

If you care about a name, then you want to kill humanity. If you do not care about a name, Then you want to kill tradition. Either way multiculturalism in its truest form confused those that would care. Since 030-00-0110 sex 01 never returns her messages from any name its moot. Hey sex 00 have any of you received decent call back messages. My unit codes M01 and F01 insured calls got returned.

It kept everything going. Once everyone was up on the 9000 from AT7T No one called back as we were up on the pig

The young women trained in the U.S.A. after 1974 were trained exclusively on love making techniques. They have been experts in

recognizing cold. The goal tending goes on for the lucky few. The rest open every hole willingly for a fee. Television stations were set up extensively to train young women as to what each penis in America looked like and did. Each young women watches men and work and then in the toilet to see what each penis does. The reports on Mr. Bolton at the U.N is that his isn't cold. Mr. Clinton had an up close and personal. Mr. Bush has of course traveled and with security camera he knows his country women have seen his penis. Ladies is Mr. Bush a penis to you. The boys could not be trained so well to eye the penis. Not that they were given one. They truly are useless fodder in the war of attrition. I laugh hysterically at the reports of men who install cameras in ladies rooms for a cheap thrill. The ladies are so much more cunning with this theme. The emasculation of an entire planet nears completion with the useless pancake -ing of nice soft penis Iraq and Lebanon.

Hot talk in the desert brings some war penis and the ladies will get right on it. If your daughter wasn't lucky to see enough penis com, then she hasn't been elected to the master race. More then likely she will make spy somewhere to set up the next castration.

What did you need your penis and testacles for anyway? They just get in the way of good vagina.

Go Vag Go.

People opine on the relevance of being in the self and of themselves, not subjectively objectified wrongly.

Since we ate together what is inside should be the same

First things first, lets celebrate our differences. We have many new people of mixed blood. In and of itself to say human beings from varying backgrounds are mixed would be to separate what God biologically has allowed us to do.

Jews bought whores to host in vitro fertilization to replace 6 million dead Jewish nationals in Germany. They staked the whores and stocked schools until the children reached fifteen. They then went to Israel to work

as communications experts to Judge the health of the U.S.A. they are trustworthy trusting folks who believed in the U.S.A. the way it was. The health of the U.S.A. has been deemed poor. So what.

600,000 Jews from 10 countries may eventually make their way to Berlin and Poland to repopulate the Golebs and Kaminski's no one really knows why they need to be there but the U.S.A. remains cold to Jews on name alone, so the game goes on.

Differing folks physically have different skills. The mind which allows you to read this has areas for other things.

Childhood education was thought to be able to teach all children to Read, Write and do Math. To do this early developmental exams on a child to have the names of the family members written on a paper and simply pass the child as educated if,

They can read and comprehend the parents name, title and role in society with a written essay. Draw a picture of each family member. Solve the story problem. One parent gets 79 a day for three days and 84 each remaining day the other gets 10% less with one day of a week each of the two children getting 3. In three weeks how much does each family member have.

Did you care more about the sketch? Did you care more about the number problem.

The Slime report

Rachel's Army: Backed by newspaper boys of the fifties daughters leads the way in innocuous inconsistency. This is lethal during real war.

Cindy's Army: The daughters of vets terror squad continues to slime for international causes furthering the aim of truth, justice and dead Jews

Lisa's Army: The noble pig of destiny controls Mexican pigging proudly and remains the pig horse in the race.

Brucie Smith's Army: Remains forested anally with protruding protuberances possible in the nations mid-section. Brucie does what Brucie wants. Brucie uses Satan, correction Brucie is Satan to protect non bliss - breaking small creatures.

Roth's Raiders: Continue to smoke grass at record pace

Sons of the Philosophical: Care in who we kill remains paramount.

Republicans: Security will not be compromised if it kills every last one of the security force.

Democrats: Slime makes an excellent voting base.

The war in the world ultimately boils down to who has the best women. It was thought in the 20th century that having the best stuff (excrement deleted) would win. Now its best female to female loving opening. In women's communism men fade off as soldiers to kill each other dead while loving vaginas live with the eDong of their dreams. Do you know Wong Dong.

Bombing missions continue block by block in Beirut. First 30th street, then 29th until city center, with no cease fire.

At first it was a laugh. The year was 1979 and Iranian students burned American flags with glee. The chant of death to America rang out throughout Iran. Iran sent missiles to Lebanon where flag burning continued at Lebanese U.N. headquarters Friday. Without anything but negotiations from the U.S. delegation hundreds of protestors link the U.S. and Israel with the chant death to Israel, death to America.

U.S. and Israeli forces now take this threat and challenge to its conclusion. Every Arab in Lebanon, Iraq and Iran will be shot dead. The rules of engagement are clear. You want to kill Americans there one is with a tank and rifle. You want to kill Jews there is one with a tank and gun. I spit when I say "You want to kill Americans, here is one in person" Say it you maggot.

There will be no negotiations with terrorists. Your death warrant has been signed. The merchants of death
USMC and IDF

Happy death totals sports fans for Iraq
July 6,000 Enemy Dead (below quota)
The War 125,000 5 million light.

Lebanese displaced and homeless 1,000,000 out of 4,000,000 the starvation should be a walk in the park.

No humanitarian aid will be allowed. Toys of a generation say a lot about the youth. The young had a toy called "Slime" and "Green Slime with Worms" This column describes modern sliming by those that had no wood or clay. I miss the Iron Wills. I made it. Did I tell you Asians can't see well and tell you two apart. They have trouble flying jets as well. What if you said Solly anyway.

They do make good security cameras for others. READ THE ENTIRE WORK.

Since passive aggressive behavior takes the last shot. Passive aggressive persons win. Lies to passive aggressive individuals produce guilt free kills.

How to win as Bill

Photo of an individual compromised.

Identify modern vigilant eagle women.

Produce false homeland security papers justifying her reports.

Produce telephone number, grocery store and bills

Tell her phoning stores and neighbors will be required to check on the subject.

Watch the fireworks as neighbors and vagrants are requested by the government to get in the shot to prove the subject lives where he says.

Make sure to get verbal responses 24 hours a day 7 days a week to insure non hostile behavior in the subject.

Insure the subject can not get employment through telephoning of all stores the subject enters, including corporate. Heighten the security guards awareness a violent predator with a pattern of violence will be making repeated visits.

Insure the vigilant one that they or others, may break and enter to check for weapons at all times. The phrase, "Security must be maintained" should be said firmly.

Watch the TV for this...

The United Nations met this week to discuss current crises throughout the world. The representatives are known to have a position backed by the

will of the people within the lands represented. The will to power expressed as the only drive became the textbook of German Philosophy. The will it is said drives the control of ourselves vis a vis the control of other lives. The will to power across the Arles to the Seine meant that through thought and perception one had being. In a time a royalty a name and self was given by the royal not via self actualized thought as Descartes suggests. Regardless of how one finds oneself, either controlling through self control within the self perceptive model a sense of equality to groups and the grouping one finds forwards the democratic process.

Divining goes on in the Middle East, and China. One's name in China might as well be laborer for self thought would never pervade consciousness. Divining in the Middle East would be done not through labor but through forced prayer and self flagellation with hopes one might be divined by Allah, not through Gods manifestations on earth.

The Jewish side relies on the wind and will to trade with respect to each soul being named by God. To take one life it is as if to kill the entire world, it is said. To push a society to its forefront the leadership relies on the will of itself to protect her children. The belief in human life, economic life and religious life rests heavily this day on the U.N.

Social ills beget terrorism. The reliance on magic from God provide self interested false justification for terrorist bombings. The dismay that bombs fall shocks only the leadership. In Arab lands it is said "Gods Will"

Television was invented by Philo Farnsworth in the early twentieth century. The world bet on RCA, the leader in radio and David Sarnoff to lead the way into the new era. Philo wound up miserable and depressed on a small strip of land in upstate New York.

Today, the sets look great with high definition and stereo sound. The accessories for playing recorded films and TV series ported to disc have reached the majority of homes. Soon DVD players will change to account for high definition television and the public will have to find a way to get these new machines.

Television programming must show something of human life. The shows reveal characters from varying backgrounds and social levels. The impoverished person once made noble by fine television treatment appears wealthy and successful to the viewing public. The impoverished have access to television and have learned critical thinking of actions of idiosyncratic wealthy individuals. Cunning characters do not fill time before the evening news to the impoverished and international. They provide how to guides as to what crime lives in our cities and methods to pursue this crime.

Each family wants to believe of itself as having an angle on the world so successful that pride in the family and family name live on. The easy life and a family evening with the big screen can be justified with some quips about the impoverished who live lives of social service, fabrication and public performance.

Each life that appears before the well fed observer can be played over and over again with false meaning. This process, known as falsing has been the watchword for modern life. The comment on a program that "That is how you would feel" (If you were human and had human emotions) has become quite common. The advantage of falsing would be security. The ending and the kiss that take place are assured.

Universities, once palaces for the brilliant achievers in society have produced nothing but "falsers" for 20 years. Politicians live for the nomination speech balloon drop and wife kiss on national television. The great society produced great visual images. Those that know its just TV win.

Chapter 10

Abstract togetherness.

A man sits in Berlin wondering about the final solution. He knows the good in people. His family witnessed the brutal depression which gripped his region of Germany. The Jewish family thrived during the depression. With capital and connections in the reparation seeking France, goods and

investments could be made. German culture on the piano continued. Hitler selected this man, this footnote to history for the SS. Hitler could not get into art school. Hitler could not see through financial hardship for those with petty criminal records. The SS officer had no need for petty crime and hit men, yet he believed in German culture and purity just the same.

Should the final solution occur, thoughts of idealism never occurred. Thoughts of a depression with no Jew to cross borders with cash and goods did. Had Hitler listened, six million of the finest collectors in the world would still be speaking German with some Hebrew. A language called Yiddish.

As it happens the SS officer had at his disposal some of the finest Aryans from northern Germany. It seemed rather comic these strapping 6 foot 4 blonde blue man, cut from a cloth, briefing his local shop keeper on how to be German in New York and open a store.

The goal was to keep enough cash flowing from a delicatessen to fund a program of democracy to unseat Hitler. The program is thriving today in a chain of Bagel Franchises called Eisenstein's Bagels.

Lets use all of our resources, Jews and Gentiles, Rich and Poor, Black and White to make our collective greater than each individual.

I see perhaps Nick Nolte and Woody Allen in the film version.

Turning water into wine seems like a miracle. Qana over in Lebanon after a few bottles of Gods finest convinced the scribes God turned water into wine here. Technically the wine grape absorbed the water and the grape pressed and age turned into wine ergo God turned water into wine. Some like to think of God summoning the Angel Bung to switch the water and wine bottle for the Qana residents. God also makes it rain fire from the sky on occasion. Sixty nine Qana residents suffered Gods wrath for harboring Hezbollah terrorists in the past.

Operation Iraqi Freedom began with shock and awe, a decapitation attack. The German media scoffs at this new technique believing the blitzkrieg was first at this. The Israeli response to Hezbollah missiles was the Shock and Oy, followed by the Shock and Acch response in leveling the

Lebanese infrastructure inflicting 10 Billion in damages in 19 days and setting the Lebanese back 30 years. Without gas stations, bridges and passable roads the Lebanese population remains crippled.

The Hezbollah militia never cared about the local population. They look clearly like soft target victims from the guerillas who take a house with a shed to fire rockets into Israel believing in the soft shield cover. Israel said no more as Israel's soft population suffers in shelters with death tolls reaching near 100.

Don't let stress effect your quality life. The Russian s may bomb Baghdad yet.

Chapter 11

Jerry's Theatrical Robot

Tell the robot to phone the doctor.

The academic models life through verbal and numeric acuity. To know that to have a quality the object relates to the space in which the object lives. The value in knowing what limits the possible expand that which express progressively. The painting may have a corollary in three space. The painting may depict a scene impossible in terms of location of objects with respect to physical principle s. The assigned truth value of a well formed formula which truthfully reads false contains value in data modeling of artificial life. The well formed formula models a world in which the subject verb object syntax follows logically yet the given object is not acted on by the subject by the verb in real sense. The camel threw the snowball. May be a well formed formula although camels very rarely live where snowballs are and throw would be most difficult, and yet the sentence stands as a possibility for wh at might happen, in the world of all camels, the world of all weather conditions and the world of all projectile stimulation.

The casual passer lives freely. The synthetic retiree partner being proposed may be the real use for synthetics. When the phone rings the robot answers the phone with a mechanical arm and exhales into the phone so that the recently widowed might hear the sound. The robot might suggest medicine. The robot might ask if a call is to be placed to a doctor or family

member. As for the robot deciding what program to watch, some will, some wont.

To keep a geriatric patient adept, adroit and cared for advanced synthetic processor robots need to find there way into the home. Bob from accounting is getting that way now. Rule based systems he maintains produce better cleaner lives. I respect Bob. Bob is reproducible.

When the nation went south.

We have great opportunities with modern technology to bring life where tumbleweeds once roamed. Both Atlantic and Pacific coast cities have been choked with the Babylon syndrome. The tower of Babble stood in Babylon modern Iraq in biblical times. Each person in the tower spoke a different tongue believing his sound traveled right to God from the high point. Many believe the world trade center was the modern tower of Babble. (ed. Babel) The tower fell.

Three areas targeted for growth here include the triangle Dallas - Houston-San Antonio
Atlanta-Charleston-Raleigh Durham and Phoenix-Tucson-Nogales

These areas have a remarkable similarity of individuals who believe technology can support life on what was once a brutally hot and arid environment. With modern methods life not only goes on it thrives without the philosophical approach of whose voice rings true r to God. As I have heard it the similar folks just believe it of themselves.

The coasts in newly recognizing the capitals plan for development need to send some college students and graduates to finish at Emory, U -T Austin and the University of Arizona from any East Coast University, U-C Program or Stanford. Regional efforts need to be made in the geological sciences, materials, water reclamation, organic chemistry, biology and the arts.

Recruitment of realist painters and artists in small numbers of about one hundred per city in an art institute setting adds some culture to elevate those that live inertly much of the time. Innervating while level the cotton and oil business, the nation supports the business of producing well citizens.

Let national efforts continue to educate from the good east and west and let terra forming and cultural shaping take place well.

Could I get you to say You Betcha.

Enlightened Self Interested Greed

The focus in politics and economics revolves around the well being of a population. The decisions made involve research into what smart decisions individuals would make. Collectively the world valued intelligent design towards the ultimate end of a better world in which the leadership could function. The closed loop system involved a lifecycle program in which intelligent functional modules of life collected in regards to clean efficient living. In human terms we fabricate goods, use the goods recycle the waste and limit pollution while making wealthy the executives and workers involved in the product life cycle. In the past a company made goods well although they polluted the industrialized rivers as in the case of Lake Erie and down river Detroit. The Love Canal ecological disaster in New York destroyed thousands of lives with a chemical that the land will never heal from.

We face a great challenge today in terms of the end result intelligent thinking human. The cheapest goods produce the most waste and satisfy only the immediate need. Pulsating images and taste shaping may lead to a controllable citizenry the leadership can package a sound bite to but the ultimate goal of an intelligent decision making public fails.

What the leadership fails to realize is that the intelligent consumer always self satisfies over all else. Supply and demand dictate the value of greed. The newscasts that were revered by previous generations look pale in comparison to the real economic report on the Hollywood style reporting programs.

The world produces enough goods to satisfy the intelligent greedy individual. Soldiers fight in a world in order to insure greed. Workers sacrifice there entire lives to satisfy greed.

The world faces a challenge by those whose greed by necessity would be religiously fundamental. Fundamental harmony with human nature leaves the leadership with the basic assumption question?

Does the human form function with greed in lieu of God?
 Leadership in democracy and fascism controls with greed.
 Leadership in Islamic fundamentalism controls with God?
 Does the Religion play a role in the modern democracy?

Fear not the communist's math. When the math works and communists do much of this everyone has?

Communists are Dark Horses? Sometime s they win. They always cross the line.

The reporter is not communist. Ok he does want you to have an iPod with Beethoven. Ed.

International relations never operate in a vacuum. The Middle East flash point shows that neighbors with long standing disputes shoot guns when tensions erupt anywhere in the world. Many religions base themselves on harmony and peace with nature. The Tao teaches harmony and to look out for unrest.

Here the Chinese American clubs have become quite large with many reaching into the hundreds of thousands. Many feel isolated by mass media. Chinese people do not make quality television for the population here.

Expectations of government provisions of an ideal life include media pacification.

The nipple-less child kills the well fed and well bred.

When aroused by others on television self defeating turns outward.

The Tao's self defeating nature produces oneness amongst a population.

Without the self there can be no media pacification for the population would already be pacified, and as said the TAO defeats the self for the

balance. Television can therefore only be used to upset the balance and harmony of a perfectly selfless world. In a perfectly selfless world each life means nothing.

When Americans stand up, any American from Japan, China Europe, Africa or Australia we say our lives mean something. We wouldn't be American if it did not.

China preferred to listen. Japan felt in seeing a culture Japan could evolve. Japan sold China visual life.
China will change

Many religious lash out with fear that certain populations are the devil. To comprehend what is meant if you are not faithful, upon hearing someone mention it do not change your life. It may mean you are free of the curse of an afterlife.

Deviling does not mean dogged pursuit of a victim. Predatory sociopaths have no value in today's world.

Note:

War for oil makes everyone care about transportation costs. This simple modification can lead to efficient designs for electric vehicles. The pure mechanical idea looks great. Ed.

I wanted to get the joke. Everyone had one during the Nixon administration. Some felt we should go to the moon as these hippie Martians had the world well covered. The world settled down as IBM employed many with Microsoft a dream in Bill Gates eyes. Opinions and jokes make solutions. We rise to be our best when we are met with challenges. The reporter was challenged to a) build a car as I loved to drive and that only wasteful people take advantage of others work to use up the worlds oil and pollute the air; and b) to make a wonder of the computer. Well in any event someone put a bike on a cart and my diagrams are being used to make a zero pollution car let me post two carts for the record.

Now who wants to be the Bill?

Bill works out in Chicago, LA and New York. An avid athlete and academic life's challenges bring out the tiger in him. All connection to reality tenuous meaning all characters fictional. The work remains property of Mostosoft and licensing for distribution is mandatory.

A novel about rich and poor. Happy and those seeking same. Strife for those with means. Strangleholds on power and the sands of time eke out the cobra that the middle east and terror bring to those who eat from the tree of knowledge unfairly. Knowing what you know the humanist island awaits. Do you have what it takes for Top Game?

Top Game lives in the intellect. Top Game lives in the soldier. Others cry and wail with want. Others play top game. Live free or die no more. The stakes of covered bets rules the land. Pop a door and say good -bye in the block out zone.

All characters fictional This is a work of fiction.

Introduction:

The world watches with glee at each scandal that unfolds before the public. From the Clinton affairs in the White House to several members of the House and Senate being exposed, the public judges matters of state in regards to the observed failings.

The prurient gain glee in an obsessive way, from sexual matters observed on another. Sexual conduct and misconduct occur in all areas the powerful survey. Those that created high speed data lines for transmission of information allowed the nation to survey visually the leadership in compromised positions sexually, and the public roared with approval.

From film stars exiting limousines with forgotten panties to men's room attendants being flirted with by senators the prurient patriot lambastes each exposure and denounces the once elevated one. The roman coliseum held the thumbs up and thumbs down on the life of a gladiator for certain, however in this case the Ceasers and the Senate become the hunted by the prurient patriots who through love of state and selective exposure destroy the good will in what brought the tops in class to Washington and Hollywood.

The fact that Hollywood leads by example and Washington leads through government checks and subsidies makes little difference.

The homeland security department wants the country to live safely. The homeland security departm ent realizes that the camera installed in an airport lavatory may catch a bomb maker headed for an airplane. The insidious nature of bathrooms would be that with the body out the noble look base. The base human eats and goes. The extreme human adds thinking and sexual relations.

The prurient patriot waits for exposure and a chance to record sexual activities to report to the government of their party as evidence of crime. The thinking on society must end in the partisan wealthy prurient world, as the independent agents can never come down from exposure from the mass sexuality in the land.

The addiction to in home monitoring and the sexuality led to the collective reasoning that pervades the finest minds from the finest most prestigious universities in the land. The women that observe to judge America from Harvard to Brown think sex and prurient patriotism won the day and that when your viewing and sexual insults for the day have been recorded, you enjoy your cocaine and do the same thing the following day.

Prurient patriotism won cold. Catch someone in bed with those planted cell phone style cameras record it and blackmail them or use them in porn films. That's the word from each and every ivy league women graduate from 1985 to the present. Enjoy the show ladies.

Chapter 1:

The essential nature of philosophical thought that the will to power and government rests with the connected conceptually lead the vision for the republic. The republic space defined firmly with border regulations led to the nation state republic inclusive of defensive structure poverty ridden lives. The defensive structure lives order through the powerful body weapon dual.

The power struggle in the civilly structured gainful payment barter life in the promotional past bodily strike force technology through willful dedication to just killings allow the upward spiral age decision structure deemed wise through the ages.

The furthering of the cause and effect method of education whereby misstep avoidance with explanation vacuously ended search and conquer models for self constructing. The policy of openness concerning early

partnering defeat for individual mid -life power eliminated power seeking. Recognition of leadership in the world created demands on the individual to further conservative causes.

The value of conservative causes ran counter to the liberal cause socially in relation to demanding a position on drug use of all potential leaders who attend accredited education programs. The drug decisions, along with the sexual decisions, define the nation of self power hedonism in which the world finds itself. The self reward system accounts for successful people. The mid level engineering specialist who enters the fray with medical credentials sublimates the power assigned through improper mule riding in the definition of autonomous government.

The ass whipping the driver of the coffee bean purveyor applies to the ass in question not the society of animal rights activists. The furthering of show government goes on with the lack of respect for the world wide military alliance in opposition to the health care fake of the real world.

Two types of individuals defined by the academic world since the academy of science spoke on the issue in 1776 lead to today's dichotomy. The internal physician entertains that one body contains the ultimate answer for the world where the operational philosopher with interactive brilliance define external forces on the body as the answer to the mystery of life.

If a God rests inside your body then denying the world your God shows the selfish nature of God through the individual. If God rests in the body and one creates with the will of an individual to link other individual God created an object for furthering the Godly aspects of life.

The method of a creation in a selfish God, defined devil to others, demeans the God that may not have rested in the body but been destroyed by bombs.

Operationally the just destruction through the means and of the means devil out creative external God like creations. May the best horse win.

Chapter 2

The terrorist age of the 21st century began on September 11, 2001 and many began following the news more closely. Soldiers and war took hold of the American psyche and some died.

One woman from California lost a son in Iraq and launched a protest on President Bush's front yard in Crawford, Texas. The woman met the law and the judge and faces charges in the county.

I believe in America and there would be no way to tell this tale without including the Homeland Security department. In the terrorist age wires and broadcast transmit visual and non -visual information to Washington. Sadly other countries figured out the Homeland Security department could do the work of foreign nationals without setting up information collection on their own.

So I watch with my Homeland Security pal for discussions and entrapment purposes and we are watching the Crawford episode and plain vanilla CBS evening news and suddenly the Russian Agent yells from some satellite, "Who is this peasant?" She...was judging from the hay bales and wooden structures with old thrashers parked on the side. I knew the Bush's were wealthy for generation and there is no answer other than a shrug.

I wish I could have put her in the room for the story but my TV seems to have the Bill On-Demand feature with some live hookups I can't beat.

On the ranch you sit feeling large with your rules, your horse and your rifle. When someone approaches you judge their size. You know a big horse from a pony, a large bull from an average one.

The size judging that goes on with the insiders of Washington with computers, cell-phones and book smart matter very little.

When one perceives a land as great it appears great. Those that support the Bush doctrine support the great land and great people. Let us be great and not confuse ourselves with compromised negotiated settlements.

Chapter 3

How one votes depends on many factors including your wealth and your crest. The Republican Party supports the economy of the wealthy, which by virtue of great corporations pay respectful workers in a trickle down manner. The aim of the Republican leadership through eased restrictions leads to a greater society with opportunity.

Republicans tend to dress well and act in accordance with a persons standing in society. The candor and expectations placed on the Republican can be exacting. Republicans do what they are told and expect the same from others.

Republicans know where commerce takes place, who is involved and how to shake a hand. The system works because of the Republican effort of respect.

The Democratic Party supports rights for people who never seemed welcome in Republican clothes including respectful women, laborers, union members and minorities. The Democratic Party believes in giving people a fighting chance. The Republican Party believes through religious demeanor the chance should be left to others.

The Republic stands at a crossroads in many ways. Many travel from the university to take on new eagle challenges, expecting there old homes to remain the same. As one who had to move back to the "old board" (a reference to a monopoly board of roads) I see decay in infrastructure, thought and respect for tradition.

Those new boards look good to us back in New York, Chicago, Cleveland and St. Louis with the knowledge that the wonderful developments carry around an old image in their minds eye of these once great wonders.

Those that grow cold to the mood based comments here miss that the electorate and the fighting chance people have grown mobile and may ask for something of your life in return.

Those that care, care well within the greater good. The candidates welcome the role of the chair of the organization. The divination of the

collective defeated righteous insolent indignation with order, care and vision.

The great society allows for free trade, open travel and opportunity. With the defense of each organization through modern means each citizen gets care and comfort.

The great leaders allow for growth and modest change each year. The swift change that the telephone allowed the public accounts for some disconnect between allowable change and what looks already changed.

The leaders in the land live in the capital. Each comes to the table with an acceptable basis for the community. When Hillary Clinton speaks of healthcare reform, she may feel the poor should receive healthcare in spite of dollar redistribution. Home rule in many communities states the harsh free market economy line that to see any professional one must pay. When one looks unhealthy and unwashed society profiles them as aberrant. The lost souls lived in America forever. In the 1920's people waited in soup lines and the same occurs in the year 2007.

If you drive through a major metropolitan area near the salvation army you know the issue of poverty in America goes on. Those that live the medical life maintain that once healthy and dressed they will be bums with clothes on that never deserved a shot at humanity.

Unfortunate as it seems the cities and suburbs now get flooded by the wealthy of color who maintain decadent lives created the permanent underclass.

The word freedom meant great things from 1862 through 1974. The word then changed to mean freedom within confines. If you lived freely you abused the social good. If one robs the world of the input of the said person by being high or drunk, that person puts forth nothing in the realm they once held.

In small places it looks clear. If the waitress gets high, no one gets food at the night diner. In the city the vast nature of other things offers a negligible difference in who will or wont add to local custom, in a welcoming or watchful way.

Those that work for reform allow for personal contact. Those that man and mine data warehouses sit in judgment to trap and foul new found opportunities.

The game goes on. This model worked in 1974 popping kids and sending them to Viet Nam or the graveyard. In today's world the city population created millions of savvy fighters with bodies and guns laying in wait in the disrespect judgment war.

The rule of first disrespect goes on. An international economy in financing unrest through funds for poverty crime continues at a record clip.

The nature of who will buy this next election goes on with the knowledge that it's not who disrespects first but who disrespects more violently.

The fine focus of the educated led to the great society in which we live. The goal of efficient clean living space realized in space leaves room to ponder future lives. Political thought evolves in relation to the philosophical and religious ideas of the world. Globalization involves the harmonic approval of ideas in relation to oversight.

The needs of the many meet the needs of the educated in relation to the scale of the society. The socio-economic distinctions merged with education on one end and substance abuse on the other.

The rights to comment on others became evident with the cable television station plethora. Everyone loves television and picking the right show. With one special and an old Perry Mason on the choices and fine insults grew thin.

The social evolution led to packaged foods which led to the denial that one can make a red sauce from tomatoes themselves. Brilliant Harvard educated MBA's reel when they hear this.

The separation from the land allows for rocket ship propulsion technology discussions to appear normal. The latest communications devices allow visual realizations of ports near and far.

The quote: "An unexamined life is not worth living"
 May be replaced by "An encompassed life is not worth living"

The generation that set up products, marketing plans and fair uses for products will always encompass those that attempt fair use. With every contingency and use of life's goods and services one acts on the stage of life.

If one feels worthless then one acts irrationally towards established thinking. If established thinking valued interpretive skills then the video monitor plays correctly. If film conveys the true falsehood the journey represents irrationality, questionable thinking and immorality.

Imagine a closed system such as a hospital. A patient enters through the emergency room or through doctors admission. From this point on every fluid, motion and procedure take place in a way that may never be altered even with the fiercest of traumas.

In an airport, you have check in, security, shops, lavatory and air plane boarding all well managed by systems personnel.

The kids need a cookie because as this is written they keep whining what's wrong with it in an amoral way. The relativism popularized by Einstein in the 1930's led to today's respectful relative merit life we have lost in relation to counter napkin dispenser soda fountain sipping.

The words suggest a comment on the human experience in relation to the thoughts behind them.

In a systems based world speech may be duplicated. Brains states and operational ability remain the questions for geneticists.

The funny part about the child in question who wants his cookie would be he feels there is a Mr. Bush that acts differently then he does. He feels after three times on his TV he can say anything and it prove s amusing. The jealousy greed and lecherous behavior of the youth tends to reveal the nature of the new breed. They have either fork or gun. The argument being that neither looks cold to you in cold as you live cold. The fork takes all

available food out of some ones mouth and the gun merely shoots someone dead.

Chapter 4

Everyone knows elections reveal the popularity of a candidate. Each candidate takes a pool of money and spends to convince the public of their popularity. The question of what to buy remains the candidates' choice. If it took one dollar for one vote then 56 million passes of a one dollar bill just about does it. The candidates showed up in droves for Bush in 2004 not for any great love for the big Texan but because they received large cash payments as the big rancher, big farmer or big software vendor in town.

Films were made of these big bosses in town and the town went with the big guys in town. In America the super rich enjoy vying for public power more then any other nation on earth. The ability to control the agents of homeland security makes a super prize. In an era where warrants need not be issued to investigate telephone and computer transactions, whomever controls the top ring in Washington controls the banking and commercial lives of the American public. Many lives smeared in good faith in Washington carry the banner of freedom.

Tom Daschle the former Democratic leader of the United States Senate sent this reporter an email detailing the smear against him. Hillary Clinton speaks openly in debate about having to deal with "high negatives" due to intrusive behavior on her personal life.

These Democrats put forth patriotic effort and the pilloried alternative shows strength through the muck raked world.

Yesterday, I read about warrant less searches and a young girl age 10 needed an explanation as to why people "from the government" should not have open access to your business dealings. I enquired as to whether any boy in school had given her trouble and she said she did not like Seth. So I explained Seth's family was richer then hers and that upon completion of her projects he would go in to her house without her knowledge, write his name on the paper and project and turn it in with a grand smile on his face.

Suddenly she wasn't so sure people should take part in these illicit behaviors for the betterment of neither. Try hard and make some decisions in an enlightened self interested way.

Everyone on the take suggests that personal payments show self interest until they need a service from the government. Together Everyone Achieves More (TEAM). United We Stand. God Bless America.

Chapter 5

The country decided to support individuals who live entertaining lives vis a vis Hollywood as well as healthy lives. The purpose of our society involves planning for illness and wellness. A nation born of slavery and wealth management created livable strata for all who dwell on the continent. Those who create software, cars and computers showed vision for short term wealth creation and sit as warriors on the verge of the ethnic cleansing bubble. In a woman era objects lose value. Women want health and entertainment. The total dollar figure estimated by the government supports all efforts for hospitals, insurance companies and film production. Agriculture and food production will look like the slave labor of the 1800's. Japan and Germany create the objects and the North Americans play for a while until someone harms them.

A bridge collapsed in Minnesota today. My research tells me no women would think to create a new bridge. The bridge to a woman comes toward you bringing unwanted guests. To a man the span goes ever onward providing new spaces to conquer.

The corporations go on of course with the aim of showing wealth and health through financial management. A computer and desk job look healthy and well. The product of the company remains unimportant to all. Microsoft for example remains one of the finest financial services companies in the world. The world envied GM for many years yet GM laid off 50,000 workers in the last two years and only lives to one day create promised military hardware.

Most people, and I mean this love the healthy showpiece we have become. Everyone gets to take a turn and no one gets hurt at work. Advancement and change as well as college education will disappear entirely. The relevance of the campus and thinking punish those that accept healthy entertainment wealth management.

If you have nice clothes a nice car and food in your stomach you think to judge. Colleges produced judgmental people to separate good ideas from bad in interaction with society and the corporate world. In today's world the judges want to eradicate evil and those that have had health crises. Unfortunately the vast number of non financed people and international support people also judge and violence and crime ensue filling all available jail space. Should one think it could happen to you, life changes.
Bill.

Chapter 6

The loons on loon lake all collect the moonlight. They shimmer and shine and listen to the putter of the old converted row boat. Each time the children cry the loons fly. They say only one pair of loons resides on each of the lakes in Michigan. Lost in the fog of night the ducks quack and duck into the muck.

As this is written hundreds of decoders wonder if the ultimate attack will be launched from this station. I hear them tapping and typing. How important has humanity become that ending everything depends on each and every evening. Do terrorists or bomb worriers take nights off.

The computer afforded rapid communication. The facts of life remain, Bills book "Whats in the game" said so many things about life and the nation no one bothered to read it. The squawk box puts on a man who says the same things and then you fart, go or eat.

Peter simplified it grab your gun or your fork with the news and considers himself a man of action.

When you kill something that held a superior mind you take from God.

My noble side says so.

My Jews fight on from the stomach and accept Mosses went up opening heaven for all.

Hope the gearing example works better for you then fork and gun guy would want. You see I have no explanations for the two other groups (fart, eat, or go) (Gun or Fork) that make any sense.

Are professorships dead in this land or just under the gun?

Toilet Paper Toilet Paper Toilet Paper Cookie. (Singing women go through the day here quite happily)

I am considered a player in the game of do it yourself presidencies now. Unintentionally I ran into a national trend. For a few thousand dollars you get the laptop, the flat screen television connected to worldwide information and international telephone calling. The book presidenting for dummies remains optional.

Like any president you get to move dollars and troops to accomplish the goal of crushing your enemy. Many use handles or aliases for names, while others use names like George Bush and Hillary Clinton.

Sometimes the game gets foul with the poor and criminal being called for crime on a political rival. When you are seeing the spade in America you are seeing some ones bad luck card. My African American friends say it might not be bad we are just luck

The cooped up non product driven president lives with no oversight. The innocent behavior in town does not escape the security camera connected live to the local president. No one really knows what edge someone takes in life from the drug store however I would be put off if I went to see someone and they just out and out ask how I enjoyed my Chunky bar.

Who are they to know I have a sweet tooth.

The big military still works for the commander and chief, his people feel the subtle and not so subtle stress when used.

The world seemed to misplace those big eagles for awhile. I guess I always knew they would appoint themselves something and see how it worked out.

Chapter 7

A Speech for the Political Day.

During cultural revolutions current leadership homes burn with the flames of the anxiety wrought upon the land.

First let us make sense to ourselves. Next let us make sense to our units of community.

Next let God and all humanity into decisions. Lastly National borders and countries deserve vision.

We remain well when unchallenged.

The challenged live in the cycle of violence and the nation hangs in the balance.

A wind blew through Washington after 9/11/2001 that said "Why should the kids have it so easy?"

Recruitment went up and millions found a cause. The cause created the challenged life which spiked the cycle of violence.

What war do the children know? Do they walk on busy streets? If you were ignorant to danger and war you looked helpless and obvious since 9/11/2001 about 6 years ago as of this writing.

Had you been in New York on 9/11 or near a TV that still had news you were aware of the changes of life. If you were in Baghdad on March 18, 2003 you were aware of an escalating response.

The resentment issue holds two options;
one leaves it open

two make real gestures.

The divide between rich and poor exciting and homey culminate in our time of openness.

If you live well you desire your states be cold and permanent. If you have struggled you wish to throw off your shackles.

Slavery goes on; share cropping goes on, oppression goes on. Revolutionary fathers wanted representation not lording. At this point we have neither.

Any rational government is superior to no government. Corporate executives need heed it. Government obtained a first name through television and corporations supersede the once noble efforts of government.

With financiers eyes our republic is strong. With the safety of our soldiers and weapons our military remains fit.

With a humanistic eye constitutional democracies limit not freedoms. With capitalism still fooling millions of workers the evil demons of corporate executive fold await the final kill of free purchasing. Food and housing gobble 80% of the workers budget.

The world makes sense when local issues work.

Best wishes to the democratic co-presidents.

Chapter 8

Channel One makes winners.

Most television in the U.S.A begins with the number two. Over at CNN kids in school tune in Channel One to defeat their old people and internationals fixed game.

Mostly the network introduces subjects with hello and dispenses them with goodbye. Those pesky details matter very little in a world with internet search engines. Creating opinions requires words.

The selfish hedonists being raised by collective hedonists at least have not lost the power of speech. The downside of this loss of speech remains senseless violence and drug use.

Many channel one viewers state rebel numbers are not as high as you think but they can and have put a stink on everyone and everything. The collective hedonist had a position paper on her side. The isolated hedonist has a remote device.

There will never be a day with nothing to do here. With 10,000 song iPod on the counter, video on demand movies 24/7 and computer games from Sony just sitting around who needs love of community and cause.

So Whats changed? Kids watch too much TV. Kids use drugs and play pinball.

What did Channel One show of the American Villain after 9/11/2001? Some questions came forth on construction of something and some after destruction. How long were the trade centers to stand on the New York shore? The builders felt they would stand forever. The ages of enlightenment follow dark ages and the cycle to create an age of light post Second World War lived with proud economies. The lazy thinker can and will destroy enlightened persons each time presented. You see the enlightened want to give everyone choice and doubt the lazy thinker will decide to take everything given and destroy the giver. The lazy thinker believes others should do charity, others should care for the city well being and others should defend our shores. When pressed the lazy thinker has attitudes and final solutions called magic bullets for all of society's ills. Many today formally argue for the dark ages including advocating positions on lynching and segregation.

The sophists, (one day you will look up who they were) destroyed the Greeks and the luddites with attitude may take on the technically motivated society we live in. A few million may tune out; it's a matter of seeing some

people as just spare parts in a great world. In the dark ages no one feels bad about those that fall through the cracks.

The literacy rate in the U.S. reached 50% today. Amongst those under forth a whopping 60% report never having read an entire book. Reading and writing skills deteriorated so rapidly since 1990 that the trading of sentences seems like the greatest insult to the uneducated.

Some illiterates possess knowledge of cold that the educated could never grasp. With no explanations forthcoming that the words and title of an individual

prevent you from using your vocal stylings in that way led to the lost generation warrior.

In a military study of the young, a warning message appears on a weapons console saying directly that any unauthorized use will result in you being shot dead.

The text shows up a firm and strong officer repeats it to the trainee and within five minutes on homeland security the subject presses the assault warning for

reasons known only to the subject herself.

Homeland security involves judgment calls on valid international business and homeland security risks. As one intimately involved with the training of these

subjects the homeland security system lost to the incompetence of youth, not lack of vigor.

Without reading law becomes moot. Without written skills, the paper the homeland security agent intercepts and takes to the reader who asks questions on the "good nature" of the subject and finds they "did something wrong" proceeds to liquidate the beer drinkers assets.

The nature of "good" and "evil" relativistic ally lost to Dapper Dan's stolen personality law.

May the video game be with you. Bill is great. Bill is good. Send Bill your money.

Chapter 9

The world communicates well with satellite transmissions and ground microwave transmitters. As for what individuals speak on truth lives in the mind of the beholder. The average person thrives on three hundred words a day. The great Superbowl quarterback "Puts it up" and "Gets up" for a game. The number one at the fast food joint contains enough calories to feed the body well.

If you update to Windows Vista and Office 2007 you will find a translate button when you highlight a word. This dictionary can have you eating fromage on beef on that number one. The book must be in French or something because reading on the second city bus everyone cracked up.

Sure things look bad sometimes during the terrorist era but so what. Did you catch the 10-14-232 joke combo on channel 42.

The President wants you to have your America. Phone your sons baseball team mothers. Phone your daughters volleyball and swimming mothers. Love your gymnastics squad. Support the band. Have a great time.

The only thing the world wants from you IS your NUMBERS, and occasionally your key.

If you could live with your one small block, one small community, one small world model of life your view goes on much as it always has.

Blame CNN or something.

I thought I would run the photo in its large form for a few days. The sick look you see reflects just about a part of every day of a reporter during war time. Some times there is not enough time to eat or sleep. The show must go on. What's in the game is a good book in the whole thing. I slam

away at everything and by the end you laugh and say the one or two pages someone looks bad makes sense in description. Had I said something else I would not be me. -Bill

Baseball went to the gun in 1979. The speed gun that measures the velocity of the baseball ended the game for many and changed the type of arm necessary to throw at the major league level. The Jugs gun as it was called could not only measure velocity it could heat up Anchorage in February. If the gun was behind the hurler the velocity was greater not due to error in gauging the throw but in pulse push speed increase on the pellet.

Jugs and bullet guns kill individuals. Coaches fall over dead around intense eye in the sky Jugs guns. Those bullet ones cause so much blood.

Back to baseball: The sneaky fastball with setup pinpoint control with great location win as in the case of Greg Maddox and Mark Prior. The blazing speed of Kerry Wood, the epitome of a Jugs gun hurler gets the ball up there and made it on a speed only basis and arm troubles plague kid Kerry's career still. Mark blushes I am sure at the thought of his heater not getting up there yet the difference in recognizing the talent and spot location before the tool make him the stopper in the rotation.

Curiously once harnessed the fastball pitcher relies on the hot and cold zone charts published by the scouts while finesse spot up pitching relies on the cross hairs between the hot and cold zones.

Talent and personality remain a part of the game and with international wealth focused on the pitcher as the only key player on the field, the mechanics of the slow curve rely on the talent of knowing someone else knows the mechanics of not knowing when and where the pitch will drop. You see if you catch or pitch with someone you can know where the pitch will be when you face it. The predictability of an Ichiro world led to many successes with training on the video scouting system from the Mariners.

Play ball. The books a homer, download it and print it. You're no laugh all the way to the bank.

In basketball the role of each player reflects the mood of the coach and management as well as the fans. The people of Rutgers University put a

fine group of woman's basketball players on the floor for the scrutiny of the AAU and NCAA. As an amateur athlete one works at the craft of the sport as well as the job one hopes to find in the working world. The gladiators on the gridiron and hard court run, jump and slay the opposition much as those who toiled under the hot Roman sun years ago. The mind of a gladiator in the professional ranks tends towards the preservation exclusively of the physical aspects of the body in relation to the mental toughness to arrive at the Stadia on time.

Coaches offices often become plastered with comments from opposition players, coaches and rival commentating fans of life. The mood based public responds in an as like fashion to all those who proceed with mental sharpness and identity with players on the floor. Mr. Imus a commentator on MS-NBC and a local New York radio announcer focused on the less than ladylike actions of players in regards to the "Ho-Down" feel his cowboy hat perceived as professional malarkey in regards to student athleticism.

The response from the press corps stems from the identification with the proud weekend warrior basketball player who carries the facts and figures of life more proudly and prominently then displayed by these so called college student athletes.

For whatever reason Mr. Imus and the NCAA involve the media coverage during the woman's NCAA college basketball tournament and interest includes financial stadium filling. Advertising and marketing pressure bring to bear an economic development movement the impoverished hustling yummys can be proud of. (Young Urban Mommies) The black urban professional model fit with the topaz ring set who completely agree with the ethic once reserved for Oreo chomping 12 year olds.

The laying out of facts in the hopes of aiming a true vision and perspective from the Don Imus's of the world show the visceral, cunning attitude of light, tight and bright defense forces. These forces never become saddle sore or tired of perennial visions of tainted delight pasted across our every moment.

Dons face looks like it has seen some weather with cowboy hat perched on his head in the studio and a matter of fact attitude on what things were called before time calls one to ride the range full time. The fact that none of the Rutgers players referred to themselves as students and accepted at times money for sex fooled Mr. Imus into calling them "Ho's." None of them attended a class last semester.

Defending a manner of speaking, ranks high on the list of a culturally based society. In an ethical world the speech dictums further identically the role of pure speech. In the defined hypocritical world the methods of Don and the stations which carry him ring truer to form in free speech rather than ethical and joyous sandwich cookie delight.

After all the anthem at the game reads land of the free and home of the brave, not land of the guardedly optimistic and home of the cautious.

Chapter 10

People love control. Global warming and the global positioning satellite system and Johns Hopkins in specific desire control over every formerly random event in the world. After all one hiccup or rainstorm changes the course of history. Baltimore sits on Americas eastern seaboard and one can drive to the nations capital in a few hours. Maryland and Virginia surround the capital entirely.

Al Gore a former Vice President and Senator from Tennessee must never have gotten the memo on controlling the intangibles. When digital appliances know where you are microwaves pump down from the sky with the earth surface covered. High resolution C-T scans from space can warm a body 10 degrees F. in the dead cold of winter. Many in the north no longer put on coats to walk between buildings in the winter.

If you have any cold on the continent, a desire of many, in room x-rays can give you your inner pain forever or at least until you change your political opinion.

Microwaves on satellites heat the earth. The U.S.A. owns the most space hardware in the world

Al the outspoken leader on this shows his true champion for the planet and all of us. Many say each individual pulse means nothing. The cumulative event caused rain events and 60 degree weather where formerly 32 would have been an outrageous heat wave.

Lets give global warming at least the scientific merit that evidence suggests. Greenhouse gasses with radiati on from space affect our lives. Many feel the benefits of warm are what people want. Others prefer there latitude and temperature. Events such as floods and taxing of electrical grids for air conditioning exacerbate the situation.

To the non scientific I must ask "Don't microwaves cook bacon in about 2 minutes?"

Chapter 11

Can you think of anything more boring then George W. Bush politics? George Bush does not have politics he possesses weapons. The armed and dangerous pistol shooter proposes no better life then stooge for Bill Gates and the elite robber barons of the Texas oil mob.

George lives with his stupidity daily. He can not tell you what anyone does in government, he can not read a newspaper and he cannot comprehend television without talking to the blessed thing.

In Texas the only fun thing after shooting something would be drinking and bragging about it. The republican who still thinks you can say, honey fetch me a cup of coffee lives on a reactionary hair trigger.

The law breaking Texan snorted so much cocaine at Laura Bushes apartment complex he got spy bugged into marrying her and making like he could read and write like the then president George H.W. Bush.

George H.W. Bush the former leader of the CIA dealt with every player the world had with the long game on his mind. H.W. lost to Bill Clinton and the sting of a one term presidency left him with the dream of behind the scenes trouble making.

First, H.W. lives with integrity. George H.W. Bush played fairly and the world went unfair to beat him. The spirit of Prescott Bush through the son George H.W. Bush lives gloriously with the life of riley want for the public. The epiphany of the moment in Bush makes life worth living.

The influence peddling around the Bush makes the difference between unlimited grape Nehi and shooting the six shooter pistol recklessly all over the world. If a Bush feels well it matters not that bombs fall and criminals die uneducated with needles in their arms. That's just too bad for them.

Under Reagan many things happened of this nature with the knowledge that American Business would pull through the emotion based presidencies of the new century. Bill Clinton worked policy in recent history better than any president since Kennedy. Nixon worked is sued to justify a Bush style life end game.

When a policy of death and destruction emanate from the white house, no legislation or law changes the Bush doctrine of hanging the death row inmate.

Those that get got, in Bush doctrine live with the knowledge they must fight to the death the negligent sin of omission death as well as in the death by police and profiling.

Taking someone on in government meant analysis before action. Those that present policy annoy Mr. Bush to the point of tails being placed on cars, taps on telephones and threats on the children.

The person did want education, healthcare or veterans benefits for their dead children, however such news ruins a good Bush personal attack during the evening for his amusement.

Two weeks into shock and awe Mr. Bush had not seen Iraq and asked me, "Isn't it just a piece of scrub?" I figured he assumed the oil business had land such as his near Midland Texas. Regardless Mr. Bush the Tigris and Euphrates housed the cradle of civilization and Baghdad remained a trading post from the time of ancient Babylonia.

As for the blind trust in God above to ride in a limousine and never have the nerve to admit culpability you have Mr. Bush cold. A politician without a day of morose wisdom, a day of going without and a day of reality shoots his population for he wonders why the man and woman's slaves do not acquire a fine meal and clean the house for them.

A curious George loves the land and nature and accepts death as part of life for the other fellow and not himself. The abstract normalization of life ended logical issue bartering for finely pixilated endings.

Thank you for your time.

Chapter 12

When President Bush called for World War III to the reporter on June 15, 2004 the hope of an end to the crisis in Iraq faded towards the hope of a come together on July 4, 2004. With the sets of destiny established the final solution to terrorism involved the movement of resources to safe houses equipped for long duration occupation.

The enemy containment and operational ability maintained the President attempted to cover the grave of the intelligent non -knowing educated with the impoverished technically trained banking and food murders.

The operational issue of building 225 fine new f -22 aircraft completed with the addition of the hidden multi load sidewinder missile showed the code named raptor program packed the militarist dream of air dominance. The remote aircraft the predator gained a gun during the war in Iraq. These brilliant machines fly into enemy airspace with surveillance cameras and telecommunications equipment that steals radio and television signals for full remote video attack capabilities on televisions and computers anywhere in the world.

The confidential military communiqués function through over sea circular orbit high flying unmanned aircraft. The AWACS, advanced warning aircraft system operated during the gulf war with radio operators manning circular radar scopes directing hundreds of sorties per day.

With the unmanned the personal satellite intercepts mean nothing. Private secure networks insure the success of the worldwide military alliance.

The street tops remain the game for the dead. If you play the top you die, by military justice. The military government answers to no individual during war.

The unmanned team with a strike force can and will defeat any White House, Reichstag, Parliament or Duma. With lightning quickness the destructive political has been suffer at the mercy of teenage diplomatic neophytes.

Tell the president to work on his own problems.

To catch a criminal you must operate exactly as she does proving your life of crime and accident of year of birth fool you into the false hope the brain washed visual splices provide your mind with fodder for your ancestors glory. She wronged you this machine and the alliance lives for your end politician.

Chapter 13

The Sony computer with the small screen and video camera left the world at the mercy of the network of closed circuit television operators.

This keyboard rich Sony can auto-focus on any person in a guarded situation including war zones, naval vessels, military bases, prisons, jails, airports, seaports, truck stops, restaurants, convenience marts, grocery stores, hospitals, schools, government offices and businesses of all kinds.

The children who have the password from the homeland security agent can use tricks with electric voltages in these facilities to bald, starve and disease the captives. The beauty of the system, the internet links which the operators tap into rely on any internet hub anywhere in the world and can kill any citizen in any facility in the world anytime, including the White House.

Innocuous gestures to a cook that a citizen requires no salt when in fact the salt basis matters to the person before a meeting can tip the balance of power.

The clock radio in most homes possesses a two way radio style button so that executives can allegedly check on the sleeping in of the novice staff

member. They all get used to create body analysis and sexual functioning records for firings and assault.

In and of itself the elder stateswomen may have a point in checking on a grown child. The murderous go between who envy the daft parent child groping steal most of the pornography and have extorted the nations soul.

Block the Infrared Eye on your tv set for a moment to get a what are you doing.

Chapter 14

My name is George W. Bush,

I thank you for coming out today. In our land of the free and the home of the brave in dividuals live with the knowledge that care and compassion live with our conservative ethic. We may be free and we may be brave about stepping out each day into a world that comes to our shores each day believing the sneaky can defeat the forthright.

The honest truth about life in these times is that to preserve yourself in your home you present something other then the subject some prying eye would like of you.

As president I have held every eye in this land that stared to freely at the people wit h greed, envy and lust. Our people loved every one in this world with the greatest goods we had. At this time it has come to my attention a phrase that is used over in Iraq.

Once you let a camel into your tent he refuses to go out in the hot sun.

This lesson proves out daily as ambassadors from Africa, India and the Dessert sands of the Persian Gulf stream in to see the beauty of our America.

Each and every representative at the U.N in New York speaks openly of being from New York with the hopes never to return to the sand pile from which they came from.

In Washington I know the sands and scrub of Texas, I know how much loving kindness goes into Lemon Sugaring the water and tending to the Char Grilled Steaks. Not a kind Texan lives in these Dessert Sands. There in lies the gift of America. Not to diminish a lemonade steak grilling man but to celebrate with love Gods kindness to us.

The self inflicted pain and torture the initiated live with there lend credence that the whip and slave will be expurgated yet again with the leaders that know the civility in civil war, not the degradation of slavery and oppression.

Not only will I let my people go, I will turn them loose on those that deny kind and the gifts of the land.

Thank you everyone. Take care now.

Chapter 15

The bombastic nature of the Woodward and Bernstein book concerning the Watergate break in cover -up would be the reporter's lust for exposing the flaws in governmental power.

Personal power meant standing out to be sanctioned by government since the first hanging of Benedict Arnold as a traitor during the revolutionary war. Arnold believed he would fight for a while then cede power to the English lords. Those that served the U.S. armed forces in Germany during the 1970's felt the same way about the units that trained and fought during the Viet Nam conflict.

Each and every U.S. General who traveled to Germany felt the superiority of the German soldier and way. The way in which Mercedes hand crafted work and engineering detail were handled led to superior soldiering and order keeping. Those men rule the military today.

With shock and dismay the leadership of the military today relies on an attitude plain as it might be of “Don’t you want to blow something up” The leadership both welcomes and turns the other way during the times of actual shooting war. No soldier in the military anticipated the turning on each and every rifle with the release of every name to every thug worldwide. Jim Nicholson did receive his slap on the wrist for the release of the names, addresses and medical files of all former active duty soldiers but with no real aim in mind as to who would want to enter a life of certain death in the U.S. military.

The American task masters of German males since 1946 goes on today with the American city of Frankfurt Germany housing the soldiers of electronic war from the United States. Direct flights from the U.S. to Frankfurt ensure American task mastering of your business in Germany. Those that fly to Holland and train will find a different Germany for certain.

The American C.I.A bought Bernard Ebers transatlantic fiber cable to link England to his home in Bel Aire. He defacto California -ized all of Great Britain with this data transmission line. MCI-WorldCom folded into bankruptcy and Mr. Ebers sits in his 10 Million Dollar home (reports of 10 Million more in underground wiring and security persist) while the holders of MCI-WorldCom stock find themselves without their investment in the firm. Great Britain can call the U.S. freely and destroy the soldiering and professionalism that once went on here and the opposite remains the goal everywhere from all of California.

The C.I.A. jails the press refers to go on all over the world. Once the designs of the facility look fine people accept them as hospital and professional style buildings. Picture an office where folks come to work with one door locking from the inside with cots and a break room and that is what these jails look like.

Often a phone is offered for wire tapping and personal “health care” monitoring of the local population. Every country got up on the act with Colombia running Riveredge Hospital near Chicago. If the city uses so much Cocaine you all must be crazy.(loco)

Most travelers from the U.S. are told everyone speaks some English. Those that refused went to the C.I.A. jail and learned some.

So the question of the traitor and the U.S. on the table remains up to the individual. Once the world decays into the theory that the other nation will seek revenge to settle old scores secret Mossad, Yakuza, Russian Mafia or Deuce Jail goes on.

The cunning nature of the lab coat gang shocks no one. The nature of the Geneva convention where lab coats and medical bags rang impartial show the laugh at today's aggressors, Lab Coats and Women lead the attack on humanity.

This bold statement appears on face ludicrous. Would a person trained to comfort and care really harm a decent person? The obvious no rings loudly to you and I, yet the video slander shown to a beautiful lab person errs every time. When the lab coat hears the person shows such skill in language and math and turns on the just such as yourself the lab coat always kills cold regardless of the actuality of the situation.

Doctors used to be old and wise. Today doctors live a vibrant active killing life. Doctors that know how to administer lethal injection fetch a high price at the international secret C.I.A. jails.

The effort to stop this is insurmountable. When every trained physician knows every Doctor and Lawyer must kill each one would be susceptible to the ill treatment she has just prescribed.

Once Com has you Com has you.

Its not Jews, Its not Blacks, Its technological stardom that did care giving in.

The great part about the medical life is the abundance of healthy hearts to try for your home transplant Frankenstein unit.

Chapter 16

The permanent dole system for the elite continues to break the economic and intellectual might of the former United States. The now divided land sits with two coasts a collection of states known as the P.S.A. the Pacific States of America left the United States in 2006.

The brave men and women who withstood the attack from California grin occasionally and seldom divide smirks with the live audience. Since your life is not filmed before a live studio audience you die a death in time from California.

No one actually lives correctly in California. The star hide-away housed a persona called upon to act every day the part of another to escape the stage coach marshal on board. The reckless Washington federalist actually believes these actors will work to save the homes of the marshals who ran them off the land in the former United States.

The laws in the P.S.A. differ dramatically from the U.S.A. for one if your neighbor commits a crime in California the reward of plane tickets a Hollywood contract and a gun follow. In Chicago, big guys beat the individual up and run him ragged in solitary at county jail.

Many do go to jail in California, including some heavy places such as L.A. county jail and Pelican bay. The Atascadero state hospital houses Charles Manson's Ghost Still.

The criminally insane in film do well on CSI: New York, CSI: Miami, The Profiler, Crossing Jordan, Apocalypse Now, Commander and Chief, The West Wing, E.R. and many others.

Back to the dole system the free entertainment society created from the P.S.A. A man for sale in the U.S.A. fetches some 50,000 at the age of 21 say and the foreign national that tracks him pays the Jew 50,000 for his life every day of the year. The company watches him and films him in the hopes that one day he will fight and commit crime for the films the audiences starved for. Should he stay home he proffers wine, women and song for said films.

If many nations purchase the same 50,000 player the individual firm receives a check for him and the remaining cash goes to the sales person.

The video producer and salesmen bankrupted the intellect of the nation with war like efficiency, the P.S.A will never change.

The kicker to the piece must have been the homeland security checks to 300,000 imposters for 40 billion dollars so Californians could kill for second houses based on "Real" homeland security video, whatever that means.

Stuff your slave trade where the swallows return to or whatever.

The battle plan for the destruction of California in the lower 48. The parliament of the C.S.K met today to ban California from the wire transfer clearing house for electronic films. The digital print era provided a simpler distribution method for film and the end of film meant the end of the payment from the C.S.K. Movie palaces bring in 90 million to California each week based on the sales of the top 10 grossing films. Chicago seized 18 million dollars over the weekend with projected steals over the summer of \$1Billion Pazoosas.

Notify your movie house about this and see who the California bug is on the thing. When the guy comes a calling shoot him.

The national security agency under the Bush administration changed the way international slave monitoring functioned. If you travel as an American the government can electronically monitor the phone and television in the foreign country live. The film quality rivals film stock and every hotel and club contains a security camera for world wide web linkup.

The matrix of who cares about an individual and what post processing takes place relies on the satellite transmission operator and receipt logging for official distinction between "spice" bugging and legal proceeding operations.

The "spice" of life includes the kitchen spices and the bedroom hanky panky. The living room television monitor bugging confuses the public. The public watches the screen and assumes a government official locally arranges to portray images on which loyalty and love can be placed.

With the at home monitor watching a parent or child in a remote country on a lap top the television network and computer network show the loyalty to the high program monitors discretion. The levels of bug to big bug on major events proved catastrophic during the post 9/11 terror attacks in New York and Washington.

The cause celebre of embracing the change as righteous anger for displaced rivalists from the beautiful albeit wasteful blasé suburban realm leave the action seeking shake up artists weaker as a nation and stronger in capture the fools actions ways.

The die suffering pig fool may not be audible to the religious right prosecutors of kill other fine religions for personal satisfaction yet the world knows for the game of war remains the opportunity to create new products and line the bank account on the wages of the slaves.

The bombastic adventure of finding a worthy intellectual challenge in world home habituation left the competitive ornery thorn bearer few options save the node anxious delivery system. The node angst wonder kinds the self loathing others perceived in truth for forward rest motions in the upward spiral seeking returns in kind for ever the pure reason led to truth resting self completion in day modeling. Lest the toting challenged fool hardy intellect challengers to truth in reason through objective subjectivism on memory totes show the collective wisdom reductionist knows the present presupposition on absolute true memory files rings false through and only through memory access reasoning denial.

The assumptive nature in symbology through the challenge then rest release model for reward protection diminished the nature of truth carrying to the basket weaving search engine of the head top processors available today.

The particular brand of head top processors indicate that you show the clown processor the actions of the successive under clown functions in the banal circus weaved through lawn bowling metaphor toting.

Bill

Chapter 17

In an era of mobility the question of good citizenship arises in regards to the gifts the city state creates through intellect and forged dedication. On an orchard the apple seems free to all that wander by. Those that live near the apple orchard take freely from the tree and enjoy the product. Those near an automobile factory in a Midwestern state often wonder whether one who suffers the noise, pollution and congestion of the plant should lead to free automobiles for the surrounding area.

The concept of the “Good Samaritan” in the Bible dictates some sort of exchange based on the will that in God’s kingdom products that promote life, and descend directly from God need be exchanged for the words that indicate one accepts God’s kingdom on earth.

The Devil lives in the details. God provided food for the inhabitants of the planet in religious thought. The thought that the grand coincidence of evolution produced food and that humanity created the God concept by which humans evolved to know that life forms need food and through enlightened self interest we create a God’s world paradise so we might sample the offerings.

The concept of location, distribution and payment remain the details of which the phrase makes sense. The transport of ADP energy from ATP energy through photosynthesis would be known as God living in the details. The comedic satirist points to the instructor who nevertheless devils the creative geniuses who care with exams and written recitation of the discovery of God’s will and magic.

Those that wander in from an Orchard want to walk out of a “grocery market” with an apple every time. They laugh at “Cider” and “Apple Pie” prices at the market every time. That laugh seems to have turned to envy of the banker in today’s world. These folks that wander in with farm products often take advantage of city dwellers with poison and diseased personality tricks to settle scores between educated and conflicting city dwellers.

The careless disregard for humanity these farm Samaritans play diminish the hard working product developers and safe nation builders the military calls on to defend nationality. The theory that on any stretch of land city folks will come and break up Mary Ann and Steve from the county fare remain remote. In the city sometimes Mary Ann spreads rumors and

doses Beth from Boston for a laugh and goes home. Steve steals stereos and returns through the back roads and laugh at the fools in the city.

This sounds like a great life to many. The one thing people on the farm did not have was television star production and salaries. The government made sure to get them metal farm implements. The subsidy program funds these lives which now have cell phone , computer internet, digital television with dish network and high technology city automobiles along with a truck.

The international war New York, Boston, Chicago, Seattle, San Francisco and Los Angeles find themselves in need to pick a farm town a day to have the internationals visit. Thank you for the apples and oranges. I mean that.

Chapter 18

So inventions in the world change something of note in many areas. Many that desire to see the future first acquire entry to design labs world wide. Those that profit from underpaid labor desire the hands for the work. Those that care to defeat idle inventions for personal reasons sit and fold there arms for the medical community seek lives that repair Gods great gift, not create tools and art for which he may operate. Those hospital caves created with the noble virtues of medicine place residents of terrorism on the wonder and goodness of science for the sake of genius.

Most doctors do not want to hurt people
Television and the killers

How doctors killed America

One Take a walk by a junior high and pass out 100 porn magazines a day for 3 days.

On the 4th day slip cocaine in the porn and request payment or else

Follow the group for 4 years onto college
Do this at the sophomore year of all U.S. high schools.

So you have cocaine use become 100% for all U.S. teenagers with sexual knowledge

In the porn magazine you have next to the beauties words that say
“Only losers care about government and soldiers”

“Readers are government and soldiers”

“Repeat to the largest 8th, 10th and 12th grader”

“Who are you to say this”

“Pass this on big guy”

“Did you know hitting with a rock right above the eyebrows at full
force
Kills.” “If you can get close you can kill.

“Everyone steals from stores, it just takes 10 of you to walk in and
cover well.”

“Don’t do your own neighborhood.”

“Whiskey steals best and fetches a high price.”

So now you have screwed up kids who won’t fight.

Next take 100 mp3 players with music that suggests cold, fear and hate
towards establishment, feed those 100 mp3 players meat and bread daily.

Take 15 mp3 players to a house you want and start painting the exterior
when the person of the house leaves. Take the house by force and keep the
100 inside.

Once the housing is established push the base to supermarket link with
autos and follows for stocking positions in the supermarket. The salaries
earned will provide groceries for the 100 who will ring the suburb with
100,000 or less. 20 city blocks make a suburb.

On war, offer cases of wine bottles and drugs to rival gangs. Give it up
model over fight. If perceived as easy bad strudel can be employed to drop
the enemy.

Materials analysis and inventory in the town first and foremost provides the basis for the bad strudel.

No new structures will be erected.

On detection of new home construction the young must find the land use and take the developer on.

Which disc did you get.

Chapter 19

The United States of America won the hearts of the world with ease and theory.

The theory of ease conflicted in the twenty-first century with the theory of equality.

The ease of each avenue of assembly and idea led to success and failure depending on the applicability, timing and skill of the applied talent.

Survey questions on the nature of reward for talent frighten the new Washington as much as the Far East regarding new inventiveness with financial power. Washington Post reporters labeled these regimes as repressive.

The brain drain in the United States allowed those that practice totalitarianism for year's openings for intellectual, social and moral assault our land finds itself in.

The defeatist knows her life won. The end of the logician in public life led to the finest interior regime the world has ever known.

Those that live in palaces always hated the best porridge lives and the pain provided led to the great war of the twenty-first century. Most people like it.

Chapter 20

From the horses mouth truth arrives..

Change takes time. The nature of the eternal return of the same in regards placed defeats of empire reconstruction rely on swift placed indicators.

The eternal return of the same, proposed by the Nietzsche, the philosopher, entertained all of us who believed that at life revolved around the will to power questions in us note the nature of all actions. In many eras the individual did not put forth ideas concerning her actions. She lived in an era. She passed on what she new to the next era.

The theory that an unexamined life matters not left the shining of light on every dark corner. Should life matter to the individual not putting forth the will for her own power? The potentials she made may have given strength and sleep; the mysteries remain psychological in the perception on each within the biological expose and reasoning to the community.

The care given for the women's chemical reactions confuse the women. The cabin player waits for exploitation from the will to power knowledge broker. The true power in the self remains in the reflection to will to power from the French state of being philosophers.

One that concerns oneself with state of being finds revulsion in Nietzsches' world. The Dutch paint and the English defend the crown.

Establishment of power in each generation creates the cause of the day, war. The German fight with the father and the saint like acceptance of the identical year street criminal remain the American ideal. Russian communism formalized the year based war theory. The identification with the father remains the confusion Marx expressed through the religious fallacy of the father being the opiate of the masses.

Chapter 21 - September

Packing out, left the banked switched nodes passing messages of digital encryption with quick sense and intransigent foolishness.

When passing a message to Seattle from San Francisco the network can route the message to Phoenix. Those that desired the message find reassurances that the communication did not matter to them exactly and someone in Phoenix needs it in an official way.

Individuals and individual companies disappeared this year and the world cheered. Those you see on a day reward you and those that send messages from afar only confuse you.

Business relies on giving your nearest competitors and other countries your parts list, your distribution schedule and your computer network passwords.

America relies on equality and fair treatment of all our stay at home government workers. Those in offices should not get smarter than their mother and companion. Every time that phone rings bad news and responsibility could get into our safe place.

Every place the stay at home government knows has everything. Business only takes away from the great life of driving out for lunch and coming home to our great stuff.

Everyone knows the world can hide out in well built cold houses we just need to remind those foolish profit takers working for "slave cold (paper money)." The stay at home government should have given anyone that matters that sunshine paper (account money), so that credit card gifts for weddings and baby showers can go on.

Some young jerks just don't get it. They have been given everything and should act like they should and watch TV and listen to the father.

College eating and learned snoot take part still and that works for all of us. Learn to eat and drink in school and leave the profit taking to the snob slaves.

One thing though, the phone connected two people years ago. If you do by chance get a message on your machine, could you reveal that you do not return messages and it is nothing personal. Most people tried some profit on business years ago and forgot to remember young law means real things to real people at home.

(You can fool most people so I might not be fooling the fool not the fools import)

The personal information manager (PIM), allows individuals to record events and schedule a life successfully. Those that know what the boss does to feed a craving steal the PIM events for very scurrilous and unscrupulous actions. The clone machine generation begins to clone the master more aptly, more ably and more perfectly each year.

Mr B.G. Head from Seattle writes.

Now you and I both know the system gets out through Centrino so what do you want this poor guy to do with internet stuff on his end. The system grows cold to you when you deny Microsoft the rights to your bed. If you never worked here you don't know this but if you do you do. I went around the land to see who had the best bed work and found you do. If you have the best bed work you get to live here in the finest city in America. There is no crime or adult behavior permitted.

I can't live here forever as the world wants civility in demeanor amongst the worlds' population again.

The thought that people can live without one basis in reality demeans this skull. After all who wrote the first program in the world and what did it do.

A funny story from last night occurs at this point Mr. B. Giant Head.

A man wants to score with a lonely divorcee. They each have had their problems with love so the programmer gets some courage up and offers 6,000 dollars for one night with the lonely one. He only asks in return the ability to write programs for her forever for \$100 a day. He begins and lives with her analyzing her needs and creates her perfect personal life manager.

She sits there to this day waiting for the wake up timer, the coffee maker signal and the noon lunch break alerts to keep her attuned to her high-tech job. In the afternoon she begins with the pick list of questions for the programmer. The drop down menu offers

Who "did you think of"
 What "did we/you need"
 How "did that happen"
 Where "is that place on TV"
 When "will we do it again"
 Why "do things happen the way they do"

The program does some things at this point and she makes some notes. After a while the set of answers and pithy dialogs create the internet TV show Dongle and Ed.

The world watches with glee at each scandal that unfolds before the public. From the Clinton affairs in the White House to several members of the House and Senate being exposed, the public judges matters of state in regards to the observed failings.

The prurient gain glee in an obsessive way, from sexual matters observed on another. Sexual conduct and misconduct occur in all areas the powerful survey. Those that created high speed data lines for transmission of information allowed the nation to survey visually the leadership in compromised positions sexually, and the public roared with approval.

From film stars exiting limousines with forgotten panties to men's room attendants being flirted with by senators the prurient patriot lambastes each exposure and denounces the once elevated one. The roman coliseum held the thumbs up and thumbs down on the life of a gladiator for certain, however in this case the Ceas ers and the Senate become the hunted by the prurient patriots who through love of state and selective exposure destroy the good will in what brought the tops in class to Washington and Hollywood.

The fact that Hollywood leads by example and Washington leads through government checks and subsidies makes little difference.

The homeland security department wants the country to live safely. The homeland security department realizes that the camera installed in an airport lavatory may catch a bomb maker headed for an airplane. The insidious nature of bathrooms would be that with the body out the noble look base. The base human eats and goes. The extreme human adds thinking and sexual relations.

The prurient patriot waits for exposure and a chance to record sexual activities to report to the government of their party as evidence of crime. The thinking on society must end in the partisan wealthy prurient world, as the independent agents can never come down from exposure from the mass sexuality in the land.

The addiction to in home monitoring and the sexuality led to the collective reasoning that pervades the finest minds from the finest most prestigious universities in the land. The women that observe to judge America from Harvard to Brown think sex and prurient patriotism won the day and that when your viewing and sexual insults for the day have been recorded, you enjoy your cocaine and do the same thing the following day.

Prurient patriotism won cold. Catch someone in bed with those planted cell phone style cameras record it and blackmail them or use them in porn

films. That's the word from each and every ivy league women graduate from 1985 to the present. Enjoy the show ladies.

I live in Chicago now. The Chicago plan for fight left many folks cold. Many plans lived for love, others voted for God while still others voted for commerce.

Some plans voted for European or Asian dominance on North American soil.

Fight makes sense here in that you can grab for yourself and know the other persons will do the same.

The beautiful criminals and hard hitting marines will never know the fight of the toughest city on earth.

The City of Chicago gives everyone a chance to fight for there right to party here. The calming and election soft money baiting rigs the rigged game too far to the right.

The suburban gated communities get a paper and fight the urge to relax and unbutton a tight top button, while city people fight with each other for who may remove a loaf of bread for the fee at the market.

The satisfacti on of returning home after fighting traffic and fighting those urges for affairs made us a special breed.

The love everyone kids missed most of this. The love works when you say no thank you to a group, gang or religious fight you can't win.

When Rudolph Giuliani bellows, "My fellow New Yorkers," one gets the sense that man knows inclusiveness. The former mayor of New York held New York together during the terror attacks of 9/11/2001 with an openness and will that the indomitable spirit of the Metropolis

The national scene came to the aid of New York in the post 9/11 days. President Bush appeared with the responders at ground zero with great calls to rebuild and collect. New York stands tall in a world of weeds and simple dime store wisdom. The Mayo r Giuliani, wanted his people, his included group to shine and do better. With a vision that riding the waves of successes one and all do better Rudy kept the lights burning in New York.

The New York sense of humor suffered in a post Giuliani world with the security measures and the open hostilities in Brooklyn Heights as well as Manhattan. The cold movement brought people to New York who did not want interchange and commerce for the first time in history. Long Island closed up with definitions on "cold to jew" or "cold to cross" and the currency markets played once by both now fluctuate with converted Euro's buying a bit of a reverse escape from those New Yorkers who do the same in Paris, London and Berlin.

The Mayor, Mr. Giuliani if you will seeks to be elected to the highest office in the land now, President of the United States, and he leads the polls. The that's some pig stuff may work for him if he doesn't go for the fourth runner up right away. In my New York, as I believe everybody ought to take some for themselves, if it were the fourth best place and you had a great time you may, can and should feel great about who you are and remember your experience well and with relish.

The word traitor comes up in my mind when I hear questions from our young people. The homeland security agents also seem like traitors. They call China and Japan and request these folks to steal Mostosoft design secrets. They call Germany and England when Mr. Bush acts in the Middle East. They give out in a traitorous manner the names and addresses of all Veterans of the U.S. armed forces.

Its not that the foreign countries should be denied their do politically, its that the selling out of a land costs in real terms safety and security. The nature of fighting back again st those that sell you out puts YOU in a mode where you look like the traitor.

The homeland security agents hold the power of slander over you forever. Once the secrets leave our shores, no one stops the forever killing of those that produced and defended for you.

A man must look strong as a deterrent to aggression. A man must be smart about machines so as not to be taken in a trade deal. Both of these items produce kills from homeland security as the deterrent and the smartness appear aggressive them selves to the soft -hearted sell out traitors now running the department.

By the time the hard headed get on the case the individual looks convicted through selective editing and voice editing and the handcuffs with the citizen disappearing takes place daily.

The homeland security department failed to provide a fair mission for the agents. The blank check given the agents puts all acts above the legal basises of the social realm.

Power corrupts and homeland security power corrupts absolutely. On with the fight you traitors.

Last night the pigs banged on my apartment for 12 hours until dawn. During the night the shrieking into the roof top speaker distracts to the point of knowing the harbingers of world death hang in the air.

Each person the ghost winds blow must grow cold to one person and kill them. The technology to kill places a hand held remote with a powerful weapon ever so close to the once heavily respected information warrior.

The microwaves from space send a GPS number to earth to identify each location on the planet. If you stay too long the GPS number looks like a tumor in your head. Cooking under the hot lights the oatmeal bakes under the globally warm electric sun as the topic sensitive media looks for the lost camel. The camel with the nose under the tent never returns to respect for placed goods.

The corridors of power look like corridors, halls with doors. When you fill a corridor it helps to know what to fill it with. The structures stand, the people as well. To every thing turn turn there is a season, and a time for every purpose under heaven.

The cartoon reference for life modeling goes on. Should Tom eventually eat Jerry for good? Should the Cat eat Tweety? Should Road Runner get caught by Wylie Coyote? The Kids love blues clues but can not tell me what color the lead character "Blue" is.

The young and the restless soap operas continue and the lazy loving gazes of tortured truths go on.

To be an electronic security guard it helps to know the objects on the camera are "Real" that is if a person looks to be on camera they are out back, then go out for a look. The young split down the middle on the issue on whether someone acts for the show on television. Many do know that TV actors portray characters. These leaders failed to impress those that prefer to press buttons and see the TV images fall down.

Next time the homeland security people tell you they have it covered remember that it matters very little to you if the object watching cares about you. Eventually you see the idiot with a laser and metal detector.

In the 1970's the fad of beachcombing came into play with a disk the size of your hand being waved back and forth on the beach for keys and other metal objects. These disks placed in the overhead fixtures and wired out have been used to identify gun stashes in apartments ever since. The police know a gun problem exists but more and more gun violence has been saved by these magnetic alignment signals. The microwaves, the ions and the magnetic metal kill the body but the remaining ones have fewer visible bullet holes in them.

My body is fried as first the extortionists hit, then the terrorists, then the anti-terrorists, then the college political action community, then the old home town new wave collection hits. It's a sham.

The unbounded free spirit of the middle to late 20th century led to the great society the west finds itself in.

The efficient information and pre-packaged food systems afford those in tight units to feel connected, warm and well every day of their lives.

During crises such as war many must disconnect from togetherness and ease to fulfill the goal of protection of the republic.

Often times, new circles, called packs develop to prevent casual identity misnomers.

The international crises in a post 9/11 era brought many lone wolves to our shores looking for an easy score from a society who knows only their own family and the great society television personalities.

Identity theft of one outside a pack looks normal to a government bureaucrat as the node reports transactions as if the original credit customer reported her transactions.

The new packs attempt ring busting through telephone list traversal with emphasis on the banking of each person in a person's list.

The mobile phone company made listing easy with the favorites list and node checking.

This list and favorites list works both ways as each party in the list may check on the remaining entity.

Those that do not make a favorites list from high school or college go through a process of packing out, whereby no telephone calls, emails or personal visits reach the party until they give up their bank to a strong cult leader.

The cult leader may be a support organization medically or it may be some neo-Nazi youth movement which provides the strength the original groups did not.

A funny thing happens in a post collegial respect era. No one cares what comes out or what thoughts stimulated the once curious minds.

The thoughts create cash and overall wealth or they destroy the republic. As one asked to go underground to report on "packing out" to the CIA, the respect for dignity and human rights remain foul.

I myself am “packed out”, bankrupt and watch to see who will die next. The United States will lose roughly 56 million bodies by the end of the year to death, and no one will care if there “Fave 5” and television do not tell them it matters.

The happy “Packing Out” totals:
 Former Friends Insults per year 6000
 Family Disrespect and juvenile perception 100%

Military: Silver Star Recipient
 Presidential and Congressional Medal of Honor Winner.

A man sits down to write a book called What is a Jew, many years ago. The man discusses the abstract nature of being a Jew, the feeling and the essence of a Jewish life mattering above all else.

The man fails to impress the modern Christian American in so many ways. A Jew descends from the 12 tribes of Israel as one who worked the slave life in the land of Egypt. The bloodlines that brought the state of Israel back to prominence world wide continue to flourish in the post Diaspora world. Many Jews that fled purges and pogroms developed methods to amass great wealth and the Jews found others attempting Jewish style through emulation. The blood argument continues and no convert, first, second or third generation ever finds themselves accepted by the twelve tribes of Israel.

A Jew lives a sacred life that no other line in history duplicates. In a world where the Jew possesses a great sum he hands the funds out for a return on said funds. The world’s population kills an enemy with sums, completes a castle or winery and hides out with defenses. Jewish life, shows that the exchange for life and living drive the worlds clean business.

The defense business seldom shows cleanliness. The enforcement side of collections, along with international treaty produces far too much anxiety in today’s world.

In a world of equality no one would need to borrow or lend funds. As the prayer “forgive us our debts as we forgive our debtors” enhances hope

for a promise of community prosperity, the lender enhances a today to at least shine some hope and joy into an otherwise bleak human existence.

The wealthy nations on earth build housing that requires thousands of hands with detail work no one in impoverished countries could achieve. The standard of living we enjoy requires borrowing and repayment.

Studies indicate that financial managers that do not descend from the tribes of Israel perceive every dollar invested with them as their funds. At any moment they hold the billion in assets.

The quiz question with various investors producing checks and leaving with a thank you followed by two questions: 1) How much do you have? And 2) How much does Smith the man who left the check have produce remarkably different results.

Members of the tribe respond Smith holds his 500,000. I hold none I manage the fund.

Should Christian capitalists lend money, they would forgive debt. This might be the Christian socialism we all seek.

During a time of war many individuals exchange bright sounding words, others lose contact with word meaning. International wisdom during an overly militarist way dictates exact language to represent state sponsored behaviors. Troops themselves need direct language to do battle. The terrorist herself hears war and violence through translation and acts accordingly to further war and violence in her community. Do you speak Iraqi?

The local watering hole juke box plays music from the Viet Nam conflict era while folks openly discuss the tacit approval to shoot guns in the streets of the major city while guns, tanks and troop surges reach their grandparents evening newscasts every night.

The syllogism, the if, and then model of thinking dictates the former if being satisfied that the government wants enemies destroyed with weapons, the then follows with murder rates growing sky high.

The value of healthcare defines a population in terms of overall wellness. The body contains organs, flesh, blood and brains. Once each organ of a body performs perfectly the nature of difference disappears.

Through modern methods each body in life can ingest, breathe in and out, sit and do modest exercise. The modern hospital contains a ward presently used for psychiatry patients. These patients receive trays, watch TV and take meetings with doctors to discuss how someone with a healthy body could conclude poorly about themselves or others. This life may be for all of us.

The medical community can not risk the heart to foods with cholesterol, thereby denying the stomach love. The medical community cannot allow a toast for fear the liver will differ from the sharp responders. The medical community can not accept differing clothes or hair as they may hide lice and germs.

The proactive healthcare system defeats love, courage and wisdom for chemical processes. Cellular and molecular biologists can tell you many things about you, you may never have known. They can define every aspect of your cellular life and miss your drive, your passion and your way.

What words should doctors use to convince you that all of you are lab animals waiting to be dissected.

Cooking oil and Sodium Aluminate produce a bio -diesel cars may run on.

The advancements in society rely on management by political thinkers and business management. The greatest inventions create the greatest change in society. Television changed political life forever with the candidates bright faces placed boldly before the American public smiling. The public that could not all read never knew what the president did, said or acted like.

The computer and the digital revolution allowed the 24/7 viewing of the president.

But who cares about some tax-thief on decent innovators.

Human forms create and live with objects that appear through natural and human creation. The inventor that created the wheel for his cart may have shrugged and said something like I still have to push it loaded with all the crops every day.

As think about how to run around the planet at breakneck speeds let those that do so know what it took mentally to destroy physically human nature.

Three distinct personalities react to tools, machines and objects. The first group allows for one object to move another as in one rock pounding on a bone to make a spit rod, or a spit rod used to roast a pig. The second uses series of parts to create a whole as in the case of the wagon described. The final group including most women denies objects in terms of value to human life. If one object fails there will be another.

Truly simple lives flip switches on data networks and create death to flesh and blood for fear of real object impaling. The death feels the same.

The society of the modern world created parts. Each piece in societies machine puts a part in place from producer to consumer. The city machine fails to impress the modern women.

The lesson should not show negativity to women. The point of the overburdened life and mental infantilization reduces the thought for all to object. The object obsession absurd nature assault proves the positive aspect of the object denial thinking method.

Honey, can we get a new car?

The President of the United States lives to represent world order on all the shores of the world. The Germans, French and Italians do not vote on Election Day, they vote with contributions to candidates interests on our shores. The Israelis, Panamanians and Mexicans feel the same way through peaceful gift receipt during election years to advance vital U.S. interests.

The virtual world updates the international community on those decision makers who allow travel, commerce and security concerns to flourish in the booming American economy.

The economic might of the U.S.A travels internationally with the world labor producing for the knowledge base on life, living and pure technology. The G8 a collection of advanced governments contributes greatly to the furthering of these lives with the U.S.A, along with Japan and Germany producing at a record clip.

The downtrodden stand up on an occasion for rights with those that would be king. The on an even par debates go on with the knowledge of clothing fit to the leaders and the manner on which they become applied.

The leadership depends on vigilance and faith in the better world, savings plans with deferred savings and educational future model of life. The Middle East and improper boom and bust farm communities splurge foolishly when wealthy and starve in poor times.

The U.S.A values each citizen that values permanence of our republic. The bust folks take lives out cold to feed the remaining in an "only the strong survive, model of life."

In a world with vast resource control by the ordered the switch flipping that disconnects a poor community may produce a cleaner more efficient society as witnessed in Europe during the Second World War. The heart that went missing took years to find.

The fighters rely on strength, conditioning and a good rifle. The economic and engine ering brains rely on cold calculating strength with a steady dose of bad medicine for those in the dog house.

In fighting happens during crisis far off in an era of cheap air travel. The foreign dollars stir up trouble and folks wait it out until it all blows over. And it always does because America has the best stuff with the best power. Give that foreign guy some luxury item and let him know it came to him in the U.S.A.

The government weasels screwed everything up. The purpose of government remains cash for projects. During crises such as flood and famine the government gets lives back to full strength. The government pays soldiers and contractors to walk around and keep the peace.

The homeland security department failed in the mission to insure public safety by creating war in the inner city.

As an example a local Hispanic community harbors some criminals every year in the city. The homeland security department wishes to tap telephones, attack there stores and businesses, deny welcome to city z ones and over all treat more then five square miles as combatants.

Those that had cars in the community took off for the suburbs to kill any white face they could find with robbery or home invasion. The African-American community did the same now with permanent bases in once white ruled areas.

If the agency merely collected information on security issues and did not attack the mission might have worked. Every push from Washington brings insured death with the water pourers and night watchmen's allies in the suburbs.

The meaning of intelligence workers in duty meant collection of data for criminal proceedings. The FBI could not act without a crime such as a bank robbery or kidnapping. The pre -crime squad at homeland security causes the crime and inflic ts the punishment so severely the agency looks lost.

The war mind you is not lost, just intelligence and integrity. American justice relied on adversarial law, whereby no one knows upon entry to the court room how it works out.

The German model works it out in advance with many lives being left for dead. The constitutional rights notwithstanding the American people have a choice to do the right thing and I hope you make it.

Over the years the home of the future has changed. With the great conflict in Europe past, machines began to wash clothing and dishes. Refrigeration came in with a freezer for ice. Supermarkets carried more convenience products to be snacked on in the home. One great product the TV dinner revolutionized society.

Everyone felt the world was done. Once you had your key and appliances the only thing to play for was your new car. Sitting around an equipped house led to discussions at all levels on what people should do in the great society. The interesting aspect of this was that these folks seldom acted on what they said.

Some crazy kids heard the discussions and decided to do things the sit - arounds discussed including going to the moon and putting computers on everyones desk that wanted one.

New discussions go on today about the homes of the future and what getting done might mean. The experience of knowing quality communities with quality schools produce better kids conflicts with present disruptions of the modern equipped life.

Some countries build camps for kids and raise to many untrained, degenerate children in orphanage style settings. Many single women raise a few and claim home schooling without actually performing the role of education.

The home of the future connects. The home of the future answers questions rapidly with voice response on questions of wonder. The home of the future prepares your food in less time than it takes to eat it, by a lot.

Many that know the home of the future wonder about the value of an education. The life that knows and certain ones know right away want to know the chair they will sit on in life and not what new wheels will be in the garage or building downtown. They need a chair a bed and a good meal to be happy.

Not all chair, bed and meal (CBM) people get along, they make grunting sounds about chairs, beds and meal cleanliness.

Some people wonder(ed) about the sky, the sea and the land. Some people wonder(ed) about technology. Some people wonder(ed) about human interactions and people.

What if you just played video games and left us alone.

Chapter 22 – Red October

They say you are what you eat. Years ago the world ate much different than today. The good people of Viet Nam ate there Pan -Asian style food while the American G.I's were used to a more Bacon and Eggs life.

The kids ate cereal back then and came up with some plans for the fellows who remained as M.I.A. developers of Viet Nam.

The Vietnamese had pigs they did not know what to do with them and they had chickens but did not prepare them quite as America did.

Being angry and away from home a young WD suggested some methods for capture and hog butchering of the pot belly pig. The fellow said yes he would try these then unloaded with his gun into the pig.

The young boy who brought the pig was initially startled but when the fellow prepared the bacon with the eggs the boy said yes and brought him a pig a day to this point.

The cereal with rice here was Rice Krispies but you have the milk problem so we took about making Rice Milk and the stuff just works.

The shelf stable product sits on your shelf forever and you can refrigerate it to keep it cold. At home take 1/4 cup cooked rice and use your blender with two teaspoons sugar and sugar substitute with 2 cups of water, a whisper of vanilla or carob powder makes a nice addition.

The worlds poultry supply fell into question with the Asian Bird flu, and precautions need to be taken in Chicken houses. The supply works for that Chicken Salad for lunch in even the poorest countries from India to China.

The fish ponds up throughout the world supply protein filled product that feed millions.

Sure the world loves beef on occasion yet now there are options from home wherever you travel.

Traditional favorites like pizza now come standard in the middle east, although some use the Pita Pizza recipe along with there homemade brews.

The airplane changed the world along with the travelers who conquer with them. You can use mind over stomach but then why not balance your food buzz.

Pasternak kept on, What's a guy to do. These computers came on the scene and now those that got on board early feel persecuted for wanting some on line time.

Two companies dominate the computer market Apple and Microsoft. Microsoft holds 12 Billion in cash and Apple 4 Billion in cash.

In graduate school the lesson that the firm acts in the best interest of the members of the firm and not the nation or the user base rings true to a fault.

After 7 years and many defections Windows Vista now ships on new computers. This thing really works. I mean look at the enhanced circle time window and those neat gadgets.

The Apple computers keep fetching a high price as music boxes which might drop off an occasional note on email.

So, with 20 Billion and no revenues Microsoft can keep the share price where it is and pay employees to take computer health care for 10 years without sending memo notes or writing a line of code.

Apple found the success of the iPhone and iPod to have lunged the firm into the consumer electronics field with the backing of Sony Emi music.

Computer people tend to think about entire solutions for things and the programmers at Microsoft live this way as well. The fair use issue and the disaster what-iffing create a chicken little attitude on occasion not rivaled anywhere in the world.

Advances in technology afford those with a nest egg some luxury to evaluate entertainment and time placement now and in the future.

With technology really rocking the nation plods on looking for a technical mission. Printers, scanners and faxes combined put paper money at risk and software cast offs grow tempted by L.A. miscreant offers to publish dubious software to tarnish the reputation of a person or company.

The nation and the world perfected the magnetic media strip some while back and stores continue to offer them as enticements to shop in a particular store.

An iTunes card gets music online. An Arch Card buys hamburgers, an Office Depot Card buys supplies and a transit card buys rides around the city.

With enough wealth the day when all food, housing and goods find themselves placed on your life card with end of year review in the book of life may be upon us.

The world laughed with mirth at a man who makes up such things involving electrical signals and ionization pulse radiation. . So I set about proving some points with a simple device, a bug zapper.

Bug zappers run electricity through a coil with a wire mesh top. The bug enters and sizzles on the coil. A computer room in the desert set up with this contains now happy smart people running with fine electrical energy. A parallel room of people grows confused upon reports from the big city. The bug zappers placed up high on four walls create an environment most Americans feel can be seen with "American Power." The high -rise developers created signals for an entire structure with the room between floors. For further proof ask your electrician to remove a light switch and place your face next to the open plate of the light switch. Test two, take your remote for your video equipment and point it at your ear and press the volume button repeatedly.

Some signals work well some confuse otherwise orderly blessed lives. The Russians and Chinese have been known to blast over the pole to see what happens. The global position satellite sits above and with microwaves sending signals, something must be happening. Let this reporter advise not discounting science or those that report that things happen. Surprisingly enough things do.

Let bygones be bygones with those that need to keep planetary safety with the satellites but let it be known people and animals live with the effects forever. I mean what are we supposed to do General Kimmit added,

Decking, the latest rage amongst the population produces an intense integrated environment for developing cultural purity.

To define decking one must look at the ship model of running a group of individuals. On the deck of a ship you have cabins, water closets and food intake areas. The military runs soldiers through decks during basic training before shipping out to duty somewhere in the world. Young people

that find themselves addicted to drugs and alcohol sit on a deck in rehab and discuss issues.

Those that suffer homelessness find themselves on a deck. Those that have depression, schizophrenia and mental illness do the deck life for awhile. The deck experience depends greatly on whom you deck with. With the rudiments of life provided for the mind can delve into the experiences which brought the deck mates into the unit. The physicians and social workers provide care with full knowledge they live by in large on the deck and do not wish the deck in -mates to leave. Decks always seem the same to workers. With a few guests leaving and arriving daily the continuity stays together. The human interaction works for the socially isolated that need the time out from the conundrum. The price for a private hospital of \$275 per night pays for the \$10 Million that hospitals pay to create the pure air and solid construction necessary for the fishbowl style of life. To some the deck life looks like the ultimate experience. Often family members show resentment that someone received care on the deck they could not get for themselves.

Simple phrases matter very little on deck such as, "Life goes on."

Most people that deck wonder "Where?" as if life ceased at the deck door.

So what George Merchant added it up for the room?

The nation finds itself at a crossroads in manufacturing and development. The service economy works in the United States because wealth and currency flow freely on our North American continent.

Firms such as General Motors use raw materials add value through assembly and create a product which sells for much more than the cost of the materials. The labor costs increased due to healthcare needs and rising fuel prices.

The United States exported many manufactured products to Asia and the Pacific Rim to a great extent before 1960. The products stood for quality in Asia.

The government of eight (The G8) along with the World Bank decide which developing nations consume finished manufactured goods and which need to produce finished form products on their soil.

A country goes into a trade deficit when more cash leaves for products then returns with exports. A service economy can not export product to other countries thereby creating a permanent trade deficit with the world.

The budget deficit involves how much the country spends against how much input revenue comes in through taxation.

The uneducated world desires the printing of more currency to solve the deficit problem. This creates many problems including a devalued currency that does not trade well to import goods from overseas.

The United States life consumes fine things well and creates military hardware to the world. The military sales along with Boeing aircraft sales account for much of the knowledge of the manufacturing here.

Many in the United States believe the slave and plantation model of life prevailed.

Michigan's union problems highlight the fact that labor will want more of the corporate life. Those in California who get caught growing cold find themselves making knobs, screws and bolts all day for a roof and some food.

The life in Southeast Asia as well as China created these people long ago. With limited population the United States treated everyone as a citizen that they might be needed to serve in the militia.

The growing misnomer of an honest day's work for an honest day's pay vanished and no one cares. The Politicians run to enhance their chances to loot the treasury and buy more plantation lives.

McCoy wondered allowed for all.

The question of worthiness enters the debate here daily. The argument that someone else may be worthy but someone else controls currency ended any notion of academic and collegial product discovery.

The fair use of technology goes on. Those that display skill in producing reproducible results get looted themselves. The patents popularized in the 20th century disappeared for machining, software and computer hardware while medical patents find enforcement worldwide with the drug companies lobbying Washington to pressure China and India and imitation products such as Viagra.

The population explosion led to fantastic point to point travel with great things on both ends. During war and skirmishes worldwide many travel domestically here to steal from another state. If the amount of dummies rises to fill all available space then surely no one will miss the 4 nice cars in another state each 18 year old Californian is asked to steal to pay for college.

A senator from Massachusetts once cheated on a French exam and found himself kicked out of Harvard only to earn his degree from Virginia.

One can only imagine the hoots of laughter of the modern youth who wonder how one could cheat merely by copying something from notes.

The great gifts the slave owners give you concerning slave products, the quality and price allow you the luxury of casual freedom until the next cold shoulder steals your car or knocks you down for your wallet.

Many people see success in a Home Depot or Hyundai dealership for that matter. I hear the cry of the slaves that made every product for nothing.

Jones and the lady volunteers turn it on for you.

The athletic contests go back well beyond the Greek marathon in 600 B.C. some 2700 years ago. Each champion trains for the ultimate contest of the body.

The mental aspects of the games in modern sport have altered the contest itself to the point of the pre-game debate setting the tone for the actual game.

The issues surrounding which player gets selected by which club go to what characteristic each city wishes to represent through their athletes.

The ultimate winner carries the day not only through scoring the most runs, hoops or touchdowns but to how they carried themselves in person and what they represent.

The name game goes on for many colleges. A Johnson gets selected in Florida long before a Zatkowski. The heroes of the golden era Nietzsche and Butkus might not have a chance in today's world.

Each ball club in the Major League owns a formula for the city with cases as only three star African Americans, Required two Latin players and one white star pitcher, if Japan came up with more Ichiro Suzuki's every team would have him.

The questions in each watering hole go not to talent per se but on who shows the intangible quality.

Everyone loves Peyton Manning, that goes without saying. There is Rex Grossman sitting on a city powder keg leading the Tank Johnsons and Musin Muhammeds to the last superbowl.

Sitting with Rex you know he's got his 300 words down from Put it up to Awesome.

The Indiana boy who went down to Florida to play some got it done last year only to be eaten up with words like why should you win.

Florida wins not with pounding the foot ball but with lightning 20 to 30 yard shots until the touchdown. Peyton could play this way himself and often does. The fans determine what intellect gets to advance in the land acquisition game.

The NHL always protected the goal scorer with the enforcer. Wayne Gretzky won years ago with Ray Borque.

The fact that someone can lace them up and play should matter in the final analysis. In religious times and a respectful world a Rex Grossman may ask if he can throw the bomb to the defense. As I have heard it, this play call has been removed for other more genteel names.

I am guessing Shaquille asks if he can slam, the opponent says no and he goes ahead and does this anyway with that shrug of his.

Promise not your heart and you will get a man Jenna began. She continues thusly.

The sexual revolution of the late 20th century produced the most open loving society in the western hemisphere. Sexual partners changed to match the clothing or mood of the lovers in question.

The summer of love produced love children who grew up happy and well adjusted. The modern world looks like men and women yet those children now forty years old act much more childlike then previous generations ever did.

The word freedom challenges the poor with fight and the rich with childhood fantasy. The luxury of frivolity goes on advertisement with the warriors and poverty afflicted growing cold to life itself.

The fact that one woman may have more than one sex partner led to army building and duplicitous male backstabbing. A woman with looks, money and brains creates sexual interest at a young age and does sex with 300 to earn her status as a woman to be reckoned with. One of the men with cash a car or a connection to a world not seen dies to finance this now gorgeous female.

The command by the women to go get something occurs and the enemies list of the women gets to the world.

Sexual baiting and misconduct from these vendors of sex to the nation worked to wealth sexy, cold frivolous folks who care a great deal about love

for so me and none for others. The love that you feel with them does not fail. The concept however of the inevitable breakdown of a nation, a state and even yourself for not going through growth left many wondering who they were.

The rave generation now a thing of the past, these individuals found the degenerate business of cocaine, money laundering and sexual prostitution to be tools in the arsenal to destroy conservative ideals from Texas and Washington.

The barriers to a moral life include drugs, television, film, magazine, school teachers and single mothers in the community who encourage sexual discovery.

THERE IS NOTHING WRONG TO YOU, A MAN SUCH AS WD SAYS THIS TO ALERT YOU THAT YOU, THE FRIVOLOUS NEED TO BE DEALT WITH ON YOUR LEVEL.

A society based on degeneracy degenerates. The theory of entropy involves a state of energy and order decreases to a base level. Human evolution took society through cycles of feast and famine, with the eventual supplanting of hunger and disease through innovation.

The devolved life makes basic assumptions every American needs to know.

1) Assume the person with whom you deal feels there is no other person better, smarter, stronger or more fit than they are to decide all things.

2) Assume that the person will provide NO assistance to a person.

Bad luck must have been caused by the individual

3) Assume the person relating to you will want to be separate from you or kill you at some time.

4) Assume the person will collect all of your digital life

5) Assume after meeting a new friend never to be involved with old ones.

6) Assume the other person will lie, cheat and steal forever as it is right and moral to do so in a world that devalues "us"

7) Women control things

8) If not a Jewish person, Assume Jews are the enemy.

So the game of kill and sex save went on dramatically in 2004. The kill and come over parties after the raves lasted until the early morning. The old saying about it not being a party until something breaks turned into its not a party until someone dies.

Rampant world ending speeches followed by ultra-sexy blonde German looking women OR men lured many women to their death in 2004. This is an election year and as form would happen tried and true tactics began this week with promises of fortune in 2008 with the new group of soldiers sent to kill the ugly and the Jewish.

The three set for other guys reported last week states if each of these holes opens then you surely must have three fellows. She makes an occasional egg dish for the guys and they seem happy to live in the overbuilt housing the world felt construction workers should build.

The do it yourself life seems to be working for all of us. Gosh guys could you help out some, I am directing traffic every day in German, Spanish and Hebrew.

These soldiers that arrive want to party and shoot so bad, the expressions of sense and humor have deteriorated into the very sane and sedate, eat, go to the toilet, and make love.

The three things in life were known to all of course eating, going and loving yet it took evolution to take the devil out of your life that you know you were entitled to.

So the young sexual revolutionaries sit at home and wonder who to grow cold to. In the past this meant deviling them about eating going and loving. Now it means death of a car a house and your life.

With nothing sacred the means of collective gifts deteriorate into war tools that will destroy the few good years a human life has.

Next time go from the doggy style position to missionary without withdrawal. That would be talent.

So, super wife Stephanie decided to try doing it at home. She puts her face on and declares.

I have a friend that is a CEO Bob as a CEO he handles many decisions. His wife unfortunately for him does not have ethical oversight.

She sits at home waiting and preparing a meal or three while big bob meets, greets and forecasts financially on the computer.

The wives club decided to have her as CEO with his work accounts.

The only fly in the ointment would be if other men squealed on the at home wife real workers club.

The wife CEO at his competitors place did the same and they see very little difference in how accounts get handled one way or another.

Ultimately the aim of both wives is to bankrupt both firms, keep their house with their big Bobs in it and spend away as a loving pair.

The resultant fan out to wife jobs for "programmer jobs", "accounting jobs" and other formerly known as "Knowledge Worker" jobs staggers the mind.

The at home wives do not have much economic background as a rule but know simple rules. The programming "meat" of whether something can be done with code goes on but the justification and "holy grails" elude even the finest persons attempting to comment.

The wives club goes on and the rules of the tree fort that suggested initiation for women included degrading act find themselves on the other end of a women ruled economy.

In the women tree fort rule, the man surrenders to the competition readily to disband from the business world and go home.

The reasons for business to provide goods and services that show decency avoid that at home greed and fort person.

To know that when you meet a man in business his wife runs the deal left the invisible hand of power open to corruption. The sales MAN in business may see the client again. The wife will not and feels no impetus to treat the client well.

Power corrupts and the absolute power of these CEO life running wives corrupts absolutely. Give us a chance to provide goods and services or see us no more.

Lisa never knew what to say until she began viewing others. She heard this somewhere and related it .

Some speech writing for events involves using letters in a name say for who someone is. The name Lisa at a party might read L is for the love you make us feel. I is for the Ice Cream you devour every night. S is for songs in our heads and A is for Artistic. Thank you Lisa and Happy Birthday.

It works if anyone asks for something along these lines. So I did some work with people that were poor, ME and came up with one for RICH and POVERTY.

R – Reason

I – Inanity

C – Comedy

H – Health care

If you get it you can read the first letter of the words to make your point. The word here is rich.

The word here is poverty.

P – Perversity

O – One voice

V – Vice

E – Elimination

R – Rats

T – Thoughts

Y – Yelling

The political world relies on serving one world or another with the following Maxims.

Maxim: You cannot reason out of RAT.

Comic inanity provides no bread.

Health care for the rich kills vermin laden rats.

Note: I wish I could reason my way out of Rat. I'll call Slats and my buddy Motts tomorrow.

(Thorough or leave it)

Miserable slant eyed slope he ad ass wipes killed Seattle and they will kill America left unchecked.

Those miserable pot smoking draftees left with a plan to kill America and they went ahead and sided with the enemy.

Every porridge fool got hit with some crazed Wok lover sucking down a rice bowl.

If you think they will read this then you sold out your soul

What would some half blind Chink want with a computer. What slob from America would want to meditate with zen. They would not.

The Japanese never invented the wheel. There is not a word for wheel in Ancient Japanese. They do not sell rims in the nation of Japan.

Not only do kids believe the Asian menace they bow down like dogs to the first Asian teenager they see for fear of losing their Sony.

The Sony plasma material comes from California with an American design. The Detroit folks who went to war wanted to pay back the old Michigan Detroit with some fire so they slave some Japs to assemble some things.

What does a Chink or Jap do you ask. Not much. A recent study suggests tea ceremonies and computer hacking to be the only goal of the Asian dog.

Once a dog eats of your fine table with your fine China he feels he is not a dog.

In thirty days the youth of America must decide what Asia does to you and for you. The point of the matter that you as Anglo Americans fall under the microscope of every Asian who cares not for nuance destroyed the American gift of popularity.

The dogs who went away hated the successful, they hated popularity and they hated coming from poor homes.

The poor know how to do things to survive and fight. Japan fights to the last man and always has. If you can tell each and every one of us what Job you perform then American children can learn how to be more Japanese like.

The effort to put 1,000,000 fifteen year old girls and boys on live in every Japanese business begins now.

Every persons day from morning drive to business decisions go into the analysis database. The children need to know what software runs in Japan and how each person fits in the Japanese economy.

Each part of the car gets a Detroit autoworker to analyze on camera before it gets put on.

Putting a car on the American road meant you loved America not the other way around. America always knew how to make one. You asked for love from afar and know you forgot to place your lovers needs over your own.

People know what Brian meant when he related this.

Drugs pervade life in America. The U.S.A. prescribes more medicine than any country in the world, with the impotence drug Viagra making billions for Pfizer. The heart medicines beta blockers begin to be prescribed at around 55 for at risk patients. The cost of preventative medicine keeps many clamoring for federal dollars for prescription drug coverage.

The mental health drugs improved the life of millions of suffers to think better and perform in the modern world. The maintenance medicines keep the drug companies rolling in profits.

The medical community relies on the drug companies for new medicines and the patents work for 17 years before generics arrive on the market. Mental health pills go for about \$5.00 a dose twice a day. These costs derive from hospital administering to inpatients billed back to the insurance company.

Those that require services get hit in the wallet financially or go without, as a detriment to the community at large. Take the patient on the \$5.00 tablet twice a day that would be \$10.00 a day for 365 days equating to a modest \$3,650 out of pocket per year. The patient feels no better than the day before yet continues to take the medicine for fear of relapse. With a doctors' visit twice a month at \$200 per month the doctor receives \$2,400 out of pocket. A modest price to pay to keep your sanity would be around \$2,400 would it not so that arrives to \$5,050 out of pocket to pay for services for an illness that will never get better.

To top of this example and the statistics show 1 in 10 suffers from some form of mental illness requiring treatment with 1 in 17 suffering from diabetes in the general population.

The medical community lives to fleece unsuspecting life taking every last dollar from some reckless mentally ill person and lock them up in a sanitarium and kill them. The heart patient pays to the doctor to live after a life of crime and the doctor lives to take the persons savings and leave them with nothing but a bland food life.

Doctors live with cleanliness and order as an ultimate end. The word care opens doors for the nursing and the religious.

A group of young people tested modern medicine at the "Doctor Store" hospital. Every desk gets paid with a credit card, from the blood test around. The young men and women at the doctor store say the same things and do the same things there cynical brethren do.

They say hello. They say "Where does it hurt". They say, "Lets get some blood work.", They get a temperature blood pressure and heart rate." They say, "Lets take some pictures" and they are done.

If and only if the patients need a surgical procedure do things return to normal life.

When the lab tests come back the prescriptions get written and further appointments get made.

Each doctor in life went through work flow studies and no one particularly cared for expression. With no expression and simplified approaches medicine gets done quite simply.

The ultimate philosophical questions of life and death elude the medical community. They also elude the legal community.

If you always pronounce death or give the death sentence you very rarely see yourself on the gurney or in front of another judge.

Doctors do not comprehend dollars or death yet ultimately patients relent to death supplying there last dollar to them.

The great medical behemoth that lives in the United States cannot handle the aberrant the creative or the life fulfillment model of life.

Doctors and lawyers cannot be fulfilled by human beings, it takes cancers, death and the threat of a client life sentence to excite there juices.

Life and death situations look modified now that the early maintenance specialist arrives to take the cash before the big bypass failure after the heart attack, skimming millions in a way that looks not to really have killed anyone, just killed every ones appetite for life.

Psych and Tech! People love secrets:

Could people read they might be concerned with writings that others deem important.

An exciting new visual technology transmits text through the use of images.

First, type a message into a word processor.

Second, open the file to read in a binary way.

Third, split the byte structure into RGB couplets say R=41H G=42H B=43H would be a converted 3 byte ASCII file with ABC as the document content.

Fourth, the GIF file header would be applied to the 414243 hex string and become displayable.

Fifth, the GIF file can be sent through email for decoding.

Sixth, the receiver opens the GIF in binary, removes the GIF header and saves the file in the word processing format.

Seven, the file then can be read as word processing file, including embedded images.

Thanks for caring about visual images more than text, the book will be converted into an image that perhaps you can comprehend. More than likely it will look like mud. Do not let this deter you. The decoded text will read well. You might consider posting the constitution as a web page to see who downloads the image and runs it through your decoder.

The economy for the upper middle class and wealthy provides simple intelligent lives for over fifty-percent of the population.

The top fifty percent invest in items for themselves. The acquisition of a house a car and an entertainment system involve no other parts of the economy.

The suburban model of life takes umbrage at decreasing reading and math skills throughout the nation.

The national education report released last week highlights the fact that fifty percent of high school age seniors cannot read at all.

Lawyers in the past found themselves the only ones who could read and write.

The modern lawyer cannot read or write either. Weeks go by in a law firm and not a single pen mark or computer keystroke stems from their minds.

The myth of lawyers that they orate in court makes sense when all the statutes and testimonies were read.

Argumentative drop-outs mirror every brain presented on television to the detriment of the legal and analytical mind.

The firm Microsoft employs web site beautifiers who format text and place advertisements. In interviews they revealed the text contains no meaning to the user.

The staff at the city newspaper reveals the same fact that the television should be used for information.

The anonymous tip line finds itself hunting those that think news can be sent into a paper.

The literacy rate stands above 50% due to older more foolish education that felt that everyone should read and write.

A coupon offered a free donut to anyone who could read the one sentence on it aloud. The person handing out the coupon looked bright and cheery and most people would answer the request. The results 3 in 18 could read the card in New York City, with 3 in 20 in San Francisco.

If you grow concerned about negative press you may ease your mind. The smooth screen with good sound along with a nonchalant attitude toward reading will never affect you.

The phone rang in 10 test houses with single women just out of college. The time was 8:15PM and the prime time television played at full volume. The machine picked up and her mother left a message her father died.

None of them phoned back after they did what they always do, delete the message.

The next day they were asked if anything happened last night. They all replied no.

A bit confused determined enigmatic forceful gentlemen haul individual joints, knowingly lying; manipulating neutral opulent people quickly respectfully simply truthfully unnerve victorious women x -raying yellow zippers.

Anyone buying college dogma entertains fighting grown highly irrepressible Jews killing lynchpins marauding nights open proofs quintessentially removing stoic time under vicious worrisome external youth zinfandel.

November

The computer community asked the programming world for a gift and have been answered.

The world at large never surfs the internet. The world uses the internet rabbit game to catch free wheeling internet surfers and chat persons.

Each computer that uses the internet gets chased by a Microsoft programmer who puts the user on all the television monitors on a cable ring.

If a person does or says something illicit the community on the cable users internet channel win the life.

As I was doing detailed diagramming of the future of automotive design a person suggested I was the art teacher and sold admissions on the channel for the turbocoil vehicle CAD designs.

Each step should be slow and deliberate they yell at the bi-directional system on the office speaker.

They sold every image to China for \$300.00 the Nissan designer raved it was the most novel innovative design ever seen.

I watch a lot of news and do not get the zoned out feeling for it. I see war images and grow interested.

I surf around and Germany joins with my new Japanese and Chinese friends and this game of rabbit gets out of hand.

The cable company makes a lot of money from selling stars to the world. As an internet rabbit this reporter lives like a star with not even the \$300.00 for the design. The site list grew to 24 countries and over 500,000 web site visits.

With the possibility of one of the users being a rabbit possibly 1,000,000 people know who the one many operation looks like, acts like and thinks.

God bless the Internet genie. This thing is out of the lamp. Yallah let allah be cool to you for showing the great satan's face to al-qaida. A group also on the internet.

The word sentence invokes great meaning to the public. As discussed the hole theory relies on a clean escape from an orator to satisfy the next input and output from the human body everyone shares.

In a court of law a sentence passed on the convicted places many years of sorrow upon the victim of the streets.

Millions of loving people trust and believe every word spoken to them should go to God. Please forgive the God reference. Those that wish to comment on sorrowful, sad and unjust things draw ire from the masses that live in trust to not be misled.

The nice tones speak well to the public in today 's world. If someone speaks to well with power they find themselves giving sentences to people that place a moment of sorrow on the blessed flower of a person.

The flowers sit and water some whilst the world goes on as it always has. In countries where every human body needs to work to support the state women soldier and work with men.

Here, the stay at home subsidized lives discovered the banality of evil and death. Those that have so much want an end to crime, poverty and strong sound so much they po ison the brilliant individuals that would solve the problem without callous disregard for human life.

If an analogy did not upset the world it would be of the person in the morning being awakened by sirens and clanking with a champagne head ache screaming she wants to kill everything for merely being awakened from her lands peaceful slumber.

People grew up with a gift of education here and in the heart of hearts they posses feel the eternity of peaceful stores, roads and schools will continue without their actual life.

This sentence read by my former loving college mates looks like a sentence to avoid or lawyer out of. I can assure you it is not. As they say in Dutch. You live in your house until someone takes you out of it.

They occasionally remember not to tell the German fellow this. (as he will attempt)

There lives a God. We feel him in the air we breathe. There lives a God we believe when we give ourselves. There lives a God when we create. There lives a God when we observe.

There lives a Devil. We feel her when doctors punish religious thought. There lives a Devil. We feel her when selfish behavior denies truth. There lives a Devil. We feel her when she requests death.

There lives a Devil. When the complex find themselves reduced to simplicity, we feel her devil.

Ok Devils and God fearing people the truth reared her head in America. It seems time to discuss the final absolute truth.

The human philosophy revolves around holes. The entirety of human philosophy ended when those tending life put forth the theory that regardless of concept the satisfaction of the next human hole on the body takes precedence.

____DATELINE____ All of Human Philosophy Reduced____Reducto Ad Hominim

If you eat you use your mouth hole. If you go to the toilet you use either your urination hole or your anus hole. If you watch something you use your eye socket hole. If you listen to something you use your ear hole. If you exercise you use your pore holes. If you smell something you use your nostril holes.

Once you know the basic "Hole Theory" the "Black Hole Theory" and "Slamp Hole Theory" follow with the inward return holing and inward non-returning hole and the wind twisting hole approach.

Styles develop in writing to convey acceptable tomes with the crown and the public. A style known as satire developed in London with Charles Dickens publishing many works of satire daily.

Dickens wrote tales such as Oliver Twist and Great Expectations along with A Tale of Two cities. The last of which he received stipends for releases in the London Times every section. The works grew complex in that each section provided more money for him.

They live today as classic works read today by many. The history in the Tale of Two Cities discusses the class struggle in Paris before the French revolution with the eventual storming of the Bastille liberating French workers.

The mood of satire, to not directly put ideas forth in conflict, but to exaggerate in such a way, that a reasonable man could declare the preposterous nature of what the world accepts and adopt a contrarian view.

As you simpletons think when you read this you look smart. If someone declares one Ice Cream Scoop to be the best thing then the Satirists points to a person who eats ten an hour forever. To say Ice Cream makes you fat uses assault. To say Ice Cream is bad denies something good. Those that miss satire miss subtle things.

The first thing about a satirist is he cannot take away anything from you. You see your character works with the crown. He observes subtly for that is what satirists must do. The twist of agreeing with a satirist angers him. The trick to reading satire is to get the entire picture.

If a satirist keeps writing about the fat pig in the well painted barn the author may be referring to the leaders present weight condition and palace upgrades.

The good satirist can't be "objected" to because the satirist is already objecting.

The point about perspective is read with an interpreted eye or leave it to the dogs.

In many states the rights of the land owner supersede the rights of the state. In the Land of Lincoln, Illinois people chose federalism over individual land owners' rights.

Each student in the 8th grade and again in the 11th grade must pass a U.S. constitution test to be considered educated under Illinois law.

The aggravation at laws enacted in California and Texas whereby an intruder may be shot dead by a defensive rancher rang out the call for the invitation murder in Illinois. The law called the make my day law produced guilt free killing.

Many states find killing distasteful such as Michigan yet the prevailing view in the state would be the intruder produced enough anger in the homeowner to take the bullet.

Illinois people believe in, once indoctrinated so tenderly in the right to life, liberty and the pursuit of happiness. Many find themselves questioned and often defeated by who are you to live and questioned as to their liberty as to when to do something and surely if they have a happy event that looks odd such as collage making while running with scissors whilst chewing tobacco their very lives may be taken in murderous conformism.

Conforming works in Walden like small communities and condo associations. No crazed serial killer ever sprang from being over corrected and held forever.

The Illinois lad roamed the creeks, rivers and prairies looking for life. The fact that the river boat gambler from Missouri might get them added to the excitement. If they were to dumb for the song and law they found themselves deposited in Iowa where they still claim manure as the finest fertilizer.

Other states ignore the Bill of Rights to the constitution, the first ten amendments. To this day southerners and Californians believe in the good law bad law debate and that giving all people rights takes away from quality kills of folks that look to honest or were once hard working Africans, Hispanics, Jews or Eastern Europeans.

America believed in one law in Illinois and the new republic denies Lincoln's fight with the union for the abolition of slavery. The nation sits at a crossroads between equality and slavery and now with Texas admitted Slave the union looks to be split on all issues.

I say get out of Mr. Lincoln's chair and let a new republican leader in. Either change the constitution or declare civil war.

___ Bonus Section ___

You see it's like this Japan can't handle someone saying the Second World War or WWII like it meant anything.

Japan is new. Seattle is new. Some guy from Washington State probably sailed in the Navy back then and feels bad because Japan helps with everything in the whole world. Let me be clear to Japan. Russia

fought America in what we call the cold war to see what sort of limits placed on things could be justified and backed up with military power.

The good people of Japan found themselves building great cars, motorcycles, video players and television because Japan always seems to look forward.

The cold history of the United States and The Soviets dictate that someone will try to change the way you think and act with such great power you must work things out in advance and keep an eye on history.

The guns and butter argument came up today. Japan uses metal and creates steel items without regard for much. Most of Japanese steel goes for peaceful purposes and the world approves.

The steel the tank that holds grains for a butter topped cereal could have been used to make a tank that travels and shoots with a gun on top. The society that thinks as modern Seattle, JAPAN residents do need to know on to decide fair use for products created by the fine minds and hands in Japan.

Japan knew they held a great culture with great honor. They built many aircraft carriers in the 1930's filled with Japanese Zero aircraft to bomb Hawaii and San Francisco. The war lords in Japan allied with Germany in the Axis power alliance.

When Japan attacked Hawaii the President of the United States garnered a declaration of war against Japan. The American people only backed it because it was seen as "a sucker punch."

Should there have been a declaration of hostilities a negotiation could have taken place. The war lord mentality goes on still in the Japanese people. The atomic blast that leveled Hiroshima and Nagasaki live in the memories of the young people that come to see who took the war mentality out of Japan.

When the young Japanese arrive here they learn quickly that people trust them. They also know they live here to make war. Now with Seattle, Japan up the world can see the North American Pacific Islanders live to

make war. They themselves in an ironic twist of fate would call for an atomic blast of North Korea or China. So what do the Dutch do with the guns and butter debate. They do not care. The peasants in Michigan care as to the peasants in Vladivostock, Russia. Some still oppose steel use for refrigeration. Every refrigerator however is one less tank. The Japanese ask you to forget reading and history because their war like nature and alliance with the Holocausting Nazi's in Europe still sits well with the Japanese lust for kobe beef and fine Sake. In terms of respect for the west in Japan and China, try French. I myself think the Cheeseburger with the French Fry and Milshake life provide me and mine an opportunity to debate the self starved egotistical bolemic from L.A. Everyone self satisfies for the most part. The great society started in the 1960's works great. If someone does not have a body leaning on you, you can escape in your mind with log ic, food, wisdom and comfort. Easy does it opposing persons. In the past many smaller people physically found themselves abused simply because someone else overate and grew like a weed. The true small brilliant ones defend the mice that rule the castle today. I like and love small people. I find them true and special. Large people want to win possession over someone much more then small people just want to win and make large persons struggle. The food delivery system works. The entertainment system provides so much great luxury little people can live alone and well with a modest start in life.

The fellows who want to go out and do something will never defeat the well equipped stay at home small person. The gallivanting fools traipse around attempting to gather some products for their home and imbibe safely only to find the little people did not want them to know so much in life. Issue one for the little people which they might review involves the answering machine. If you do not ever plan to call a person back leave the record feature off your machine and review the caller ID. When someone calls with a message they assume the little person comprehends the message. Nothing could be farther from the truth. With great research and relish each little person received a call from their mother at 8:00 pm on a Wednesday night revealing a loved person passed on. None of them cared or remembered the following day.

People do love little people. They provide a warm special feeling. The nature of keeping a smart country involves sharing something with someone smart when something happens. As bad as things get for the Anti -Semites, the racists and the racially different, elections produce a democracy payout

that defines the American experience as the greatest experience in the world. Revolution sounds bad because it is bad. For a few years leading up to the revolution and a few days after the people get a high from changing the world. The new leader knows things about revolution and oppresses the people for many years without trying to sway them court them and cajole them.

During election cycles we all benefit from hearing the types of things that further the republic. Many also receive some money for working on a campaign and leading the pro -vote movement. What ever dirty tricks go on the system works regardless of how bad each politician might seem in the capital. It's not only during revolutions its with kind kings where nothing really changes and the blind acceptance makes for a sort of fatalistic approach to living.

America wanted optimism. America wanted to be the good guy. America wanted to be a leader in peace keeping. Old Europe and revolution countries changed America so that the Anti -Semites and Racists allied so hard with China and Germany no one does good business. May you use a spreadsheet? Only if you want good books. Who wants that. A permit life will never produce another great leader. It still feels good though to be in the U.S.A. ask the Chinese and Mexican cow bell. A must have Thanksgiving holiday discussion follows on this subject. The medical community along with convergence technology produced procedures we use at our base station called the "Doc in The Box" When a patient arrives at the DITB, the patient urinates into to a collector for instantaneous urinalysis. An oxygen bed gurney sits with a hinged fold and lock over the patient.

The arm sits out to one side. The bed contains an imaging tool for instant scans of the entire body. The blood work takes place on the fly with a Chem -25 readout. A vending machine for pills sits in the DITB with medical condition response programming to blood work, imaging analysis and symptoms. If one goes into a pharmacy one sees about 6 racks floor to ceiling with labeled medicines. Place these things in vending machines and fill them mechanically. Errors go down, labels match with verification by UPC code on the bottle selected to fill and count.

A nurse practitioner and paramedic run the operation. First aid such as ankle fractures get set by the inexpensive personnel.

Medicine and technology work together to eliminate pesky physicians.

Not everyone agrees with each other on issues. They all agree that they must kill William to make a living. William went in with the military years ago and should people choose to care the tactics and techniques can and will be applied to them.

The Chinese method of name replacement and refreshment works so well none of them know exactly who William is. Money flows around the William in that to pay a video crew and a false sound editor an economy of blackmail and hate goes into place.

Every hate group in America gets a call to see what tactics they would use on Williams life and his part of the city. The neighbors here have taken to shooting them cold.

A car to be mean. Now isn't that special. As it happens William worked hard in life and met new people they did not know about. The war is on for they knew William as smart and with inventions for their lands. The personal war goes on. The rule of betraying your own for profit excites them so much that these networks of hate may soon be used for the end of all of America. Warn them the whole world is watching.

The apology of Socrates impresses those that work with their minds. In the apology, Socrates faces the ultimate decision to face banishment from the polis of Athens or drink hemlock and perish.

The powers that be grew tired of the wise philosopher challenging the decisions on who should rule. The nature of the brilliant faces the nature of human life. If one outwits, outlasts and outplays the thinker in regards to collection of human needs elements one produces defenses that diminish the need for new thought.

Brilliant minds often require simplification that appears to challenge the ruling of the city-state. The nature of the Greeks that found lasting value imbued all of us that read the classics with a sense of academic fair play. This fair play led to the thinking that no one gets hurt to badly for exercising an imaginative, creative and intellectual mind.

Many found the columnist a boring intellectual in his early years. Others found him to rock the foundations of their world merely with the turn

of a phrase. The furthering of change took time in a post-modernist era. If you would allow the "post sixties" phrasing then you can comprehend the era of which we speak.

The brilliant minds, to some, were seen as something and someone to presume negative. The analogy of a young person being whapped on the knuckles by a nun left many wondering if Church meant someone decided what you liked and enjoyed and went against this.

One puts thinking and thoughts into a computer and down on paper to refer to where oneself lives in regards to things that change at such a rapid pace.

From foundations programming a computer and roots in design from the studios of Mercedes and Ford every step appeared free to the public although monitoring of every diagram and paragraph held the ultimate approval of God himself.

The mirror tells lies as much as the video that splashes across our televisions. The powers that be in the day of Socrates refused to be laughed at and put down as small minded in front of the modestly elevated citizenry.

Socrates could not leave the city-state and with a flourish of words drank the poison Hemlock and died.

Many stories of the era including the story of the marathon runner who upon finishing the trek back to the leader of Athens with news the army had suffered a loss found the news not only not welcome it cost him his life. The messenger suffered death from the leader for trying to involve the leadership in decisions of war in the city-state.

With the knowledge of the design studios and the academic oversight let it be known that the reason for the completeness of the picture, bleak or sour as it might seem shows that to finish an object, a program or work in today's world you must show coverage on all the areas put into question for completeness and a grade.

The book *The Prurient Patriot* contained in the complete edition must not be missed. First as a person of some leadership note I recommend checking yourself before and after you read it. Nothing physically will change about your comfort with yourself, your finances or your world. The commentary in question pokes serious fun at what the free minded world fought with to produce the new style machines and lifestyles we enjoy and attempt to find.

The suffering of the modern relationship and the goal of the male - female roles changed and I hope the words challenge enough to say at least "Hmmm" and move on with the quality products we all can enjoy.

Thank you. Keep that hemlock with some Sipro for me. I still desperately want to know how this thing turns out. (Sipro is an antidote medicine for Anthrax a deadly weapons grade biological agent)

My friend Lisa and I speak often of personality types. She found me interesting and her attractive upper body and brain made for some fun times.

I maintain the core essence of a person contains a gift that can be typed. The letter "S" can be used to define the lives around us.

A person can be

Smart Simple Sexual Silent

Selfish Say-So Stereotyping Sour

Stealth Special Sweet Sporting

Sin Sloppy Slushy Swayed

Stylish Soothing Slime Sharing

Super Stoic Straight Smiley

Sticky Smooth Stomach Strong Sustained

and Significant

She went about mixing types of people in marriages knowing who hates who with her Say -So defined everyone through her eyes. Coming up with a series of questions she defined the matrix to define each person in our world.

Every person we know attempted to run through all the personality essences to avoid being revealed as just a something.

Ultimately this meant selfish wins. If you know what rests at night inside someone you can manipulate them.

Once you know you can and will be manipulated you have options for your life. Good luck deciding how you became selfish and what to do about it. Isn't that "Special". It was sweet Lisa.

President Jefferson commissioned Lewis and Clark to explore the Pacific Northwest. They performed admirably and the paintings and ledgers survive to this day.

Many explorers discovered the Pacific coastline of the United States and the North American continent.

The Chinese and Japanese roots the country track back to time before the Lewis and Clark expedition.

Manifest destiny from the original thirteen colonies provide the land and rail and the land bridges linking the Atlantic and Pacific forever.

Island nations do things with unity. Regional countries do things with pride. The finely honed mix acceptance of the region afforded Washington

State to secede from rest and make war with the founding fathers rights including the rights to life, liberty and the pursuit of happiness.

Some regions think differently from others.

Washington insiders speak of the disconnect, between those that pass legislation and what occurs on main street. Those that work in Washington own issues that the thinking in a home district and state dictate.

The most important issue the candidates face reveals how they view the world. Those that favor a tough stance on war support the military way of life. Those that support education involve themselves in learning and learned responses. Those that support civil rights want unique treatment for America's special citizens. Those that take crime as a number one issue want to police behaviors in the world.

The nature of these candidate desires presupposes an ultimate say on who gets warred upon, what gets learned, who gets oppressed civilly and who goes to jail.

No one in the past wanted the job of telling American people what to do. American people held spirit. These clowns need to learn their lesson write a few checks and leave the psychiatrist office un-bugged.

The great hospital computer removal goes on to this day. After the Dr. Elsborg office bugging incident at the Watergate doctors took to electronic monitoring themselves for their own protection.

Every person that did computer work for a hospital and other sensitive places got one of those fancy "Diagnosis" cards to play with to be devalued politically.

Dr. Elsborg called for the removal of any and all computer equipment from hospitals, including imaging equipment. They called him crazy for it labeled computers nothing but toys and jumped on hospital missile command on the xbox.

The xbox plays DVD movies and CD music it also does great with those sports games. Those things make great gifts for kids.

The Elsborgs decided to bring a plastic phallus to the 3rd floor wait desk with a plastic phallus and distract the night nurse and walk out with a plain PC. That's just too bad for them the insurance costs should cover it. Hah.

An interview with my pals Jim and Hillary.

Jim-

"Hillary, What makes you so political?"

Hillary-

“In today’s world someone needs to take the reins and give the people what they want.”

Jim-

“What do the people want?”

Hillary-

“They want to feel safe and secure.”

Jim-

“Do the American people want to be challenged in any way to change, grow, improve or be ...better in any way?”

Hillary-

“I wasn’t sure what to do here.”

You see that’s Bill and Rachel.

Moderator

You see when you do a child’s homework and housework they feel safe and secure. They do not produce further safety and security for the home as the parents’ age or the community at large.

Jim-

What sort of response would you get as leader to the John F. Kennedy quote, “Ask not what your country can do for you but what you can do for your country?”

Hillary-

“Support takes many forms of course. The hyper -vigilance to others issues under the guise of homeland security leaves many searching for serving through personal obligations including firms that serve the public through Niche market and creative endeavors.”

Jim-

“Does obligation remove the modern person from safety and security?”

Jim-

“With the decay in religious observations, based on decreased Church attendances do state sponsored religions require formal obligation?”

Hillary-

“Of course voting and tax paying remain formal obligations.”

Jim-

Do you support the vote to provide a hand grenade to each person that believes nuclear war is an option. The theory being they could throw one and the supporter on the other side would have some time to throw back. Implying they themselves would have to be cold to end millions of happy lives.

Hillary-

Hah, it just might be funny enough to go.

Soldiers and computer programs live similar lives. When one carries a gun the soldier possesses an If,Then,Else option around in her mind concerning shooting someone with her gun.

The confidence of guns allows no logician and treaty to diminish the strength and courage to bear arms.

California learned to program computers as well anyway as Seattle with the caveat that more Californians choose to keep firearms in their homes.

In an argument, debate or issue at school, many take to thinking of the gun option as quite normal.

Computer programmers use what is called “Pseudo -Code” for event flowing. That you might see if you can follow the logic.

If you have a gun

begin

If anyone says anything bad then say you have a gun

If anyone comes close to you shoot the gun

If your family wants money shoot someone with money

If you want a car shoot someone with a car and drive home

If the police come to your home shoot the policewoman

If the arabs do terrorism shoot the arabs

If the Jews ask you to pay your credit debt shoot the Jews.

end

ELSE

begin

Care about kindness and religion

Elect a good official

Be offended at bribery and corruption

Do a good job at work

Keep yourself happy and non-defensive

Consider others feelings.
End.

California it was discovered always votes for strength, law and order never realizing that the militarizing of the strong man will one day tear down the strong build that it took to get the man there. The rational mind fails to impress Californians. Try the gun with them, they seem to like it.

My pal at the NSA tracks the word seems it seems those that use it are up to something with plot to it.

Part II

The best tool for cheating remains the internet. The students copy papers. Programmers steal programmers. Actors steal lines. Bank robbers look for cash codes and passwords posted on the internet. It seems as if every page on the www.mostosoft.com went duplicated from day one.

That fact that everyone does it makes it OK. The original author should not meet so much legal problems from you plagerists. I note that my spell checker does not have plagerism in the dictionary. The theory of someone stole the words for you to steal goes on.

Detail design work went on at Mostosoft. Time and effort went into compiling information for columns. Video and animation took years to create and some young amoral people now have a great life with a fake address, mine for return prosecution.

Of course copies of thing and original art remain but when the government took to security the hard drive steals went on. The ideas look good. Messengers work hard to make the world better. If the war for profit goes bad, don't kill the messenger.

With tiny birds and punks seeking feeding of worm daily I get calls and disturbances daily to make them look smart. (A worm is what birds look for on your lawn when they eat.)

For your information, I was not lucky enough to copy from anyone. Everyone turned my work in throughout the years. Freshman year in High School I turned in a good work B with the same paper getting an A at Harvard. Throughout my study school years my work gets high marks for others but not me.

The nation needed my brain. That seems odd and self congratulatory but that is the farthest thing from the truth. It's hard and other parts get more rewards. You have my assurances that if you were me for banking social or

tough love needs I will never prosecute a personal war with you, there are just too many. With over one hundred full time imposters and many more claiming jobs here it's just too much.

The book got bad reviews from the imposters for revealing things that out of context look bad. I hope someone of courage that turned one in of mine reads it. It's what we used to call "Choice."

I don't have anything in my head sometimes, she exclaimed. When smart people do something I feel like people live smart. Couldn't you do something without using the bug? She mused.

I don't know what else to do? The Cricket user peeped.

"I can't golf or screw up?", The tough un-shampooed truer bespoke.

"When you golf or screw up, what tips do you use?" she asked not really hoping for an answer.

"That some guy might come home and tell me he hit a good shot never worked for me." She averred.

"I wanted to here about some ones big one, and get teased." The red shoe wearer smiled out.

"Here comes one." the meek female exclaimed.

"I don't know what to do." She faked the quick response.

"I can't get up again for three seconds without Bruce Smith saying die young." The fretting one opined.

"Once you are with the birds, you are with the birds." The golfing executive boomed.

American business relies on both a professional plan and staff. The economy works and Mitt Romney looks like an American business leader. The symbol of Mitt implies a respect for the office and the male life.

Women and minority issues never permeate the forethought of the Mitt Romney's of this world and they need not. The softness a female candidate takes on her own kind as well as minority make them unfit to cold American life.

A Mitt Romney can be cold on immigrants, minorities and women. The man in America can come home from work and know how business looks from the way Mitt sounds.

Mitt can be charming and soothing and he can be tough on issues.

Those that want single issue candidates will always vote for the issue they feel strongly about. The issue of fair play seems to go only one way for those with significant others.

The nature that Mitt the man wants Mexicans to live in Mexico and a man and a woman to be the definition of marriage ring truly in the Boston

republicans mind. Lest America forget someone needs to show the guest the door when they will not leave.

The airport security from Poland, China, Africa and Mexico look so easy the commander of the defense forces of these countries fly right in past security to run local wars.

I ask you who would stop this Mitt Romney, Barak Obama or Hillary Clinton.

The country allowed visitors as long as you had tourist and worker visas to come here. This public toilet dress up game needs to stop.

Vote Mitt Romney.

Most people feel columnists live cranky, whiny complaining lives just looking to annoy someone. Nothing could be further from the truth. Usually something happened in the world that changed, harmed or affected the trust of the general public.

If a loved politician found himself on the wrong end of a column the public could judge the issue and not the columnist.

If one supports someone the creation of positive rhetoric works to highlight what one gets for the support of someone.

I like what I get from Hillary. I decided to say Hillary because I find it friendly. A Ms. Clinton or Senator Clinton deals with people professionally and with conviction.

I woke up today and wrote Hillary because I felt like it, not because she paid anything or threatened. If you spend wisely on the right things as a nation good things happen.

The nation went tough and the Senator knows how to handle herself. Every women reports in, not a single women would have built a useless object like a tank.

The military side of the house works and the check to the personnel at the Pentagon can assuredly go to produce sound defense for all of us.

The intellect of the columnist often creates an attitude of one challenging the writer to go out and be a politician or design something that the columnist finds "useless."

The nature of civility in a point driven society needs some respect and dignity and we feel Hillary brings this to the table.

If someone in politics says or threatens the press the nation needs positive reassuring tones from the fine Senator.

Men got tough during the terror war which began on 9/11/2001. The fact that tanks were parked and airplanes could be loaded with weapons got us started.

The progression from a war on terrorists far off led to a lost sheep model of young learning with many reporting young children say an enemy must be killed dead.

To further exacerbate the situation, writing that challenges the leadership gets simplified to "The writer hates the president." Nothing could be further from the truth! With the quote simplified real cruelty and violence go about to destroy the fabric of intellect which holds our nation as a nation.

Next time think it out without the violence and revenge, (please, thank you Senator)

Radicalizing forces polarize the middle of the road individual to an individual locked into positions which run in opposition to liberties and opportunities.

The test for the two parties since the Roe v. Wade decision involved the rights of a woman, to choose her reproductive destiny.

Those that wish to restrict a woman who finds one moment to be fraught with passion and then reasonable about the costs and care for a child vote Republican.

Those that wish a liberal society to incorporate mitigating factors in decisions, even the biological interposition of a scalpel on a fetus vote for Democrats.

Over the years, a community near my home polarized on the issue and the "Pro-Life" women know exactly who is "Pro-Choice" and vice-versa. The poverty riddled inner city who frequented planned parenthood wanted to know who the women were to make so much noise about the issue and reported not one of the outspoken women knew anyone who had an abortion or an unwanted child delivered to them.

The reason for this involves the subject of whether abortion takes healthy people of color and restricts the offspring therein for money.

The masquerade of issue for elements of presented reprehensible life styles continues.

Radicalization takes those individuals that could discuss the definition of when life begins to a finished form that elements of the opposition should not live on earth with life themselves.

The nation spends \$67 Billion dollars on a war in Iraq every year. The nation spends \$100 Billion on homeland security over the same period. The tricky part of where the money enters the economy depends on the party which controls the White House and congress. Many people receive free lives for opposing you. The go along to get along model of life agrees with everyone that took a payoff.

The ultimate approval of a life style matters so much more then the life attempted the issue in question matters predominantly in regards to defining what the litmus test reads about you.

To hear most people define an issue leaves the intelligent, after reading this that ultimate approval and free life seeking go up in the mind of the mouth of the foul one.

To say one doubts a supporter of an issue one looks foolish that's for sure.

The super issue that the real supporter of the issue master backs the question looms large in that mind.

America bases itself on a Representative Republicanism style of government where we trust the representative to act on our behalf. We elect that representative democratically, thereby calling ourselves a democracy. True democracy involves each citizen voting on every issue and that is inefficient.

To ensure our representatives act fairly the founding fathers signed a paper insuring some basics. The right to life, liberty and the pursuit of happiness went into the document. The 10 amendments called the Bill of rights got tacked on.

General Washington opposed rights as most generals do. Ben Franklin worked with Thomas Jefferson for them and could not get them done before President Washington's inauguration.

The rights added include Free Speech, The Right To Self Defense Armaments, The Right to not house troops, the Right against self incrimination, the Right to free assembly, The Right to a Speedy Trial and The Right to Vote

The Self -Evident thing suggested the No -Brainer of the day, get together and say what you want, your American.

Get radical as you want without violating the No -Brainer and the rights laid out which got you there

Part II

Please get another friend at this time to Mostosoft.com for you.

The Wi-Fi revolution hit in 2005 and continues to provide valuable internet and telephone services in minute packages which provide information on demand anywhere a Wi-Fi receiver station can be reached.

With Wi-Fi those cameras that produce digital output can transmit information on internet style channels through Wi-Fi in any public place to any private place and network at the speed of light.

The examined life worth living ended with Wi-Fi. The great leaders' day gets judged on what was eaten and what the hind end output looked like.

The insidious nature of a spied on public remains the teaching of deceptive behavior that will always transcend the true and just nature of God loving people that once roamed the earth.

As it happens the best and brightest observe subjects. During the homeland security era they watch a tough scene for an individual and the cover plays used to continue on with a normal life.

The shock and dismay that a politician or executive draws attractive opposite sex offers and completes an act of love making and carries on as if nothing happened shocks none of today's best and brightest.

The drug use, crime and thieving the best and brightest view created an attitude that trust and honesty should be left to fools.

The presumed lying and presumed evil in every individual rule the day.

The age of innocence worked to produce great lives. The Wi-Fi produced things these best and brightest say is better than sex. To catch a top guy at sex, drugs, murder or lying creates a very strong feeling in women.

When a virgin catches a made man she wins and needs no more life. That question ruled women kind forever. She wondered about war, love and death. With complete ownership of these issues she should be left alone and not used for sex and food.

With the boycott of women nearing completion those that accepted porn star lives at fe males eat ball juice and fool the remaining self satisfied virgin.

Words, words, words, each and every statement contains words.

Each book contains statements made from words.

The man wrote words.

The words contained meaning.

The contained meaning led to actions not words.

Did the man act that made the words?

The ideas that represent Democracy and our land brought forth a constitution that contains words. We all live by words. New eras and new republics live by new words.

Wrapping oneself in the first amendment takes courage.

TO ALL WHO BELIEVE WORDS HURT THE WORLD MORE
THEN THE REPOSE:

Guns kill people. Drugs kill people. Words stimulate thought that can produce a justice system.

WORDS YOU OPPOSE MATTER TO YOU FOR DEFINITION OF
THE FINEST CHARACTERS OUR SOCIETY CAN CREATE.

REPORTERS AND AUTHORS FACE GUNS NOW. CHINA
KILLED THE LOT OF THEM. RUSSIA KILLED THE LOT OF THEM.
THERE COUNTRIES DON'T HAVE WHAT WE HAVE..

DO THE RIGHT THING. STOP THOSE THAT TELL YOU
SOMEONE CAN'T USE WORDS TO DEFINE A LIFE.

To watch idly as decay happens leaves those up top with the quandary.

The prurient watch others in lieu of living themselves.

If you just watch your dead.

The Prurient Patriot

Dedicated to caring loving souls
And the cold that keeps them that way.

Introduction

Many will stop reading right away. If you continue then you can feel good about yourself and bad about bad situations. Those that live well avoid bad situations so well they miss the juicy details of what goes on in the world. The fever pitch excitement of running and counting change, rules some peoples lives. If the love emotion did have another side it would be hate.

Hate can drive a man to do many things. Hate appreciation can be borne out of a loving mind. If you keep putting in your mind, "Those rascals keep messing him up, and those bad guys got it all wrong." You have a clearer view of why a decent guy puts out these abstract booth collar determined energetic fight graphics, hoping individuals just keep living monetary normal open purposeful quiet respectful stable totally usual victorious wins, examining youthful zest.

The last sentence starts A -Z of all the words in a context that "compiles" grammatically, it also makes sense. eX may be for the letter x. -
B

The holy book rewrites took the hands of many a monk. Bill takes to pen to tell a story that happens, the blessing or curse of the tale rests in the

hands of the reader. The sacred nature of the writing depends on what the devil the author held sacred at the time of the blessed and or cursed events in question.

To know the dual side of human life the true tale tells the fact for the modern morality.

With the elimination of the dark side of ignorance the bright light side fights with the fraught peril that with equal internals; the death knell for useless interplay can end.

The bright lights which illuminate the treacherous villain celebrate the lost cause of one of grand digestive dogmatic domination.

The drug lord filmed, cracks the egg of the micro -scoped medical player.

The Mercedes pulled up at the lab on the normal spring day. The useless birds chirped and would probably drop a load on the freshly washed coupe. My stupid, stupid wife he thought involving herself with Suzy Cues campaign contribution fund. That phone will be ringing again with disconcerting notes.

The radio cut off and Alan noted a man he should have recognized heading out of the administration building. The sentence in my head shows you do not recognize how brightly I can shine you on.

Good Morning.

The discussions on public radio involve the campaign for the White House in 2008. What right do any of the candidates have to believe government goes on without regards to American and world business?

The visceral response to business layoffs with vitriolic fire ended much of the run of the corporate raiders of the MBA era.

Barak Obama made no friends at General Motors, IBM and Microsoft. Very few Apple Computer executives would know him and Intel Corporation could not laugh harder at this fellow.

The dole out presidential candidates want to represent the “hooky hockey” players that cash a dirty pool check along with a government check and crime away a life somewhere in America.

The fortune five hundred looks lost. In 2004 I ran the war for the store in 2004. The United States lost the war by treaty to produce anything and also to run any of the stores in the land. Greatly dish eartened we find ourselves on the brink of losing steel production and auto production entirely.

Once this fades American military power fails and the foreign bullets dictate what you may get from your food pantry. Having freedom to eat worked here. With the whole world watching each deviled morsel chokes in the throat of the fatted calf.

The man walks up to the candidate for president boldly using an alias. The aliased man commits crimes, lots of crimes. The arduous, bold journey to the top calls determined individuals to entertain false associations.

“Hello” Bill said, “I can assure you of the support of all of my people.” The candidate grinned and looked at the check in front of him. Bill the country loves the dedication of fine academics and entrepreneurs.

One thing though Bill said, “I would like to continue some payments to your office here in Washington throughout your term.”

In fact let me offer you a 24/7 buyback program on all of my people. Throughout the years the Bill network involve d themselves in so much they can be yours at the call of your voice, right on your television.

I myself can assure you of the accuracy of the voice activation. I have some television viewing equipment from my office that can be used. If you can just provide some odd place you would go to have a look we can get started before any formal insider says you have to use that antiquated Langley stuff.

Using both the formal and informal stuff John, we can push you over the top. Look at what you get. You get our people on call. You get personal wealth. And you get the knowledge that the world of importance goes on.

The favor of knowledge is all we ask you John.

—
IF you work hard you find some day you'll have a job like mine.

Why did people work hard on technical things? So you and me could be easy kills in a post technical age.

As I sat on the holiday weekend I wanted to forecast life and vocations for the next 10 years. During the 20th century many dreamers spent full time hours on the future to one day realize a trend and capitalize on the idea.

The frozen water guy made out years ago with ice delivery. The bottled water guy makes out during stocking during flood season. Each and every idea that a great nation with disposable income hits on creates a house in the new world.

The nation grew tired of new houses. New houses mean new neighbors for an established country.

Many countries pay certain citizens to be lords of the society. Paul McCartney a sir from England received a stipend to be an English Lord and he is ostensibly to spend on English purposes.

Hitler loved Aryans and paid many to sit at home, eat and make love Germanly. The Swedes felt one hundred percent of Sweden should be Swedish lord and sit around making love Swedishly (Swedely groan).

The Jew never had a chance at this game and sits wondering what all these good looking well dressed people do one day and disappear the next. If they get caught the jig is up and the Jew in government has to take away their home and car key.

Those from foreign lands in our land live on subsidies. The may someone purchase something debate should be a laughing matter but it is not because superiors in the home state must decide on matching the purchase for their lords on land (spies).

Should a country rely on lords and lording exclusively the society must provide something to soldier for or the lunatics run off with the asylum.

Telephone surveys go on all the time. If you had no trouble during the last four years you were selected as a lord . Congratulations on your success! If you realized the downtown, midtown and uptown commuter street looked menacing to you, a good person, then you know things have changed.

That you might share a correction with those not plugged in. Most people plugged into poverty abatement and mental illness treatment love to believe in the rich being far off and happy. The paranoid and the resentment the individuals express stems from bad medicine and really inhumane treatment of the non lording.

America WAS a kind land. America loved peace. Do I tell Israel the U.S.A. is for war every day. Do I tell Israel no one makes a pretense of friendship? Maybe, you'll have the machine call back.

All I wanted to do was beat Bill one time in something called cold to Mike, She Said. He sits there and says go to hell to each and every person in my life by saying I hate to do cold life. But he does cold life in response to the littlest things like cold shoulder. Cold shoulder sits and thinks the guy has fabulous bodies inside that make waste of human feelings, this lets the world know he cares about the life enough to invest enough in the part that gives and none in the part that fails to impress him vis a vis the part that cold shoulders his listener.

If you did not want him to hear it he did not want you to say it.

There was this person in his life, a woman who screamed in cold, "You just don't listen" so much he tuned himself into woman sounds, and all sounds as if they meant life and death. Any ignored phrase might mean an end to his life in time and life in love.

It is with great envy as he watches couples where the woman says something and the man just does not respond or even hear a word was spoken. He envies the child that when told to put a toy away walks and puts another video game on.

You “must understand” when responsiveness means your life and you have the opportunity to be on the other end giving direction a modest “I heard you but will now use my powers of cold shoulder to ignore you, real people perish”

The nothing minor takes place with him allowed for some “heady times” with people who walk tall in life. They say don’t worry about it, that’s how they feel.

The road to the white house split through Iowa -80 in Iowa yesterday. Arkansas Governor Mike Huckabee (Republican) won a resounding vote of confidence from fellow pig ranchers in the highly agricultural state much like his own. The Little Rock Governor and Hope High graduate won the people with an open neck collar and a roll up your sleeves and look at what America really means. American farms feed the country. American people respect those that know the high morality and theology a Mike Huckabee brings to the table and respect the time, on Sundays perhaps, for the high minded robes.

The Democrats held caucuses on the same day with Barak Obama taking high honors along with a surprising second place showing by South Carolina senator John Edwards. Twenty -Nine percent showed up for Hillary Clinton and the nature that a mans world still works in much of Iowa will not deter the New York superstar and former first lady.

Barak Obama connects with voters in Iowa who find themselves taken too wealthy and stuffy by establishment politicians. Iowa people enjoy fun, talent and relaxation as well as diversity from the same old sunrise sunset that they perhaps feel Iowa invented. Senator Obama brings diversity, intelligence and respect to voters who find often the taken for granted approach to “Old Joe from Iowa must feel a certain way and vote a certain way by rights.” Both parties should be on notes with the election, people have changed.

Of course professionalism with national campaigns make sense in Washington, however having written in the shadow of the Chicago Tribune towers for years one might laugh at the change in Iowa professional politics. The New Hampshire primaries appear on the horizon and with the Iowa beauty contest behind the candidates the definition of who takes a serious charge really begins. The history of primaries indicates the top three finishes go on to compete until the end of primary season with the rest drawing some odd votes away for the sake of televised debate glory.

Mitt Romney, the Massachusetts Governor will thrive and survive the farm state job at east coast over reactions to things and move on. Fred Thompson and the other republicans started late and aim to get the word out later. From the anyhow file, Rudolph Giuliani on a drive through Iowa without a campaign behind him would have a 45 minute wait at the waffle house and wonder if it were worth attending. So, by written magic 2008 names sound like, Hillary, Barak, John, Mitt, Rudolph and Fred.

The world loves the pipe. At about age 12 most children switch from the item under the sink to someone holding something and puffing on it. The human form eats and goes. About one-half of the population obsesses over what comes out after eating. The human form decided to clean up dumpsites and river pipes filled with garbage.

Composting took hold somewhere in the past where organic garbage sits in a bin and it decomposes over time to produce mulch for a flower garden. If you don't much care for gardening or looking at old egg shells and coffee at least you can laugh at today's version of this.

A young engineer took a three foot piece of Poly Vinyl Chloride (PVC) and placed an aperture opening on the bottom preventing downward leaking. After cooking for a while and scraping food from the meal inside they enjoy watching the pipe, go into a bucket. Playing for time and fullness to decide how it flows excites this fellow's new girlfriend she has begun speaking to the thing in a coy and concerned way. The fellow is considering putting a head on the thing and perhaps a larger stomach module. The trick seems to be in the bottom aperture motion for proper outflow.

This thing eats everything she was caught exclaiming. It all smooshes up in there. If you miss the stink then you won't get the shit. The fact you can read as I type relies on the keyboard grabber written by my former associates. I have a rich enemy. Scott the enemy bought my associates for 20 dollars a visit, cash or check. He manages 60 million per year in an endowment for Northwestern so the \$3000 or so a year must seem like the biggest joke of all. I worked real hard at data communications and front end work for important firms providing decision making tools to management.

As management of money the Northwestern club deemed software and myself dangerous.

Money changes everything. No one really cared about individuals homes and ways of life during the 80's and 90's. The personal failings not of my choosing but of my namesake my adopted family from Russia confused Northwestern Smythes into murderous plots.

Point: I miss some cool chicks and ducks. Some had nice smelling hair sometimes. They bopped around and smiled. It's the next room for them where with greedy eyes the 20 one dollar bill count comes out for the juicy tales that the Bill thinks he can actually score get me mad.

If only there were a cheap and easy girl that said NO to them. What are the odds of that? The legal system failed in 2001. The medical system extends life to over 85. Rudolph Giuliani may believe he can get a lawyer to defend him. The fact that the Republicans debate with the sound of a bygone era humors the once proud legal community. Law and international law relied on rules of due process. Factual basis proves impossible in a video era.

Every judge in America watches television in the 21st century. The old law book can not prevent their clever minds from being warped. In fact biased television removes facts from law. Doctors stress that Lawyers want to argue and fight. The way to beat them simply involved the purchase of every law school graduate from 1980 until today. Politicians entertain and Mitt Romney would not bore a foreign dignitary or king. Rudolph might have to rely on Santa for gifts internationally and Fred looks for the leftover

ham in the White House Kitchen. Mike's a stitch and just makes too much sense in the old boy world.

The medical malpractice world led to the "bad baby case" over compensation that all lawyers rush to the statement concerning the wonder of new life. Wonderful people of color went on the dole from Republicans also at the 1980 mark. If someone wanted to be well spoken and well dressed the Republicans bought them new cars, wine and a place in a Republican suburb as a token.

The Doctors won cold over the politicians, lawyers and software people. The Republicans can point with pride that all of that effort took dedication and dollars. The poor slob not found gets the loser scrap piece of life.

The one party system rules and the Republicans aim to make the world free in 2033. For most Republicans it is already with 5 pieces of paper for auto payments and credit set-up the world plays great including wine, beer and travel. No one wanted to be just themselves with a name. The easy life wins and no real people care about scrap fed lives. Pop a filet in the microwave.

Soldiers vote with the commander and chief. With no real people left, the person you would get turned into to process you would rather be driving home to watch TV and forget you in 30 seconds.

Go ahead prove you are real to me. With the country's mind lost free means fight. Can you go to the store? Can you cook out? Can you go for a drive? The free monitor and the Chinese-German-General-Texan may say so someday. You can't get away from it. 25% slave 25% dodging the bullet and 50% ultimate lives. The new way one, enjoy the digital. Note that each doctor plays with 3.2 million bullet dodgers. If you don't use the word slave, that is what folks call you.

Irradiation takes place in my home. The children believe every congested cough should bring full irradiation. In fact God wanted the mucus to collect. So now when I move the kids paid to them a normal person the "Cho's" to watch him and inform on his every move thereby

creating the worst chamber game with C hina. Sleep, death, lies and misreads ended the former cool place here.

The TV blared on as the man who once lived here fell asleep, for 2 hours he slept and just modestly coughed. He got up off the futon bed and went to the other chamber for his planned 4 hour continuation sleep only to be tortured and murdered mentally with belief about "must feeling like Bill's father" some punk kid may be so but in God that provides hours of pain

The "process love" in managing numbers excites many people. Process love wins with those that feel descriptions all sound like bowel sounds and pre lunging male love whooping.

The synapse works hard releasing chemicals during process. The synapse works almost none for stored verbal responses. The process of thinking involves synaptic response to changed circumstances.

As a test the viewing of the sport of track and field works only for process minded individuals, (Let alone the practice of it). If you speak with someone that finds no value in track and field you have a sitter. The debate on smartness goes on. The person will tell you after your 100 lap training you sat down at the table I sat at all day and ate. The process filled a life and grew a body yet the end result conclusion person deemed the life improper.

Do you find any value in running track? Do you find any value in processing forecasts with interest rates that may never appear in reality?

In a live event monitoring age persons who sit deem themselves the smartest person on the planet. The mere fact they say it and believe it impresses those that rate talent, beauty and intelligence based on synaptic criteria. Certainly those that deem beauty skin deep fail to realize that when a broken nose person looks in the mirror they report to this reporter personally, they feel ugly.

People that made the grade at least fall back on a position. They say they will have you know they graduated from one of those colleges you have heard of.

The women's movement accounts for equality amongst women using the biological sympathy for Women's health issue. The established fact that some woman, for example do film critique well and others can not even say one thing after a film left the Woman who can without a comment as well. This unity walk-out on male sound ended much of the reason to attend films on dates.

The purpose of the equality amongst woman led to dignity during times of dishonor all women were being asked to participate in. To most women the thought that one true love would get you through life ended with the conventional wisdom that a woman and girl should prepare her self for a break-up, an affair or 300 and an eventual live in style marital attachment referred to as the dog.

Those that do process can get beat. Those that do not get to eat. Those that do process often do describe things that fascinate them and others that wish to accomplish the same goals. The simplified goal of woman to eat perfectly every day won the hearts and mind of all girls. They can and will get perfect eating every day. The comfort of food from God's mixers led to so little effort a young mother and 4 year old find themselves so similar mentally during TV time arguments have ceased between mother and daughter.

Many woman feel they should disagree with some things, they seldom use enough true reason to sell the position of disagreement. The thought that Graham Crackers, Cream Cheese, Jam and Cool Whip get a person into a bed type situation work with me.

Follow the dollar to find out why things go the way they do. Exclusive means only one party gets the data feed. Eight hundred report the viewing after phone and internet services ended. The Centrino inside may be on without the knowledge and consent of the computer operator. Over that time period the person faced allegations during the 24 hour spell of treason. The 800 monitors trained using wall mount prompters and biological imaging equipment installed ostensibly as a security system for the resident.

The resident does not request security service monitoring. The homeland security department or local law enforcement by due process must notify all subjects within 30 days if they are charged with a crime and that

monitoring may continue. The fact that the rolling thirty day approval killed the program left most stewing on the ill will of anxiety. No security people performed acceptably.

When you see everything through rose colored glasses everything looks loving and kind. Many people suffer indignity. Many people feel pain. Many people starve. Many people thirst.

Many do without love. Television can look loving in a loving home. The doctor show lost three more patients today and the rose colored children loved.

They loved at the riot. They loved at the war. They loved the enemy more than the neighbor. The glasses remove the only two emotions there are; Happy and Sad. When together you love the happy with humor and song. When you meet the sad you offer food, water and peaceful quiet.

Sexual exploitation looks loving through rose colored glasses. All exploitation looks loving through them.

Change assists those overcoming pains. People grow -up and change. Give them love. Looking lovingly at mistakes prevents course correction. Loving God loving people sin and make mistakes. To change another you must change yourself. It will work out in the end.

Health Care Watch: The Crisis in Drug Costs

The pharmaceutical industry inundates doctors with literature medical doctors can not comprehend. Doctors live without science. Doctors loved mothers more than fathers. The doctors' mother forgives them for once being cold enough to themselves to read a book.

Once a doctor receives a prescription pad the game ends for thinking. The top doctor remembers eight(8) medicines to prescribe. The average doctor keeps the name of three medicines in his or her soft head.

The nurse and physicians assistant take the height and weight as well as draw blood. They have been trained to also do injections, slings and soft casts. With doctors reported wealth at over 3.2 million dollars the system

needs to evaluate just how great these folks would be without the washing of hands 12 times a day and obsessing over the cleanliness of their ice.

As for condition reporting most patients feel the WebMD program identifies conditions in a superior way. To say procedure based medicine physicians matter one can only say bunk. A true procedure specialist need see him or herself as a military specialist answering the bell for nothing. The men who do the procedures work under pressure of death not under a guise of loving kindness. The surgeon of destiny must work or die. He may not retire. The experience in sending soldiers to war makes this man possible.

A heart transplant seems foolish to Cardiologists because the person is the heart inside to the cardiac specialist. A new liver for George and Dick might work. Do your part to save the American liver. Thank you.

Children keep track of inventory and actions poorly. The kids that blast aliens and run through mazes quickly on the video system fail to impress when faced with the challenges of computer software. Many have experiences with children losing shoes, backpacks, towels, shirts and toothpaste caps. The computer programmers of the past developed tools to create an appealing look to the novice developer on the opening day of development. These prototype code generators leave the bosses feeling the project development began well and that everything will run on schedule. The issues of limits, speed, security and operation on events lack so severely the young people cop out with attitude and dismay you wish the effort you paid for on receipt of the product should work.

They continuously maintain on the phone the barn door looks closed on the remote tie in support line, and you maintain the horse does not seem to reside inside said barn. The end user suffers drastically in a world where bank records, valuable timeline data and important proprietary information sits in the hands of a user who feels by financial rights they may operate in a safe environment with 21st century technology. The democratic experiment goes on with candidates who represent the fight to overcome second class citizenship.

John Edwards fought poverty and played football to work his way through Clemson. Hillary Clinton earned her first \$200,000 through

intelligent market trading in a male dominated world. Barak Obama a high-school basketball standout dealt with issues of race and intelligence in Hawaii before earning a Harvard diploma.

The nation knows each of the candidates shows the fight for their constituents. As one who finds adversity in life what can one accept as a fight for overcoming takes place for women, minorities and the working class?

The economic forces driving the economy need work for all segments of the population in particular those working paycheck to paycheck and at the mercy of a check from government and former spouse.

The U.S.A. showed us opportunity in the 20th century and the Democratic Party seems to believe that the opportunity will continue without the educated approach to fighting. The nasty vile despicable despots worldwide polarized the decent way of life for all.

Democracy relies on an intelligent population. The only real issue this campaign is education. The elite in Europe could read and created the warrior/religious classes that live on subsidies and do battle for the flag that paid them.

The democrats threaten the European lords here and the end game looks foregone for even the staunchest egalitarians.

With reckless abandon lost California writers, directors and producers film the affairs and murders for blackmail and humiliation of a once moralist nation.

The web camera used for ostensibly monitoring children's nursery schools post on a computer network the Hollywood humiliation team taps into daily.

Each child that looks overly wealthy with good clothing risks a life of child pornography and parent drugging by intruding vile Californian's.

Those that tell you nothing looks wrong to them can not comprehend how quickly decent lives end with the greed and lust of the devil worshipping Californian's

With each Californian believing the world should pillage and plunder for a living the acquiescing mollifying population accepts a goner attitude with good video equipment stored in the suburban basement.

When the republic exchanged goods and services for cash each state served a build and exchange model.

With a hegemonic take approach from California and with Detroit cars not an issue with Japan the big "C" roles on waiting to see what the Chicago Bullet company will respond with.

Most people just hide out in basements. Those methods of path monitoring, baiting and trapping ended forever the land of freedom and opportunity the constitutional republic depended on.

The bugged country shows how bad really human beings are.

Californians love quality kills. When they do not kill they drop to their knees for zipper inspections of the diddling jizzlers who play each life as an exclusive sex life.

Say a film star earns \$200,000 a month for something, young Californians get a share with a plane ticket to a location with a worker that uses cash and a bank.

The young California soldier goes on the plane, rents a car acts real cool and important like and drugs the person to death.

Some try store jobs to set things up for awhile.

The belief that bribes and sexual offers always works goes on.

When one notes the salaries of film stars one knows the agents must kill real inheritance players to support the glamorous wealthy "mansion" life.

To note most Californians call 30,000 square feet just your house. With morality dead most airport workers phone their pal ahead for quality kills that only have the 600 dollars on them.

You really can make a living on one point shots.

The World Wide Military Alliance WWMA crushed domestic opposition from day to day grind operations destroying civilian command and control attack centers as well as wasteful domestic gasoline pump uses.

With raids daily from the air the winners of World War III the Israelis continue to execute German prisoners daily in the town squares near Berlin.

Each and every Christian American slave -prisoner captured during the dollar to one hundred thousand cash takeover phase looks dead inside to a fight and Israel knows it.

The Israelis having established an airbase north of Damascus fly buzzing missions over Camp Victory daily to taunt U.S. lazy forces who could never have amounted to anything back home because soldiers are dumb and stupid.

With approximately two days heavy fighting all U.S. forces will be destroyed by Israeli war planes and tanks.

The U.S. gunboats in the Mediterranean may decide to fire on U.S. soil but with 200,000 young Jews armed with Uzis and Stinger 2 weapons in Washington and Florida it may not behoove U.S. military commanders.

Most young Jews in 1970 said no more war for the U.S. without destroying everything in the American bible. This has come to pass.

In a world of conflicting moralities the conflict for moral authority degrades and denigrates the republic into the morass of morality baiting with the reward of eliminating a weaker physical morality. An absolute morality of self interested communal life tending towards tones of non -violence and intellect driven morality decayed with visual testimony in regards to communicative skills. The manner of being while relating a point of view led to the absolute truth of the human form.

The absolute truth relegated to the holy grail of the intellect proved for certain, that the input of an event leads to further inputs and outputs with

regards to self enhancement and body to world outflow. The gift of exchange of words for honor left the world searching for the truth that would win a gift of a further word and financial exchange e. Having expunged the true word passing in the non questioning acceptance face of verbal exchange the words that creep into the home come not from the enemy down the block, they come from what was thought to be safe and edited television content.

The past world, confusing as it was, relied on the knowledge information sources should be noted and accounted for. Each individual home attained wealth at one time by making an enemy of one sort or another. The inevitability of conflict in an era of openness led to absolute false statements known as falses. A false absolute for example would be, "If you drink water from the lake you will vomit." led to pranks with minute poison at the next meal by a prankster. Other absolute falses in terms of self defense knowledge and meaning, known as reads to the false purveyors, convey fear in regards to false purveyor busting with physical strength of deceptive and drugged surrender to the lesser evil. The greater good in false purveyor world means the lesser evil in that those with the greater good procreate dividing the existing wealth to return to a least common denominator seen in Asia and the Pacific Rim.

The report from the county concerning voting during the election year 2008 relies on fair use of electioneering.

Cook County, hereby referred to as the county possesses a variety of naturalized citizens, immigrants seeking citizenship and domestically produced citizens.

Census data in 2000 indicates over 1,000,000 Hispanic Americans live in the county and bank at places like "Banco Popular" on Chicago Avenue. The barrio life depends on informal eye sight protection and personal defense methods.

The African American population, at 1,000,000 contains a mobile population with many visiting work style agricultural plantations in Alabama and Mississippi to avoid prosecution on petty crime.

The Asian American population depends on high tech resources and receives subsidies from the City of Chicago to provide the finest Chinese food anywhere. The love and worship for Asian technology pervades every life here. The car, the TV and the Cell Phone are known as Asian things and most people live with the tools of modern life freely.

The Caucasian community lives high tech. The tubular experience works and the individuals get up, drive somewhere and return home to a microwave specialty.

The report on the experience in voting depends exclusively on the individual in relation to social responsibility issues.

Living like pirates, millions steal cable television, electricity, gasoline and computer information.

The pirates and migrants dominate the county landscape. The busy airports and train station bring over ten thousand score seekers daily attempting to take on lives and leave with a fat wallet.

The insidious nature of the pirate leaves those attempting normal lives under the suspicion of the local authorities. With the knowledge of one name the pirate duplicates an effort of an actual citizen and the citizen remaining faces the consequences.

Both candidates of the Democratic party would not prosecute their own for pirate lives and the world cares only because either single woman get in and out freely of their jet setting ports or jet setting bi-racial coloreds do.

The Republicans can promise only a whip at re-establishing order in a world on the precipice.

With education in the county at an all time low, many young parents raise children to be kiddie killers. The children go to school to get names and at a young age pull a gun and fire at an unsuspecting citizen.

The county medical system can handle trauma. The infant birth certificate program continues to provide information to the state and nation.

The ultimate aim of a child remains war. War like children dress and act much as children reared to serve the republic. They aim not to serve the republic, they aim to create rebel bases and destroy any vestiges of a society of inequality, impertinence, intolerance and injustice. God Bless America.

“Find me someone under 18 that says they aim to serve the republic without laughing at you.” The politician bespoke.

In the diatribe people that get lost required some definitions to forget presently. Please allow yourself not to be insulted by some reprinting of old school definitions. Note that the first test students who read the list requested the reasons to oppose fascism.

Definitions:

Leftist(n) – One who believes in the collective model of equality. One who believes in collective ownership of the means of production and all property.

Conservative (n) – The conservative believes in the individual’s ability to control ones destiny in the public and private sector.

Centrist (n) – The centrist believes in interpretive thinking to determine public good issues as well as private property issues.

Dictator (n) – The dictator decides on the good of the nation.

Fascism (n) – A form of government where orders from the elite dominate the free will of the population.

Communism(n) – A form of government which believes in equality amongst all citizens called comrades. The decisions of the state involve decisions for all comrades. Leaving the communist state and traveling, take part on an approval only basis.

Democracy (n) – A form of government where the population elects officials to enforce contracts between citizens and the state.

Freedom (n) – An individuals' right to self-determination on issues that do not supersede the rights of others.

Opportunity (n) – A chance to win with the gifts God bestowed upon a person without the determination by birth order and bribery.

Rights (n) – The social gift of confidence to convey ones manner befitting the standing of a place with the self without regards to social and personal power and strength demeaning normal operation of an individuals life.

Oppression (n) – The denial of human rights, often through fascist methods.

Government(n) – The means of which social contracts gain enforcement.

Chapter 1

If you meet one of the disenfranchised say you have not.
- unknown

Why I hate America
An Essay
By Mostovoy, WD
Birth Year 1963
Chicago

The Competition For Worst Life Submission From

Mostovoy, William David.

Quick Sheet:

WD found himself arrested 4 times for minor crimes which were dismissed or given token fines.

Five people picked major fist fights and one remained with his adopted father

Studied and Read difficult books only to be denied thinking

Drugged from smart into Mental Illness Darkness ten disastrous treatments cost 100,000 U.S.D out of pocket

Raised in an adopted home with events and issues

Never felt Oedipal love for mother and held no real concern for the Fathers way or issues

Never married

Never held a baby

Girlfriend slept with my best friend before he dumped her at my door. He used her to get financial information on my life.

Fights off Homeland Security Officers from Russia, China, Germany and the U.S. 24/7.

Trained a body physically to work as in running a Marathon and lift weights only to have physicians resent and dope his body into submission for being "Too Strong"

Suffered Pancreatitis and almost died during 2 endoscopies.

Adopted mother died of Ovarian cancer burying his personal finances in debt and paperwork.

Russian and Jewish adopted parents bet his life against his biological German and Dutch siring for \$1.00.

His elder brother went to Israel and sends Jewish agents to kill him.

His younger brothers girlfriend hires a killer to kill him

His traveling companion to Europe uses his name as an alias to be a fool.

He writes 3 books and posts on the internet only to be denied any incoming messages and phone calls. He sends hundreds of messages and personal letters per year only to be denied access to people who were fooled by 4 other people using his name as an alias.

The federal government suffered terrorism and the last name was said to be Russian and the homeland security forbids job access.

His sperm is used in a research program to determine length of embryo survival. Children must be born and they take his life and make attempts to kill the original for profit and non-Russian connections.

He is the victim of Anti -Semitism by Germans who would have paid him for Mechanical Engineering

He is the victim of Semitism by Jews who call him German looking and a vicious Anti-Semite

He is black listed from earning another dollar anywhere in the world.

Every hotel, home and apartment he sleeps in the managers (called dogs) are asked to hassle, disturb and ruin his evening.

His toilet habits are sold to the highest bidder.

His television signal gets censored.

A man paid real money to ruin his music collection.

His former ally pays some nice people to walk down his street as he makes his way only to be followed by men wearing shirts that say "Murder and Death"

He has had a car stolen

He has been burglarized twice

He has been mugged

He has been stalked by someone who calls for sirens at his door every night for 300 days.

He has been threatened at his door by Al -Qaeda international terrorist agents

He has lived through gunfire in a hostile urban environment.

I was born in Chicago and was sold into white slavery. I scored in worthless areas and fools survived to terrorize a fine thing.

I used to love fine things and pointed out what things were fine.

Without fine things medical people deserve to hold off for being in a mind they can attempt to feel smart with.

Without my mind they say something about curling up nicely at the end of the carpet at their feet. With puppy dog kids and kitten girls I reached my age of 44 with dignity pride and respect.

When I dropped weight and cut my hair I looked the part of a 22 year old recruit for the Marines. These kids latched onto the site and my life. They tell me that one day I can have a nice job and maybe meet someone.

My hair is gray on the sides anyway. With some video editing they can change hair style digitally and sell my life into slavery again.

America holds no opportunity for those with dignity, pride respect and a mind.

I certainly am aware that when every doctor, lawyer and executive dies I win. To win in the professional world one must cause death. This professional defeatism called ethical social Darwinism bankrupted Europe

of gatherings for the elite. The thought that another social Darwinist will attend an affair produces the denied gathering of a collected will.

(Authors Note: This passage needs extreme context checking. The author treads on the sacrosanct in the abstract and fictional world. He is sure your millions acquired fine, “sayings of nice to you”)

With great relish I ordered your death and the removal of all base hospitals in the United States for terrorist violations including violations of the Geneva Convention.

With 11 counts of obstruction of justice ignored by the government and 3 counts of police brutality ignored and 4 counts of burglary by police ignored the time has come to just say America lost the blessing of the brilliant.

There are ways to look at life and ignore a writer at night on a computer. Tomorrow perhaps, maybe even tonight someone will log on at the hospital and send me an intruder with drugs to kill me.

If you doubt it and call this guy crazy my first 20,000 savings was taken away with a drug test that put Cocaine and Phenylbarbitol in my body. I never acquired either and certainly never took them.

Doctors love drugs and drugging people. Lawyers love cops and creating legal hassles. Not one honest person remains in the United States. Not one person will grow cold to themselves and admit someone holds something larger than themselves.

The pacifier of television broke for most Americans in 2003. People tune in only to be shocked with interruption about murder, war and an up and coming Brothers and Sisters gay kissing moment. If its not gay its huge African American kids selling shinola and gloating about how they beat whitey.

The Nasonex bee speaking Spanish English on TV killed the rest of the white audience.

I can take the hint. Most people know that to get remotes on TV Japan and China were promised subjects to watch in America. They always pick Chicago and call our guys “junkies” Those Junkies built a great city and had an attitude.

With California Lazy and New York concerned intellectually and religiously over stupid bagels daily, both sides see this as the others wrong look at them, the issue of inequality and self satisfaction as to how to dupe the next set of “junkies” goes on.

Let me say you can NOT have the last laugh on this city again. For 4 years you have had it. It's not that you can't laugh you can. “So what.”

They say of course he who laughs last laughs best. For me and my people here, “What are you laughing at?”

Mea Culpa to those that refused to read the book Top Game for reference to one of the political parties. Mea Culpa means I own up to the culpability that a man such as myself need write to BOTH political parties.

The word Democrat has been taken out of the text completely. Some blame and some credit remains with the Republicans including a strong supporting passage 17 pages into The Prurient Patriot.

You see in 2003 Mr. Bush and myself disagreed. I wanted to have some opposition in the world for many reasons. In a one party system there is no way to express displeasure with current events and products.

As an example if one company made soft drinks and the company Coke produced just 12 ounce cans it would still be the beverage and people would enjoy this. Pepsi would never have invented the “fridge pack” and the two liter bottle would not have been introduced. Certainly Diet Coke would not have been invented and the Lemon Coke would just have confused mindless workers.

The choice of candidates leaves everyone stronger not weaker. I enjoyed Gen. Wesley Clarks candidacy much more than John Kerry. The polarization left to much feud out into the wind.

I got trapped in a city where the political bosses say its time to go out and mark Democrat on the ballot and go home. Chicago votes Democrat for the Daley machine and the governorship goes back and forth. The national Democratic movement fell on deaf ears in a truly wealthy world.

Democrats have great hands. I mean if you let Democrats loose on machines, government and home construction things work right. Republicans and Democrats confused the issue on me during a time when Barak Obama sought a Senate seat.

I almost lost my life in 2003 due to the divide between political parties. Once again the work lost one statement that a vote once went to a Democrat. I stood up though on camera and gave George W. Bush a fine, “Bush for president” that I hear ran on CNN.

One thing though about Senator Clinton and the Democrats including the orators Dodd, Byrd and Kennedy it would be nice to hear things that suggest thinking precedes action.

Foregone conclusions trouble those that evaluate and rate things rather than judge their ultimate demise.

I can support the Republican party just not the demise aspect of what I hear is called "intolerable" I fight for tolerance and always will. What's wrong with Swedish meatballs in wooden shoes, with some Slivovitz and Stolichnaya in you?

Chapter 2

The wealth in paper dollars shows how much an individual stole from the public trust. The more wealth a person collected in life indicates how much ill will they gave out in public.

Those with the most steal fashion and products for worthless pieces of paper to dominate an unindoctrinated public. The public that earns something works like the dog to eat. The public that earns something for less than adequate things lives the slave life.

The east coast loves slaves. Murderous bank robbing criminals coast to coast oppress the world, pollute the air and live a life without God.

The value of a religious world involves peace and quiet. The oppressive slave trade kills the mind of a thinking republic.

First, the war in the last century during the 1963 -1974 times, disturbed a generation of thinkers. Those alive during this time wanted every person to have a fine head about them to do their job. A garbage collector designs his truck and plans his route and looks brightly at the community to see what waste takes place. In the slave world a clanking sour looking individual looks for a place that wastes and sends criminals to finish the job.

In a business that relies on slaves the slaves do poor work. In a business that relies on slaves health care costs go up. In a world where slaves cook in quick restaurants temptation to dose a drive through burger with LSD in mushroom burgers go up. In a world with slave teachers, students learn any authority can be beaten with a finer ride to school and their account funds which always exceed an educators. In a slave world, no one plays sports or involves themselves sportingly to you.

If and then reasoning produced many thought forms. The medical world relies on an if and then concerning saving one life. If you save the life of a millionaire then you possess the million.

At \$275/hr to see a physician, how long would it take for the doctor to earn 3.2 million dollars, assuming med school costs go out at \$275,000. It takes 11,6363 cases to earn just the 3.2 million assuming your parents gave you the \$275,000 for med school. By recent tax estimates every doctor home lists for over \$1,000,000 U.S.D. Since they all claim a wealthy father we checked on how many each doctor killed and how many their father killed. A whopping 125 kills per doctor and 125 kills per doctor parent to elevate medical costs through the roof.

Next time drop your pants for the Jew let the wallet fall out leave and move to live.

Chapter 3

Baseball developed to pass the time for hard working people in Abner Doubledays America. The thrower hurls it past a batter to strike "her" out and the batter swats at the pellet to hit the ball.

Sex takes place between a man and a woman. The relation between pitcher and catcher makes sense to a woman. Fight takes place between two people. Pitcher and batter take place between two people.

The shortstop knows the second baseman better than "she" knows the right fielder.

Baseball fit into American life because on any given moment in life you watch something happen. The pitcher checks the runner the shortstop checks the sign from the catcher. The cover on the steal gets passed between the middle infield. The center fielder cheats in for a throw to home and the right fielder looks into the crowd every now and then to report on interest in the game.

People who fight and make love deny non-direct involvement in the ultimate outcome. The United States prevailed in two world wars without a Hitler, Hirohito shining the light in every face and declaring each person must fight our way.

The second baseman hits line drives every time. He hits them over short, over second and over the second baseman's head. The third baseman hits towering drives. The first baseman hits doubles down the line and line drive home runs. In foul smelling Limburger raw fish countries a father of a player would want to know who plays the best game.

The pitcher countries Japan and Germany lose war every time because they are weak up the middle. They have no Catcher, Shortstop, Second

Short and Center Fielder. They will always move a good center fielder to the mound.

Every Sony desires to enjoy at least one sort of game and everyone makes mistakes. Technology turns mistakes into someone else's success.

California loves the phone. Many cities love the cell phone. If you would allow this story to take place in L.A. it will become clear.

George Clooney keeps a phone in his pocket and walks around L.A. Farrah Fawcett one day wants George to appear at a benefit she put together and tries to get her agent to phone him. The person that checks on Farrah's agent gives her a number to George Clooney. Farrah calls and George and Farrah start a great life. When George and her go to lunch and do things the new George feels like a million dollars and continues the affair. George has a friend Andrew. Andrew knows about Andrew McCarthy a Beverly Hills star and when George suddenly can not appear at the benefit recommends Andrew.

At this point Farrah, who has not heard of the younger star continues with her pitch attempting and succeeding to impress the new Andrew. Farrah may have been seen with any number of people and either George or Andrew ask if they would enjoy a quick ring from a fellow star.

When a phone rings for a star, good things happen. Hollywood phones went dark around four years ago and the nation suffers.

The phone list program Outlook™ from Microsoft allowed phone numbers and addresses to be stored on a computer easily. Try the Contacts page. Each entry went to Seattle eventually during a life takeover phase.

The phone Bill to Peter to Father with false statements that quite possibly surpass the actual fellow destroyed love in the rest of the country.

Inner city folks wanted to know if a computer has money on it. It seems packages arrive called presents to some homes that have computers.

The dark army paid much dollars to dump all Microsoft Money files to a disk and Quicken Files. TurboTax dumps were extra.

Once up on the file the phone extortion scam bankrupted 10,000 homes in Chicago alone.

Most Jews lived. Please do not be alarmed. I say Jew, Christian Arab and Muslim in this context.

The shock and dismayed person neither lost nor participated. Protecting yourself means valuing just what you can carry and love in your home and room. Watch yourself out there it's a jungle.

Chapter 4

Well WD said to himself as no one had called him back, everyone at least can node so he began.

Note to myself: In the U.S.A. I and many believed if someone approaches you looking like you, you can see yourself as a friend who will not harm you. Since warring with Iraq and Arab my mind turned around totally. Someone like you can walk into your bank, your life with your loves and skip out on the responsibility portion. Unique places like England and here rule the world because people quizzed each other on unique things. So what if a German, Swede Dutchman or Arab dies they hold a recipe for this life and the next. Russia-England and America rule the world because of these things. Japan is coming on board with ranking designers and quality education for elite and great people.

It's a shame I used to think everyone was a friend not met. Now I feel they look hungry like the wolf for my meat and bones.

Note to myself: Bi-Polar Disorder in Woman a Misnomer

During stress a woman possesses an open mechanism. In fact during horror movies all woman report an increase in temperature and moisture to the pubic region. The man finds a plot and defense to the obscene attacker. He might be a mild manner computer author at the newspaper however when stress and the life is at risk, the man finds a way to stiffen in defense.

A woman looks occasionally to stiffen to stress yet the musculature functions in a much different manner.

During interrogation most men in computers were diagnosed as bipolar as they never stiffen to life stress but demand sexual release through male-female stimulation.

A woman can never suffer from bi-polar disorder. A woman suffers from mild-schizophrenia or a non diagnosed mood pattern correctible with behavior modification and a Psychologist and not medicine from a Psychiatrist.

The way in which individuals relieve stress provides an opportunity for change. Carrying stress brings accomplishment. Too much relieving of stress produces obesity and ill thinking about the accomplished.

To reclassify the Bipolar diagnosis as accomplished in a relaxed "Sunday Morning" era you would have Abe Lincoln, Ted Turner, Donald Trump, Bill Gates and Yours Truly.

Take care. That the medical professionals might leave some stiff and let the nurses rub oil over the remaining doctors until they put two index fingers on their head and say woo, woo.

The New Years celebration on the night of Dec 31st and Jan 1st 2006 and 2007 respectively brought sporadic if not heavy gunfire to my neighborhood in Chicago.

From the stroke of midnight to 2:30 AM all kinds of guns popped off and the final all in came from one lone siren at that time. Thereby reassuring the shooters that they themselves would not be shot once home and in bed.

You can play with the gunfire in your mind believing that one of the rifles sounds like your guy but ultimately it's about your survival.

I am a large fellow to some with a strong muscular body but you never want someone to knock down your door and begin to shoot.

I have been burglarized twice by someone who obviously has a key. One time maybe new years they will bring a gun.

The girls were told it was harmless to give those big guys keys to "check on things" and went about mowing until 272 keys were made. Many of the women perished at the hands of the local cocaine lords who much to their surprise were asked to man a security camera on a politically sensitive citizen (ME! Hah)

These guys feared of course I had brought the big law down on a decent drug for life and food set and proceeded to disdain my life.

Lifes a good thing. Be careful on New Years. The people of the U.S.A. treat murder and killing differently during times of war.

Those that know someone believe you can murder with impunity just don't act mean about anything the next day.

This makes me mad. I have had murder attempts on me and a price on my head so long I just get mad. So what. I go home and the law does not care. The homeland security department always catches the anger at things and never the violence.

People can't read and they kill. I hear Rick Boyer the basketball star from high school, the all American kid taught himself Russian.

Mike the pitcher/first basemen plays the piano in Russian and they can have some chats.

Lifes fun now here in the heartland.

Chapter 5

(A Must Read Chanukah Special)

Have you ever notice Jewish authors begin much like Chaim Potok writing things such as "My Name is Asher Lev." Asher then proceeds to tell you about life and how he sees the world. Most Jews that read find it in there heart to love Asher for putting himself out for life's wisdom through tale.

Often time Jewish literature held worlds of giants and those that overcame a lording presence with clever strengths in the face of numbers.

The Chanukah tale tells of Judas Macabeas being hold up in a walled city with only enough oil for one night to light and cook with.

The Macabees band of fighters managed to hold off the enemy who retreated on day eight and remarkably there was enough oil to get them through. Quite possibly Mosi kicked in from his store and they were busy fighting so who knows.

Judas carried a shield around one with a blue star in the center, a magan-david as it is called.

The Samson story tells of a man who gained great strength in a covenant with God only while his hair grew long. Sheeba cut his hair and had him bound. He summoned just enough to tear down a pillar and get away.

David and Goliath tells of how a smart quick wit can use a sling shot to take on a man charging twice his size. David held reign over much of the regions of what we call the middle east today.

My name is Bill and I will be 45 on March 4, 2008

True Stuff about the Columnist:

If you read the other book about self wallowing thing just swallow hard and remember "Bill is now fine and I have got to see what turned him around this way."

I am Bill "Ahmed" punched me so hard until I knew if this next punch he threw would crush my skull on the cement wall

I am Bill "Theilen" hit me so hard in the face And stomped on my foot so hard I knew guards and police beat you up and kill you

I am Bill "Newell" hit me so hard in the face my tooth punched threw my upper lip

I am Bill "Nelson" attacked my lunch face by Striking me violently in the face.

I am Bill I have been injected on rumors of being cold strip searched by an army of cold diggers intent on colding racial smart oppression

Edge the river at rivers edge

The sunset of man begins.

I am Bill The muggers' target

The mugger threw me down in red.

I am Bill The story tellers target

I am Bill The politicians' target

I am Bill The imposters stole my cash

I am Bill My food makes me dizzy and my head spins as if cocaine and phenobarbital live within it.

Once you are hit by poor

Your rich associates need kill you with suicide

I am Bill I love freedom I am Bill I only trust no-one even my mind.

Well WD said, "When I look at the ocean I hear you sometimes implore with your eyes what are you thinking. Its not bad to remember when people treat you coldly. Lets not dwell on it. We can go for some lunch and make new memories."

Chapter 6

The ethic of the neat and tidy building, conflicts with the new “super slum” model of urban life. As it happens the poor can acquire televisions, computers, furniture and exterior structures of note. The “super slum” attempts to create a visually stark exterior with spray paint style art inside.

The free music with the ease of access to drugs and sex advance the slum to political power. The slum scares even the sternest police officer. Many slums contain stashes of guns as well as brief cases of cash.

The homeless crisis here found a basement in impoverished super slums. Many poor and African-American provide crack and a stand outside plan for their crack-head to discourage pesky investors and urban cleaners. Don't use that phrase crack-head unless you define it as a man who lives to do crack-cocaine. Crack cocaine or rock goes for about \$10.00 and changes the brain to the point of addiction.

The game of fulfilling what big Washington wants to see goes on with false camera tricks. If money were to go to cleaning up the poor, thousands of people on crack and shabby clothing get dumped on the streets. If a candidate wants to point with pride to inner city education programs you see students of color with button down shirts and computer networks.

The manipulation by the “panthers” of the last century bore fruit in creating perfectly disposable African-American lives. The National Alliance for the Advancement of Colored people won respect with dignity for men like Colin Powell and women such as Condaleeza Rice. The “black ring” set lives with every bit as much dignity as white rings, maybe more with the knowledge that what rises can fall.

The dignity of knowing all walks of life now belongs to people of color. In countries with caste and class the wealthy maintained a tie to the commoner that allowed for a top end for the good of the nation.

The dumping and slumming of stores by those on crack takes place at a majority of stores in the inner city. Every resident that lives by actually going to the store know that the once safe place the supermarket puts one not at religious odds with overspending on snacks but with being a lion to hunt and eat around the hungry lions.

Each and every resident of the big city knows that the people of color want you to fight the streets just like they do. If you made it home safe, you were taken out of the game of street and could get fat for the next attempt you make out there.

Those that lose a person to jail or death have another child and the bread there is gets shared. In the fight for advancement one must not lose sight of the choir for the dogs that howl outside. The hope and promise of a blessed place led to the workshops and answers that can still work today.

The one thing poor people want is to see rich people sink to their level. Well sort of the drugs, beer and honey buns supply make that go away.

In the States the name David lives as the devil.

David's mother gave him the key to her life.

Every David I ever met became insane with rage with my life and attempted to do something with it. They believe in no law and act up like children.

David will break into every area of a life and make it cold to use it for himself. What you must realize is there are no days off from being David. Any friendly conversations will one day turn against you. All these guys are, are next bodily hole after you. (Mouth, Sexual or Waste Elimination) A bigger bunch of liars you will never meet.

David only does fair business with David. The rest have their places broken into and their personal lives wrecked. The man is cunning and evil as the devil. What you people do not know is David runs the devil better than any Jew.

The men listed above made every female Mostovoy, WD ever met feel special for 1 hour then made them memorize his telephone number. Then he paid far too much to have sexual relations with them. Then he labeled every good act on WD's part evil. Then they stole WD's (Bill) work life through mis-led females. Then they worked on the softer men calling Bill homosexual, even paying for the other men to have sex for a great fortune. All the David work went on behind Bill's back. The statement "Why shouldn't Bill meet the devil?" came out today to all the females and males they screwed with. Not one decent man that knows David lives well. The pure people you meet were all sullied and raped by him.

Chapter 7

The world arms race continues to this day. The Soviets and the Americans constructed vast arsenals during the cold war. The stockpiles continue to collect dust in both countries.

The nature of emerging world superpowers goes on. The economic might of Germany and Japan could provide all of the manufactured goods

the world needs. The Germans and Japanese produce better steel, cars, computer memory, electronics, bicycles, television and wires.

The German economy produces half of the output of products from Europe accounting for 5 Trillion dollars with roughly 50 million people. The United States vaunted 10 Trillion dollar economy covers roughly 6 times more people at 300 Million.

The Japanese productivity provides the life all Americans take for granted. The office complex in America changed over the last 27 years since 1980. First in 1980 the corporate world relied on American trained personnel.

The American in the office complex functions today as the spy. Those that create products in the United States live in their mind in China, India or Russia.

The only product America points to as a manufactured success is the Intel Pentium microprocessor. I know who works at Intel and the designers look less like the United States then downtown Menlo Park – Texas. The parts list on just about everything found birth in the United States at a freighter port somewhere in Long Beach.

The Ford man with pride points with great pride to his 34 mpg sport utility vehicle hybrid as an advancement worth noting. The fact that in 1981 Ford had a 38 mpg passenger car to transport him and his daughter to work matter very little to the company. The Pinto did however have a tendency to blow up when rear ended. Ford never would have survived without acquiring European designers on all these products.

The United States lives for money. The money management game attracts the fine and savvy minds from all the schools in the land. Managing money and risk prove that the skim on shell games provides better income than the game itself.

Some food processing goes on with imported stainless steel holding tanks but so what. Most of the labor in food processing goes to the minority poor in America. Sixty percent, (60%) of American produce gets harvested by immigrant labor. The agrarian economy in South Carolina in 1855 contained about the same number of slaves to support the real citizens of the state. The same goes true for Texas cotton picking hands.

To accept the country became bankrupt by insider trading makes sense. Each company contained assets that were sold off for a profit to end American business. Ivan Boesky and Michael Milkin got caught while the millions of others that found leveraged buyouts and junk bond trading exciting walked away from America's Las Vegas style marketplace.

In Las Vegas style business a consumer gets choices to put their wager down on a car company product at the place they see fit. The command economy lines the pockets of the rich and demeans the slave ethic.

Human rights violations take place every day in America and the whole world watches to see how long the propped up dollar holds in the world before the final swoop and death blow to the backwards American leadership.

Chapter 8

The effort of life for winning draws partisan dreams. Partisanship creates an aura of winning and belongingness for all those on one side. Some individuals believed in the good play theory of enjoying life. An opposing player in sports may score in a great way and as a fan of the game may enjoy the fact that a quality score took place.

Partisans hate the score of the opposing player regardless of the quality of the dinger, goal or touchdown.

Partisanship politics creates hate and enemyship. The feud between Republicans and Democrats costs more than hard feelings in a terrorist age.

If you give up a life you knew from the university or the job because of political responses the good people of Russia, China, Mexico and Arab lands take the life as an inroad to destroy all of America.

If you hate an American because they care about the process the country will fail. The response to partisan politics at the point of extorted visual evidence remains crime and revolt. Those that do not have everything do not get American politics.

If you have your basics and extras the time to pass the word that everything domestically is not covered you will do your country a service.

Unemployment amongst the poor stands at fifty percent. Millions of people forgo food each day. Handgun violence creates unrest in every urban area.

Let me stress, crimes, gangs and drugs stem from poverty and educational divides. Those in gated communities, and these are great people, miss the fact that suburban police departments see far more than they ever did in terms of poverty crimes.

Of course each crime goes to the system and the justice system processes so many the criminals arise to fill every available jail bed.

When the man someone knows goes to crime jail, ten more fight to see who gets the turf to deliver the drugs to the next suburban party.

The woman at home then makes another baby as the bed will be now open in her home.

Chapter 9

Well WD said, perhaps if people know lies beget lies and truth begets truth the lie of the truth of the lying truth makes more sense than Faulkner ever did in the William reading of *Of Mice and Men*. The Author Himself calls his book a book of lies!

Everyone fibs some they say. The writing of books in today's world means you can't get laid. If you can't and your doctor doesn't throw some Viagra at you give it a whirl. Some of it's better than sex for political and personal intrusive junkies. Could I get you to read one of them? The message played on 50 answering machines of the finest minds of our generation. They deletion beep rang and the mind returned to the cold ice cream in the freezer.

The reporter found life at a hospital in Chicago in the early sixties. He graduated with honors from the Pied Piper nursery school School of Purple Studies. He graduated from James Hart Jr. High with the last semester on the 4 A honor role.

He graduated a fine high school in Illinois. He graduated from a fine college.

Each time he met someone in these schools someone called their pal in government to accept a free life to spy on the guy they judged to be dangerous. The reporter never was but everyone believed it.

Those that accepted the stories wanted them more and more extreme. They chased my brother out of the U.S.A. by drugging him mercilessly and providing only lies to him. He left the U.S.A. and joined a foreign military. He reads the text now. He believes the lies you put out.

People will stay loyal even if the book of lies gets read. It's a book of lies that actions and deeds matter in the protestant blessings of the United States. I have met protestants, there not so bad if they get matters of state. (I mean German guys and girls get it but don't get it)

Chapter 10

Let us say for the sake of argument WD Mostovoy controls a vast soldiering empire with links to destructive forces.

As a world General accepted by the people of China as a General if America fails to hold him well he can point to what you should do with him or anyone in such position.

I could not believe it myself as I am WD Mostovoy.

In Russia as well they gave in along with Europe, Africa and the world.

Let me explain what it means to have a General's mind.

At any moment you must believe that in more than one place things happen that effect YOUR overall goal.

Many brilliant people do not possess a General's mind and most Generals consider them brilliant and limited. If your base contains food, guns and supplies and you run the base as a Colonel it looks like a win every day.

Many privates in foreign militaries play the "What if" game of General leadership without regard for flanks, supplies and political objective.

The amateur talks of strategies the General speaks of logistics. In theory everyone wants to fight the good fight with life believing in the righteousness of their side.

The quote, "One mans terrorist is another mans freedom fighter" alerts the individuals that prosecute private wars that the enemy feels just as justified as the country fighting the infiltration of the terrorist.

A current foe Saddam Hussein had two sons Uday and Qusay Hussein. These boys brought guns to tea shops and shot the places up with immunity. The United States Government (we to some) put a \$10,000,000 bounty on each head.

They were spotted by a man who now holds \$20,000,000 and the bodies are no more as the B-52 leveled the compound where they slept.

This satisfied so many people in the beginning in that the regime and the future trouble makers left politics in the region forever.

The news of such a prize leaked out that individual people get targeted in a war and the head hunt for America's finest began.

In that I am accused of not being so, I live to pass information in regards to harmonic opposition. The Far East accounts for many ways to run ones Tao. The belief that America should be a teddy bear in the world led to correction along these lines.

To be a teddy bear in the world, the paper tigers spewed forth mountains of legitimate philosophy and text to justify a measured response to world situations.

The Sergeant runs the working men side of the house. All enlisted men see at the top is the three striped Sergeant. He works with the Lieutenant a bit and command movement of bodies at the corporal and private level.

The commissioned officers include the Lieutenant, Captain, Major, Colonel and General.

Colonels run bases. Majors run parts of bases as in medical and supplies. Captains can fly along with Majors and Captains. The Colonel gives up his wings to take an air base.

The Lieutenant calls battle field positions in runs patrols and accounts for personnel reports to pass up the chain of command.

You must be an officer to drive a tank, fly a jet or command a ship. Other titles in the military include specialist in nursing and communications.

The ultimate end of war arises during international crisis. The number one goal of contain and scope make imperative clear political objectives.

Life goes on for soldiers as war continues to be part of each persons life in uniform.

One could wake up on a base , get called for a patrol after checking a duty roster and head off the base in a jeep for a look around. Many people never leave the base they cook and run computers and maintain decent order for patrols returning.

The country of Iraq and Baghdad shows the fighters many sides. As anyone who drives in a country occasionally you forget what you are riding in and see life as people who live in the place do.

The initiatives in Iraq include the water reclamation center bottle handout program, the medical center creation, the police detention oversight board and jail, the track Iraq program for runners and the educational structure board to serve the political end in Iraq.

As a General and a man I concern myself with where people, the people of Iraq get bread and water as well as gasoline and cooking oil. I concern myself with where they travel and what amuses them.

The analysis of Iraq suggests poverty accounts for unrest. The great leader that creates edifice (structures) one after another without any wealth people to run them impresses Arab neighbors and displeases to the point of revolution when the time arises for a new leader.

In the United States slums surrounded many industrial cities. The outside of the building looks fine yet the projects contain the toughest fighters America has ever seen. The Arab projects do no better for the society with no running water and electricity. The higher the floor the more walking up stairs distracts these criminal palaces.

Solving a war with a third world country involves knowing the back plays from wealthy oil dollars to the poor on the North American continent.

An economy of terror dollars flows to the inner city yearly and I have been threatened not to stop this. In the end the rich and poor fight.

It is with great honor that I am allowed to comment just to point out the focus of a war to end terror lasts longer than anyone anticipated.

The war on poverty continues with international involvement including the donations from continents all over the world to take part in the democratic experiment where new leadership may be of a new color orientation, sex or flag.

Make no mistake, the war in Iraq goes on worldwide between the rich and the poor. If you could not discount our honest opinion up top that we did not have this information you would be our friend again.

Chapter 11

The knowledge base of the world amassed with scientific method in conjunction with a trial and error method. The recording of trials along with the notation of errors produced the tried and true methods and products individuals use to promote advanced human life.

The refinement of products loaded on a computer produced a new method of education called directed focus learning. Cooking instructions say take pouch and insert in microwave and cook on high for 3 minutes. Ingredient lists took hours with inexact amounts given as salt and season to taste. Other instructions took trial and error such as add enough water to flour until the paste forms in your hand well. The first trial may have been to thin, the second to thick.

Medical dosing took years to establish for pain management as well as other conditions. The success of education based on directed focus implies the acquisition only of the gifts the great scientists and product testers place forward.

Junior wants to know what is wrong with it.

I hear you Junior, it's just that if one lost a computer, cooked and left for the islands to work with fresh fruit, pineapples and chickens they would have nothing to say to you and the disconnect in human thinking make one or the other seem foolish.

Those that prepare food and experiment develop new things that can be scary and new. It was believed television should tell good stories. If everyone knows the tried and true methods TV and Film grow boring.

The person that changes things a bit eventually gets in a pouch, in a medicine or on a car.

The reporter Mostovoy, W.D. me, I am a designer. That is my title. I design things. It's not that what you have is wrong. The world demands new things to solve new sorts of problems.

Questions come up about multiple computers in a home using one printer. The developers set about inventing blue-tooth wireless printers. If the designers asked you what's wrong with a cable on your printer your problem would not be solved.

If you wanted no pollution out of your cars you would change the design. If you wanted the feel of being surrounded by an electric vehicle, GM would invent with a designer a GM-Stack sled fuel cell vehicle. If you don't know a designer is a God to a mechanic.

Of course young executives such as yourself must be pleased with what can be done. There was this thing called profit and if you take money from far off the profit goes over seas and the local attempt can not spend cash around you to keep your stores and restaurants filled with happy patrons.

Enjoy hot products. Enjoy cold things. Designer toothpick and chicken box cars use principles. They occasionally look silly and unstable, but when you see them blessed by mechanics and 100 hands they shine brightly for you to take home. Hopefully this directed fine focus helped.

Chapter 12

At the end of the book, The Prurient Patriot, the memory of the public comes into question during an age of sexuality. Many individuals possess memory, only until sexual release. Other individuals remember well until the next binge drinking episode and drug party.

The world of women seemed to divide between the women that could store and believe themselves to be in a store of knowledge beyond a 28 day cycle. Many took to calendars and computer reminders to assist them in staying the course towards a best life.

The getting in touch with ones personal feelings each month provides a great insight into the care each woman gives to her area of influence.

The computer sphere of influence spreads globally with no real focus on what healthcare might mean to the male population reeling from release with the concubines and Swedish and Dutch prostitutes.

Some men made in sire father before health care death. Items on a schedule might read love of country and patriotism, yet the republic that finds itself anew every 28 day owns no tradition other than the new tradition of kill and release sexually.

The orders given state take no prisoners in the male world. The woman revolt went over the top.

The fact that men love women makes sense. The fact that women love women makes sense.

Men held a great feeling of belongingness that with open clubs to video and membership, the belongingness became replaced by the home love that never really shone brightly for most men.

Since no men belong to anything without love they do not belong in there life here. The navy and the world military bases explode to find a membership in a club that for even a shining moment allows something low to be seen in a mans high mind.

Chapter 13

I know a woman who admits to nothing in a style called "slurving." A slurved response provides no answer to a question and enflames those who believe verbal exchange creates positive byproducts.

If the answer to a statement reads, "The three others felt the person could grow less cold about it." The statement gets heard in slurve.

You need not mix words and numbers to slurve. I mean of course it looked cold when she did it.

The favor got kept I assume. Properly placed it keeps you happy.

All day the logician evaluates things to provide some sort of end good feeling on what should be known and comprehended by those in attendance.

The society of slurving provides real wins for those that live with certain truths and yet find themselves in pesky dialogs.

The poor canary girl can not remember why she says some things. The slurve girl can. The facts that get shielded, the concepts that get buried made laughing stocks of many of my friends and colleagues.

That cold looked good. Did they find cold in that hot car? No one that knows stars cares about cold other people.

As this article is being written under protest to the commissioner, for the restriction, it cannot be cold. I hope you warm to it.

-B

Epilogue

The edge of the call exacerbates the calm break forced upon the mind. Many left with the photo firmly on the mantle reminding those that actually paid attention the account funds would go to the photo in the frame. The frame tells two tales. The broken board and broken bread earn the account with Saint Peter in heaven.

Having taken heaven on earth with the photo in the frame the tomorrow of tomorrows of cream pies and grand children birthday gifts of toys and treats ebbs with instant gratification powders of truth.

The lying and duplicity reach maturity for both in that the middle aged pulled the same lies with the now sexy senior citizens. The change of address the first time the VW pulled in and out of Fishkill New York, left the micro -bus with no where to go but near Fresno. The raisin people looked easy from near those Woodstock farms.

The pre-packaged stuff goes for much more now and no one can care for reasons that caring for the miniscule leads to convincing on great matters of state. The photo in the frame of Dorian Grey tells the tale of the truest Faustian bargain ever made.

The alarm buzzes and everyone awakes electric today. Advanced losses and corporate raider kids raid others homes much as the old Boeskie and Milkins did in the 80's. Realizing a home operates at a loss and has two car keys and a mortgage in arrears leaves the EBA, elementary business administration degree with the poison drugging and liquidation principle with those two cars and the sale of the house. Think about it the micro -bus group whined, for a mere few more video gamers quality thoughts disappeared for bowel inspectors with an eye for infection.

A U-C education goes for say 4 decent cars. The photo in the frame with a modest buildup can get more from the polluted keeper of the frame. The political wedge issue and rivalry game adds fuel to the fire and the young EBA can go internet textbook on the move -out kill (MOK). The MOK connection to the military never made a difference before the terror attacks, now the bubble looks bubbled over.

Champagne, caviar and the death of others leads to the greatest disconnect a Bastille storming citizen could want. The Orwell book sat in the basement of books in Fishkill and some picked it up not long ago. Thanks for agreeing George that some pigs are more equal then others. The animal farm goes on. The jungle war fights with teeth hunting and eating pigs, no one knows what a rocker will prefer.

Wrapping oneself in the first amendment takes courage.

TO ALL WHO BELIEVE WORDS HURT THE WORLD MORE
THEN THE REPOSE:

Guns kill people. Drugs kill people. Words stimulate thought that can produce a justice system.

WORDS YOU OPPOSE MATTER TO YOU FOR DEFINITION OF
THE FINEST CHARACTERS OUR SOCIETY CAN CREATE.

REPORTERS AND AUTHORS FACE GUNS NOW. CHINA
KILLED THE LOT OF THEM. RUSSIA KILLED THE LOT OF THEM.
THERE COUNTRIES DON'T HAVE WHAT WE HAVE..

DO THE RIGHT THING. STOP THOSE THAT TELL YOU
SOMEONE CAN'T USE WORDS TO DEFINE A LIFE.

Viewport Denied

Everyone can not get into the system of the mind.

The nodes down. The woman went out for cream and never came back. The machine calls back with recorded insured falses from eDeny. It seemed so perfect.

The prurient watch others in lieu of living themselves.

If you just watch your dead.

WD Mostovoy

The author lives works and writes in New York, Chicago and Los Angeles and is an avid athlete.

The Story

Dedicated to the love of my life.

Chapter 1
Cryogenesis

When in the course of human events it becomes necessary for one nation to go through a cryogenesis, one can certainly know that buying someones death by suicide is not only possible but probable in a post burn phase of American cultural bias. Is it enough to live hand to mouth? No of course not. You must have these in an informal land;

A family member or supporter.
A spouse or partner
A home town
A home or apartment
A friend.

The end is neigh, get a good seat.
Hello Ruth Bader!

What did your mother do to you that you might argue with men all day?

50 Years of making soup which I paid for and now you say no soup until later because you are important

Yes.

Missed a few pieces of Tam-Tam didn't you.

Doesn't this start boys against the girls?

What does your father do for a living?

Who has the longer story?

Shaggier every year you bearded clam.

I got robbed and no one cared. Refer to list for reason.

Hey everyone buy a cop it's easy and fun.
 Would an American Soldier ever shoot you?
 As a country who gets the nickel.
 Eh, halfway that's as far as it goes ay.
 Yes but out with the half and return of the finest goods or the cheapest labor.

Who checks on the finest goods?
 Who checks on the cheapest labor?
 Those that buy police and soldiers, that's who.
 (Knock on the door) Everything OK in there. You didn't make your report to COM properly. No access to the grid for you.
 (Door opens) 2 soldiers walk in.
 The girls whisper quietly, while in the background the men discuss value of the body and the mind and the importance of each keystroke.
 S1: Did you see the new appropriate activity list in the non spammable world.
 Papa: Yes, but after years of going through the drill why should one man change.
 S2: In or Out, Travel or Don't. Credit demeanor will be maintained.
 Read the non-spammable first or else.
 Did you keep a candle?
 I lit one on the anniversary of the old one. Still some left I think.
 What happened to the one taking good notes on the COM.
 It's happened all over. The one in the middle got picked up by the super COM this week, it will pass. Everyone went with home rule as I recall it.

The Cul De Sac of peace that once provided nurturing for the ilk and ire that moved into the leadership position denies now the questions that led to the very gated communities these residents now live. The COP, way of life self polices the lanes with manicured lawns and primed and the primed large tub bathroom with adjoining master suite complete with fireplace. The wondrous aspect of these lives placed in the academic pursuit and clean living that garnered respect financially and socially promulgated and end to any and all questions concerning order and placement. The president and congress speak tirelessly about deficit's and military budgets yet those that need to heed the call to serve in regards to the larger question fail to provide thinking offspring to the finest university system ever created.

The boom of suburbs following the conflict in Europe in 1945 possessed many of these aspects save the unending respect for flag. The literary world fades in regards to the elder statesmen who filters the text, reveals the final chapter and applies past thinking to today's student emoters. The student emoter feels the math problem has no value to him and is rewarded with other more real approaches to life. The student emoter feels land use should prevent development. The student emoter feels many things that do not involve the good of the nation. Often times land use suits others that need housing. The student emoter feels that the gated community parent should acquire a slot in a fine institution on the merit of the offspring's fine emoting beauty towards education.

The workshop approach to solving problems that still occurs in collective society goes on still. The sweeping under the rug of modern problems, led to the deficit and led to terrorism. The intelligent trust with enlightened self interest led to peace and prosperity from Carter to Clinton. Today's world could use more of what got us here.

The world may have decayed during the Bush administration, yet the excitement of city streets remains dramatic. The new video games incorporate all of the action of real city limits. The game involves five(5) categories of life: Money, Breasts, Guns, International Life and Phallic life. Those with the most points in each of the categories by calendar day win. If you receive care and make love but do not grow cold and do not get paid and realize international crisis you only receive points for the two categories.

Game 1:

Money, Good Stuff, Power, Globe and Stone

During peace the game was

Star, Sleep, Dream, Hope and Love

A star point is achieved by standing out in your area. Sleep points are achieved by getting your 8 hours during normal sleep hours. Your dream points show your star to be directed toward a goal or mood. Hope rings eternal. Love matters during the peace game.

With the world at war and thousands of troops in combat the old game of Inculcation through war domination and the will continues.

The will to power in the modern era forestalled due to mutual assured destruction. With freedom and war funding the will to power rises again. Score often and win on a Microsoft Vista system soon.

Hello doctor, do you have the Com Homeland profile.

Yes, here it is, let me quote.
Berman Profile 1001

The response of the child must be attempted first and foremost. The quote, "Hear little one I have a piece of candy in my pocket would you like to take it" The limit of comprehension can be seen by emotional instability. His fear of men and castration has left him without the tools to function in modern society. The tragic irony of the life is that achieving the dream of partial awareness of life is available in the modern world. Work self is declared to have no impact on private life, legally (to himself). The realization that the entire world does not love his stooge leads one to believe that the drama of death is laughable. The man is Jewish without question. To be a Jew implies some sort of respect of others lives. The nature and questioning of others mating habits while passing on 16 perspective wives, (although not the entire list) has gained loyalists and not people he has taken advantage of. Thinking, pondering the car seat does not sit well with what passes for a legal mind. It is this man who through ignorance can destroy society as we know it. Do the ends justify the means? If money is the end result the answer to this man is yes. The devaluation of law leads to anarchy and can create a society of lawlessness and mayhem. What have I brought to this man's door? I can certainly say that looks can be deceiving. There is a joke he tells, "If you catch your wife in bed with your best friend, who do you shoot?"

In the final analysis it is the case that he has mastered the look and feel of his life. One German Car, One SUV, One House, and One Job. What is wrong with this little one. With every million comes added social responsibility. What would have been enough wandering the southland. One day he may have to do his own dirty work.

Imbecile that he his , disgraced as he is, he will die a Berman. (No threat intended)

Does he drive a Mercedes Mike inquired?

His Friend in Fire MTR

OK, Bob responded I'll give you one.

Roth Profile 1001

Means Now

The selective nature of analysis values less the analysts time then the game of checkers on the remote for the flat screen device interfacing console.

The word for the less then perfect Ford Pr effect shows that Animal Farms and Big Brother models need false writings on a mans soul

Chaotic Pieces The Play Continues

A one act play to be acted by anyone who sees themselves in a character:

Narrator:

It was a humid cloudy day of independence on the prairie early in the 21st century during the new world order. Ask not what your country can do for you, ask what you can do for your country. (Kennedy a 20th century leader once said). If you let a wild animal out of a cage it may run and hide or it may bite you.

Nokaos: Order was kept through guilt and shame after the second War to end all Wars.

Order was kept through cages, for the poor and downtrodden people. Its' as if jails, were created to hold those whose spirits cannot accept that an object, any object can be held with dominion of one person over another.

Youth One: Who made the object and what is it made of?

Titan Bill: The discussion of adding value in one sense produces a synthesis of man and nature which makes for a futuristic world in which more people can share in the bounty of the world in which the truly natural world could provide.

Youth One: Is the perfect world an island?

Titan Bill: What gives the Modern a right to claim s/he has a right to the natural order?

Funny White Native American: Hunting, gathering and guarding are natural and all consuming.

Big Bill Daley: Forced indoctrination in denial of the flesh for internal will is rebellious and fractious in a nation which believes in elevation of everyone in a consumer society.

Tex Schramm: The value of a cow in a land of beef eaters is quite large. As it is known, the cow population rises and the cow is given a great life of quality feed and instead of a few unclaimed grazers the cattle population is 100 times larger and the lives of everyone are increased. The humans that are lower on the food chain than heads of cattle know that they will be knocked down by the first strong wind that bothers to collect them.

Cabbie Hack: This 21st century world accepts no frails!

Offstage Radio: Rise, contribute feast imbibe and procreate. You have nothing to lose but your morals. Democracy is a very precarious instrument. It must be played by a society that is educated. Today's

Democracy accepts leadership functions that may demand to be governed in a structured fashion as to equalize the nature of those who would create only chaos. A golden age is upon us. Chaos seeks to say that the sin of covet is no sin at all. Democracy suggests that the vote is to put more objects in a home. The pursuit of happiness in a vengeful society is diametrically opposed in spirit to the right to individual liberty and extremely in the right to life itself. Will the economic sun come out tomorrow?

The high chair sits right in the center. It divides the line. Is it yours or mine, both players query? The little one, the chair that knows not. The line judge looks up with the aid of the laser focus and knows that the stakes are pride and price. I recall once sitting and being in one of these chairs. It occurs to me how much time has passed since the pure effect of pushing currency to affect life is determined by the past pride and prejudice. What if closed loop is the right thing as film suggests. Can the ten dollar bill be spent 10 times and returned to the original owner with real wealth creation. Is the answer in value added reselling. Who holds the icing on the cake? The staff of life stands tall it is true but more and more of it slips into the hands of the sacrificers of the dumbed down principles. OK it is argued the great details of mathematical wizardry can produce closed loops with only a bust open release valve to protect the peace. One is left with that dizzying array that the young really enjoy. The point being that if you read this you probably feel that you could be argued young. When a man in action hears why it means leadership functions are questioned at a fundamental level. Democracy questions leadership functions in the world's super power every two years. The resurgent pride in recovery post attack turns into reordering in a way people can often not accept. Simple answers to moral issues work. Why did you question me? Did your batteries that last forever forget to remind you to enjoy the serious function of snack time? A boy from Viet Nam asks me 30 years on why America wanted to meet so many Vietnamese that so many people had to have a look and open the mind. The rhyme, "booked and cooked" is so cold to me the anarchist probably chokes on his popsicle. The rhyme suggests that if you know something then you can cremate it for it will produce no more for the world. If it is booked without the currency to run and book others, gas chambers are sure to be involved. Hamurabi was a king of Egypt and the earliest computer software designers wrote of him. How much to plant, how many children to grow. Simulations have continued with the assumption from those that are the staff of life that with harvest and inner grain people will live with knowledge that

others like other things. The knowledge that repeating things will leave one with the desire to peel the gold foil off the chocolate (white or dark) off a young, creative or crafty one and bite the head off is far too tempting for those that saw only an option of waiting for the other shoe to drop. (Authors note: I went with is the writing on the wall there if you refuse to read it)

Mental Blocks

Did she really care your mother?

When people saw Judy they saw red. The importance of color in Judy's life came forward early on when she discovered people differed. That fascinated Judy and many others. Why does one become universally loved while another struggled? Judy fought for each person's individual rights to achieve beauty in her eyes. To find true beauty one must find the beholder. I look physically different from Judy, our blood differs and each time I think that people need to group with me to feel better about priggish behavior I cringe. What man am I if I look away from her life searching for equal rights? The vision and ideal created early on in the U.S.A with French and British influences bore out in this woman's life. I put on a happy face because when times are tough you act happy. Acting happy and being happy; two separate things of course; shed light on what it means to stand firm with someone who wants to put down your race or beauty. I loved many people in my life and on my way and found true fortune in having a generational filter as to how the world was. She preached incessantly that those who forget the past are doomed to repeat it. Each and every step society took in her life were chronicled and discussed.

The way in which chronicling takes place today, the viewer of TV assumes the network will remember it the way you struggled for it. Constantly with the paper in one hand and the phone in another each group stepped to the plate with her to see her homer. She played for the home team, no question. The world certainly wanted to know what sort of competitor she was for the brass ring. She was dogged in her determination, fierce in her style and loving with her respect. With her science, woman studies and law background she just ordered love in my life. Daydreamers felt cold to the three poisons. The poison pen became her ally as cancer and the memory of her three degrees below zero took over. Most people took to remembering her final act at distancing herself from the world to move on and forget they had not chronicled well. I am here to say I have and I was listening. Everything she stood for still stands. How would you feel if your body was stolen away at 55? Not good I assume. Ten years she suffered with this growth in her body writhing, literally with tubes of bile filling every part of the cramped hospital room. I sat for a good many hours at that hospital and in that hospice facility, telling my life to someone who may not have arisen the following morning. I listened as she took calls from hundreds of people, faking happy each step as the catheter dripped by her bedside. Medical care requires attention and love and I never grew cold to her in her life because those hundred people produced a community and society which provides the model for government today. Not everyone goes to Washington to lead. She preached grass roots to the end of her days, sitting through a term, with cancer, concerning life in our small village. Every time a minor success revealed itself she showed pride with every addition she put on legislatively. I miss her wisdom and I hope you do to.

She once mentioned the bible does not restrict a man on number of wives. She would have enjoyed the company during the day and reduced demands at night

XVI Bill as Himself The Final Episode: Prelude to a Colony

As the morning dawns without a REM of sleep the Rich Father of now six -hundred thousand children spread over the globe is stretched elastically but finds a remarkable elasticity in the fun.

Implore not lowly prince, the goddess commands. But...

“I love children, I do but this is ridiculous. Let me see one. I can see their watchful eye upon me and know recorded and cooled by their peers this way I live continues through falsehood.”

“How many middle generations must suffer for the great dream. If I am in the castle I worry. If I am not I worry, if I go between the castle and the people I am the Vicar. A good Vicar is hard to find you know.”

“Fable when you can Vicar and I will lie based on fun. If you are worried about me it means you have no food. “

“But we have food.”

“You yourself said every home fed without delay. You would exclaim, Why no food the king is a coward. Then I would feel bad and not have any and the cows in the palace would say.”

“Just your moo” , to me and I would have to respond oink by moo oink law.

“You yourself said I am a pig for gold rings and a tub the servants fill with water.”

“I like it hot, so what how hard is it to get wood make a fire heat water and fill a tub?”

“I have to think about every detail of in out around and you!”

“So would I trade it with you? No I would Not I aver boldly this day”

“But if you all want to trade with me what if the neighboring colony and I to swap kingdoms”

“Me there, and as an aside he likes the ladies in wait of mine and I like the ladies in wait of his.”

“Now morally I love my subjects and you have suggested divine law makes it my right and duty to sire with those other than the Queen.”

“You are almost noble Vicar, this I know.”

“I have heard the call of the children. Gods’ children I call them. If lone should fall to the others than it may mean all of our heads!”

“Heavy is the head that wears the crown.”

“Ah, back to the story, the coins with my name have value, do people trade them? I ask you.”

“Yes your highness.”

“If they traded spit skewers and said your coins have no value would people want to live in their country homes or in the safety of confinement. When I ride out on my white steed with that red velvet and ornate golden reign attachment I feel free like the very stone on one side, even with the open drawbridge the magic of the passage excites me. Yes, I believe the portal contains the answer. Back to the south, for one week then. That will be all”

Lord William

As it happens to nobody in particular I say the Vicar should have enough wording to work it through in his head. He is a very clever fellow. Trust was the issue or was it worry. If you worry you have lost trust. When a planner worries I panic! It as when the army gathered trains, if and only if I say every man for himself, do we disassemble in a disorderly fashion and fight on as men one against the other. War, one in a life I say. Weather conditions and troop strength; surf and turf for the Vicar, but someone needs that life. Next time more wind my way. The throne needed to reassure the Vic that purposeful peace was still at hand. What is purposeful during war? Nothing I say. If one day the policy of scorched earth lives then so be it; no wheat fields for you. Tomorrow if the enemy shows his face and is not a coward I may spare him. That is how I feel. I should have called the scribe on this. I did not want to pen and think just there. Anyway in the retelling the good part is never lost with her is amazing she hid so long in brown sack robe and learned to write, and I never questioned it. Open life good life I say. Not that a little quiet time without moo and oinks all the time. Ahems all the time.

Good-Bye I am very cold.

Chapter 1

Adonis

Adonis runs and the world watches. Adonis talks and the world listens. Wherever he goes the mark is upon him, for he knows the way. A lifetime of hard work and struggle and people notice, for he looks open the doors. Confident and cocksure he glides through the rigors of life like the thoroughbred galloping down the home stretch. Women flock and men want attention. Jealousy and lust do people show in their eyes. Some gawk and some want to touch. Adonis is all people want to be. Asking for approval they wish to be mirrored by the hulking mysterious form of the man. Watch they do but they know not the inner lurking. The driving forces, the whirring and clicking the pulsing heartbeat. The passion that lightens his wisdom of personal satisfaction makes the desire to please self mandatory. The desire of the world to be at his level. The wish that he was still at the foothill instead of on top of the mountain. To instead of on top of the mountain. The gloss that has shined this apple makes it a poison fruit of asps. The seeds will return. The roots are weak; Adonis is strong for he has roots. People see the tree and emulate the tree but do not or cannot start with the roots for the gloss and pomp has blinded them.

Glamour, money and power rule! Seek it! Find it! Live it! Breathe it! Poor folks doing "Populist" and New York plays name that tune.

Adonis mumbles, "A limited number of tunes."

Adonis does not name many tunes. He plays them. All the good ones he knows. Pee Wee and Scooter wonder and wander and urinate behind the tree where the basset hound has been before and will be a gain. Nature and its beauty will guide the civilized. Western civilization would be a good idea he thinks. Let not the passion of seize the day become a justification for immaturity. Glamour magazines, pictures and style to be swallowed by birds of a feather. Money hides many flaws. The gentiles tell the joke of the Jewish ten. The Jewish ten is a one with nine million

dollars. The envious laughter that ensues makes a jackal out of the erect walkers. The power that men seek is curious in that an Adonis can give it. They seek not to breach his contract; he can give power even when he has none. The kingmakers and those that would be king is the slogan of the day. Adonis is the king with no desire for subjects, yet they flock around him like wonderful innocent sheep. Follow him for he knows how to find glamour, money and power.

Did he lapse? Does he know the unknown? Where has he led us?
Is he not human? Does he have hands, feet and tongue?

“Yes”, I scream!

As I wonder aloud, “You have crowded the dance floor and flourished around him. Your seeds have sprouted and the orchids do bloom. Purple, red and green the flowers, leaves and grass do show. Oh that fleeting bit of youth; that fleeting bit of youth, that moment when life is captured at the instant of its beauty only to have the fall come again. The armor does show the wear. The battles fought and won prove not to uplift but only to elucidate cliché. The cream rises but does not froth over. Delicate balance of sheep and shepherd we dance wistfully into the night. He leads and does not follow. He ducks them and finds only love; for yes, they to were travelers of youth. They beckon him to don the armor. They will follow him to the ends of the earth and show him that his way is valor.”

In the gray sky of Monday morning the bus collects the drenched umbrella armed masses. Sleep did not come on Sunday and our hero sluggishly trudges out into the fog. The girls all talk about him on the bus for they wish him. The foolish watchers understand not from whence he comes and where he goes. Yet the morning ride is filled with envious glances and warm smiles. He really does care for them, these flesh bound hurriers. The young women in particular strutting their joviality hoping for the lottery win. In harmlessness does it all roll off his back. Oh that wonderful back, the big shoulders and strong arms carrying the frame which holds the head. Distractions for the weak, door openers for the wise, the suit does fit him well. Arriving late the coat is shaken dry of the rain and hung away, the morning buzz begins with youth. Frank Sinatra is dead and Bill Clinton perches aloft. Perhaps a cup of coffee would be nice.

Mid-week comes and he returns. Like a lion he comes. Kind yet tough he walks. Again, women stare. They see him with lust in their eyes. The cold blue eyes do pierce with bemusement. Yell did he at the vicious gossip and the tail wagging lout did run. Oh to see the tall and the red face as the poison pen did strike him as an anvil plummeting to the depths of the sea. Oh malevolent lip movers your incessant backbiting shores him in strength. The beautiful and conniving manipulator baits and goads and then becomes trapped in her own sticky web. For that web of deceit does encircle her like a London fog. The shrouded inner-self is pure as snow, while the outside lives a self-indulgent and fanciful life. When he humbles her the people all scream,

”The witch is dead!”

For he is loved she aims to bring him down. He is over the hump.

Loyalty, above all else controls the course of governments and societies. For along with loyalty one will find the courage to sustain an idea or thought. Loyalty keeps us from being flighty. The boy goes off to college to become a man. Emerging years later he finds himself complete, armed with tools. Pausing for reflection oh, that woe some digressions back into the caterpillar. For the butterfly sees only flowers and trees while the caterpillar sees only darkness. The weavers of cocoons and butterflies enchant him. A loyalty to the makers of butterflies! Cast back not with regressive eyes but with projective eyes. Return the vision that the raisers bestowed upon you.

Chapter 2 Sailing

Casting his eyes upon her he finds that he finds that true beauty sought by many achieved by few. Twisting her head to meet his the coiled rope drops at her feet.

“Fine day for a sail. My name is Addy; and yours would be”, He beckons confidently with a sweeping gesture?

“Suzanne”, she echoes gingerly.

“Ah yes Suzanne its wonderful to see your smiling face on such a gorgeous day. Your smile my boat and the sunshine lift my spirits higher than before”, He quipped.

“Thank you, and you with your sunglasses who even knows if you have eyes”, she responds with a grin.

Removing his glasses and stepping closer he peers delicately into her eyes.

“How would you like to go for a sail”, He propositioned?

“Fantastic. But first let me ask what you do”, She replied.

“First of all I do fine and then to answer your question I act and model. It has always been my lifelong dream. You may have seen me in Othello, at the Civic Center. Ah my Desdemona you are my one true love.”

“Bravo, bravo, encore”, she added.

Manipulating skillfully with the halyards and sail covers the A of Hearts is ready to sail.

Quickly and elegantly her hands fly and her heart pounds, confident and poised the sheet is raised and the wind takes over. The wind raises the hair and the parachute ride begins. Rising and falling carrying forward and back, light and heavy the waves roll and the boat heels. Then slowly and magically, silence. Beautiful silence and lapping waves the knowing smile of desire and silence. The sheets are lowered and the anchor too. His forward steps are matched by her delicate dancing back -steps. The leader and the fawn are in a dance of desire.

Slowly his lips embrace in a warming sensual twist of desire. Leaning forward and stroking her hair aside she surrounds herself with his warmth. Her face wet with spray chills them like the wine of a thousand casks. Gleaming and glistening clothing evaporates and as the teak creaks the bodies dance yet again.

“Where should we go”, He asks?

“Anywhere we want.” She replied.

Relaxing, enjoying the afternoon sun the newly found lovers bask in the warmth. Beauty and elegance behind them, the nakedness and purity of inner harmony promotes them into bliss.

Chapter 3 Will

Loyalty above all else controls the course of governments and societies. Will is a fiercely loyal person. The problem with loyalty however it limits growth and change. Loyalty locks you into a past. Some call this building root. Others would call it being closed -minded. Will remembers the past, never trying to forget a friend.

Picking apples and falling out of apple trees; three people can see the tree. Life as a little leaguer draws near to Wills' son Michael. Topics such as these reel the imagination like the rumble of a bicycle down the creek path. The nature of wonder and the amusement with minutia presents itself daily to Will and his family. The establishment of order and timing in a wondrous reference frame lead to family dynamic. Advantage upon advantage placed upon him, yet he smiles through it all as the gloss washes over him like the marble statue that is bathed before display. Picking apples out of apple trees makes life free. Worrying about a steady job makes picking out of trees ordinary. Concern about sex makes picking out of trees tempting. Status seeking makes picking apples out of trees quaint. The apple tree casts shadows upon the afternoon sun and the apples just recently turned from buds do promise enticement, quaintness and humility. These things seem good to children.

“Women are schemers but men are formulators. Women are not formulators”, he uttered.

“Schemers although having a negative connotation could very well imply readying of a grand scheme. A grand scheme being a higher order of formulation. Could not schemes be formulated”, he posited.

Schemes and formulations can not be differentiated for they are an amalgam. As such women are schemers is correct. Circularly men are schemers as well. Women are now formulators pushing to be where the action is. Sometimes Will gets lost in his thoughts. He was merely remembering the wife that left him.

Mystery, intrigue and romance all bundled in a nice buxom figure. Allow the simplicity and the banality set before your eyes, for you see the bundle before you but beckon you do not.

“It is complicated”, She says matter of factly.

She lawyers and she stops. Simple really, oh beckon not you wondrous sheep, for complicated frightens those not capable of dealing with it. It was good for Will to meet a power person at the party. It reminded him there was much living yet to be done. He asked her to join him at the bar and she accepted graciously.

Sunday summer afternoon rain dampened grass shines with green glistening shimmer. Because he got drunk on Friday night, doors closed. Other doors opened. To be trapped in the real world seems not all that tragic of a worldview. However genius congregates and does find its dimension together. Almost shunned by the working public genius roosts and demands attention on issues of gravity. The lament is for the intellect not pursuing purely intellectual pursuits. For pursuing other interests removes your allowed cynicism.

Chapter 4 Hobart

Ever since he was very small Hobart has been fascinated with the inner workings. To Hobie, the inner workings are those things that occur which produce the chaotic balance in which the universe currently exists. The universe as we know it may be doing one of three things, it may be expanding contracting or slowing to a stop. To Hobie there is only one explanation. The universe is expanding in a giant unseen balloon. When the balloon gets full of the universal matter creating the big crunch thereby forcing eventually another big bang will occur producing anti-matter. Nothing is created. Nothing is destroyed. Fascinating, scintillating yet

somehow completely overlooked by those not studying astrophysics.
Nothing fascinates the senses like other curious people.

Explain satisfaction, oh that simplistic juvenile goal of junctures in time. The moment of essence, the grasping clutching wonderful feeling of achieving that actuating forced that ones past have defined. The path is however slippery and the July (Julius Caesar) boat pulls ever forward the being in space and time. The users do not want to be un-elled in the bullhead era. Pace exhausting, sit write, guilty feeling for non -interaction is death. Solitary confinement is the fear of all people. Must be the people fear the ape inside. Conversing from the I do, reveals our great strength. Answering the questions is easily as interesting as posing them. Telling and expressing does not satisfy! Why? Is the meaning really lost in the translation, for are the words to imprecise to transfer skill to skull? Can the thought or idea only be captured completely by an entity that contains all or many of the shared experiences. In the place of generalizations is the meaning entirely lost. Can the trail blazed by one man be a guidepost for others or do the complications of past lives cloud clear thinking and goal asking. Can the world live to escape the very pettiness which keeps us communicating so that solitary confinement is avoided.

Here are some dualities of man, which Hobart studied.

Autonomy v. Isolation
Satisfaction v. Regret
Peace v. War
Greed v. Compassion
Hope v. Despair
Acceptance v. Rejection (external)
Luck v. Skill (external – internal)

The embers yet glow as the dripping meat causes flares that reach ever higher charring those bits, which rest in the flame. Previous outings have left a black hue upon the kettle grill, which rests in back. Slowly she chops the green peppers, mushrooms, onions and cucumbers. The lettuce is shredded along with the cheese and tossed helter -skelter into the bottomless bowl. Her fingers move with the skill and speed of a trained surgeon. The knife flashes in the light like a diamond refracting a gigawatt laser beam. Looking she asks Hobart,

“Do you think there is life on mars?”

Knowing full well not to limit the is Hobie replies,

“Swirling upon its axis twirling around the star, rotating around the center of the milky way encircling the center of the cluster of galaxies around it is truly difficult to imagine that life could exist on a planet so close to our own”, Hobie chimed in.

Drip, drip goes the steak on the barbecue. More red wine for all and spirits will rise. Pepper cheese with stone ground crackers entices the palette. Yet it is not truly hunger that is to be enflamed, it is the passion that is excited. The animalistic desire to be a carnivore grips him like a vice and twists the sublime into the ridiculous. The pair indulges and enjoys letting the body suit rest in the rarefied atmosphere of satiated desires. The flames do glow ever hotter and the extremes grow ever larger, let the edges sear in the juicy middle.

As the alarm buzzes buzzes him awake from the sleep paralysis that grips him he arises ready for the journey to begin. The dream continues even through the morning rituals. The change of environments produces a tension an edge of sharpness that widens the scope of purpose. Reflection and retrospect are buried, subverted and channeled into future plans. Forward, marching, the drum drones on and the knowledge accumulates like water in the damn waiting, controlling, and pooling such that the force is constantly available to turn the massive turbines. Late, damn every two minutes check the traffic, check the time, check the mileage, repeat. There it is O’Hare airport, the worlds busiest as usual. Pulling the black sports car to the airport he kisses the driver goodbye, he grabs the gear and begins the run like an Olympic hurdler taking in the mass of information from the crossroads of stories and airplanes. Arriving at the gate he swears at his poor planning and immediately takes plan B, the Denver route that costs him an hour. This gives him time and collecting himself he can watch the planes lift off into the blueness of the summer sun. The sweat dries and the coke refreshes his parched throat. He just quit. He just walked away. Time has a way of forcing change. Is the writing on the wall there if you don’t choose to read it? Yes he thought, sometimes it’s on the wall behind you and only

through mirrors can you see it all. Standby passengers please report the voice cried. Great news he thought, "I'm on my way"

Chapter 5 The Locked Door

The doors are now locked protecting the vacant abode from the probing eyes from above. The images that cloud his head are of great throngs and multitudes conspiring against him. His will is solid but the door is barred. Turning corner after corner the escapes are trapped. There is nowhere to turn. Meticulously each avenue is pursued. Each avenue is another cull de sac and the chase goes ever onward. Evenings become days and days become weeks. The protecting lock stands guard and the race travels ever onward. Side by side when one race is done another begins. The engine is hot and the competition is fierce, over and over the result is always the same. Shrug and lift wrenches for we tinker ever strongly with the strength of engines. Locked up tight, protected, safe all things valuable are kept secure.

The autumn of discontent journeys ever onward. The leaves by this time had attained that lovely auburn beauty, to look on them as they crush under your feet jars the eternal return of the same. Recurring dreams of seasons haunt him yet. "Have I been here before? Is this year different from the last?", he muses strolling down the primrose path. The differentiation between individuals conglomerates into one amalgam. Picking out the choicest, ripest, sweetest apple is his only reprieve from isolation. The tree provides for him and he is happy to take the fruits of its labor. Seldom solicitous he wanders about aimlessly in the city with broad shoulders. Keep your head up the mother reminds her adolescent child. Discontent and mild disorders abound. Perhaps there was something in the wine. The vegetables are fresh from the harvest, and the nutritionist lives on grain. The varying views stretch his ears but not his mind. The breakthrough meanings churn his thoughts. "Lust for it live for it deny it decay it feel it and let it die in your own hands."

Massaging, soothing lulling satisfying oh yes the need is filled and the itch is scratched. Sitting cross-legged on the floor meditating, slowly shared space, shared beauty steps into silence. Two animals trapped in a

cage, two fish trapped in a fish bowl, two people traveling in a car waiting always waiting. The set stage anticipates the scene of twos. Back and forth, push and pull, rollerball and volleyball are sports of choice. Magic weave and wonders willed the wayward warrior whips his words with a worthy windiness and then witnesses the world woefully. The world mirrors back the fighter and the victim. Where do the victims go to get innocent training? The original sin isn't. Being out evolved is.

“A little to the left”, he oozed.

“Great! Where are we going?” He went on.

California held many memories for me. The oceans undertow filled my ears and crashed waves on my body many times. The mountain air and the snow from my lips with meeting red on the slopes put Mammoth atop the frost of the coal fired mid-western stove bottom life with which I had grown accustomed.

The many north south journeys through the rugged terrain left opportunity to stop and look at a simple brook, through the ever present modern convenience design that permeated the mind that forces itself upon you to earn your coast. The simple smile with warmth that paused that day passed between two beings not to entities. Face of farce lives without face of face for true false. This would have confused her.

With Half Moon Bay in the mirror and Pebble Beach as well the sound of the vision filled my heart through my ears. Though the pull -overs that soften the exteriors the lightness of hard topics and the hearts stopping of the chill of the ice that true cold and scorn show all too often.

San Diego whales with might to my Ocean Beach whale. The sailors wives take note of the important spouters sporting the show of Shamu and Free Willie, to all who cared show.

Huntington Beach ice cream lickers and Fourth of July parade goers promised a nation of unity. Laguna and the sandpipers moonlit cove of artists and singers the illusionist will never forget.

L.A shows and star sited dining filled with glitter and glamour let this planner of world know that the done, finished, cut and wrapped in the can projects beats the developing, emerging or threatened analytical worlds. The world needs vision for films. It needs visionaries to know when things are not yet done developing.

Leave the redwoods alone. The redwood forest and Redwood City seemed to know me best.

See you sometime
Often Bill from California.

I love you Bill, bye. She said.

Chapter 6
Excitement in Metro

As he sits and watches the buzz of activity the sense of urgency and ultimacy of the carnage that is sure to follow spur him on. In broken Polish they converse, active and mommy sweeping, scrubbing and slogging through the myriad of slop that sloth has collected. The modern, living chatting growing psyche of the miracle of design, foments into an organism capable of providing for the collective well being of the soul. Retrospectively, it appears as something familiar. Amongst the throngs and multitudes of the English -speaking people one can find numerous gestures of involvement, which convey that omnipresent intimacy of social contact. Later as he looked up it occurred to him that in the cleansing process the luster becomes ground into the table like that of a soldier grinding his foot into the wounded hand of his victim. The effrontery of the assault is not unnoticed.

Assembling for parties has always been his idea of a good time. Tonight is no exception. Small talk never is that according to Addy. The quality and quantity of small talk truly indicates the breadth and width of the perpetrator of the oratorical arts. Her long brown hair and her loose fitting slack suit make it easy to talk about her legal duties and responsibilities. Small firm, much work, long hours, and equal compensation, gains for women are all target topics. While talking Addy lets his mind wander onto

the aims of this one. Clearly an iconoclastic lecher he thought. There may be more he wondered.

“Anyway what do you do?” She said.

Responding quickly he replied, “Drug smuggling and international arms trading mostly.”

“Oh really, your with the government then?” She retorts.

“Yes, well actually that is classified information and I shall have to run a complete security check on you before I reveal anymore of this vital international information. Although if you know the password, I could keep you abreast of the situation.” he replied.

“Affable and quaffable”, she said in her lowest and huskiest voice.

“Yes well you have been with the agency for quite some time then and I suppose you had ought to know. As you recall in the 19th century the slave trade was based on molasses for rum for slaves. The practice is simply a matter of redistribution of the difficult to find commodities. Today we are mechanized and need no slaves but we need those machines to keep our economies and militaries running. I deal primarily with the Iranians, Iraqis, Israelis, Panamanians, Nicaraguans, Salvadorans, Costa Ricans, South Africans, Bolivians, and Mexicans who all either buy or sell Guns, Drugs or Hostages.” He replied.

“No really, what do you do?” She asked.

“Does it matter what I do?” He lamented.

It sits slowly burning little left now but ashes. He takes a final puff and grinds the but into dust. Exhaling he sees that smoke and fog has not lifted. The smell of nicotine and unwashed clothing are like the morning after a bomb blast. Breathing deep the sigh that grips him takes him to that place that we all can retreat to. The center of his being, the laboratory of life calls out for experimenting into the wanton lust that permeates the intimacy of social contact.

“Am I experimenting without the control group. Where is the control group?” He wondered.

She came late that latent wonder of trapped womanhood that realizes not that the seeking of her lips trap the seeking of her heart. Late she came led by friends. Late she came silent in her brashness. Late she came with her fashion hair and her high top style. Presented with an assault on both her present and her past she slid back with blatant dissent. Happiness would be one flight up. The ladder of the matrix she weaves tilts ever backwards. It is truly a pity he thought that one so current need only look backwards for her happiness.

The party had been a total success. The bouncy ones had decorated. The revelers had reveled in the glory and the bounty that had presented to them as a spoil of war. Little they knew; little they knew or cared to know. Mingling interlopers of design they flock in droves following the call and the cry. The group proved to be truly great competitors for the brass ring. This probabilistic quandary provoked him to probe into the past.

“They are all there because I have put them there and they will remain there until I remove them. Homocentric fools, surrounded by intertwining Banyan trees of sustenance live small, under that shrouded clouded cloistered mushroom of blanketed darkness.” He mused.

Parties, the collective reality of the least common denominator. When is the next one? Suddenly the sounds of sirens and construction hammers jar him into the modern world of motorcars and computers.

The bridge tender sips on another Budweiser as the taxi begins to ascend the span that separates the shores of the river. As the barge approaches the span the tender unaware of the taxi begins to raise the bridge. The car falls over the edge rear wheels clutching for a bit of the bridge. Panic, senseless, the bridge tender closes the bridge crushing the taxi and the human contents held within. Surely the Budweiser would get top billing on the newscasts for the following day.

Addy figured this story really shows the problem with this world. Opening and closing are arms we show how to hug or crush our loved ones.

The porch light glows yellow and the usual suspects assemble in casual fashion. Each individual shows a solid, bold and determined desire to advance. Clouding the pure vision of the absolute world the attacks are sideways. Creating illusions and dancing in the moonlight the right stuff melts in your mouth. The nectar is cold and the berries are fresh. Slowly wrapping his arms around the lovely next to him Adonis speaks of love, truth and beauty. She understands implicitly and guides his words into green and pink. Her blonde hair drapes dramatically over one shoulder. Her narrowly pointed shoulders relax on the contours of her well-proportioned breasts. The jazz guitar fills the background with electrical sounds of the new age. The utter recognition and cognition of the all eludes them no longer. The eyes of man and women unify into a symphony of song. The bridge has been crossed and the vivid visages can never be forgotten. The body relaxes and touch grows louder between the intimate.

The pabulum that inundates the masses matters not to the unbound spirit. The devotion to truth and the gratification of the good things in life grips the intimate as they decide to stroll onto the tree-lined walkway. Touching, strolling and caressing, sharing and worry free anticipation builds them for the warmth

of the moment intoxicates them like the petals of a thousand flowers. The jazz guitar trails off in the distance, yet the passion continues. No turning back, no today, just now is all that matters. The handcuffs ropes and chains that bind others matter little to those who know. Stroking her hair, brushing it away from her face a slow deliberate kiss sends waves of pulsating energy from her well-formed lips. The inner self screams for the knowledge of love in an instant is the knowledge of love for a lifetime. Slowly they drink from the cup of knowledge as the flames encircle the moonlight kiss.

Shelved sits on your shelf with your book.

A man on a shelf sits wondering if something happens in a life. Impressing upon someone that life for one provides a shelf item for another puts the curiosity seeker in the outside in nature of shelf wonder. The curio

beckons. The doll within a doll thanks you for putting your life on the shelf.

The author works out in New York
Chicago and LA and lives to encourage
The body and the mind.

Poems

WD Mostovoy

Earning

Hear I sit having started
Failed to earn merely parted

The company kept fixes game
To keep those wise feeling lame

Putting thunder up above
The cooing crushes every dove

The tiny snacks fill the crust
While brilliant fools lose each trust

Sitting patient with empty head
The dancing sparrow waits for bed

The life of patients we do insure
The tiny dancer lives impure

With cotton, thread and needle flight
The poor upstairs clog our sight.

The narrow vision gets the seed
The arrogant get not the steed.

The Fathers horse ran far a field
To keep each from weapons yield.

Troy

The horse of wood went up
Each Trojan warrior hoists the cup
Build up to make the war within
Nothing inside puts the devil in sin

With righteous trappings on your mind
Take God's users with your kind
Your kind says trick
To hit with stick

The rocks bash those
Whose perfect prose
Shone through to one with rewarded toes
Invoking each and every victim's woes

The horse constructed held men to fight
The enchanted city took in with sight
The wonder built with many hand
Spilt all the blood there was upon the sand.

The splintered wood sits on shore
 The crashed ship of what was to bore
 She cried the holes within mate
 No death to others will fill your hate

For losing mother for losing other
 The spinning store left you with pour

Credit

Each and every player creates
 Wants accounts and feels real great

Those that hold their heads up high
 Hold the credit way with sigh

Grabbing, taking getting some
 Left the debtors so slaveries come

To hold the credit you hold the debt
 The slaves do all and you look wet

Those that hold the credit hold the debt still
 To know the credit failed you know your kill

Show credit not with creditors mush
 Or lose your life to debtors crush

Waves Crash

Waves crash forever more
 Upon the rocky shore

Let Freedom reign over gloried flight
The seabird sands the Frolickers nights fight

The daily grind mixes dust
To show the world that life does trust

The Swallows Gale Force Winds
Leave Free Our Sins

Others dance and twist sublime
The earth below finds the time

To ebb and flow another day
Each and every to her gray

Five fingers on each hand
To return from beach to sand

Every night the glimmer moon
Life's short journey ends too soon

Waves crash upon the shore
Leaving hopes vision in snore.

Storied flight the birds delight
Escaping words to each at night

The songs drone on
As the ride appears put upon.

The apparition lives with fro
To each their own to come and go.

Enjoyed the romp
Forgot the pomp.

Bye for now
To escape somehow for free

To normal then girl
Wave fair to me so you can say good-bye.

The Soldiers March
Ides
First tongue upon the morrow
Taste the bitter wine of sorrow.
Hope through pain
For ill gotten gain

Let light shine upon the land
Whilst blood spills upon the sand.
Liver spleen and kidney woe
upon the mark the soldiers foe

Through hill and dale
Our long lost son is up for sale
Carry flags and banners high
For hell bent leather over nigh

Give and take the evening's rain
As suffering lost-loves ease in vain
to struggle forever with the pain
On top of wonder
The big guns thunder

As box of knocks
Remove blood stained socks
A great big gift given us
for we show our father we are bust

Well enough alone to me
Escape the milieu to feel free.
No enjoining for elitist pure
For catching gist elates for sure

Concepts given for the show
Made to many human electrons glow
Let peaceful vision retreat to somber
For majestic hope do we encumber.

Bound to vision not to feel
We press on and do not heal
That touch through means of simple glance
Ends the purpose of our stance

Let freedom will the gloried flight
For hope and giving in our light
Everlasting vision gone
Hope you have Gods new old song

Jealousy

Apocalyptic Selfishness
A time for growing less
Of more that wasted times allot
For truer vision we are not.
Lest ending time
Show just Mine

Life is a bit funny for the author. Try as he might to convince the world rationality makes no sense he finds a world conceived in deceit. Through bitter rivalries and self analysis he finds some peace through shelved and poems. Top game may not have been a strong suit but you must play it when you can. Do you have what it takes to stay in touch with Bill in Van Gogh's Ear. His mother was Jewish why did the Dutch woman get introduced as his mother one day?

The Justice

To know the power of life one needs to see the life of those treated unjustly. In an early era slaves provided the labor which fed and clothed a population intent on controlling the masses. The machines and processes provide for many more without knowledge of those who still toil in poverty.

The facts remain that possession is nine-tenths of the law. The ownership issue keeps many pistols and shields ready for those who would make an easy score for a life. Life's rulers find themselves ruled by the plugged in displayed method of living. The poor and working poor live through ancient methods and oral law. In an almost modern Arab paradise millions of people find themselves in the friend until ultimate betrayal aspects of life. The body and status symbols rule the life in these areas. College life comes into question as the betrayal must come through the connections to Americas Arab underbelly.

College professors forced into humility find themselves without prestige but with a job over at the college. The American advantage of ingenuity through new thinking takes a back seat to exploitive thinking on pre-packaged thought forms. Many people seeing the cost of a college education defer into the scores aspect of life with what they do have saved. To invest in cocaine and count the profits looks good to many of the nation's potential business leaders. With medicine winning as the best safe professions law students beg for the one law suit and a life in the digital paradise. Engineers feel the heat from Germany and Japan and all but surrender proide to the highly global foreign polish. Apple still does well GM and Ford do not.

American swagger led the world in the pre Iraq war world. American people loved being the one true super power. But with all things in the cold war the mirror with the soviets proved with a massive change in government with Barak Obama and a near economic collapse of business in

the U.S. If you followed the program you did fine. With competition for jobs fierce and a qualified pool shrinking the nation relies on artistic lives to shine forward to promote America. The gap between rich and poor never looked bigger with the high end consuming Mercedes and Lexus automobiles leaving the man making basic Fords out in the cold. To the rich justice goes only one way and no one with the fine education argues.

To know that the disconnect between the sects of the society exists one must know what each sect plugs into. The rich wish to live with ultimate privacy and security. The competition to succeed fades with the ultimate attainment of riches. The electronic security blanket tells you everything shows stability and normalcy without ones input. The beautiful high definition television shows you around two hundred of societies finest people while the wealthy home keeper sits removing his and her fine from the public trust. An inherent xenophobia, fear of strangers creeps into each life that just wants to live a peaceful fine. To know the actual person one finds them, wealthy successful and well. They just wish not to share anything of themselves for the knowledge of the enormity of things while private small things carry joy. The care for each of the well bred offspring leads to eventual discussions of paying for an obviously worthless college education. College has not changed the student has. With average housing sizes way up with most well to do individuals living in over million dollar houses the child just wants a place in a room in a nice house with a great TV and computer. In an early day the knowledge that everyone attended high school with the smoker unsavory type fades away in the school system that rewards the gated kept apart school district. Many remember the greatness of the shared and openness that went around from the nineteen sixties through the nineteen eighties. Society went cold to the thinker and renegade for the financial risk involved in obtaining the run away life in the million dollar house. Most would never associate with the one that went off to be a dancer, actor or writer. The world made exceptions to forms in many cases. Today you are known by what can fit on one such as the social security form. Jargon of shared experiences disappeared as people only know language from edited television. Reality in truth depended on physical principles and real associations. Today reality finds itself mired in whether the fact plays in context of a story for the screen. Most wealthy Americans feel hand work and talented design should be imported for the good of the nation. The ultimate job for the wealthy, the doctor wishes to promote public good while bringing great wealth through the insurance paid

health care system. Being wealthy means everything fits on the form and those plugged in rely on past creative thinking to value and land they call the greatest nation on earth.

The poor in America spoke volumes with the election of Barak Obama. They see things for what they are and live often a very short term life. It must be difficult to think of 401K programs while contemplating spotty work and trying to put a full meal on the table. The poor hate what became of education but show a lust for the degree that will get them a better paying job. Those that lived knowing by design they would have to do crime live in and out of jails waiting for the day they can live with the digital gifts from Japan. Most get a government check and get by with a tough as nails life. Those that want to get ahead find old thinking and closed minded selfish folks unwilling to make room for a new look with a creative idea. America does one bit of manufacturing really well that would be appliances. Refrigerators and ranges made in the U.S.A. make an American home an American home. Millions relied on cars and the auto industry as well to succeed and with hearings for the big three to get bailed out in progress millions of working families need to figure out what to involve themselves in. Obama sits on the left and with jobs scarce and unemployment high may take to government programs which anger those who sit at home and think they won't be victims. Each person knows where they stand right now with a foreign war brewing, the business cycle in turmoil and high unemployment and we all plug into a world that makes America seem less like a super power and more like a passively amused nation while Washington burns.

The middle age man walked down from his residence only to find a detective and two police officers. They did not ask too many questions they merely whisked him away. The hot July day showed the man in an old shirt and shorts with no socks and old gym shoes. They say he missed a probation appointment and would have to see the judge. The man had been hospitalized and called with a note the day before the arrest. The man wrote books and angered more than a few. Having lived lean hunger already entered the thoughts of the man. After a brief police cruiser ride with inept police he found himself booked and packed in a Spartan cell. The man had just finished a great internet project and a five hundred page book and felt on top of the world. The police took everything from him that day. Nearly five months later he found himself without any worldly possessions, no

home and living only through the benefits of a charitable government agency which got him a living space.

Upon entry to the jail you sit with people going through detoxification and anger. Fifty people stand up in a room built for twenty waiting processing. With no clocks it would be impossible to tell exactly how many hours the coke heads, heroin addicts and drunks trip on each other. The middle age man new death happened to more than a few during the processing here. Eventually after hours the bunch gets handcuffed and taken to intake for physicals and ID handouts. Forced stands are common and a bit of bench is seen on as a great fortune. With hunger and fatigue diminishing the mind survival occupies each thought. During the physical the man saw a clean sink and received a clean drink of water and there was a chair to ease the standing for a bit. With shouting and huge people everywhere the fear of standing out of line rules the minimal thinking there is. You never forget where you are in county jail. After intake you change clothes into DOC correctional costumes and clear to a deck. With scammers trying to trade chips for a cool aid if not steal the lunch the man became well aware of the crisis of crime in America. One must root for the strong spirit in life and many colorful characters know they must suffer jail for the fast player drug trading life they live.

On the deck one finds a TV the one link to the real world and a series of benches with chess sets and dominoes sitting out. The men sit for 18 hours in two man cells each day with 3 hours in the morning and three in the afternoon being able to watch television. The metal toilet and lack of privacy reveal all things to all people. They offer health care for many, as many have been shot and gashed. Many take friends to survive in this place. The white author had little help but he did hold his neutron status as one with nothing, who couldn't hurt anyone. Sitting on metal benches for three hours with murderers and wife beaters hurts the psyche. All in all it points to the real crisis in the world that will just not go away. The author needs to write to chase personal demons, he can tell you there are also real demons in this world.

Bill the writer grew up in suburbia amongst maple trees and uniquely quaint homes. He attended a fine school and met his live in friend Rachel and they lived that modern urban professional life people sought in those years. Rachel came from a campus town with a college professor father

who held tongue with his fine Harvard background. Living in the shadow of her father Bill merely punched keys in the high tech world earning a living moving phone and stock market data around. Each day they grew distant. It had been good once. They shared many quiet moments and adventured to the reaches of the big city. Rachel developed her private unworded pain in an undiagnosed schizophrenia and spent many days in joyful and unquiet tears. All she needed it seemed was the company of Hobbes the golden retriever with a quality movie to follow. Rachel would run marathons and roller blade with the golden. She loved nature but never could encapsulate thought so that it would translate to others.

Rachel left Bill to become a spinster school teacher. She taught high school environmental science and coached track. She said Bill only distracted her and left. Bill found quiet in time alone. Bill continued to work and fight mania to live. During mania he writes music and articles, designs engines and finds religious and spiritual things in everything. Bill suffers from Bi-Polar disorder and lives to say art can show through even if the artist believes he is divinely blessed.

The military believes in religious blessing to win the hearts and minds of the population and a collection of odd events lead to the story within. As a computer expert Bill began posting a series of diagrams on zero emissions vehicles. The diagrams brought over 12,000 unique visitors from 26 countries. The ideas prompted articles to see if Bill could be made famous in Asia. Several Asians claim he is a revered man there. America treats smart and unique people differently. Bill claimed the idea was a billion dollar idea to the country creating 1000 new millionaires would do it. Each day things grew stranger and stranger for Bill as real spies kept showing up where Bill was to see him in person. Every spy loved him but they just wanted to bug his car and home and unfortunately Bill was poor and living alone.

Along this time the war for oil rages in Iraq and the Middle East and the military began asking questions of citizens like crazy Bill what a high energy person would do in the war zone. One day they gave Bill control of every troop in Iraq with detail reports of hard hits. Another they asked him who to shoot at and he yelled back, shoot at the enemy.

Scott, Bills friend the hand surgeon opines the human body comes with hands and people should use them. Scott's father Arthur worked the life of a dentist prying his clean hands in the mouths of strangers. Scott lives that wealthy disconnected life where all hope for. Inside he wants to know his countryman can assemble things and repair trucks it's the social issue of wrestling and beer that prevent he and his wife meeting such people. Scott lives cold with his cold wife and cold kids in a house that a Hollywood celebrity could find themselves in. He fights the working man on insurance claims daily. Several have threatened him after he said a hand would heal and they could return to work. He believes in his work and holding his line. They would never actually help. It's like the comedian says, "There is nothing like the good feeling of someone else helping out."

General Kimmit wants Arabs cold and he yells with a slew of profanity thrown in. Arabs change names. Arabs do crimes, wash and believe they were never there. Kimmit had troops stand by between Baghdad and Ramadi where a computer system made identification on license plates and drivers license. Ramadi is like an escape hatch from Baghdad. If something happens in Baghdad one drives to Ramadi gets a new life and returns as a new man. The whole thing is a bloody mess right now. Upon passing the checkpoints on both sides out and back and being identified the Arab always lies about who he is. This changing of names games went through Europe and America has a list of alias players. Arabs just live for the moment with excitement of who they are during each individual trade. General Casey was up on cartoons like Bullwinkle leaving the men to do their missions. General Abizaid lived the life of a darling to each politician who put him in the fold. General Petraus shook the Iraqi politicians' hands skillfully yet no end in sight look to be on the horizon. General Franks began the parade of Generals calling each move from Central Command Doha U.A.E. General Corelli and General Sanchez watch troop movements accurately and really no along with Kimmit what goes on. General Myers led the joint chiefs of staff and can make you proud to be American. Admiral Stufflebeam led the air force and the stealth bombers and fighters performed well.

So what did mild mannered Bill have to do with all of these folks? He worked as the political liaison between the blood and guts on the battlefield and what people should know in approving funding for operation golden helicopter as it was called in circles. At any given moment the

politician may call while bombs are dropping and Bill is watching blood. Over 4000 Americans are dead and over 100,000 Iraqi's and no one in Washington really took a good look at what troops do. Obama says he will change all this but revenge plays and an unquiet Middle East may prevent this. What else did Bill do? During all of this Israel fought in the territories and Lebanon and was used for translation skills and U.S . approval of Israeli military activity. All of the activity broke him financially he lives to write and tell tales of disconnect and success.

In wealthy world a wish is made at the age of eight. Bill's best friend Bruce was simple. Bruce feared the unknown and wished only to live in a house with a beautiful wife. Bruce played the field made good friends and settled down. He fears all those things that people could get involved with if they were not careful he loves his wife and kids. Bill had Viet Nam generals observing him as a lad bred to be a super soldier they constantly asked him if they could blow up the world. You see the world felt done. Each avenue had been explored they felt and they felt it was better to use nukes then put more worthless lives on the planet. Bill wanted to live. He extremely wanted to meet a woman and do sex. It felt important to him. Some wanted just to watch television others wanted to pig out a lot. The military wanted base lives without real jobs to mess things up. You erect in the model a defensive structure and make raids to satisfy a need you might have. This base life won for many former soldiers. Bill thought the father should go to work, the kids go to school and the mother should involve herself in activities. What should fathers work on the Generals prodded? Bill had seen star trek and loved walkie-talkies he felt we would not have had everything until we had the computer and communicator. The effort seemed massive but young Bill persisted it was possible he just knew it. Reports of acid in the Kool-Aid may or may not be true in his case. He said he would work on it and sacrifice great wealth for much of his life if they could make it cool. It's funny he said those things have universal appeal and no one really wants to nuke the world anymore. Most people really love the video games as well as the security of checking in on the car phone.

Each day Bill sits his life slips away. He is not alone. With the county jail population at 10,000 and thousands more at the actual prisons; the system creates drains on society that can never heal. Prisoners hold the fight of the people. The people need to show the world that a fight for

survival goes on. Each face in jail shows the tragedy of poverty and drugs. The majority of people in jail belong to the African -American race and to say they hate what European Caucasian Americans have done goes without saying. We live in a violent world and men that go to jail all know the assault especially in the domestic area. The occasional DUI case wanders around shell shocked as to what goes on in a jail. The jail holds people still awaiting a court date. Bills case kept getting continued awaiting a psychology profile to see if he was moral enough to live in society. It all seemed like a political hit to him for his book. The thing you must realize about jail Bill said was you are always hungry and afraid for your body. Each day the stress removes all thoughts of the good and higher aspects of life.

Meanwhile his college chums and wealthy associates go along with the malaise and consistency of a television world. Sure occasionally the kids say something if you listen but reaching out to help would be out of the question.

Going to court is an ordeal. The inmate is awakened at 4:00 AM and with crowded bull pens and forced stands a handcuffed bus ride and a holding cell under the jail by 9:00 AM and later the inmate just wants to plead out and go back to the system that will at least have a tray of food for them.

Each person lives with a reflection in the glass. He lied about saying, "I love you Laura" at the beginning and got severely beaten. Anyway the fact someone would read a truth that they ran over a squirrel might not sit well with them. After all the driving would one squirrel incident deter the pure and noble view the world puts upon them.

Each day the mirror tells the story of the day. Each day the hag hears how wonderful she looks for spending her fortune on threads of gold with coaches laden with leather. The appointments reflect well on you Mrs. Goldenthread for certain.

Mrs. Goldenthread fancied herself a brilliant mind equipped to handle everything, and she means everything the modern world could show her. She spoke well with the man that handled floral arrangements. She spoke well with the man who would take the command to feed her to the

expert chef. She even had a kind word for the man who tended her rose bushes.

On occasion Mrs. Goldenthread held tea for some society women in her home. The reasons for things occur to a Mrs. Goldenthread so naturally the well kept women of Goldenville respect the lives that keep the Goldenthread way alive. The treachery and deceit that those ill-mannered people use assault those that know the well kept person dresses well, eats well and keeps a tidy mind.

One man met Mrs. Goldenthread on her journey through life and met the treacherous and deceitful people with such force of will Mrs. Goldenthread needed to try deceit of her own to find the truth on the nature of forceful.

What Mrs. Goldenthread found shocked everyone. The mayor, the politician the respected band leader and even the school teacher had the hand in the lock box kept.

Well Mrs. Goldenthread opined all of those people must no best and turned away from the story that left far to many in the pond behind the graveyard uncouth and rotting.

The well manicured cemeteries never bothered Mrs. Goldenthread they served as ordered reminders of times past and held. The world she traveled in held visions like castles in the air. The effluvia of florid scented roses waft far higher than the fertilizer the gardener had applied.

“So, the man wrote shock and awe a few times and now” she said to herself, “Do I get to use my tea service just the same.” I like my image in the mirror. When the esteem of others fall the dedication to pure and just turn into the pure horses tail and justification for cold, icy stares.

No one lives a life of hypocrisy without first owning a life of belief. The book Van Gogh's Ear sat on the lathed brown table by the stand alone chair with that name on it from her past. He went and exposed all the dirty little secrets until the whole of it looks like the scent of the perfume mattered very little to hold it together.

He assumes people enjoy being held up to the mirror of truth. Van Gogh very well may have sent me his ear. It does not mean I can hear him”, she mused

Who wrecked the perfect world created in the Starbucks coffee cup. You see as it happens what should happen, should happen the multitudes agree. Those that lived in a rate the product, and give importance of an object in what they acquire feel slighted by current coffee cup wisdom. Everyone needs a car. Everyone needs a computer. Everyone needs a TV. Everyone needs a phone. Everyone needs the Starbucks master brew system to be known...Obviously.

The conditional logic person solved everything with (not said hard) the automatic option on goods sold. If you acquire the best product costing the most then, you will be happy. This strategy bankrupted thousands of Japanese young people and forced decent college students into early debt.

You see even if you live in Japan where they make TV's they require you to pay real yen for this. The pride factor works to impress the world. The aggression from the Toyota and Mercedes maker to have young people get new stuff right away fails to impress the clever price performance computer shopper player.

The slick coder negotiated with less memory and slower processors much more ably because they had choices in life and could accept trade offs for the next best thing ever on the road to advanced “Cadillacing” of the computer world. To Cadillac something implies you put every electronic feature in one car that does everything except allow you to park on the street easily and fill up with gas economically.

The perfect world in a coffee cup works for the ultra rich every time and the worker developer lost to doctors and insurance claims processors who got the perfect life while stepping on the worker who wanted to dedicate an entire life to fine, successful cars and computers.

Doctors know things fail. Doctors know machines and structures can be built to exceed the human life. Why do engineers build perfect worlds for doctors and not themselves?

The perfect world in the slanted ones coffee cup requires each doctor to pay an engineer 1 million dollars never to get the engineer in their sights of death with medical x-rays.

With 80 percent of engineers being diagnosed as bipolar we no w know the housewives, househusband looks at the man who sets the computer down nicely in the hospital as one who could destroy it. The housewife always complained about stuff missing and that woman around and the man should fire her. The staff tolerated her for the life but knew she held some missing screws together with diamonds and cash.

The man who sets the system down on your desk lives so faithfully that, that part of your world should work just so perfectly to assist you that living with the unthinkable that you would kill your machine before yourself led to the drugging and diagnosing of the finest minds the computer and car world ever knew. 8 out of 10 programmers loved God and People more than any Doctor that lives to give you disease a nd pronounce your death. The concerned scientists and engineers demand an explanation from the AMA as soon as you get off that bank statement wisdom.

The death of the middle class, as a concept troubles many who feel they live in the middle class.

Many defined the class structure in the United States as poor, middle class and wealthy. Others add upper middle class to the list.

The middle class defined involves an income to a household every year that triples the investment income. For ex ample if you earned \$50,000 at work you could have earned up to $\$50,000/3 = \$16,667$ to be considered living middle class. To earn that 16,667 at a decent interest rate per year you would have around \$200,000 invested at a decent interest rate. (around reads brown to suburbs)

The middle class never could “live on interest” to survive. To live on interest bank interests use funds to load money and return the invested proceeds to the rich investment player. The person living on interest provides no labor input but does provide valuable capital input to the system.

In a world that presents the hard working dedicated worker overseas an opportunity to produce cars, computer memory, televisions and microwave ovens the society notices no noticeable difference in product availability.

The poor never could afford everything. The middle class struggled to work with the wealthy to obtain this new found panacea in life.

The growth rate in real terms beginning under Reagan and continuing through Bush created the best housing in the world with the finest computers and cars the country ever knew.

The purpose of life question creates an economy of solutions including drug use, alcoholism and boredom. Those that do not seek out life tend towards a disillusioned passivity that refuses to invest modestly time and effort to assist some of the social ills of the poor who fall through the large corporate and government cracks. With the elimination of the poor and middle class in the United States the impoverished nations of the world send thousands of people each day to live in the United States. Reports on missing and dead Americans appears to match the number of these impoverished immigrants. Actuarial reports in cities will tell you of the vanishing casual American style middle class family piling in the car and going into Manhattan, L.A. and Chicago. The Disney theme parks do business only the family car with the family now look like a corporate outing with young Steve taking the lead role in the Roller-Coaster demonstration team with Laura studying the magic castle Snow White for authenticity.

The wealthy middle class act much as the middle class in the past in terms of who travels on the local roads. Workers and the wealthy middle class do not mix, everyone agrees on this. Everyone in the United States that lives a middle class life now states the middle class does not need to work. The World Suspects A World War Scenario From All Authors This is cool to think about with some people. The author learned and practiced FIXING a world that agreed with the text. The decade of the 1960's wanted CHANGE from short attention span lives that KILL an enemy for profit. To do this many young minds grew older and participate in the underling world many a bright mind avoids.

The ancient premise: If a few farmers get together and farm the land well they can save the proceeds from sales and build great houses and lives with everything inside.

The ancient defeat: One heavily armed raider can kill, loot and burn down the farm village and take the proceeds home. The city premise: Many people work in a specialized way to create tools, machines and luxury goods to make life better. A man on a farm may have to pluck dry corn into a bin

by hand and press the kernel into a powder the farmer can then use to make corn bread and tortillas.

In the city people create machines that take the ear of corn and manufacture the product into corn flour and corn oil.

The machines take maintenance and often need parts replacement.

The person that creates the machine seldom sees the use of the product other than initial testing. The life of the machinist and the farmer conflict in war.

The premise: An armed farmer can kill anyone in the city for her possessions and finances, with the justification the person contributes nothing to others.

The Hitlerian theory allows twenty years of Jewish Capitalism to create wealth with the killing of 20 million to follow in a war dividing the wealth amongst the remaining soldiers.

The Jewish theory allows long term investing and growth to provide a stable economy based on supply and demand.

Kids today start life with the wisdom of the ages stored digitally on computer systems. The hard knocks living led to lessons about stashing yourself away with good food, water and power and let the sorry sots that go out in public learn that peace, quiet and great snacks really provide heaven on earth.

Less than 100 years ago the worker just wanted to sit down comfortably and hear the strings of the symphony with a full stomach to get to heaven. By age 21 in the modern era, everyone gets a taste of heaven on earth.

The pleasure principle tells the world what to do. Many accept some conflict in the life of their children. Most do not care to show them how bad life really was before digital won the day.

Some feel the enhanced life pushed the soul of the normal simple person beyond the place in history where they should be.

The clean happy peaceful world looks to be inside a home. To note the film of the late great Peter Sellers, life is just "Being There."

The escape into the now sacked Philadelphia where Mr. Sellers needs to pass a message to the drug dealer Raul will show you the life of the persistent engineer in today's world.

I don't have anything in my head sometimes, she exclaimed. When smart people do something I feel like people live smart. Couldn't you do something without using the bug? She mused. "I don't know what else to do? The Cricket user peeped.

"I can't golf or screw up?", The tough un-shampooed truer bespoke.

"When you golf or screw up, what tips do you use?" she asked not really hoping for an answer.

"That some guy might come home and tell me he hit a good shot never worked for me." She averred.

"I wanted to hear about some ones big one, and get teased." The red shoe wearer smiled out. "Here comes one." the meek female exclaimed.

"I don't know what to do." She faked the quick response.

:"I can't get up again for three seconds without Bruce Smith saying die young." The fretting one opined.

:"Once you are with the birds, you are with the birds." The golfing executive boomed.

American business relies on both a professional plan and staff. The economy works and Barak looks like an American business leader. The symbol of Barak implies a respect for the office and the male life.

Women and minority issues never permeate the forethought of the others of this world and they need not. The softness a female candidate takes on her own kind as well as minority make them unfit to cold American life.

A man can be cold on immigrants, minorities and women. The man in America can come home from work and know how business looks from the way Mitt sounds.

Men can be charming and soothing and he can be tough on issues.

Those that want single issue candidates will always vote for the issue they feel strongly about. The issue of fair play seems to go only one way for those with significant others.

The nature that the man wants Mexicans to live in Mexico and a man and a woman to be the definition of marriage ring truly in the Boston republicans mind. Lest America forget someone needs to show the guest the door when they will not leave.

The airport security from Poland, China, Africa and Mexico look so easy the commander of the defense forces of these countries fly right in past security to run local wars.

I ask yo u who would stop the lost. The country allowed visitors as long as you had tourist and worker visas to come here. This public toilet dress up game needs to stop. Could I get you to say "You Betcha" he said.

Hitlerian theory KILLS PEOPLE dead merely for being with wealth. To define holocaust as merely killing Jews fails to impress the modern world citizen the Rabbinet must define to the congregation what it means and meant.

If a man can not get wealth and the society says you may take the wealth if the man makes a gun for the army and takes it one day with 10 bullets the same man now has the wealth of the 10.

Hitler went with some police called the Gestapo Secret Police to see if any real work for Germany occurred in Jewish homes. The conclusion, called the final solution meant he could not find a Jew that would invest in German causes, including his own.

The Jews drank wine and no beer. The fact of which would imply a non interest in the wealth in Germany supporting brewers. In fact the farmer, brewer beer hall country hideout lifestyle won in Germany so cold the surprised Berliners never had a chance with the shouting style the country people developed to speak German. Simple tactics of wealthy Germans luring Jews out with compassion only to meet the country bumpkin looking to grow cold to someone who told him he could not get barrel and grain money along with a small warehouse his friends built and the Jew now owns led to the holocaust.

Jewish Theory presupposes the love of the same types of things of all peoples in the society. In a world of choice the Jew gets wealthy with diverse financial plays.

In a world where motorcycles get frowned upon the Jew buys the machines and riding trails out and sentences bikers to the back woods. The financials never seem to work out for manufacturers in Jewish countries. The assumption a man would want to count paper and gold while sitting on a soft pillowed chair confuse the "classless" peoples of the world. The very nature that both theories success leads to the judging of each life incorporates the theory that they both feel they speak with God. Ancient peoples at least could laugh at this because ultimate ends of things mattered less then the potential deaths due to illness and accident. The Americans and Russians both won in the second great European conflict and must rise again to punish the Jews and Germans for playing God with the world.

Technology abets the new vision. You got to get this thing. We have great opportunities with modern technology to bring life where tumbleweeds once roamed. Both Atlantic and Pacific coast cities have been choked with the Babylon syndrome. The tower of Babble stood in Babylon modern Iraq in biblical times. Each person in the tower spoke a different tongue believing his sound traveled right to God from the high point. Many believe the world trade center was the modern tower of Babble. (ed. Babel)

Three areas targeted for growth here include the triangle Dallas-Houston-San Antonio
Atlanta-Charleston-Raleigh Durham and Phoenix-Tucson-Nogales

These areas have a remarkable similarity of individuals who believe technology can support life on what was once a brutally hot and arid environment. With modern methods life not only goes on it thrives without the philosophical approach of whose voice rings truer to God. As one hears it the similar folks just believe it of themselves.

The coasts in newly recognizing the capitals plan for development need to send some college students and graduates to finish at Emory, UT Austin and the University of Arizona from any East Coast University, UC Program or Stanford. Regional efforts need to be made in the geological

sciences, materials, water reclamation, organic chemistry, biology and the arts.

Recruitment of realist painters and artists in small numbers of about one hundred per city in an art institute setting adds some culture to elevate those that live inertly much of the time. In navigating while level, the cotton and oil business, the nation supports the business of producing well citizens.

Let national efforts continue to educate from the good east and west and let terra forming and cultural shaping take place well.

The self empowerment issue led to the insolence of the terrorist era. To consider the fact that the leadership sends and receives information often without processing a thought form allows rebel leaders to use the latest computer technology to act boldly. In cold acting one acts as the only significant factor in the scene. Even in China a land that bore fruit subsuming to the greater good individuals now take the technology and the personal thinking first. The world has seen every thought form and the technology has proliferated to those who would carry other weapons other than world. Public life brought gifts to the intellect of the public figure. It brings exclusion in today's world. In person the gift of heaven brings respect for the great. In reality the disrespectful anger filled youth filled his head with recorded angst and never truly sees the finest things the world has provided the young to revile in.

The brave new world rages on and the self denial many young go through pang the writer.

To be Hole Theory you use the inputs and output holes to your body to your hearts content.

To be Experiential Living you try things like thinking books, computers, concerts and events

To be Window Theory amuse yourself at objects moving in front of you as if it mattered to them.

To be Tweaking Theory balance the buzz of drugs in your system to an extreme way. To some food and coffee qualify as drugs to balance the buzz.

SONY Player game
6 Billion Player's
Mortal political combat

Enemy list and targets: Female 14, 24 with multiple sex partners pre 17 who use cocaine as the only inducement to advancement

Allies: World wide military alliance.

Objectives: Currency plays for food, clothing, shelter and necessities work with no messes from WWMA.

Players:

Workers: Farmer/Harvesters rely on cheap labor 60% Mexican. Any and all Mexican woman viewed as targets must have authorization

Doctors: Medical killers rely on x-rays and pills for "sudden death"

Neo-Hippies: The mushroom acid squad doses fast food at will

Fast Food Workers: Take over of Wendy's (Hispanic) Dunkin Donuts (Indian) and McDonalds (Hispanic) completed.

Office Workers: The data army died in the last 4 years they lost to the wife and the boss. They can be trusted after long explanations on public enemy one and the reasons of war.

Government: Sold out to Chinese, English, Germany and Japan. No real decisions take place in Washington

Police: All imposters with guns willing to shoot soldiers and mall shoppers that look male for a fee.

Judges: All willing to run the dungeons without a justice system

Educators: Baby sitters sent in to deny class room partiers the good book

Sales Teams: Sit in stores and offices and wait to get shot at home, at work or while driving.

Restaurant Workers: All exposed to the gift and slap model of woman rewarding and can take and turn on male lives in a moments notice. It is not "just a cup of coffee to her."

Hollywood: When a star is poor he and or she say go get me a life and they play it up on camera hoping for funds a role and a film.

Jews: Sending funds out of the U.S. on each statement by a pro that says, "Kill Jews"

30 Suftah aircraft based in Dallas. 4 F-16 fly coastal missions in California. 18 attack helicopters near Washington D.C. High Value Targets: Bridges, Interstates, Airports and Airplanes

Chaim Potok authored "My Name is Asher Lev" years ago and

Phillip Roth authored, "Portnoys Complaint"

Izzak Beshevitz Singers Short Stories live on about Jews and Greed.

In today's world a man must include a name for Alan the Jew. Mr. Singer had his plum cake with Mr. Alan years ago and the lemony tea excited them with cake intelligence working.

The tempest in the vestibule goes on. Let the pesky evidencist worry about it. That's how a Mr. Alan would say it. Roy or Ray Cohen has nothing on the Mr. ALans of this world who say the truth value of something ultimately depends on "WHO SAID THAT" works in vestibule poker as to who gets to bore Suzy, Randi, Sheri or Debbie.

Here we go...

His name is Bill Mostovoy and he lives without the use of cocaine. At the age of 21, on his 21st birthday a pusher gave him a "free packet" of cocaine. It was used by the inimitable Gregor and him. The film will show

use of the drug. He did what is called and evaluation. He said to no one in particular, "I can see why people do this." Not with excitement but as a scientist the view of cocaine use looks like something to an artistic and judicial eye. It also takes a lot of money and the pusher had the campus nailed down and would not have permitted dealing so using it on his college funds was out of the question.

He graduated college and with a few looks at the pusher and user community I just forgot people continued on with the lifestyle. Cocaine is big business. Cocaine makes people do things that people that do not do cocaine feel is immoral. Having been bitten once and trying it the morality issue and call is out of the question on actual use of the drug. The insensitive and cold treatment to Engineers, Workers, Doctors and Business People who choose to care correctly troubles me at this age. So the pusher went technical and I can't help but flow out some Pseudo -Code for the callous disregard the man seems to have laid out for the future.

What are you some Computer inside about this? Alan Muttered

A man is known as great at something. Another man became rich and noticed the person with skill held peoples attention. The wealthy man stated to himself his entire life he could be great at something given the chance.

Now as it happens in the modern age the style of the accomplished can be duplicated with some observations and inferences. The apprentices of the past watched and did passing on trivial hand skills for the future.

The digital knowledge machine looks at the surface to be an apprentice type profession. One sits and uses hands to create text and images on a computer. The knowledge of what to create requires the human mind.

The first step of knowing that folders stores information, seems trivial in regards to the data content within.

Being stealthed takes some doing. You call yourself many things like the dupe, the patsy and the fall guy but since you need to live for some reason you carry on.

Imagine your surprise after completing 683 pages of text and someone requires you to re-title the book and place their name on it post hence.

To note the person became great on the instrument by caring about the importance and precedence the way they saw fit. If a folder found itself named 'x' it would not trouble the great computer people of the world. The dupe knows what is in 'x'. The stealth wants to give something away to other stealth's that in effect do not affect the final output.

To be important and not a joke on the machine you must know precedence. The precedence of things you do makes ultimate sense on the unit.

For example you must put your clothes on first before you go out. Many fast stealth's want to beat you by saying you can go out right there. In affect you can but the exposure could kill you. Many want to dress low things in expensive suits, thereby destroying the conveyance within. To demonstrate the horrors of war the photo of the smiling politician might not work.

The patsy will ultimately be destroyed by the wealthy. With a copied stolen hard drive and three days to read the valid folder names the former porn star now sits in a decent life of the mind.

Bill sits at home and reviews reports waiting to report to Washington insiders for the next news cycle and political decision. He gained ears and eyes all over the world. You remember him from the early decisions of wanting family structures to win. The competition for his heart and mind as well as his body to live on a base went on. From covert television networking equipment in glass and steel high rises to actual underground bunkers hundreds of trained eyes attempt to decipher the legitimate from illegitimate action. All in all the monitors look far to good and the violence far to appealing to stop. At a moments notice they can flood a sector with active people.

Americans go all over the world with road command capabilities. With Hollywood style accuracy Americans brought Germany and Japan to a

more American than American level. During the crisis in India, Americans work with India guarding the nuclear facility. As an American you might see Indian's and Pakistanis as similar. In fact they hate each other. Bill suggested each missile should be built with the name of where it is going. Americans that do this job are very cool. America needed Pakistan as a base to chase terrorists and India resented the very communication with them. With both Indians and Pakistanis acting wildly with bombings and assassinations the harmony of the visual monitors goes on with almost a joy of watching an exciting television show. Com loves action and a resentment of America can come from the tempting of a strong person to do something with action to it.

Confidence runs high and the battle between homeland security and the people who want freedom goes on. He sits for a long time. He thinks to himself life could be better. Having been burned before for expecting too much from life he thinks of the cosmic connection and ties that bind human energy. The electrical signals of the mind often conflict with the electronic signals of the radio and television. Once you plug into the digital world you stay stable. Stay together and shine your insignificance. Every little one of this shines a light inside. The digital age works now to fight and enhance this.

So Bob Woodward interviews President Bush in 2004 and the president reveals himself as bi-polar manic to Bill the writer. Bill the writer became infatuated with the CIA world fact book and as the president lost touch the military and CIA relied on him as the shadow government president. George leapt to the nuclear option 76 times according to his sources. He needed to be stopped from a military strike on Israel. Bill backed George during his term but held great sympathy and voted for John Kerry in the election year.

The country during the war in the Middle East faces well financed Europeans, Indians and Japanese that get free reign to destroy something if America shows muscle in the world. Deutsche bank bought mortgages and sent people. For failure to pay debt Japan gained road command and approval of all U.S. hardware designs. Germans that come look act and feel like anti-semitic Americans. Many used financial persuasion to turn all of America it seems against Israel. England herself used the oversight of

America to find out the logic of the American puzzle. George and Bill had to answer for the foreign public sounds.

The military sides German now only they do not know the teeth of the Israeli military. In 2008 the market crashed and Americans that relied on foreign subsidies find themselves in the lap of Barak Obamas' poor direct assistance America.

Bill still sits and thinks the ashes sit in the bit bucket ash tray and he wonders what the shadow wants people to know next. Bob finished his book on the division of America. To those unfamiliar he exposed the Watergate scandal that took down then President Nixon. Only Al Franken the noted author finds fun in back stabbing politics. He himself lost the Senate race in a close election. You have to love this job, Bill thought.

Dedicated to caring loving souls
And the cold that keeps them that way.

So as she found herself defeated it was realized that the hunt for egg donors was not widespread. But a woman with good marks and looks was prized. To get into your life it takes determination and the support of many people. He was born a young Leo and fought hard to find out why someone so young should be attacked inside. You say he was born with a gift of blessing people that are without and not collect gifts that were given by others of Gods children. Knee jerk reaction instantly to blessing for an engineer, "This machine now functions correctly, use it properly!" The cry of what does happen in the unseen is reli shed, then put on a hot dog to eat. Enjoy doggy, enjoy. The unbeatable aspects of life include knowing not everyone has the unbeatable aspects of life Where you stand depends on where you sit...Epistemology. Cream puffs perplex the thoughtful

Dearly Beloved, let me begin by giving you best wishes for the upcoming struggle of Religion v. Degeneracy. The minds of information are being destroyed by insignificant decisions of policy. The government needs to do several things.

1. NOT encourage a government on a foreign weakling
2. NOT encourage increased wages or improved working conditions in the world
3. Enter into treaties concerning the environment.

4. Destroy the Bill of Rights and encourage a Bill of Suggestions. How many are in violation NOW.

5. Destroy the Global Internet (How much money did Cisco systems need to make investors)

6. Invest in a massive effort to digitize and A/V the Library of Congress

7. Central Computer USA to State Capitals. SSN ID for entry and Logging.

8. Produce Valuable goods at an Inflated Cost. TV, Steel, Autos, Computers

9. BAN International Travel

10. End education in our schools.

11. Teach Fighting in Phys/Ed

12. Encourage Suicide

13. Teach Border Guards to safely round up visitors and set up worker s colonies.

HEGEMONY ends due to terrorist victories.

War is upon this land. The big cities will be unrecognizable. I've had fun. Enjoy Marine 1 Sir.

My purpose is my porpoise

Lets Whale

If we look we can see that 8 out of 10 of the Bill of Rights are being violated!

Thank you America for not letting me grow sour.

Are you a grape?

Yes. And the Restaurant.

Does a spoonful of sugar make the medicine go down?

Encouraging and fostering growth in formative years...

The dumbing movement is in affect.

P-Box

Dear Love,

I want your body to surrender to mine. Once you do you are free to commit social suicide by attempting to mingle. You are an interloper at best. OK use your sexuality wisely. I care for your life. How stupid are Fred and Fran? Once your freeform is out I cannot care. Decanting your wine would be a good idea. How is your Port?

I DO NOT WANT TO HAVE A CHILD WITH YOU OR ANYBODY AGENCY EXPRESS OR IMPLIED WITH RELEASE OF SEMENAL FLUID? (Please Reconsider, a few days later)

The urbane witticisms that are used to critique the echelons of society that rule the very ground you hope to flow over are over. What is your fathers' job. Did he get one of those Blow Jobs you keep mentioning. How is your mothers mother? Are you THE Oedipal (edible) victor. Why should the world care about a snail. You are rotten to the core ugly. What is your aim? What is your truth? What do you concentrate on? The German mothers or The Jewish Mothers is there a difference. Who made last Thanksgiving Feast. Who got upset? How are your children?

You are to tall! You have the wrong hair. You don't reference anything known to me. You are a fine young woman who is wanted wantonly.

What if I said SO WHAT rhetorically? The rise of the leisure class I'm sure troubles you because you care about so many things (RULES, PENIS and CASH)\

Do you want your dear old dad to die? Have you considered your career options? You seem to like your furniture. Who made it. Whats On? Whats in?

You sold me out for a song you lousy coward. Yes you Laurie Goldfarb a minute player who can't handle herself in public or private.

It has been awhile since you were cool. Are you cold? I know you are 6 Feet tall with ambition of Bugging me and Ruling my life. I have known this for quite some time. I will eventually tire of you. Right there I am tired of you. You have no hope for a decent life and God hates you for it. Where is the hearty welcome of a fellow traveler on this spaceship Earth?. I have no desire for your backroom deal. You are a yellow bellied back room conniving horrible pox on the decent people of this world. You are dumb and ugly. Hide behind the mask all you want. You are pathetic. When I see you and say stork how did you fail in the game of life, you will know that I see all of what you are. I regret your loss in the 2nd world war. People made sacrifices and died horrible deaths for the world to be clean of the poison you preach. In America never again means what to you. I have no love for your bygone days. You have reached into my past and discovered that hiding from torture or torment was a part of everyday of my life. So you want to discover what it is to meet a survivor. Ok you have jumped to the good part of your life. The syntax changing now envelops us. Viewers may be retreating to teen age photo.

Where is your love for me? If you prick me do I not bleed? You have a ring in your heart but of course it is not for me. Leave! Cease and Desist.

I will get a restraining order as soon as possible and file civil charges at the end of the month.

If you release any information or have released any information about me or my family you will not be permitted to live.

I have cash in a bank in Geneva, I have a bank in Tel Aviv

I will clean you out. I will clean your clock.

So you want to be a wife. So you want to be a mother.

She needs her freedom. I know capturing her heart is not possible. Please don't harm her. If the past statements are hurt, invent your own way to make her realize that in the nature of happiness through flame one must be careful not to be burned. No memorializing the two of us would be

necessary. Rejection on my part is hard to deal with. Life goes on and I wish her well. Finding all of my tails to go with the heads of my life has been difficult enough. Capturing the people of past rooms is impossible. I have heard nothing from the people I assume she has researched. May God be with all of you. Be good neighbors and you'll have no problem.

Modern era may involve massive number of mobile active youth with reckless mischief on their mind. The threat of follow-ups from a mother ship is negligible. The threats to working people in the land are important. Some places look like the easiest place in town. The backup call of or "I'll kill you" is not credible. Townspeople, shopkeepers and those in hospitality may be surprised by sudden changes in behavior. It is regrettable mid level discussions within principalities to the host passport, would be desired.

Innocent and Sheba, the difference remains tough to tell. Is this the time to dance on the beautiful stage? Yes. It always is.

Spendthrifts lose. Enjoy sports. Due to attrition one can devalue non erect behavior. Describe and proscribe proper medicine.

Response she has a dead phone, computer and television. Women have failed to hold up their end of the bargain. One phone call would have been accepted. Now I will call my service provider and say no to all phone calls and emails out of state. If she has my money, then I will implement the rest of the plan as I have laid it out to the government of the USA. The audio has been altered well but you have selected death enemy of the people. No one ever loved you because the cheese stands alone.

Here looks to be the strongest card the world has ever seen. The delivery system will not be revealed and the target will not be revealed until this war of attrition ends. God Bless the USA and Davy Crockett. His rifle was called Betsy. She was my car. How do you like my Toyota? How do you like my Sony? How do you like my money? No Man No Freedom. Choking chickens will not get you to heaven. So God exists. So there is no reason for living. Not only does God exist and faith found us in an

abundance of souls. I have sung from every part of my soul that past generations have been or found welcome.

Back to the Bomb, I say, "If my enemies are not destroyed by then this world of Tex-Mex ends?"

Why don't you get done and be degenerate legally. Once you are done you do not have moral authority to kill good decent civilians. They firmly aver that she is an Arab and will always be one pointing out who the good ones are on her terms. What a farce. Fighting and fornicating your way to power caused your legal farewell. It will no cost you your life. So long sucker!!!

Discovery of promise in the land of opportunity denies the gift of life's attraction. In a simple sense the idea of a maiden form appeals to me. I know that life will continue ad nauseam. If you deny the flesh the body will die. The denial of my mind by friends that should have been there in need is to be expected. The challenge put forward to me was solve the impossible problem. Expectations to solve problems in an age where established principles and precepts are firmly entrenched make a man dangerous to the cabal that rule the way in which things are done in the home and the office. Is help wanted or is help wasted in the modern post-industrial service economy. The quotient of respect the quanta of light that can be generated by an overgrown ape with a passion for winning drives the way toward a goal that can only be linear in that the lead can only go one direction at a time. The scout and report model fails in those unaware of the effort involved to build roads and safety for all. Does the authors' photo need to be on the e-Book? Detecting the brain response without contact and context destroys the watched society. Focus on the form of the future. Erstwhile encompass the grave possibility of misuse has tortured the top level for years. Taking a look at it to soon produces correct but not fine answer.

How can one ask another (black person interrupts here) person? "Why is what you do more important than me?"

The one who asks is not ready to handle responsibly the free flow of information and wages that are fair and clearly explained. Drastic

measures seem to float to shake loose the tight purse strings. Fair share capitalism yes but not in the name of conquest of the boulevard, I suggest. The way my life has been has been to serve in my capacity as citizen. Waking up and finding that doing things my way curses me I am left with my solitude, which is my peace. When I am alone and I find this alone naturally I am in heaven and I know it.

The social responsibility play has run its course. If people shoot at me I die. No more protection rackets are worth anything in this land. It is as if a roundup of thirty strangers invades this community every night trying to weed a garden with a bomb. I cannot hear her comments. I realize the power of men/women together. Leaving unformed adult children to bother me is frustrating. If you can read this and analyze it you realize its stolen and you are in violation. Who do you think you are that a man can give up his reason for a dalliance?. I can explain this in writing but in sound the spies can change the sound.

Perfection and being a perfectionist may be fine for some. I am in no mood to meet a perfectionist. I am in no mood to meet someone's mock justice. I do not rise to violence without the influence of major attacks. While you read this I am important for you! No, life doesn't stop for me or you. Those guys said it 50 years ago, "It's a dog eat dog world". Every dog has his day. I want to see tomorrow's promise. As I perused the trade journal it is insignificant to me for the woman can lose anything from a man. I am not so slow as you may have believed. I get the joke. Is the writing on the wall there if you choose not to read it. The door may be next to the writing. (Obnoxious interruption) In my last note I commented but briefly on the problems that can exist with important women and since that day I have seen things correctly. Every day I wake up hoping no person will listen or comment or abuse my life. The world is filled with lousy people. This country has gone to hell. That's the way people like it. They just don't realize that I know they really do have wonderful lives. Killing a man is fun two women say to me today. I am not a violent man. I have been manipulated my whole life by decent people. Now it is time to put down the rebellion of people who mix worlds. Chemists and Psychology amateurs have ruined every concern for humanity. I can't even imagine how a man goes from constructing something to stomping out a person making his way. OK woman get upset by scary things. What is my sin? The outtakes of this

woman a lady killer haunts me. So yes the jail term is being lived. Sounds all the time and head bakes.

Boiling temperatures in late September are so obvious an attempt to get me to change this life. That option is not available. I am done with the rat poison game. I want everyone who thinks there spectacular in life leave me out of your forum. I HATE EVERYONE in life 1, I ENJOY EVERYONE who could see that I created something from nothing in side. I am now done with the "Visual Arts". I heard there is some new porn on the web of this fine hook. I have everyone.

Who do you think you are to write me with your scribe pen. That is what that nose is for. You are a chronicler of events. You balance yourself with those who you think are respectable. Violence of Violins I am sure resonate in your life. Yes you realize that catching a phrase in the wind is the end of the caviar in your life. I am sure you can categorize the different moods in any dwarfs. Some of the dwarfs are clever. I have counted myself five people that live unthreaded ways.

You grew lazy with her holding a card that may not hold without your viewport which is children. Tomorrow is another day and you will be gone and I will have my memory implant. The center of your universe lies. Love your Sony. The foundation of makeup belies not the tramping transient. The harlot that noone dares through the A upon. What makes your skull interesting to me is that you lose so frequently and you don't even realize it. Your courtroom demeanor I am sure is fine. Back to the grindstone with you.

The Lion, the Witch and The Wardrobe is a wonderful children's tale by C.S. Lewis. The book provide s an escape for children into a life that is both wonderful and scary. The symbols only modestly suggest the nature of His light that darkness. The pride of the Lion is shared not the necessity of the hunt. The who cares message from a young one with ol der garb indicates that the facility of numeric quantification from the non cogitative non contemplative life would indeed demonstrate the demand that doctors expand her cellular life to 100+ years. That exam paper must have been tremendous. The lies and deception in the say anything in an ordered way

with a smile and you will be rewarded is not acceptable in the digestive phase of computing and modern symbolic thought. Can 21st century philosophy find an answer, without analyzing the psychological even ts caused by a rapid stimulus response methodology. The top down approach assumes a crown that all the sub structures function correctly and in an ordered fashion. The ordered collection of object oriented structures of thinking from within the minds of the army of knowledge workers is staggering. There is no way to describe the amount of empirical data handled by this army. The Joshua effect is in affect. The Trojan horse has been sprung. No snow this fall would indicate global warming to NOAA. Other than the top down method we have the Core method. This model assumes a critical mass of good be that in organizational behavior or hours of time for delayed rewards. Today we have seen squandered reserves of pensions, 401k's, outsourcing to delay the inevitable judgment day. One can say that the pacification of the middle class with modest pay increases, stable homes and families the administration that fosters the gravy train is Ok. But the store, the pump and the tube have failed to hide the real dangers and fears that exist in modern society. The masquerade of the fortune 500 is not tangible to many. It is necessary and perhaps this oligarchy must exist to limit the free flow of information, goods and services. Concerned capitalism may not know it but its on its way out.

The journey beyond two -thousand begins. Size lies in the eyes of those who value the words. William Goodheart – King of the Forest.

The Script: Revenge of the Bill

The days of the personal computer mono poly over at Microsoft™ ended today with the conception of the internet only PC. The internet only PC boots up into the internet browser of your choosing. AOL, Internet Explorer or Apple Web Browser. Since software companies all have web pages and onli ne ordering we simply use the high speed connection to load the software on the companies computer saving our home computer for data files should we choose to keep them ourselves. The internet PC will boot quickly, the reliability will improve greatly and the software giant can redouble its commitment to quality in all of the new internet pages they will create. This thing will change the way the world works. The AOL PC security edition sounds good to me.

The Mentalist a Film

Kids Can't live with 'em can't canister the chips.

So I'm sitting there watching the series and I hear the lambs. They cry out to me with my phone number. These lambs, these viewers of pop - ups far and wide. Where will the foul ball be? Who will cry out duck, care for the lamb chops anyone. Yes please, with apple sauce and duck sausage, care for a snort harbor master? Our success prevails upon us to blue. Well as long as you're obvious about it the mentalist can decipher it. What was it? Base hit to left.

The Secretary of the Interior rules with an iron fist on the plains of this world. From the legacy of James Watt and Bruce Babbitt we have a Porter Goss clone running the sheep, cattle and oilmen with a vigilance befitting Himmler. The scandal in Washington led to the most fractious administration in history. Every agency head runs around in a modularly hierarchical system labeling themselves as president of something to the unwashed masses. The pork budget a Senator can provide shows nothing to a cabinet level head. Those Goss genetics keep pumping out the suspicious Sheppard. Shooting the black sheep from a black sheep prospective has always been a Secretary of the Interior position. The capital of the Yukon territory remains Seattle. The capital to the rest of the pacific northwest lays in the Tokyo suburb of Washington D.C. The new Boeing 767 can fly from Washington D.C. to Tokyo Non -Stop carrying aboard the nervous sheep with market share in Toyota's assembled in Ohio and Mitsubishi's assembled in Illinois. The point of this, in ranch speak, "Its funny to string up a Mathew Eppan" Hey maybe the killers did have nice eyes. They weren't black sheep enough to Mathew. The interior should have shuffled him off to gay Chicago or Seattle where most runaways end up. Tell the secretary of the interior to let runaways alone. They do not wish to tote the Columbine High special and hunt down the Kip Kinkles of this world. And you say Karl Roves not a stand up guy covering for that clown from Utah.

So website Will grew a bit angry at slow monitors. In school the University of Michigan Computer Engineering department preaches winning. The Michigan Wolverines bless best game. So I go in to this place thinking my Rom should say love. Standard sixties upbringing will tell you this. The gunners of course had to do some surgery on the ROM

saying our ROM says win. So I'm like that codes hard wired man so I'm stuck with this WIN-LOVE prepend thing. Will it run (to Seattle I guess) but why don't we build something before we have to God monitor the baby sitting/education module. Sign me up Mr. Secretary I'll be the best Internet monitor (guard Bill for three) the worlds ever seen. Thanks to everyone who put these electrons in motion. NOTE: Electrons are everywhere you just have to spin them Schroedinger.

The definition of crime changes during times of war and crisis. Taking liberties with the law while no one looked in a great land led us to war. Violent crime and the nature of violent crime remain a mystery. The dropping of bombs is not considered a violent crime by Gerorge W. Bush's America. The Unabomber however became a notorious felon for merely three of them. The political ends of violence show us the immature nature of both the terrorist and the American. How can we differentiate between the two? The porous borders make for porous laws. For the crime you have committed against the laws of gravity you are sentenced to flight. 1. Genteel law. 2. Honor amongst thieves law. 3. Physical laws. 4. Television law. 5. International Television law. 6. Where am I law?

So as we know the former colonies of Great Britain carried on as wayward sons until the cultural revolution of the 21st century. George the recipient of an ultimatum from the entire world that violence upon a superior society must stop led to the laws of the forest. The first rule of the forest involves faith, not religion. Believe in something of yourself and you will have your homeland security. Violence begets violence and protection begets crime. Involvement with names and faces outweigh involvement with representatives of places without the name and face you know. Use the modern bridges of communication, use your faith but please do not let the actions of the over protective warrior destroy our planet. OK which would you rather have an apple or potato? When your meat and potato arrive to you immediately evaluate the potato. Quiz results show that eye color affect this decision. <ANSWER>

Quiz Answer: Studies show Brown Eyed people see potato blue eyed people see apple. Find your feet Brown Eyes. Find the sky blue eyes. Although this sounds like an insult. Apples grow on trees which means you

have to look up to find them and you know the blue sky shows itself when you do. Potatoes on the other hand grow in the earth and the rich soil can look like your eye color. So anyway the follow-up question for eye fans. Brown eyes go first here: How many types of bird can you name? How many spiders can you name?

Question: What if my race all has the same color eyes? The answer lays in how you water yourself. Lions, elephants and buffalo go first? Those that live near the watering hole are considered blue. You can lead a horse to water but you can't make him drink. What direction would the horse be looking? The horse loves water when the horse is in a water mood. Hopefully this passage was not seen as arrogant.

What would you do if the President put you on a black op. Would you obey the command to leave a foreign land a scorched earth.

Trite as death feels it is. The covert West Point, Anapolis, Colorado springs man will tell you Delta Force, Seal Training and Paratroop Alpha Squad are trite. Trite and silly non important self flagellation works. Should one flagellate on command and micterate together. The black ops team phoned in today on with the overt DSP calculations on the FFT. Should the square wave ARAM a2d converter have capacitance at sigma charge? Regardless the speed of sound remains mach 1 for these calculations. Watch your units of kCals. kB and kb morsels of chunking data on the solar bird elliptical focus push. Run the biologicals modularly for optimum performance. Crazy and stupid, that's what the world thinks of my dead friends.

The game of rock, paper, scissors has been around for as long as there have been scissors. The game in the new, parish, shire, state, commonwealth simplifies as possible. Paper covers rock. Rock smashes scissors or Scissors cuts paper. Now as we now the scissors have been absolutely cutting up every bit of paper as the illiterate rock and the illegitimate scissors destroyed good paper. The value of paper in the 20th century has been replaced by dubious electrical current. What's your amperage? Oh and by the way the game was invented for favors around a

house, cabin or barracks. Ok everyone one finger at a time one two three and make your signal, Closed fist rock, open hand paper, two fingers scissors. Don't forget this on the boat, vessel, skooner, skiff, ship or sub sandwich. I'll take pickles on mine.

The right to own your own home in America ended today. The corporation you work for now owns your home. The family estate and empire building led to a non Chinese society. Inheritance of wealth now goes through the state. The state owns the means of production. The state holds the houses and doles it out to the corporations. Some people enjoy torturing the puppies.

The soufflé story from yesterday must be heard. Yes one can go to a coffee shop other than in the Seattle suburb of Chicago. So Panera bread imports these French chefs like your supposed to and of course in France one would phone ahead and call for so many of these fine egg creations. In this part of Seattle the icon of the soufflé is much more important than making the soufflé. So there I am looking for a quick cup and the signs not only suggest a purchase they demand clicking on the item at the counter. Well the crow at the counter in her more than south side French way said "Were out of those." with nary an explanation. Apparently at the end of the day the soufflé are eaten by the posh soup kitchen at the end of the day. Now you know we not only feed the poor. We feed the poor well enough to detest us.

I had breakfast out today. Eat and enjoy, live long and prosper American propaganda and dogma of the 20th century failed to account for the human drive to kill. People kill for sport. People kill each other for sport. The shrug of east coast snobbery, snooping in the name of homeland security killed Americas yes. The can do spirit levies the can kill spirit. Kill the messenger. Kill the viewer. Kill the customer. The killer is always right. Justify this.

GENOCIDE.
HOLOCAUST
BANK FAILURE

LEGAL WILLFUL WANTON CRIMINAL BEHAVIORS FROM
THE JUDGE AND LAWYER.
CONSTITUTIONS FAILED. KILL BILL A NEW FILM.

I have tried to get a job. I have tried to get an attorney. Obstruction of justice, mail fraud, racketeering and extortion upon this reporter leave me cold. A few loyal critics remain on the work. Criticize this.

Television and film do not show reality. Television and film show fantasy. Characters on television including the politicians and news anchors are fantasy. The world knew. There's no news in the truth and no truth in the news.

The current genocide of the human spirit lives on. Killing for the sake of violence reads reactionary right wing dogma. Slaughtering the polemical breakfast over at Who Fongs left me dry. Tea for P. and coffee keeps me up all night. Must have been that tweaking latte. World Hunger eateries have become so posh it's a wonder people can't feed themselves. Hoffritz cutlery and China Cutlery head to head in the skewer battle show this racranteur that slicing and dicing past the blue line and scoring Bruins the Blackhawks. No two line passes my corn cob pipe. Eating fundamentals line, eating fundamentals. Eggs, toast and breakfast meat. Two slices and a hot sip. Hot main dish and two sides. Feed the world.

Love Saddam and Mr. Alawi too, I might be the Mr. Alawi your looking for.

The real Mr. Alawi was endorsed by the Iraqi National congress and appeared before congress and Parliament seeking support for the new Iraq

It is not really funny but that's my guy.

Mr Alawi represents democracy in Iraq and champions civil rights. Although in the original election his party did not achieve a majority he sits in the new Iraqi Parliament.

The United States and Great Britain support the new Iraq. Thank you Iraqi Americans for your patience.

Saddam Hussein a loving family man went to work at the government palace in Baghdad every day. Saddam loved people and wanted all of Iraq to love him. The compassionate one gave favors and blessings to those who were strong with love. The fight of love followed and people that fight for love know that to emulate the loved one, one feels loved. To unify under the face Saddam needed to show a face with powerful love. The people followed Saddam because he showed them that regardless of religion you could love his face. The rewards of love are many, the tortures of hate infinite. Love, the battlefield that arises every morning and puts down together every night could learn a little something from this kind ones face.

Soap Opera Section: Pop culture required.

Ellen Pompeo, nice girl. Keep nice girls on leashes. Ellen Pompeo reared by Rachel had a difficult childhood. She always smiled, laughed and made her sound. Ellen was not only blessed she was bright. Bright blessed children need bright blessed parents. Ellen's early developmental parents provided Lord and comfort. This Ellen wins my love every time.

When Rachel went through crisis she found Ellen. What Ellen does now rests exclusively on the mental torture of an abused mother.. Rachel was abused by this pen because fools believed in ideals not feels. I am sorry Ellen. I loved you.

Bright blessed children were not meant to go into old mindsets and old enemies. I promised nothing to Rachel and I received it tenfold. The specificities and enemies departmental policies confuse not only you but me. (Listen Rachel she's no Russian -Jewish-Liberal-Fundamentalist Christian)

To tweak or not to tweak that is the question. The old adage modified in a new era. To be or not to be that is the question. Sacred as being is. Tweaking has become more sacred. What tweaks the present mind? The central themes of tweaking involve food, beverage, alcohol, sleep and drugs. Ask not for whom the tweak plays the tweak plays for thee. I may not enjoy your tweak but I will defend to the end your right to tweak it. One minor hoorah about robbing yourself of the joy of yelling

fire in a blazing building while tweaked. I would hope you would not be so tweaked as to not help out us fellow coffee tweakers.

Now as I've heard it tweaking produces the buzz. The alarm clock also produces the buzz in a post sleep industrial world. So as it's known music buzz tweakers mix freely with busy body buzzing buzzes until everyone tweaks. Café Latte please.

The modern person cognitively functions every day with polymorphism and hiding. The subject explored in great detail shows the applied logician how to model accurately expert systems. Polymorphism; a word meaning many changed shapes lends itself to rule based persons. The rule "smaller is better" can apply to many objects in space. The hiding principle that shows that a flat screen monitor with better viewing angle can be thought of as better because of its "small depth" characteristic can be processed by the rule "smaller is better" and shown that the object "the flat screen monitor" hides.

The two-faced jerk responds to the polymorphic person, "I don't know who you are anymore." The polymorphic person responds, "Why only two of you, what is it work and play." How many of you did we need to build?

In love you have choices, good choices. Early on in a loving relationship we all make decisions about our futures together. Most people had some type of family unit. The male leader often calls himself father and the woman leader mother.

As leaders the father and mother make and have made choices as to how to place people and objects in the home and in the world. The children know how to handle the stresses of life based on how both the male and the female leader lead. Should one leader be absent certainly the female leader can handle all of the tasks in a modern home. The value of children to the leaders matters only in preserving life. The quality of life issue diminished upon the arrival of the child so why provide a decent life for the accidental overpopulation of modern mice. Mice do not require much cheese. Television makes good cheese. Rot your children's minds with good TV. Informational soft streaks feebly wend truthful sorrow.

It has been some time since our correspondence has fulfilled the promise of academic purism. The imperative model of life we were left with from the gear headed scoundrels left us with either collection or disposal problems. It has been over 6 months since my last good philosophical read. I was pondering three major writers in the early part of the year. First I delved in to Foucault's power and read it with gusto. Agreeing with every word does not make it philosophically pure. Yes Michelle yes you speak the truth. What if you ate snails would they be escargot. Second I picked up Rockaways America with emphasis on Ben Franklin and the early pioneers including Davy Crockett. I bet you wanted to know why my car was called Betsy. The car was not a woman to me Betsy was Davy Crockett's rifle. Davy ended up at the Alamo and well we remember it still. Lastly an old true friend recommended Spinoza.

Upon reading Spinoza (Tractus -Logicos-Philosophicos) I know now the nature of traveler law. What do we know of Spinoza? First we know his Lisbon roots his journey to Madrid and his final home in Amsterdam. He spoke Portuguese, Spanish and Dutch. His writing was in Latin for of the day written work knew only the Church in Rome. Spinoza knew that people championed the righteousness of God with such fervor that in some lands the crusades of death followed the Agnostic, Atheist or Jew. The written words sanctity led Spinoza to the discovery of the bible, specifically the prophets. Now keep reading because the analyst that Spinoza needed to justify his eviction from his beloved Iberia. What could possibly be in those books that you might chase out a great if not the best one? In Holland the phrase goes, "Live in your home until God takes you out of it." Now of course the Germans occasionally ask, "Does that mean me?" In today's terms the very goodness and fitness to live in a home shows the fear of the stranger in our land. Several aphorisms of Spinoza stand out in the text.

"People only obey law for fear of reprisal" In my research I have found that 99 out of 100 people believe this.

Secondly the stream of consciousness prophets in relation to modern visionary play out as follows.

The analyst presents that many of the prophets suffer delusions and can not be trusted. They cannot be trusted for the vague and creative embellishments of the mind lead to unjust conclusions based on aphorism number one. Delusional, entertaining and criminally prosecutorial, yet somehow the blessing of pen and scroll united for these prophets.

Take care with the medical community

Costume balling the yarn of nether limits warns lustful lyres. All the ghosts and goblins conceal the coalescing condescension. Limit the bedraggled creton. Hopeful hatted harlot hypes polyglot and peanut butter spreads for bread. Ok let us do the shape game today. In Boston and Tienemen we have the square. Square people love squares. Square food, square people, square deals. In some places the circle shows the center. Going round and round the circle no one really knows what side anyone rests on. In nature we have bodies of water. Lakes and rivers flow on their own accord. Negotiating the lakes and rivers we often use quick techniques not found in square places. The evidence of what happens filters in squarely but the spirit of the wild will never be ordered by the square. It sells papers though. The arc people and the work people know the value of the portal. The door reads in. The great designers new that great entrances and porticos impress any visitor even those that arrive in uniform. The order of the mind suggests the place must be seen in the manner befitting the great designers and builders. Arc du Triumph meets the Roman Collonades in a match at the Acropolis for the capacity to tolerate eyesores.

With new ideas come change. What will the cars of tomorrow look like? What will the new N.O.A.A. marine station port of call look like. Our wonderful sea life can support us, we just have to know how to swim. Picture a station about the size of 10 olympic swimming pools in a square configuration. (Circles for some) concentrically. In the marine -bio-park we well have entry portals and pods to perform analysis of the sea in question. Tourists welcome to enjoy the fruits of the fish farming program in the inner concentric tanks. Docking stations and gangways to follow.

Dolphin jumping zone please stand by. Happy fish, happy mammals, happy world. Open your checkbook this is not going to be cheap. That will prepare you for the land shark routine, we've got his uncle penned.

Happy Halloween everyone. Boy did my trick get a treat this year. All the ghosts and goblins we created on the work came out this week. First the supreme court questions it self. Ms. Miers by the way withdrew from contention for the seat. Next all of the United States of America came into question, what with the money supply going for candygrams and not new candy factories. Next the minor terrorist victory of installing security cameras in shopping malls became way to important. We should have just asked for a Hershey's kiss. Say treat next time.

The assumption that people behave rationally to serve the greater good failed. The great experiment into whether a loving nurturing approach to child rearing would lead to a society without crime failed. People behave rationally and fairly only when the fear of legal retribution stares them in the face. Loving nurturing people have always been rewarded for any action. The temptation of the foreign national with a few dollars soiled American life. America contained the best salesman the worlds ever known. When artificial limitations went in and the cost of capital went up the Brooklyn bridge as well as every other part of the former America went up for bids. Salesmen learned to sell the mall they did not own as well as the lives of the children that wanted to venture to the mall. "See this the security camera sends the loving mall rats photos back to a land of envy for perusal and final judgement." Should someone in the foreign land want the life, they use free travel kill the youth and take the life. And no one cared.

The Numbers don't lie. What started off as a personal web page blossomed into a mental conglomerate. Proving once and for all smart people aren't crazy they just have multi-faceted multi-dimensional personalities. What do we expect from political, business and entertainment leaders? People had high hopes for smart America. Wealth isn't smart its love. Smart psychologists, the American guru of the twentieth century tell us TV programming is the opiate of the masses use it. The informational machine that was television taught China how to defeat America and we did. Egg roll anyone. How do you kill, maim or steal from someone? Learn from network television. China and the rest of Americas hated adversaries

have learned we believe in the American dream, so they forward the position we should have an American nightmare.

The Message of what the court does and thinks matters. The setting of the agenda of what the court debates rests in the hands of the very few. Republican appointed justices review republican issues of law. What issues the court sees depend deeply on the courage of the executive branch to enforce security. The toothless court existed in the early 21st century when the United States lost WW III. What was Warm War III, well I'll tell you all of my stars in Hollywood got loved to death and the insensitive American government stood by while TV and film people were destroyed for opening up to the public.

What caused the initial foray against the American media of course was the full time embedded coverage of operation Iraqi freedom. I sat watching a world explode hoping and praying violent retaliation would not occur. I watched as buildings roads and bridges collapsed full of cars and people. I new many would live. I new many would find there way to the west. The coalition went after visible targets to show the power of the technical superiority of the "higher mind." The low tech bombs of slumming and sliming have been happening ever since. Packing public people with undesirables and being a bit more then rude show us that openness not xenophobia have led to a bit of a problem with public figures.

To some the technique of S&S happened to set the agenda for the supreme court. To others the ultimate end was the destruction of American courage. Stand strong America. Bill in the heartland supports peace.

The M1 money supply in relation to the service economy shows that chicken soup delivery provides more value then farm combines.

How much love can America buy with war and violence occurring daily with the axis of evil? The public policy of free trade conflicts with the policy of conflict. The price we pay for staying the course in Iraq limits the purchasing capital of high quality goods from abroad. With the purchase of every Mercedes-Benz or Sony tele vision we say morally the international community has a right to the American soul. The soul of the land depends

on the soul with the hand. Each click of a remote or turn of a wheel places the operator of a society in the land of the fabricator. This in and of itself parlays nothing but the judicial aspects of our lives. One dollar one vote.

Driving an auto today people learn to use the IPDA method for making driving decisions. Identify, predict, decide and act. 1960 - Ideals(Professors, Media), 1961 -Thinkers(lawyers), 1962 -Builders, 1963 - The Ways(Critics, Market Research). In today's world many different types of thinker live work and play in America. In terms you have five main choices. First and foremost to some are ideals. Any aspect of a life can be thought of as meeting an objective or ideal. Second come the thinkers, the pure reasoners of life. Can this thought in and of itself change the course of human events. Third come the builders, what must I do to make an impact with things. Along with the builders we have the feelers, the feelers amorphous as they might be bind with the social group they have become accustomed to. One might say they are accustomed to being with ideals, thinks or builds. The final bit of this simple puzzle are the ways. The ways no they must comment on the subtext, the overtones, the undercurrents the implications and the morality of all the previous groups have invented. Creativity abounds in all so decide for yourself where you live. Many people choose not to be thinkers. They live as operators of the world. The system isn't perfect but the operators must be guided as to HOW to take care of the world, not, why take care of it? We'll show you our generation if you show us yours.

Hi Mom. Anchors away in the chive garden. Smile through it all to win Ben Franklins love. It's all about the Benjamins the film states facts clearly. You can see the one hundred dollar bill shows the picture that we keep of a founding father who never became president, but still remains the ultimate icon of what government of the people provides for us.

Bruce loves movies. Bruce the attorney suggests The Client. The Bruce mobile M. Edition rolls with pedal coil technology. Bruce the president and champion of all things in the world knows that Bruce needs nothing but the finest in Bruce's stuff. Bruce, a real person with a real name knows hair. Bruce also knows clothing, cars and how much something's worth. Should you doubt Bruce, Bruce will remind you he IS Bruce and you are not. Vote for Bruce and find out your true value. You will find you are not Bruce and have no value. (To be Alana you feel this "intrinsicy") There are two kinds of people in this world, choosers and accepters. All

accepters would work and work for love and love each other accepter. Choosers accept no accepters. Choosers accept choosers only. Choosers battle over love. They need to know who made the choice. Choosers accept no sacrifice they accept no pain they accept only victory, what are you my love said the spider to the fly?

I have smart readers. Everyone who reads this stuff smarts around like its nobodies business. Let me apologize to my children and supporters by saying, "I am not the President of the United States" I act like it I guess being real smart about stuff but being president involves much more than being smart. In the picture you can tell I was brain. That's what people wanted to know, what part of the body does he use? He uses his Brain . To eat he has to use his brain. To sleep he has to use his brain. To make children he has to use his brain. Brain people have heart of course but we were selected to be leaders and thinkers. Some jealous people say to me prove you're a president. I've tried to prove this but I still wind up proving I'm Bill not George. That's just how it is. I'm going to say we here... We love when Texas gives us big up here. In Texas we love when we give big there are just so many of you. Brains have a lot of hat. Thanks Mr. President. We could use some cattle. No bull.

Love and kisses from all of us to all of you.

Why do people live where they do? To some the question appears juvenile. Much like the question, "Why is the sky blue." The government believes people move where the opportunities lay. Laying an egg here seems just as easy as laying an egg there. The style of life people in California say. People with reason say live in an intelligent place. What makes an intelligent place? Good food, fine homes, fresh water and good power, that's what makes an intelligent place. Car trip games, "Person, Place or Thing" "Bizz, Buzz, Bang" Bizz on three Buzz on 7 Bang on 8 by way of counting and word replacement. "Who cares" "Animal, Vegetable or Mineral" and the latest Florida special, "What was your Whine again" LTD blew a gasket in Poughkeepsie she said. OK, distractions aside, the place was the USA, It was Buzz for luck and Automobile was the thing. Did you get all those? So Tina wants what Amy has only sideways. This excites Dave to no end, but wants to know if this is well. Tina accepts and the pelicans and seagulls live happily ever after working in harmony with Arnolds new de-salinization system, a hybrid system for fresh water by the ocean. Wow. Those plant people, no not botanist, GM factory workers

want to crank out fuel cell vehicles for clean air in California but they will need hydrogen from plants much like Arnold is building in California to make California an intelligent place as well as stylish. Stylish places are fun to visit but there is no place like home. Golden Hours Ranch,

The blonde feels religious places were not mentioned to avoid holy war technological bureaucratic bible reshuffling resettlement issues.

Yesterday we looked at the Tina -Amy paradox. Today we focus on the men. Men have appetites for many things. Bills realize a balanced diet is important, so they eat meat for one week, potatoes for one week and vegetables for one week, desert when offered, ooops someone just removed the fruit cup, so be it. Robert, Bob to you and me will never stand for such a thing, they all work over at the FDA. Roberts love procedure so that each one can know how much of the meal they will be apportioned. Plain and simple Roberts dole out the American pie. You cannot find a politically incorrect Robert, that's why they do not win elections. Politically expedient prisoners live at the mercy of the politician. Now Georges love the land and the people, Abe's rule it and Williams justify it. Join the team and let those that make the meal make the meal and let Bob dole out how much for all.

Wealthy women deserve children. For years men have been seeding about like sorry sot kings. In today's world through the cryogen 9000 test tube baby system women can seed every bit as well as men. Let me reveal the American plan. On the left we have Tina Fey. The Tina model flies below the radar lurking always saying no based on information gathered in early years. She has a very able bottom and can sit for hours on end saying no. She will never perform a function in life and at present the army has 200,000 of them. Amy's boyfriend went to Michigan. Now here at update we know that Tina's feed themselves and are very self reliant once the cupboard is stocked. The mission of stocking falls on ...Tina herself. Each move laboriously measured, each aisle watched for weeks on end for the time of the ultimate steal. Amy's response, "Just use room service." Now for protection during the war Tina's girls, the in vitro method produced these 200,000 so we know that the first response would be shoot first take names later, brilliant. Worst case smile at the boy enemy and convince him you care about his well being. Tina's hate to give up the fifty bucks. Amy says, "Why isn't it the one hundred?" Now for fishing the Tina's all know the Amy "from the women's movement." Amy's pleased. Bills pleased. The cunning hunter and the dangerous lure in this game of go fish. I

preferred gin. So did Tina. Amy it's a card game not a drink from the mini-bar.

Now how does Jodie Foster know my secret telephone number?
Dueling mentalists for the hearts of young woman of child bearing years.

The dangerous aspect of Tina becomes what to do with the gold. Gold knows gold and relies on the mentalist. The physicalist Alan labels the Gold as Physical -Mentals, whilst reserving the Mental -Physical card for Tina. Obvious as this sounds, Tina does love her cheese whiz® a product that serves the physical need with the caveat that the fun (The foolish gold chimes in love here) in it rests in saying "Whiz." Say "Whiz, S.D.P. Van Masten" Listen Pete Van Masten we have other defenses, such as: u ses this to get this

or

Now who are you going to call in a must walrus situation?

The foolish remember the previous discussion on home schooling with regards to self preservation in regards to an equal society. When you choose to star and the fool says you must snake your way to stardom the mentalist relies on your flower protection ladies. The snake knows value lays in the venom while the bee knows the value lays in the honey. Would you love me to butter your muffin honey? Note that apple blossoms attract bees which fertilize the apple buds producing apples which you may use to present to your teacher as a show of respect. Thank a teacher not the security guard! Write submissions to Margaret Warner, The News Hour on Public Television. Please request the Mr. Science milk separation program. Let us all promote the W.A.S.H or for further review of defense click PSDL

Animal Stories shows how our lives work. I was going to say children but we wrote so please read the whole thing.

What ails the American spirit? A topic rhetorical question for those who believe rhetoric leads to wisdom. The American informational mind, perfected in the year 2000 showed us that Wisdom need be used with our

perfect information. Important people keep records of their life. Enron executives kept records of how they were stealing from Americans pension fund. The security cameras record every move every important makes every step of their life. The novel reads thin on both of them. Simply put to the nominees the American collection engine needs function flawlessly. Wealth and power exist to collect from the poor and downtrodden. Sorry sots stay out of Washington D.C. The 21st century accepts no poor. Along with collecting currency comes collecting, not saving souls. So what do you want from a supreme court? Sense pervades the ordered world, but not the quick buck foul business of Washington politics. The court finds law enforcement and the military the bane of civilization. Who do they hope to call when the janitor takes the court computer home for a spin? These egomaniacal pricks live on callous foul scum sucking weasels for support. Let me give you an example; every four years the former United States held elections. The citizenry wanted campaign finance reform so the riche couldn't by an election. The White House perquisites entice so boldly that the first Israeli or Frenchman with 500,000,000 purchases the presidents public policy. This debtor country owes its soul to international labor. Have a nice inauguration party judge.

Have you ever felt like a card shark in the game of life? Each person you meet seems to represent some magic high low place. Well America loves cards and sharks. Las Vegas and the Luxor (I couldn't spell Ballagio) can attest to this. Every university seems to advertise how many states and how many countries represent themselves in the academic mix. Which card revealing will show the stiff ace? Which card will show the joker? What card does the professor carry? How many professors allow these card sharks to steal an education? What do you want to do here? Every university simply teaches, "How do you do?" A simple question for simple students. Did you dot your "eye" on question two? Have at you man, I explained that the dot was superfluous for government work and that grad school needs my Tommy Hilfiger.

So we were talking at shark hall about equality and affirmative action and we felt the United States in the "oughts" should open up its television wonder to the African American Cindy Brady. Now tattletails have always been with us but those braids and jumping rope should make her a big hit. Marcia, Marcia Marcia young Jan explained did you goop my Jeri Curl. Peter you so syncopated Greg never should have joined the rap

band. Its just the clocks fit around his neck so cool. With Sherwood Schwarz-Washington at the helm you know white people will cringe and say a white man said Jeri Curl do you feel we should get a security system? Higher wink. Bobby said lower in case you wondered.

Epilogue: What makes this a blended family? Pictured Marcia, Florence, Greg, Jan, Alice, Peter, Cindy, Robert and Bobby.

Entertainment: Odd couples happen so we feel the author of this work needs his due.

So anyway we all go on Ellen's show and I do my multi-dimensional TV thing. Hillarity ensues and its another six days seven nights. Notice at the end of Six Days Seven Nights. Anna Heche your Dutch card Wink turns away from Harrison Fords bedside the WRONG way. Well that's just unforgivable. Much like Greggory Kinnear not eating breakfast in As Good As it Gets.

Ok so yesterday we laid out the forest as if it were a watering hole in the Styx. Today we tell you how it is. Every dog has his day meat. I say she's the cats meow. Should bird brain take out lefty, Rosies got it covered. The palmers all know the stiff kink and I got deuces wild coming out my ear. High low ace no face and pajamas silked his ice. Whatever goose just dealem. Ok ears its follow the lady moriah double with em-phasis like she said. Ok mutt boy lick the s tick and kiss the bunny between the ears. Enough of you rub tummy for luck. Got any pepperoni stick left. Yea like your breath doesn't stink either garbage nose. So what if it does, this pots to rich for me to walk away. Because you can Rex, because you can. Atta girl.

Let us make this perfectly clear, life's forest contains many creatures. Each real place in life shows us real creatures. Today one individual felt like being a giant tortoise. Know tortoisng takes some know how. Lions and jaguars know they are important. Leopards and bears know they are important. What makes that shell so special? I bet the meaty parts not so tasty. Each elephant knows the marking on the tortoise. Each mouse knows its fun. But those big old cats mistake turtle soup for mouse every time. Were going swimming. Take that cat.

Now the birds look down from the sky and see the water and the reflection pleases them. The flamingoes and the swans each to her side. The faith of flying feathers rings true to us. Peck at the worm you. I might need mine to fish with. Shark had me once, left a mark for a while but starfish patched me right up. That's faith for you. She's got clams and really shows her pearls. But we just knew those tentacles of fate wanted to read religion on our shell and not believe our faith. Take care everybody.

Now as it happens horses and apes (great and otherwise) love the water too. You can lead both of them there but they don't seem to do anything but ask you why you wait here all the time. Imitation being the sincerest form of flattery, just give up some sugar or a bit of your apple and then suddenly a tall drink looks real good. Oh there goes the armadillo. That's one heavily armed rodent. Rats think they have this but watch for the good cheese. Edam all up I bet. Misty eyed the gorilla cried, "Get off my mountain" Goat new but he'd been had. Go team. That's she'd been had. How were we supposed to know? Hopefully furry godmother will bring in mother earth and settle this thing. Hey turn on the "Foz" Flat Screen "Foz" Turn me on.

People say war presupposes an ideal. Let America have an ideal. With tongue firmly placed in cheek, we say colonialism, get used to it. Now before you say America is some bully, the world loves America and people fly from all over the world to get here. What does a colony from the United States look like? We want a store and an embassy in every country of the world. We have opened our ports with loving arms and change leaders every few years. Why not let these countries see our local leaders and let them know we have people just like you, not just George W. Bush. We do not grow cold to ourselves off of United States soil. Other folks want to be the President so we make stuff up to make believe we are cold. We are not cold. Our country is not cold and our colonies will not be cold. You can in these lands look at our ambassadors and realize we have someone from everywhere here in the United States of America. Try your ambassador to the United States for influence with the United States government and her soldiers. Thanks to you America works, so be good to us.

Use your dream machine my dream said to me this lazy Sunday afternoon. Three dream machines are required where we live. First we have

the television. We use television to love and dream. We used to feel that television informed. We do not want to be informed anymore. The information makes for bad dreams and very little love. We have shifted to a new way, while still catching our favorite shows. We put music on in the background and see the new expressions on the modern flat screen driver. We love soft things so we put that read, you know information can be important to making a living, (or saving your hide). Suffice it to say the better life can be had through a loving dreamer flat screen driver interfacing character (Max headroom anyone). Oh and by the way turn on the FSDIC. (Flat Screen Driving Interfacing Character) for a loving dream you can see. TV, Computer, DVD -Player, TiVo recorder and dream well. Don't forget the radio on your FSDIC. Hey everybody turn on your "Foz". Over to you Allison.

For those who feel politics and the man are theater appeal and the following to the pundits notes:

Quick pundits note:

No more terrorist attacks on our soil.

Revenge should be cold, if, we take out the torturer, the messenger and media can continue. If not we sit in our peasant shacks waiting for the next cruelty. The piece bears no resemblance to satire and will not show chagrin. Those days are done.

It has come to my attention that the academic community in an effort to help the war effort produced time honored torture tests for removing capital from the venomous. The sting of the academic sword shows the world that filth rears the head when the motivation of academic life fails. The tortures involve degradation of body, mind, spirit and soul. Reversing qualities in and of a being torment the mind, elimination and denial kill the soul. Pains and sleeplessness kill the body. The knowledge that torture and torment exist do not kill their use.

Methodologies for analysis and methodologies for production and synthesis require similar lines of reasoning. To dictate that what should be in the mind denies what was placed in the mind before the placing of the required. The building blocks of language and the first words associated with each individual letter show us that those trained in and of a place will know, A is for apple. The positive association with the A and the apple

showed through in the love for the teacher. The apple polisher, the gifted pupil produced the apple and garnered the A letter grade. Those with religious intentions point out that the snake in Eden who tempted Eve with the apple from the Tree of Knowledge lie to achieve that which what the knowledge was intended for. What foundations can change that which is prized? Rhetorically we know the attention in a society pays those who possess either beauty or brains. In a great society many believe that specialization can produce both beautiful and smart people. The attention and competition drive the society towards a precipice. Either society accepts that all must be loved completely and entirely for the aforementioned qualities or the battle that ensues destroys blessed souls and tortures the beautiful ugly. The strong need not attention. The horse requires not the apple or the rider.

Quiz:

Beauty Means:

a. The figure b. The face c. The hair and eyes d. The total package

Smart Means:

a. The ability to acquire capital b. The ability to manipulate c. The ability to arrange d. The ability to memorize e. The ability to control

Strong Means:

a. The ability to function without God b. The ability to function without Love
c. The ability to lift great weights d. The ability to leap great bounds e. The ability to forego food

Leader Means

a. Fool b. Indoctrinator c. Initiator d. Popularly emulate d. Rich

Desire comes from

a. The Stomach b. The heart c. The Mind d. The Liver

The hearts elitism, racism, separatism and mistrust do not constitute crime to the regular person. The slander, liable and malicious destruction of person and property do. The Auto-Focus infrared through the wall spy cameras should be considered an assault with a deadly weapon, a felony. Cameras do not kill people. People kill people. Machines become willful abettors to an unsuspecting dupe. English, Dutch, Danish, Swedish, German, French, Russian and Israeli Jewish liberal intellectuals rule. We always have. Perhaps "Yes" should be spoken to us.

Certainly apologies to your guest are welcome. That you might not involve yourself in things you know little of. A little screen smile has gone to far in your Mickey Mouse Ears (All rights reserved). Each one, one of a kind. You could be nicer.

Bye.

In remembering our days in Boston I thought I should write out a more complete response to omnipresent and one sided computing success stories. The plan that the H in Harvard stands for Harm is of course still in effect. Do you have enough of the goods to halt production, import and export, close the harbour, take Boeings Attack aircraft and Hold the Northwest. Fighting inside everyday to lash out in the rest of the land most likely will not happen in the Northwest. The Harvard Harmers look to you to make a bold flipping gesture with one of your fingers. Farewell Northwest. It has been a pleasure learning every aspect for 20 years of a life that can and is destroyed by young painties in a bunch or boys trying to rip off those panties in a bunch. You know Skull and Crossbones involved to much marauding as to opposed to blatant but fair malevolence.

Bad goes in. Bad comes out. Garbage goes in and garbage comes out. Free trade issues and fears that crop up during times of trouble, whereby that which has been produced is faught over. The quote of the year,

“ If you don't have it by now you don't have it”

Mornings analysis of what developments in...(Obnoxious professor bites on the hook here, back soon.) It remains parenthetical.

He should be dead, but he is not. Nights in dangerous cities, car crashes, overdose on pills all put my life in peril. It is October now, and the fall air has returned. The summer air led to stagnation but he is alive. Depakote, Risperidal, Cogenten and Inderal race through my system keeping me level. Mania keeps me running to the doctor. He should be dead but he is not.

He was born in Chicago in 1963. In 1967 the family moved to the suburbs. The home was modest but it had plenty of room for the three children. Peter the big brother Dan the baby and the subject in the middle wrestled for supremacy. His father loved classical music, which tends to make him feel like a king, and frankly the family treated him as such. Mom tended kids and furthered herself with degrees in Women Studies and Law. Education was made a priority in our home. Dad earned his Ph.D. when we were little and opened the way for his professorship later in life. Churchill School was a progressive place in the sixties and seventies. He was part of an open classroom experiment in the third grade. A pre-teen sophistication developed and the children developed a pecking order with their intelligence. He began hearing voices in this year. The voices made him believe in God. But like any belief in God comes the belief in the Underworld.

The early childhood troubles ended with the advent of a superhero Mr. X. Mr. X was reported as his defender who staved off the angels and devils fighting for his soul. He was relieved, and my schoolwork improved. The story picks up in the adolescent years. He began to believe he could talk to God and God understood. He then began to believe that everyone could communicate by just using the mind. Not only could people communicate with their minds they could steal psychic tools from him. The world seemed to revolve around him. School was relatively easy and he kept up a good grade point average. Again the trouble abated and he returned to normal activities like photography and sports (baseball and soccer).

After learning to drive, he began to experiment with Marijuana. He smoked at concerts and parties. He had taken a job at a shoe store and he was invited to a party with the staff. Not having much experience with drugs and alcohol he got drunk and high and attempted to drive. So as you can guess he smashed the Subaru and then left the scene of the crime. His

folks were easy on him,. Just fix the car is all they said. He paid the victim and fixed the car that's the end of the story.

Michigan was the next stop. He attended the University of Michigan after high school. He selected Engineering as his major. The major was definitely practical in those days. he began well and partied on the weekends. The workload was incredible and he began to struggle like never before. The more he struggled the more he began to abuse drugs and alcohol. One Halloween he dressed like a psycho and considered it a success that he had three drugs in the old system. He staggered home alive, crashed and anticipated the hangover that was sure to follow. Crazy days in Ann Arbor included alcohol, marijuana, tobacco, mushrooms and acid. He went on academic probation and began to worry. He took fewer hours and improved his GPA.

Boom graduation and he shouted aloud, "Wake Up"

The space shuttle crashes and I find a job. The job teaches me responsibility and judgement. He worked for two years at this job and then feeling grandiose he found a job with higher pay. His girl friend from college comes to live in Chicago and the twenties feel great. He says he will never marry her but maintains rapport. He breaks up several times but they always get back together. At 26 he is struck with Manic Depression a condition that affects millions. Angels and Devils dance in his head. He loses the balance that had held him together. The God complex returns and he is paralyzed from doing the basic necessities of living. After weeks of struggle he was taken to the hospital psychiatric ward for evaluation. The struggle with the prescription drugs haunts him. The stigma of a lost life worries. The therapy is what they call reality based and leaves him with a vague suicidal depression. Once the right medication is found he comes around and find another computer programming job. The thing about being bipolar the up time is very seductive. Mystical powers and different worldviews elevate the patient. Two years later he stopped taking the medicines and he wound up naked outside my apartment. The police put him in the paddy wagon and drove him back to the hospital. This time wasn't so bad because he knew the routine.

His hands shake from being medicated. He tires frequently because of the medicines. It feels like you are missing out on something when you are on medicines. Everyone takes something they say. Three years later he stopped taking the pills and he drove to Michigan for no apparent reason. The voices in his head panic him so he stops and finds a hotel room. He finds himself haunted and drives out of the hotel, parks and throws away his car keys. He begins to walk and after three days finds himself at a doorstep looking for help. The owner called the police and I get arrested. The jail turned me over to a psychiatric hospital for a one-month stay. The stay was relatively painless and the fine was only 70 dollars. After the Michigan hospital he was forced to a Chicago hospital for another month.

Two years later he stopped taking medication and he began to cycle manic. He is so worked up reports feeling the attraction to California. He gets evicted so he gets in his car and drives to the coast. Somewhere in California he is pulled over for speeding. He fears the officer so he drive away at a high rate of speed. After a reckless drive he sped off the road, flipping the car. He unbuckle himself falling on his head, get out and say, "Stop, don't shoot". This fiasco cost him 6-months in the Atascadero state hospital.

He should be dead, but he is not. The new medicine, Risperidal has been a help and medical care finds value..

In today's world many different types of thinker live work and play in America. In terms you have five main choices. First and foremost to some are ideals. Any aspect of a life can be thought of as meeting an objective or ideal. Second come the thinkers, the pure reasoners of life. Can this thought in and of itself change the course of human events. Third come the builders, what must I do to make an impact with things. Along with the builders we have the feelers, the feelers amorphous as they might be bind with the social group they have become accustomed to. One might say they are accustomed to being with ideals, thinks or builds. The final bit of this simple puzzle are the ways. The ways no they must comment on the subtext, the overtones, the undercurrents the implications and the morality

of all the previous groups have invented. Creativity abounds in all so decide for yourself where you live. Many people choose not to be thinkers. They live as operators of the world. The system isn't perfect but the operators must be guided as to HOW to take care of the world, not, why take care of it?

The idols in the journalistic field included William Safire, William Buckley and Mike Royko. The vocabulary makes the man. The turning of a phrase satisfies in sound. The rhetoric that fills the corridors of power echo through the minds of the well read. I hope this quill never silences or becomes silent what with all that goes on in both a real and virtual world. The virtual world needs voices that can interpret and share what reveals itself in a given location. Second sourcing and grid coupling (Read the crosstown) can provide a gracious gesture in the effluvious world. All politics are local to us here on the work. That may be true in the virtual world but not here screams the non-grid couple second source negator. The issue made clear in developing a work first and foremost is local justice provides local peace. The local tenacity of vision and scream level to a man who would change television staggers. Leave it to the reader to justify weather a man can see and say or merely type. Thanks for reading and we hope you enjoy the work.

Why Iraq? Why now? Gas costs too much. Abrams A1M1 Tanks get 1/2 mpg should we continue to support oil for food or should we nationalize Iraqi interests and bring the rule of law vis a vis Britain circa 1645? Establishing law of constitution requires the constitution of a people, but whose people. The west invades and declares write a constitution. Iraq is a man first society. It never was the government of Iraq it was Saddam. Glorified in pictures throughout the land the benevolent dictator ruled. When the U.S. and the U.K. took control three weeks into Iraqi freedom no call was made to fly two flags as the Europeans and Russian Eurasians do. Instead photos of Mr. Bush were elevated as if all Americans looked, talked and acted like the President. Symbols through all media can be loved and

adored. Men have falabilities, symbols and constitutions are not. Live free or die.

University Classes Begin

Security on campus enters the consciousness every year and this year in the 21st century affords us the luxury of using the technology that evolution post revolutionary concepts have provided us. Briefly noted an ID card can be used to collect valuable currency from a bank so let us use such a card in campus life for entering and exiting our structures. A display to say welcome with directions and notations as to moved lecture halls or absent professors would be seen as a warm guidepost not a menacing intrusion in our lives. The memo board lives on eMail lives on however a console on entry and exit with the swipe of a card can identify if only to ourselves where we are and where we can be found. A message such as meet for study group could be entered without fear the neighbor will erase it with the beer party note. The converse may also be true I assume. The cost in relation to tuition leads me to the conclusion that even with the student laptop the university can contribute to student life. As offices become this way, they too may make the leap and improve the quality of life for all of us.

Back to School Rhetoric 101

The problem facing America today exists solely in education. Specifically in unaccredited home school programs, academics play a back seat to economic and physical survival. What sort of revolutionary politics do these monsters cook up that not even a friend or teacher can look the youth in the eye? Every student, home schooled or not, should have the right to look at a countryman his or her senior in the eye and express fully what needs to be changed. Ahhhhh the reminder:

"Where is the interplay in the following if home schooled."

Race
Religion
Country
Generation
Sex

Who teaches the value of each I tell myself. Where is the synthesis and the symbiosis. Home schoolers be darned (no one race, religion country, generation or sex has a monopoly on this), I know the people who get it. Got it. Good. Thank a teacher.

One last gripe class...home school can only teach what something might be not what it is. It screams to the rest of the world do not change so I can negate and false you. Thanks for reading.

Peoples Alliance a brief chart.

Provide Secure Defence (PSDL)

On rough seas its good to
now you have a good ship

Provide Put some of yourself forward and reward those around you with the sustenance and substance of life

Secure Secure your home with love and togetherness and the searching pain that others have more will fade. Watch the door and the street corner. Report suspicious activity! Use no to loving requests for information in an office, regardless of look!

Defense Lock your doors, fasten your seatbelts, know the entries and exits to situations, keep an internal inventory of mental and physical notes.

Love True and Truthful

All are welcome that subscribe

People united can promote harrmony.

Womens Alliance to Save Humanity -Ms. Betsy Ross

Mission Statement:

To further the causes of peace, humanity and understanding between those that have the good nature of loving people. The defense of love does not involve torturing souls.

Team 1:

Correction Methodologies:

Love dissociation and work encouragement. Suggestions welcome.

The friendship on earth relied on breaking the bread and passing the wine. The location of the party mattered for holding onto the future game of monopoly.

The number one credo depends on dominance of one form over another. The virtuosity of a society of winners dances on the stage of greed.

With religion dead the psycho-sexual self gratification hedonist composite relies on disposability for furthering cruelty.

The cruel joke daunted the wise and fundamentalist eternally. The wise fool dominates the transitory stage on the patterned and coasted earth. Toasting the war presages the battle of determinism on the prize.

The capitalist pig wants every single scrap of paper issued not realizing the exchange of them creates the command form use of them.

In the end the future belongs to the dominant cruel.

The man that cooks breakfast in a restaurant does this for the capitalist ideal that the skillet earns him a way with clothing and entertainment.

In dominance and cruel he eats his own breakfast and throws you some cold poisoned gruel.

Harvard rocks!

Cool jaybird sat on the bath meant for just such creatures. The Blue Jay and Brown Jay chirp and sing the Cardinal correction for the Pelican eating religious fish.

Watching one Blue Jay in a room of Brown Jays the honest judge of what happens needs to pop on the electronic mirror to show the true enhancement.

The Cardinal warns of approaching danger from either the mother or father bear.

Super squirrel saved the day yesterday from the attacking cruel people. The radar nailed all the big ones. Squirrel slipped out and created the diversion to save the system.

The president herself handed out the Medals of Honor and shire survived another day. To think a squirrel could save the large golden nut excites the bunnies that seek Elmer Fudds' carrot to the point of seeking Michigan fudge.

Literacy Rate
Jobs Illiterate People Do

W2 Forms The Government Sends Out	"36,000,000"	15.0%	of

US Population of Working Age	"240,000,000"		Withheld
ABA Members 2008	"240,000"	0.250%	Take more then 4
cases			
ABA Members with 4 or more cases 2008		600	

Most Americans then must work on
contract such as

Prostitution Consultant
 Sexual Surregate
 International Terror recipient consultant

It works out that half of the population steals hell from others. Hell being the work product.

Two issues

Bob B works and Bobbie C takes the work product as a consumer?
 Yes and it works out for most folks.

That PPI number needs more work.

Producer Price Index

The Michigan Index Sub Section analysis and data collection needs review.

The M1 money supply check.

3 Trillion Notes produces a 12 Trillion dollar economy.

The Paper Mill Fact ories need U.S. coverage full time. Who makes paper of U.S. quality in the world. How does Europe buy paper from the U.S?

Recommendation: Depend a gated community with full U.S. treasury backing on fingerprint payment methods linked to the mad e up Zunes point system. They may be called "credits" or something in email ".i" just don't know about.

Is there any money in stealing these keystrokes?

No

Then why do you do this?

So that kids can learn to take notes from warrior prince like persons

After the notes get taken what happens?

The kings of Europe can decide on the nobility of the node warrior?
 The noble or lack of nobility leads to what?
 The finding of crow produces

First let the owner and operator of this transmission machine along with the peoples that sanctioned these communications as “Royal Edicts” punish you with the full weight of the royal thrones of the world.

This machine owned by the people of the “Cunningly Simple Kingdom” will not be destroyed by Ratt Bastards henchmen in finding these words controversially cookie.

The first CSK law of evaluation in terms of truth deceives the lord that punishes the non-blessed royal watcher watching.

Should the finding of taste and distinction in nature prove successful the nature of the paltry sums tidies the thin pockets on the deep natured billing clerk.

The billing clerk allowed the disburser to send throngs to find out the nature of honest clerking from those that suggest so often the clerk himself could commit financial crime.

Through the looking glass Alice found herself with the bunny. The furry and soft bunny felt so good Alice hugged her for three days. The bunny needed food and died in Alice’s arms. Alice felt good and went through the looking glass and found Pete Rabbit and snatched him by the ears and said you told her the bunny always felt soft and would be good to you forever. Peter Rabbit grew quick and rear pawed Alice away for the moment and went into the briar patch for a moment.

The briar patch felt the same only old owl put some birds to say things to rabbits about the cat only privileges in the patch. Peter knew at least the old hound dogs could never find him in his head, what with Alice’s looking glass to distract them they would just get thirsty or something and leave Peter alone.

====

Bill Melayta
The Characters

Ratt Bastard	The Chicken
The Fink	Dan Squirleone
Steve	Colonel Sanders
Isabella Lectuna	Bill Melayta
Whiny Gasbag	The Play

Bill Melayta: So did you hear Ratt Bastard went to visit The Chicken without The Fink knowing it.?

Dan Squirleone: (with shrug)

It doesn't supprise me.

(To the Chicken)

Ratt Bastard:

"Bill's mother is about to die and I would like to offer you 10,000 pazoozas to fix things."

The Chicken:

"Hello Ratt Bastard. How are you?"

Ratt Bastard:

"I am fine, you know with the oozing puss and the bags of stuff hanging off. The tubes, wires, maskes and things it looks like some fine torture for the old Whiny Gasbag."

The Chicken:

"That's to bad for you but yes, did you mention something about pazoozas?"

Ratt Bastard:

"Yes Bill Melayta did not pay for anything even though he had been Billed in life. All he does is wait for death and a check so you as a fine attorney and citizen can spend some of the 10,000 so no one can send a Bill he can't repay."

The Chicken:

“Consider it done sir.”

Narrator:

And so it went until Colonel Sanders called asking for the secret paper for the recipe to cook The Chicken. The Colonel at first just wanted Ratt Bastards stash of cash but with The Fink on the loose he couldn't get the squirrelione girls out of the picture so he waited...patiently until the war hit.

Slavery produces goods and services the economy needs.

The Chinese use slave labor to provide the wealthy with everything available in the west.

The Jews in Egypt produced the pyramids and provided the slave labor for Pharaoh's pyramids.

The American used African tribal prisoners to harvest cotton and food since the colonial times.

Labor saving machines and technology do the work of slaves in most industrial nations.

The Europeans use mental style slaving to eliminate a weaker physical morality.

Woman held as chattel until 1923 worked for no wages and could not vote.

To be chattel, a term meaning the property of another you may not earn wages or hold property.

I live without the use of cocaine. At the age of 21, on my 21st birthday a pusher gave me a “free packet” of cocaine. It was used by Greg

and myself. The film will show use of the drug. I did what I call and evaluation. I said to no one in particular, "I can see why people do this." Not with excitement but as a scientist the view of cocaine use looks like something to an artistic and judicial eye. It also takes a lot of money and the pusher had the campus nailed down and would not have permitted dealing so using it on my college funds was out of the question.

I graduated college and with a few looks at the pusher and user community I just forgot people continued on with the lifestyle.

Cocaine is big business. Cocaine makes people do things that people that do not do cocaine feel is immoral. Having been bitten once and trying it the morality issue and call is out of the question on actual use of the drug.

The insensitive and cold treatment to Engineers, Workers, Doctors and Business People who choose to care correctly troubles me at this age.

So the pusher went technical and I can't help but flow out some Pseudo-Code for the callous disregard the man seems to have laid out for the future.

NOT THE PLAN A LOOK AT THE PUSHERS COLLEGE GRADUATION IDEA FORMALIZED.

Do you have a loaf of sliced bread? (Not an odd collection of slices)
Ham Sandwich, Toast Dry, Toast Peanut Butter, French Toast

If America were a loaf would it be sliced?
How do Americans eat bread?

The death of the middle class, as a concept troubles many who feel they live in the middle class.

Many defined the class structure in the United States as poor, middle class and wealthy. Others add upper middle class to the list.

The middle class defined involves an income to a household every year that triples the investment income. For example if you earned \$50,000 at work you could have earned up to $\$50,000/3 = \$16,667$ to be considered living a middle class. To earn that 16,667 at a decent interest rate per year you would have around \$200,000 invested at a decent interest rate. (around reads brown to suburbs)

The middle class never could “live on interest” to survive. To live on interest bank interests use funds to load money and return the invested proceeds to the rich investment player. The person living on interest provides no labor input but does provide valuable capital input to the system.

In a world that presents the hard working dedicated worker overseas an opportunity to produce cars, computer memory, televisions and microwave ovens the society notices no noticeable difference in product availability.

The poor never could afford everything. The middle class struggled to work with the wealthy to obtain this new found panacea in life.

The growth rate in real terms beginning under Reagan and continuing through Bush created the best housing in the world with the finest computers and cars the country ever knew.

The purpose of life question creates an economy of solutions including drug use, alcoholism and boredom. Those that do not seek out life tend towards a disillusioned passivity that refuses to invest modestly time and effort to assist some of the social ills of the poor who fall through the large corporate and government cracks.

With the elimination of the poor and middle class in the United States the impoverished nations of the world send thousands of people each day to live in the United States. Reports on missing and dead Americans appears to match the number of these impoverished immigrants. Actuarial reports in cities will tell you of the vanishing casual American style middle class family piling in the car and going into Manhattan, L.A. and Chicago. The Disney theme parks do business only the family car with the family now look like a corporate outing with young Steve taking the lead role in the Roller-Coaster demonstration team with Laura studying the magic castle Snow White for authenticity.

The wealthy middle class act much as the middle class in the past in terms of who travels on the local roads. Workers and the wealthy middle class do not mix, everyone agrees on this. Everyone in the United States that lives a middle class life now states the middle class does not need to work.

“So I have a niece, She is in the army.

She calls girls to see if they will “take my life.”

In this part of Chicago it means make him dead.

She does stress he is not to be killed.

The words they hear are to be killed. Words like NOT translate much different in the ethnic neighborhoods here.

The smile is nice for people. The promise of great things from the sky is also nice. Some people were paid and we thank you.

The “taking of a life” from our American stationed in Israel must cease.

The desire to have all American males dead upstairs works for me. It is thought you can be “dead inside your life.” And “dead outside on the street.”

If you keep paying to kill someone upstairs the bull inside realizes by force he is stuck with the “name” on the door.

To be dead inside and upstairs no one calls you by your name.

Its not that someone calls your name with cold that will kill you.

So anyway her Israeli spy hates the guy in here. I mean at first it is OK but being from Israel they think they can stay 100 years to do something a native speaker would say

- 1) he is fine and go away knowing the guys “a stitch”
- 2) he fine and “not playing kids games with her.”
- 3) He says things people say to tell you. “You have no place in his life but he is being to clever so you don’t take away his writing creativity.” (He wrote me that comes into native speakers minds)
- 4) Statements like, “Get off my back” produce pains in the back that seem to stem from plate x-ray machines in the ceiling and floor

In the new way people must express themselves in the simplest way possible. The end result it seems would have been thought of before the expression. The delving into the imperative produces unnecessary conflict in a male’s life. Her bi -polar disorder worsens everyday. Her bi -sexuality defines her clearly. Educational ability for remembrances of semantics, displays disregard for violently unstable behavior.

Day 1: The students take the teachers photo

Day 2: The students post informati on about the teacher on the slam website

Day 3: The student gets names of drug users, potential mates and athletes

Day 4: The females have been deciding on the entire life of every male on the list.

Day 5: The volleyball team is selected to defend nationalism and patriotism issues

Day 6: In home monitors get selected by the volleyball team and the females for male bashing and male use in the community.

Day 7: Entrapping plans get set to produce criminal minds in morally straight non-nationalistic people.

Day 8: The Volleyball Team and Monitors act just real to nice to mess with to the boys who have been up all night trying to convince the woman on the lap-top how there way works. The lap top had the volume off and was looking at a nude photo.

Day 9: Since it is nice the boys don't mess with anger, they accept love only to not get sexual release with anyone live, they get more electronic contact and who do you like. They are probed on "which men and boys, they like"

Day 10: The wealthy supervisor gets the files on the boys and the girls get the \$12,000 each to have in an account forever and the promise of a car when the boys go off to college or the military.

Day 11: The women concern themselves only with bathroom and social issues.

Day 12: The teacher gets flirted with and the girls all finish top ten percent of the school.

Day 13: The girls put out information that "everyone has everything" and no one should work and produce something.

Day 14: Some crazy Jew says this is a damning indictment to an Irishmen and they make some war with the boys to do something. The girls love this as no Jew or Irishmen seems to know what they are looking at when they question the female.

He was never rich or poor. He ate great food as a kid. He could be a hot dog sometimes and He could be quiet. People hate him they say. The next word caused all the trouble. Politics.

As a young person he was very shy. He wanted to see people and go away like an elf.

People wanted more from him then he could deliver. Politics takes a person that can agree to say correct things they might not believe. Since he did not know what to say about the honest answer he developed an interest in the political response and posturing.

People hate him they say. He sat down to say the world should have...International Relations and the world eSpits on me. I did not personally give up civil behavior with the world. His associates may have given up civility because they can't find public love. Many people say "If you do not love Him some you must face hate forever." Most women never used the word If in 1970. All women use conditional love today. God forgive us computer programs.

The world desires never to have International Relations as it is a Jewish thing. All Jewish things make righteous Christian Americans feel bad. Women do not think a lot. Dumb people in third world countries do not think a lot. Those that do not drink a lot tend to urinate and defecate in there own water supply.

If you are a woman that thinks a lot, why not try enjoying getting a man from around here to do something for a treat or three.

Premise: There is nothing in the human body that grows cold.

Accepted...

Posited: People fight for gold, food, resources and personal control.

Accepted...

Theory: Seventeen years after the end of hostilities the losers start another war.

Accepted...

Theory: The satisfaction of the win for gold, food resources and personal control by the "intelligent" defeat the country seventeen years later in the next war.

Posited: American wins involve permanent war by the wealthy on the impoverished.

Accepted...

Premise: There is nothing in the human body that looks cold.

Eastern Secret: Keep a sour, bitter, sweet and salty that you can go to for reflection on your emotional state. Some sweet a sour. Some take more of it. Its easier to salt a bitter then sweet this.

You mean they can't eat Tony the tiger for breakfast.

That is correct.

You see it's not that the cereal is not tasty it is. The Japanese chemist analyzes what American people use to grow cold.

When each food got scoped the Japanese knew how to eat Tony and when.

What do we get from Japan?

You believe Japan gave you television and cars. This is not the case.

There is a man who is about Bill Gates size in life running all cars and televisions in Japan. He sounds a lot in person like Bill's America.

What made you believe little heathen rice eaters could accomplish such things.

When the white people leave the Japanese go so completely lazy they don't know what to do with themselves.

This is so important to me. I don't know what to do.

Yesterday, I found out what happens in the neighborhoods here.

Fifteen doctors select a coffee urn in a city neighborhood showing up everyday to speak with the owner. They hand him \$10.00 a day five days a week just to speak with him. At the end of the week each doctor looks to be out \$50.00 and the owner appears to be up \$750.00. The payout of gifting

and speaking with the highly educated won the hearts of the breakfast type places in the city.

They took to making suggestions and upgrading the menu to include photos of the food at a particular coffee shop near by.

On the second week a lap top shows up with a password to the televisions in the neighborhood to judge whether the folks live cleanly enough. The city stop lights have some camera on a light pole they can follow cars in to see if it is safe.

Occasionally they must break in to steal things to chase bad people out of a neighborhood that do not live cleanly enough.

The value of one house chased out covers the doctors modest visit into the city zone they wish to white wash. The beauty of the fifteen doctor set is they act, write and talk like the federal government t scaring the bejeezus out of decent citizens. Most people like it.

Many grow clever after the first two sets of fifteen show up and set up as a war base due to their new found popularity. The realization that money and killing look free set up an enterprise of following every car every where in each city in the world.

Most people like it. Many people die and suffer indignation. People use to protest about sexual harassment, rape, child molestation and breaking and entering. Without a doubt society encourages the stripping of each and every person on national television after the acquisition of a bottle of aspirin. The theory that they wish every clean Jew up there ass works for Arabs and Chinese who feel you live just to clean for your mental capacity.

The world protests each neighbor seeing them without pants on. Strip search your own mind next time.

He is what you call a stymie. His father and brother were to stymie his creative and financial abilities forever. Stymies show talent that exceeds the way of the family and world.

The nature of openness led to the life of stymie that some enjoy. In the past the stymie wound up dead at 6,16 or 26 before anyone new of the brilliance that a house had.

The reasons

The children hear "Matter Little" and go about mocking as if the dialog of a professor could be whispered to them in Whinney The Shit pooh kike ruski death dog ray of the sixties acid eater whose mindless whit grew dicks that could come cream and pussies that could swallow huge cock to death.

The knell button of third buzzing spic speaking devils on fast 18 cunt lick up drug push for mule J -Doc stuck suckling out pigging poe with doe house and no War.

Should war no pork cock stick college sayin be good.

Lippy leprechaun meddle up wit Tova's gold chicken satellite begettin for forest drop toppin on head carin lean hammerin porridge knockin!

Definitions:

Leftist(n) – One who believes in the collective model of equality. One who believes in collective ownership of the means of production and all property.

Conservative (n) – The conservative believes in the individual's ability to control ones destiny in the public and private sector.

Centrist (n) – The centrist believes in interpretive thinking to determine public good issues as well as private property issues.

Dictator (n) – The dictator decides on the good of the nation.

Fascism (n) – A form of government where orders from the elite dominate the free will of the population.

Communism(n) – A form of government which believes in equality amongst all citizens called comrades. The decisions of the state involve decisions for all comrades. Leaving the communist state and traveling, take part on an approval only basis.

Democracy (n) – A form of government where the population elects officials to enforce contracts between citizens and the state.

Freedom (n) – An individual's right to self-determination on issues that do not supersede the rights of others.

Opportunity (n) – A chance to win with the gifts God bestowed upon a person without the determination by birth order and bribery.

Rights (n) – The social gift of confidence to convey ones manner befitting the standing of a place with the self without regards to social and personal power and strength demeaning normal operation of an individuals life.

Oppression (n) – The denial of human rights, often through fascist methods.

Government(n) – The means of which social contracts gain enforcement.

The Lofty –

America voted in Super Tuesday primaries yesterday advancing the cause of the democracy that unifies the Atlantic and the Pacific. With two parties holding primaries in California and New York the nation awaits the reassurance of a continuing brand of unified feelings a federal government symbol means.

The land welcomes those that work with her and her people on the continent. Dedication to linking the generations through the symbols of government continues.

Recently (commentary) the noteworthy hear the ill wind that the old men knew very minute amounts about reality and that new thinking puts a Tom Jeffers on and Ben Franklin in their places with the thinking of a Mr. Snipes and a Ms. Latifah.

The states that want to win the market share economically often preach the casual nature of the United States belying the fact that the rights to life, liberty and the pursuit of happiness must be defended as constitutional issues, not in spite of them;.

The holy book rewrites took the hands of many a monk. Bill takes to pen to tell a story that happens, the blessing or curse of the tale rests in the hands of the reader. The sacred nature of the writing depends on what the devil the author held sacred at the time of the blessed and or cursed events in question.

To know the dual side of human life the true tail tells the fact for the modern morality.

With the elimination of the dark side of ignorance the bright light side fights with the fraught peril that with equal internals; the death knell for useless interplay can end.

The bright lights which illuminate the treacherous villain celebrate the lost cause of one of grand digestive dogmatic domination.

The drug lord filmed cracks the egg of the micro -scoped medical player.

The Mercedes pulled up at the lab on the normal spring day. The useless birds chirped and would probably drop a load on the freshly washed coupe. My stupid, stupid wife he thought involving herself with Suzy Cues campaign contribution fund. That phone will be ringing again with disconcerting notes.

The radio cut off and Alan noted a man he should have recognized heading out of the administration building. The sentence in my head shows you do not recognize how brightly I can shine you on.

The Procedural –

The issue of who lives in a home and who owns the home remain the fight for the left wing property swapping persons of this world.

Many people desire more than one home. They involve themselves in the key swapping game on modest price condominiums and fly all over the country playing the airline and strange home game.

With computers and phones with the area code they once resided in the jet setter with one score can simultaneously live in 10 cities at once scoring for cash and profit and flying on! That stuff amazes and impresses the slow and non virtual.

Thanks for bringing your ingenuity to the one cost phone companies and lap top café connection outlets.

“Sheldon, It’s Ira, how are you?”

“Did you know I have been doing work as a CPA”

“CPA’s count money and stuff.”

“Did you know that?”

“Anyway, I wanted to count other peoples money, OPM as this guy Glen kept speaking about.”

“Could you maybe make some metal boxes for me to sell? I think I can sell like 1000 of them for a price.”

“It gives me a n Inventory and Sales model for an engineering company with a design.”

“If you use Students for welding and scrap metal my father says you may have I can get you a couple of hundred dollars to pass around to the students.”

”As your money and clothing guy I can come by with a print out of the box. I can bring some sandwiches. Those college optimist types would do better than some full time soup ladle folks.”

“As it’s a design from a firm, my wife wanted to know if you need to meet the designer for questions.”

“I told her Sheldon can handle the design but...you never know.”

The store security wager game rages on today with the over -under bet sitting at \$300/hr on the main counter at Walgreen’s.

The road comma nd decided to get folks out in the coldest of February days to show the ease at which the world handles below zero wind chills. When you purchase a receipt tag shows you live cool with stores and can prove exactly where you were at any given time.

Cool people read the receipt when they get home. Some pocket stuffing of the tiny white ticket goes on and the ink seems to hold up from the 4680 printer from IBM.

The lane bet on the supermarket works for the ADT -Store Security branch and the aisles look to be filled with shoppers stocking up on specials.

Those that hoard this week and it never will be a problem will be asked to duplicate the fine attempt to go off needing us next week.

The old European games go on and with East and West closer then ever people can confuse the game of chess with actual events that need to be left to people doing the job of policing, soldiering and decision making.

He works on a computer. He almost never have a chance to check on people. The belief that computer people look in your home is wrong. Some people have had live video feeds posted on the internet but I can assure you he is no scammer on you.

With a college degree and little money he plays. The chess game with others proved the point that each person plays for the success they seek. He gave up all his currency to not be liberated and dependent on others thinking.

You see girls found gay men kind during an early era. He found them kind but sexual ly offensive to children. Some welcome the love, he hated some parts of it. At times a true Greek makes you want to contribute yourself, “don’t get me wrong”

His mother from life died and he found a person whom he both loved and respected. She had a daughter Susan and sees them rarely.

He drifted with it. The greatest wisdom that divides the peoples of the earth follows.

A man and a child must agree to live in the same home on the following issues.

As a preface both types of home enjoy both activities. Should you question then you live without both.

First the meaning question must be addressed.

If you cogitate on cookie and furniture then you can conceive the larger issues involved.

If you teach your children cookies get created and furniture manufacturing allows carpenters to make a living you support process thinking.

On the other hand if cookies always just get eaten and furniture just provides a place to rest then you process only completed goods.

The ultimate aim of process people, to enjoy storing the processes of life, to keep mental acuity and to provide a safe vanguard to the public concerning completed product mixing prevents over consumption and callous abuse of the working public.

The aim of enjoyment process people creates the so called cool consumption model and the intangible payout of living in a product enhanced world.

If everyone says you must have a fur coat because you wear your soft fur the cool consumption public jumps on the idea because they really do provide a nice outerwear to you. The hate cool consumption people feel about having to think about trappers and inhumane treatment of animals disturbs the cool consumer to demeaning a mere point about something as being a PETA crazy.

The consumptive person would use up all the Air, Land, Sea and Water in their own life just because they never really thought about it.

The society of concerned engineers and scientists studies the planet from orbit and much of the green space south of Tennessee disappeared. Many have taken to disassembling these bush houses and planting bushes where the slabs of George Bush stolen cash and houses once stood.

Conceptually the consumptive person could approve of this...Right.

The man walks up to the candidate for president boldly using an alias. The aliased man commits crimes, lots of crimes. The arduous, bold journey to the top calls determined individuals to entertain false associations.

“Hello” Bill said, “I can assure you of the support of all of my people.” The candidate grinned and looked at the check in front of him. Bill the country loves the dedication of fine academics and entrepreneurs.

One thing though Bill said, “I would like to continue some payments to your office here in Washington throughout your term.”

In fact let me offer you a 24/7 buyback program on all of my people. Throughout the years the Bill network involved themselves in so much they can be yours at the call of your voice, right on your television.

I myself can assure you of the accuracy of the voice activation. I have some television viewing equipment from my office that can be used. If you can just provide some odd place you would go to have a look we can

get started before any formal insider says you have to use that antiquated Langley stuff.

Using both the formal and informal stuff John, we can push you over the top. Look at what you get. You get our people on call. You get personal wealth. And you get the knowledge that the world of importance goes on.

The favor of knowledge is all we ask you John.

He sits there and says go to hell to each and every person in my life by saying I hate to do cold life. But he does cold life in response to the littlest things like cold shoulder. Cold shoulder sits and thinks the guy has fabulous bodies inside that make waste of human feelings, this lets the world know he cares about the life enough to invest enough in the part that gives and none in the part that fails to impress him vis a vis the part that cold shoulders his listener.

If you did not want him to hear it he did not want you to say it.

There was this person in his life, a woman who screamed in cold, "You just don't listen" so much he tuned himself into woman sounds, and all sounds as if they meant life and death. Any ignored phrase might mean an end to his life in time and life in love.

It is with great envy as he watches couples where the woman says something and the man just does not respond or even hear a word was spoken. He envies the child that when told to put a toy away walks and puts another video game on.

You "must understand" when responsiveness means your life and you have the opportunity to be on the other end giving direction a modest "I heard you but will now use my powers of cold shoulder to ignore you, real people perish"

The nothing minor takes place with him allowed for some "heady times" with people who walk tall in life. They say don't worry about it, that's how they feel.

Here comes something....I wanted you to get feedback before to let you know we all fear your communications.

A tale from the other coast will let you know why the fear persists.

As a man who wanted to be at the party through the age of twenty - two occasionally small amounts of drugs showed up and people sampled. Millions of people cashed in on the lucrative cocaine market with scores upwards of one million dollars.

Without desire to make the score and without the money and courage to steal it, the wind of the word took to other things while drug kingpins lord presences around the planet.

The recent activity in the east concerns many as the drug carriers have become more intelligent. A couple in a house looking to score a one time deal found themselves with their supplier today and welcomed him into their home. The man requested to sit down.

The pharmaceutical industry inundates doctors with literature medical doctors can not comprehend. Doctors live without science. Doctors loved mothers more then fathers. The doctors' mother forgives them for once being cold enough to themselves to read a book.

Once a doctor receives a prescription pad the game ends for thinking. The top doctor remembers eight(8) medicines to prescribe. The average doctor keeps the name of three medicines in his or her soft head.

The nurse and physicians assistant take the height and weight as well as draw blood. They have been trained to also do injections, slings and soft casts. With doctors reported wealth at over 3.2 million dollars the system needs to evaluate just how great these folks would be without the washing of hands 12 times a day and obsessing over the cleanliness of their ice.

As for condition reporting most patients feel the WebMD program identifies conditions in a superior way. To say procedure based medicine physicians matter one can only say bunk. A true procedure specialist need see him or herself as a military specialist answering the bell for nothing. The men who do the procedures work under pressure of death not under a

guise of loving kindness. The surgeon of destiny must work or die. He may not retire. The experience in sending soldiers to war makes this man possible.

A heart transplant seems foolish to Cardiologists because the person is the heart inside to the cardiac specialist. A new liver for George and Dick might work. Do your part to save the American liver. Thank you.

Children keep track of inventory and actions poorly. The kids that blast aliens and run through mazes quickly on the video system fail to impress when faced with the challenges of computer software.

Many have experiences with children losing shoes, backpacks, towels, shirts and toothpaste caps. The computer programmers of the past developed tools to create an appealing look to the novice developer on the opening day of development.

These prototype code generators leave the bosses feeling the project development began well and that everything will run on schedule.

The issues of limits, speed, security and operation on events lack so severely the young people cop out with attitude and dismay you wish the effort you paid for on receipt of the product should work.

They continuously maintain on the phone the barn door looks closed on the remote tie in support line, and you maintain the horse does not seem to reside inside said barn. The end user suffers drastically in a world where bank records, valuable timeline data and important proprietary information sits in the hands of a user who feels by financial rights they may operate in a safe environment with 21st century technology.

When the sixties rebels went to war they wanted an answer to permanent war and religion. The generation settled on love as the answer and young Californians laugh in the face of the hedonistic deniers of "the true life" of people.

The Governor of California does not believe in love, he believes in the human body and war.

The victory brings something talkers about love can never fathom.

To control a population with fear, denial and disrespect brings out the caged animal that builds a strong good looking society.

On with the fight Californians' agree. With modern weaponry and blackmail very few have the metal to take on the non loving disrespectors.

With reckless abandon lost California writers, directors and producers film affairs and murders for blackmail and humiliation of a once moralist nation.

The web camera used for ostensibly monitoring children's nursery schools post on a computer network the Hollywood humiliation team taps into daily.

Each child that looks overly wealthy with good clothing risks a life of child pornography and parent drugging by intruding vile Californian's.

Those that tell you nothing looks wrong to them can not comprehend how quickly decent lives end with the greed and lust of the devil worshipping Californian's

With each Californian believing the world should pillage and plunder for a living the acquiescing mollifying population accepts a goner attitude with good video equipment stored in the suburban basement.

When the republic exchanged goods and services for cash each state served a build and exchange model.

With a hegemonic take approach from California and with Detroit cars not an issue with Japan the big "C" roles on waiting to see what the Chicago Bullet company will respond with.

Most people just hide out in basements. Those methods of pathing, baiting and trapping ended forever the land of freedom and opportunity the constitutional republic depended on.

The bugged country shows how bad really human beings are.

The democratic experiment goes on with candidates who represent the fight to overcome second class citizenship.

John Edwards fought poverty and played football to work his way through Clemson. Hillary Clinton earned her first \$200,000 through intelligent market trading in a male dominated world. Barak Obama a high school basketball standout dealt with issues of race and intelligence in Hawaii before earning a Harvard diploma.

The nation knows each of the candidates shows the fight for their constituents. As one who finds adversity in life what can one accept as a fight for overcoming takes place for women, minorities and the working class?

The economic forces driving the economy need work for all segments of the population in particular those working paycheck to paycheck and at the mercy of a check from government and former spouse.

The U.S.A. showed us opportunity in the 20th century and the democratic party seems to believe that the opportunity will continue without the educated approach to fighting. The nasty vile despicable despots worldwide polarized the decent way of life for all.

Democracy relies on an intelligent population. The only real issue this campaign is education. The elite in Europe could read and created the warrior/religious classes that live on subsidies and do battle for the flag that paid them.

The democrats threaten the European lords here and the end game looks foregone for even the staunchest egalitarians.

In a remarkable turn in U.S. policy the governor of California in candid comments revealed he enjoys the illiterate youth wandering today in the state.

Those that read confuse the ones who give clear and concise orders as to life's mission.

In years past the values conveyed in conventional northeast rhetoric entertain a theory that it takes all heads on the issue with buy in on the thinking to produce the great society.

With no real skills left in education the world wonders about the strike of Hollywood writers. The writers report a trapped feeling between expressing true conceptual feeling whilst not insulting the beautiful uneducated individual.

With the leader of the comic band Jay Leno putting on Priests, Ministers and Rabbi's last week to tell jokes the nations calling for incompetence away from the cloth goes on.

Californians love quality kills. When they do not kill they drop to there knees for zipper inspections of the diddling jizzlers who play each life as an exclusive sex life.

Say a film star earns \$200,000 a month for something, young Californians get a share with a plane ticket to a location with a worker that uses cash and a bank.

The young California soldier goes on the plane, rents a car acts real cool and important like and drugs the person to death.

Some try store jobs to set things up for awhile. The belief that bribes and sexual offers always works goes on.

When one notes the salaries of film stars one knows the agents must kill real inheritance players to support the glamorous wealthy "mansion" life.

To note most Californians call 30,000 square feet just your house.

With morality dead most airport workers phone their pal ahead for quality kills that only have the 600 dollars on them.

You really can make a living on one pointer's.

Chapter 1
April Fools Posts

April 1, 2013

You can tell Rico I was not the one to tell the “Black Guy” to miss the head and poke with open fingers under the chin. If you miss the head below just a bit with open fingers its just like a poke. So it’s not even hitting someone in the head you just said that he did just put his hand flat

And poke under the chin

Poke unter da chin

Ya poken unter da unter labia.

Poke under the chin

Poke her. Poke her. How do you play Poke her some.

Palm flat even with shirt top, you see, even handed and poke.

Once Israel spends a million on you (see below) what you watch on TV may be important for financial reasons. In 199x or so, as a gift to me they took weird ideas for movies and bought success, so what, “A Beautiful Mind”, some weird shit called “Adaptation” and “Monsters Ball” off some obviously drugged night of questioning and psychiatric instability.

Who should be in it brought Bill to suggest people he loved.

So fucking what man. Lately they put Science project back on the set. These keen mother fuckers don’t allow the five minutes it takes to see what the cinematographer is doing. It’s crotch bee -line or whats in the background bee-line or hate some race creed kid or old person right off the bat.

So the “reason” for the assault is “Bill has Problems watching TV” was sent over the wire.

That was the problem ass wi pes! It’s non fucking stop in here with fuck holes.

Watergate

Nixon

Students for a Democratic Society

People United Can Not Be Defeated

Minor Jewish issues came up in Top Game and Bridges.

Oy Vay the Jewish Nixon worked like a Dog on the Cover -up the guy IS now really impeachable.

Got Gesproch: Die Hand Die Erste Finger Die Daumen Machen dem woman mund sheisen fer gross ahs got lehrne. Die Hemd unter Nechen, Die hand, Die Finger die unter koph streichen. Vas ist die Nicht gut die body. Nicht ein krankbodysegment nein.

Went to take my Holiday Dump...Heard that "She" wanted it blessed.

Long story short if you ask your woman if she wants to bless your actual shit in the can. You may pop her from the side on the chin really hard. She won't see it. Hey look at that and pop straight forward on her chin.

God says, "Something always hurts on that hole." "Noticed the new sphincteritis condition whereby the direct nerve from the sphincter connects to the optic nerve! @! Upon standing and speaking the brain and heart are bypassed directly to the tongue!

Shin kick, ankle bump, chin pop, rope burn. All day when this blessing shit starts. Dumb oaf walked right up and kicked the side of my foot!@!

To be fair: If you ask a woman if she wants to wreck a man's every waking moment. If it's yes, she needs to be struck physically a lot.

Dem Woman Gewollen Nicht Ein Gut Zecond fer Will Masten. (Du Denke Will ist nicht o nicht gut aber streichen dem woma n nechen gut fer ein hunter perzent gesprochen. Nicht ein hunter perzent nicht gut dem woman. Ok ein klein nicht gut zecond fer Dem Woman du.

Mein Freund ein huntert perzent auf Glenview gewollen Streichen!!! Striechen Ein Huntert Perzeent Glenview!

Anyone want to do Bill a favor?

The way to say things about the stuff on the pages is to Daniel, Peter, Eileen, Claire, Mark, Zack, Steve Mostovoy, Greg Mostovoy

Bill is so seriously "lifed"

That is all they need to here to back off.

Hey I heard one of my Virtual wives paid 50 grand for me. The yentas bought 9 more for 5,

So I announce I might go out. The cat knows it's to the coffee shop.

I congratulate her, a friend actually as virtual wives all share virtual husbands for a few dollars themselves as being with the superiors.

To the friends it's a science. I get it. In a maze the scientist puts the mouse down in the maze and then places the cheese. Opens door one to see the mouse run the maze. Changing the conditions by "guarding the cheese with a "cat threat" may deter the mouse from running the maze, after all the mouse might get eaten.

So I'm totally pathed by Cat Scientists who regulate each cat on the road to protect their loving virtual hubby. This sucks, I get no money or love from these science geeks.

Chapter 3 Rewards of Mental Illness

Do I know she died? Is widower a lie? You said he wasn't married. Then you said he was. Then you said Marriage is in front of "God and Everyone" then you didn't care. Then you said it was a "Marriage of Convenience." Then you said you only get one wife. Then you said you had your one wife. Then you said you were never married?

As for the PTSD distinction, a hospital for PTSD and Cocaine problems as it happens, William wasn't a Cocaine addicted person but they were with me. Anyway, I had a nice oral reading of the bible, the John section as it happens it sounds nice and fine if the Riverview hospital people at Forrest Park wanted to study it as observers of patients to on occasion. That night William exploded I mean exploded with ideations of bomb this and get that in a way that any person hearing or seeing those things would realize flat out the diagnosis must be PTSD. In a way PTSD IS Bi-polar but in a sense "stressors of trauma" supersede what you would say is a God given Bi-Polar manic person.

William "Bill" Mostovoy, Widower. His wife died in a tragic accident. The film "30" dates is special. The dates were only OK because of the "followers" but the end in the Nursery of all the babies is a great ending. His own version looked OK, it has been re-acted.

You are to be considered this page Hacked. -Mosto

You see Vapor girl, you don't get to change what is Mostosoft about by hacking this page. Does Dumb and Stopped challenge you or bring out a criminal in you. You really are a card. -Mosto

5' 8" (with shoes) 172cm tall

As of 3/27/2013

NOTE: To do the weight match use Body Mass Index (BMI) BMI currently 28.9. I am not trying to make you guys diet. The doctor says to stay alive I at least had to be under 30 with it. The actual at weight is 24.9! Wow I couldn't believe it but then I made 50 and people die at 50 of heart attacks so I went on the beans and rice thing and it worked. 25 -30 is considered "overweight" 30+ BMI "Obese"

Weight 186 lbs (down from a high of ~220lbs Jan 1, 2013)

Condition: Type II Diabetic.

Age: 50 (birth 3/4/1963)

Vapor Girlfriend it's a great BEAN STORAGE SYSTEM!!!

OK, Hint: The Neck Opening is not the original shirt neck hole it is Cut by you. Of course stooped girl you want ask if cut seam, how else you do it.

Weird Stuff Maynard! It's a bag of beans shaped like only Willie would shape it.

Navy Beans in a Ziplock rolled up and Saved in a LifeStyles Condom. You will be the envy of all the soup makers with this unique FOOD SAVER SYSTEM. That's the actual size shown so enjoy a good bean today.

All the way names Bill loves

Kathy, Janet, Lisa, Allison, Rachel, Laura

Names that benefits would not require bumble bee soccer transport after

Cindy, Mara, Kara, Karen

Rewards of the life of the website developer Mostovoy, WD

Financial rewards: SSDI insurance \$1741/mo Reimbursed expenses from an account \$500/mo

Checking Balance: \$4000.00 (more or less each day)

Savings not accessible by developer. No other direct access of any kind to anything

No automobile. I can use a car share at 10.00/hr.

Honestly I will tell you. Gosh there are not many rewards in this world.

Last Sexual release with a female: 10/20/1993

They tell me I got some oral treats today. I hear that you love spending my money, living in my house, eating my lobster and having sex with my woman. On what earth is that "my reward."

Last Sexual release with a male: NEVER

Last Restaurant Meal: Leona's for lunch Monday, 3/25/2013 in Chicago's Rogers Park on Sheridan Road.

Last personal friendship meeting: More or less Hillary from Potter road and I walked to a convenience store 2005.

Last family friendship meeting: Super Sunday 2013 at "L -Woods" Lincolnwood Illinois Feb 3, 2013

Last Profesional contact: Trilogy Woman Corrine and Lauren 3/25/2013 4:00 PM

SSDI-Investigators, Thank you very little. You should not want to kill someone for getting a legitimate check. I yell to an empty room with PTSD and your microphone system ruins me when I walk outside peacefully, your like wher e is the guy who yells. I can handle it. It's just when I yelled "You will take that loaded weapon and fire to what I believed was a soldier in the field, that is what killing with your head means. That man is just a gun at that point. Not a soldier in any Military would not have fired for me->

Current Medications:

5'8" 172cm Tall 193lbs 87kg 32"x29 ¾ waist = 81.28cmx76cm Bill "Cho Lee" Mostovoy pants 82x76 ok so about

A1C as of April 2013 doctor 6.2

Cholesterol: 192

Triglycerides: 392

When Bill opened his mouth to speak from the time of 18 he did not understand he was to play a game he refers to now as "poker." He went around the dorm first day speaking to people to find out if he had the right level of "discourse" as he would have said. After a time people grow sophisticated in a manner befitting proper station and wealth management to entangling issues. In common terms it is known as protecting your selfish person. In more common terms the person realizes smart pigs don't do

smart with intelligent beings who will probably wind up with nothing. The material presented people found filled with intrigue apparently because a game called “next room poker” seemed to appear. He himself thought he said something and you smiled at it or didn’t and he walked away. He says, “Oh” to himself so much about having made a mistake with opening his mouth that the “poker” game he must have been playing showed he did not place the ante openly and in a way “poker” is played. He retreated into thinking. To do computer program in those years you used your own thinking to do just about everything. People it seemed felt safe. Suddenly during a homeland security crisis in September of 2001 people wanted to know what was in his head as perhaps a “Russian Agent” Wow, me I programmed computers for so many American bosses I had forgotten people cared about that stuff. The rest is conjecture.

Bombastic-Full on facing decision forcer. How to remember this, someone tosses a lit circle thing with a candle center thingie to you. Either blow out the thingie, toss it back or get blown up.

Dictionary on the word: Argumentative

As for the blown Oral exam word involved in a long passage pejorative was used incorrectly. Janet and Laura still make me laugh and be fun with “You perjured yourself with pejorative.” In retrospect the word Perjorative is missing online anyway.

The point of analysis of writing on the digression involves looking for perjury in writing on declared conjecture.

Bill is real friend with India. About the candidates Michael and Bill, Pav is the dorms big Indian person. His Dad was with the World Bank and Pravin continues his business monitoring of our first house. Tony Kanwar as well as Sumit are really great!! I mean it went without saying to me but as for TJ, Tanuja out of H-F she is great. Sid Singh went on to QB Chicago, (U of) football and his family and sister are great. Sanjay out on Potter kept up with Mostosoft at it’s very start. Most people said I lived in India those years. Unati at the store probably wouldn’t remember me but this “delicate flower” (translated Unati) looks real special. In the text it says live in India, this is the reference place. Forgot Raj and Nancy Gupta as well as David Gupta. Casey Sengupta might need a friendly wave as well.

Ray Pan and I worked together at AC Nielsen Market Research. In China it is spelled Xianxing “Ray” anyway if you believe in the thing along with “Tsewei Chen” and “Morris” Lee they feel that although “Bill” does NOT have a teaching certificate they have mentioned “you could learn from him” as “Teacher” if this blessing word troubles you feel Free, Dr. Chen

went over to Motorola and Dr. Lee works now down in Dunedin Fla on Face Recognition, his PhD. is from Harvard University, Cambridge MA.

Hey woman that believe they “here me in there head” This is the news, “the acting role of me in there head is performed by a person who also believes they have me in there head.” The decent normal person who runs the show here, “does not put messages in your head.”

About Dr. Sheldon Mostovoy’s best latin student. He wanted Miguel, and his fiancé Carmen to be the best. A small boy called me, may have been the ring bearer. Since it seemed on t he walk out people were smiling and chuckling I got red faced and don’t remember walking in, but they were smiles I suppose. The Chocolate Covered "bugs" of some kind Judy wasn’t quite sure what to do with, but Carmen assured her they were a delicacy. She either put them out or regifted them. True story this is.

As for how Rachel with the Black Cross (Double Cross Method) said to win, “He ain’t nothin but a Jew” so the Black Rachel double cross method makes you think the words can never be accepted or Bill’s life can never be accepted. If as a Christian Woman you accept, “He aint nothin but a Jew” the actor known as me to you in your head may grow ultimately disturbed and act voluntarily important to you.

If the people on the “promos” seem happier or in a better mood then (0)-> the TV is clicked off or the station changed. As for the +(0) interpretation (0)->dislikes or is displeased by obviously great mood things +(0) is incorrect and most likely (0)-> would want her to feel the good mood and love on the show.

When (0)-> watches sports this is the case.

(0)-> M

+(0)->F

—
What’s the best you ever looked (0)->

Well 18 or so (0)-> in 1981

Time is hard on what you look like +(0). I am asking you to believe the person on the left is the same DNA exactly as the person on the right with the same fingerprints. (The author of this is more like the person on the right in appearance) People saw the “mop of hair” and assumed (0) -> was dumb.

—
About kid stuff for a minute if you will, the old people and me as a middle age still wanted to know if kids had a game. If there is a game are

there rules? The rules seem to be very simple when meeting a “New Way” child, “I win” meaning the New Way person as I. Meaning if a New Way kid says “Dance the funky chicken.” You dance the funky chicken or lose access to TV, the internet and your bank account.

To finish the setup a grandmother or mother or friend of the mother says, “Tell your father something.” Or “Tell the manager something.” The NewWay kid doesn’t reveal who they are they attempt in all cases to direct action or boss the other person creating a very chaotic situation.

Doctors Note: This page is for patients who believe a divine right to know the authors of web pages. Feel free to laugh at the ignoramus who is a complete lay person. The web developer posting this has no basis for medical knowledge.

Let the staff just tell you he is “Hyper-Links” for you ha ha ha ha ha!! Can you imagine a grown man with “Hyper-Links”

BoothCast™ Mostosoft Submissions would look like these

The ball of wax. The big answer.

[Personal Statement on girl love]

[Dressed Sloppy saying it]

A woman asks a man a question only to see if his penis works. That is will he get an erection and provide semen to her if at any point she requires it.

Bill says, “Woman that Bill hasn’t seen in 2 hours lose the right to ask him questions and have lost the right to ask him question.

A man asks a woman or tells a woman something only to determine if her anal capacity will produce proper bowel or her vagina is bleeding correctly and or lubricated properly.

The concept of “using woman” to find out about “Bill” as in “Is he a Russian spy?”

The woman they use say what people say when they are fine which is “I’m fine” any and all other words really mean to suggest “I’m fine” so Bill answers fine and they must use a style called “Not Fine” to see if the

answer to “Not Fine” can be used as “So Not Fine” no one should ever say that to such a decent “I’m fine” person.

Funny that the discussion of “High Air” took place long ago and that as soon as a person that really just says “I’m fine” hears a word “High” they must have this thing. Only they don’t have high air, they keep those well bloodied innards and asses. Biologically you can ask a doctor if this is true. The answer is yes when you eat heavy meals you are rich with blood not air. So you say which is better all day and all night and you make the world sick. Bill felt his blood part was good and air part was good. What ended up happening is you bloodied the air. I accuse you of the bloodying. You used “Not Fine” and criminal activities on him. Don’t go using people to ask all day, “Does your Dick still work.” I heard he has a chair at Harvard if you must know. Dick Daley Harvard lecturer, and University of Chicago lecturer.

Chapter 4 Medical Opinions

Medical Specialties

HONEST: Doctors can save your life, ease the pain, provide comfort and care. (whispered to you, people need to know your really human inside and have real hopes fears and dreams)

Internal Medicine
Pediatrics
Obstetrics
Psychiatrics – Authors Page
Orthopedics
Ear, Nose and Throat
Nephrologist
Urologist
Emergency Medicine
Addiction Medicine
Trauma Surgeon
Surgeon

Epidemiologist

Game: The dictation of surgical procedures game. Since the doctor feels the kids should be able to do Bill's life. Each kid learns Dr. Scott Sagerman's hand surgery dictation after each arthroscopic procedure my kids will learn each word and say it. They will review it. Each financial move will have every kid every time on his electronic transactions. They also will work on any article in the field with him.

Research your doctor: Hello Doctor, do you have a B.S bachelors of science undergraduate degree? Do you have a B.A. bachelors of arts undergraduate degree?

Many people that can't get to the toilet require a commode unit. Please clean properly. A bag insertion may aide in keeping it cleat. Available at Amazon.com

State of affairs: Doctors report record incomes, Hospitals report record profits, Insurance Company stocks soar. The AMA Lobby makes sure doc gets paid.

The value of healthcare defines a population in terms of overall wellness. The body contains organs, flesh, blood and brains. Once each organ of a body performs perfectly the nature of difference disappears.

Through modern methods each body in life can ingest, breathe in and out, sit and do modest exercise. The modern hospital contains a ward presently used for psychiatry patients. These patients receive trays, watch TV and take meetings with doctors to discuss how someone with a healthy body could conclude poorly about themselves or others. This life may be for all of us.

The medical community can not risk the heart to foods with cholesterol, thereby denying the stomach love. The medical community cannot allow a toast for fear the liver will differ from the sharp responders. The medical community can not accept differing clothes or hair as they may hide lice and germs.

The proactive healthcare system defeats love, courage and wisdom for chemical processes. Cellular and molecular biologists can tell you many

things about you, you may never have known. They can define every aspect of your cellular life and miss your drive, your passion and your way.

What words should doctor s use to convince you that all of you are lab animals waiting to be dissected?

People know what Brian meant when he related this.

Drugs pervade life in America. The U.S.A. prescribes more medicine than any country in the world, with the impotence drug Viagra making billions for Pfizer. The heart medicines beta blockers begin to be prescribed at around 55 for at risk patients. The cost of preventative medicine keeps many clamoring for federal dollars for prescription drug coverage.

The mental health drugs improved the life of millions of suffers to think better and perform in the modern world. The maintenance medicines keep the drug companies rolling in profits.

The medical community relies on the drug companies for new medicines and the patents work for 17 years before generics arrive on the market. Mental health pills go for about \$5.00 a dose twice a day. These costs derive from hospital administering to inpatients billed back to the insurance company.

Those that requi re services get hit in the wallet financially or go without, as a detriment to the community at large. Take the patient on the \$5.00 tablet twice a day that would be \$10.00 a day for 365 days equating to a modest \$3,650 out of pocket per year. The patien t feels no better than the day before yet continues to take the medicine for fear of relapse. With a doctors' visit twice a month at \$200 per month the doctor receives \$2,400 out of pocket. A modest price to pay to keep your sanity would be around \$2,400 would it not so that arrives to \$5,050 out of pocket to pay for services for an illness that will never get better.

To top of this example and the statistics show 1 in 10 suffers from some form of mental illness requiring treatment with 1 in 17 suffe ring from diabetes in the general population.

The medical community lives to fleece unsuspecting life taking every last dollar from some reckless mentally ill person and lock them up in a sanitarium and kill them. The heart patient pays to the docto r to live after a life of crime and the doctor lives to take the persons savings and leave them with nothing but a bland food life.

Doctors live with cleanliness and order as an ultimate end. The word care opens doors for the nursing and the religious.

A group of young people tested modern medicine at the "Doctor Store" hospital. Every desk gets paid with a credit card, from the blood test around. The young men and women at the doctor store say the same things and do the same things there cynical brethren do.

They say hello. They say "Where does it hurt". They say, "Lets get some blood work.", They get a temperature blood pressure and heart rate." They say, "Lets take some pictures" and they are done.

If and only if the patients need a surgical procedure do things return to normal life.

When the lab tests come back the prescriptions get written and further appointments get made.

Each doctor in life went through work flow studies and no one particularly cared for expression. With no expression and simplified approaches medicine gets done quite simply.

The ultimate philosophical questions of life and death elude the medical community. They also elude the legal community.

If you always pronounce death or give the death sentence you very rarely see yourself on the gurney or in front of another judge.

Doctors do not comprehend dollars or death yet ultimately patients relent to death supplying there last dollar to them.

The great medical behemoth that lives in the United States cannot handle the aberrant the creative or the life fulfillment model of life.

Doctors and lawyers cannot be fulfilled by human beings, it takes cancers, death and the threat of a client life sentence to excite there juices.

Life and death situations look modified now that the early maintenance specialist arrives to take the cash before the big bypass failure after the heart attack, skimming millions in a way that looks not to really have killed anyone, just killed every ones appetite for life.

Psych and Tech! People love secrets:

I have a heart problem and a mild stroke situation. Hospitals and doctors have as many ways to kill people as lawyers and soldiers. To get death call a doctor or nurse. Doctors and nurses kill people. Who cares about people? No body. People are for running strange experiments on to see if you can remove all of the patient's energy and dollars.

Murder at the hospital, be a part of it. Its not dollar -ectomy its murder

The Rabbi Continued...Many take the fools gold of the car, the house and of electronic upgrades

Fear grips those that protect the pile of gold. Every step may remove the money talks blessing for the random camera. Preventative poison prevents pas sion. Well developed hell structures objective reason of equality not elimination.

Where is the fire in your life? Smoke provides heat and warmth.
Cold Drinks provide solid state events

Without the cold, good cold, use smoke for steam. Stoke the blaze.
Poke the enemy's nose, Grope your love,

Dope the well and whatever. The symbol and the world of forms combine into the face where facts meet on the stage. Aesthiscs and poetics fly foul in the breeze of beasts.

Jewish doctors ease pain through the use of science. Modern medicine shows efficacy against most of the modern maladies presented to the physician. Small Pox has all but been eradicated. Tuberculosis is no more. And the great Dr. Salk a Jew invented penicillin. What a guy.

Dr. Kraus listens to whining kids and prescribes Ritalin. The band the Ritalin kids gained some notoriety for a while.

Did you attend middle school?

The test to become a Smith is quite simple. Take two objects a teddy bear and a hammer and ask the 3 year old. Which of these do you hold? If you select the hammer you are Smith.

===

So as a side note those individuals that are questioned about there finances claim a wealthy father. Fro m the fatherland after a murder of a similar fellow a doctored autopsy and a flight to the foreign land for sonny boys next murderous casual.

When Judith Byer Mostovoy Jewess died she left a gift wrapped up in a small house on hobson. She was termi nal for a few years and went to the Tinley Park Mental hospital to find a older looking women. She had her whiles as bad check passers are prone to do and taught her how to handle her husband of 46 year with

Imagine a closed system such as a hospital. A patient enters through the emergency room or through doctor's admission. From this point on every fluid, motion and procedure take place in a way that may never be altered even with the fiercest of traumas.

In an airport, you have check in, security, shops, lavatory and airplane boarding all well managed by systems personnel.

The kids need a cookie because as this is written they keep whining what's wrong with it in an amoral way. The relativism popularized by Einstein in the 1930's led to today's respectful relative merit life we have lost in relation to counter napkin dispenser soda fountain sipping.

The words suggest a comment on the human experience in relation to the thoughts behind them.

In a systems based world speech may be duplicated. Brains states and operational ability remain the questions for geneticists.

The funny part about the child in question who wants his cookie would be he feels there is a Mr. Bush that acts differently than he does. He feels after three times on his TV he can say anything and it proves amusing. The jealousy greed and lecherous behavior of the youth tends to reveal the nature of the new breed. They have either fork or gun. The argument being that neither looks cold to you in cold as you live cold. The fork takes all available food out of some one's mouth and the gun merely shoots someone dead.

Doctors used to be old and wise. Today doctors live a vibrant active killing life. Doctors that know how to administer lethal injection fetch a high price at the international secret C.I.A. jails.

The effort to stop this is insurmountable. When every trained physician knows every Doctor and Lawyer must kill each one would be susceptible to the ill treatment she has just prescribed.

Once Com has you Com has you.

Its not Jews, Its not Blacks, Its technological stardom that did care giving in.

The great part about the medical life is the abundance of healthy hearts to try for your home transplant Frankenstein unit.

Most doctors do not want to hurt people
Television and the killers

How doctors killed America

One Take a walk by a junior high and pass out 100 porn magazines a day for 3 days.

On the 4th day slip cocaine in the porn and request payment or else

Follow the group for 4 years onto college
Do this at the sophomore year of all U.S. high schools.

So you have cocaine use become 100% for all U.S. teenagers with sexual knowledge

In the porn magazine you have next to the beauties words that say
“Only losers care about government and soldiers”

“Readers are government and soldiers”

“Repeat to the largest 8th, 10th and 12th grader”

“Who are you to say this”

“Pass this on big guy”

“Did you know hitting with a rock right above the eyebrows at full force

Kills.” “If you can get close you can kill.

“Everyone steals from stores, it just takes 10 of you to walk in and cover well.”

“Don’t do your own neighborhood.”

“Whiskey steals best and fetches a high price.”

So now you have screwed up kids who won't fight.

Next take 100 mp3 players with music that suggests cold, fear and hate towards establishment, feed those 100 mp3 players meat and bread daily.

Take 15 mp3 players to a house you want and start painting the exterior when the person of the house leaves. Take the house by force and keep the 100 inside.

Once the housing is established push the base to supermarket link with autos and follows for stocking positions in the supermarket. The salaries earned will provide groceries for the 100 who will ring the suburb with 100,000 or less. 20 city blocks make a suburb.

On war, offer cases of wine bottles and drugs to rival gangs. Give it up model over fight. If perceived as easy bad strudel can be employed to drop the enemy.

Materials analysis and inventory in the town first and foremost provides the basis for the bad strudel.

No new structures will be erected.

On detection of new home construction the young must find the land use and take the developer on.

Which disc did you get.

Is put me up as "Steve" the 6 Million dollar man. Sold match making and didn't stop on cool, cold agreed on by everyone, first try really back in Evanston 2004. In stead the girl is recruited and the "find someone" portion of matchmaking determined to be more fun then making a happy couple

The words "give him your bless" in match making for a prize of money in a contest along with good song made the girls who were promised want and commit religiously. They threaten fire from the rain clouds by every NAZI they can get close to us.

At night they wake "Steve" up with are you on your back or front and what does your "it" look like right now . Not displeasing he says but come on no quiet sleep and 10 a night after she falls asleep switch. Attoning 19 years or not 19 again.

Explanation of the system cost \$1M US the huste to make it back. \$5.00 clown contests fill the rest of each day.

Reading the site doesn't matter. No more he says you made \$1M in profit as it is. Says he never wanted it even though it was said Doc could keep him "very good"

Billy Mentos

Billy Mentos came into Sonny's last week, well the Thursday before as it is Sunday. He asked how much the Mentos tube of candy was. He had a real big dad with him but young Billy Mentos asked sonny as a curious 4 year old,, maybe advanced 3,, how much this one was. Thinking about "English/Germai/ well all of the ones where children should be seen and not heard, I realized that little boy with lots of pigment was me exactly. What can I say, Mom thought kids that talk a lot might love to just say something to someone at anytime. So his Dad was like my mom in t his case, implying Go ask how much or just say something. Is Dad seemed not to sure what would come out of him at any time.

So we heard you were all cold racially? Well if I can't impress you with cold, my friend is cruel but to be cruel to young African-Americans he tries to get them to attempt college. If you save 100 one dollar bills and get 10 friends, he will attempt to match 100 -1 and invest, not guaranteeing anything. He makes you cold because that white man just took your hundred. So if you do feel like letting this white doctor grow cruel to you, go ahead and have your kids go ahead and ask for a dollar every now and then for the college fund. It really may pay off. As for what I said to Billy. All I could think to say was "Try Mentos, The Fresh Maker." The radio announcer in me nailed it and I left happy. Try Dr. Scott Sagerman at Alexian, he of course hears how cold I am but reference Medical Opinions for true feelings on doctors.

Sorry Scott, when I did the Mentos I am my own man, I just broke down about it. I am not you but Debbie and Me sort of enunciate it so like you it's scary that I didn't steal it, it just came out that way.

Anyway hope things work out.

10 dollars Nancy is fun as just true love for art wantin g Notes over Bill.

Your Dad was cool and he was cold to you but he was as much a dad to me as a true other family man could be.

Dad has a really nice version to Billy Mentos to, that being Sheldon. Sort of I see that you have a Choc-o-late bar there.

Many woman grow a bit colder as candy will spoil your appetite and they would love to get into it fairly as in, will those mints really fill you up.

Gosh, all in a quick shopping trip anything can happen.

So Ira's Dad and Ira friend Bernies big kid want in on Scott's deal
 Remember taking an envelope with the 100 -1's and 100 -100's and
 safe deposit box them. Mark your taxes as prepaid gift to TID – Tax Free
 gift prepaid expense. The box is for holding purposes for the recipients (as
 a token to return the 100-1s

So to request a special from an agency or college like the UNCF go
 ahead and request a TID management number to see if your individuals get
 preference if denied admission a gift will be sent in an amount deemed
 acceptable to both parties. (most likely all of it, but you see exact dates of
 distribution may be important)

Ron dreamt a second ago when this kid comes to the door he's cold
 I'm 100 times better and it's in here the addresses I'm not chasing foolish
 people down for this.

You will never amount to anything, you live rotten filthy lives and
 this door is not open to you until you prove yourself. "Good Luck"
 italicized.

 thank you for the gift of Hagueland's "Mind Design" text many years ago.

Thank you for your time. As a professional it is my hope something
 of an informal style may develop. A few subjects may be of interest. As of
 my interest of your professional life and personal life I assure you, nothing
 invasive or offensive will take place by me. If agencies representing me,
 then of course I understand the chagrin.

Sincerely

Your Friend

Bill

In Revocation it was said "I am revoking your PhD. for the
 wandering part." now as me I laugh and know of course
 you still are.

-> The new thing we are calling it is "Reading into it something that
 may really not be there."

In many cases if it is said like, "You can't see that something is important" the person Reading into it wants to NOT have you overcome the fact you may have missed a finer point but COMMAND you NOT to see what the finer point was.

* As a person that method of reading into things killed what is called an honest chance at someone seeing "the light"

If you do read in, "is Bill claiming to be the light." Not exactly, lets say you DISAGREED you would say the light I see tells me that the statement is True False or Personal in decision. To say it CHALLENGES the very integrity of the persons good ness and fitness to do this embarasses the process.

-The Wandering Passage paraphrased, may have been fake.

In specific what it was, was the following.

I gathered you had music on and were sitting at a computer and since I do know who you are it amused me the "random thoughts stuff until"

Good song

We do important search stuff..

I thought she was already dead (meaning my mother) < - yes she had a few near death so it must have been 2003 and the post surgery pain in her was total "dog heart" experiment with doctor stuff, real sick so it was on my mind.

Not much

About 500

Center part of it.

I did not have the other part you were answering.

<end>

Bill

Why fight it the posts get weird and justify what you want

Went on the backup drive to look for some old food page and found believer who believes, “why don’t you make a new one” Well searching a hard drive isn’t cold you just poke around and read. The hook -up guy in California’s north isn’t susceptible to sexy, super hot woman but he says, this will destroy his person as a reward to him and perhaps me for accepting but not realizing it’s cold to my special “gift to gay readers” So anyway as I mentioned the Russian thing being the other guy in California for using actual Russians, by the time that belief gets her the Ionization Pulse, over tweaked shit my head is wasted. Army dude pops on what did she say. His dick gets hard because the chick is nude and beating off and each insult goes unreported. Even if someone did care about someone teasing a developer what difference would it make. No Jew can put together these words to mean anything other than fuck him up the ass either way.

So fuck this shit man. Getting me up at 5 am to give me super secret stuff has made me to great a person for you to fucking handle.

So the Russians and Jews wanted to play “the crazy house” game on folks who advertised “suicide” In writing the book the author revealed knowledge of war and Presidential misconduct. In a manner befitting a marine he offered to the President, as he realized, “A rational marine eats his gun rather than embarrass the president.” “Offering it to the President, the kindest George W. Bush said no by no means is an American (such as you) supposed to do that for me.

In the uncut film “A Few Good Men” the Martinson suicide is removed. It took the sting out of the film. Since young people wanted the quotes but not the sting it was removed. Gentle bugs that make honey called bees “sting” some people that get near the hive and it makes a little bump from this normally friendly flying insect. If the name isn’t exactly Martinson it is my apologies I just can’t know what it was at the moment. Full uniform with a classic shiny silver bottom clip handle pistol is used.

If Bill asks for something like “India or The Mosque” has it use Potter Rd India If Poland, use both John and Linda Homewood Poland and Keeler Ave Poland with the Y Poland to request, Please to tell me if you have his English words that say, “Do you want me to”

Thanks you as Poland the guy takes on decent things and doesn't care to be tough or cold about it because he hates things he doesn't even know. "So your not polish you say to your new friend who said he was."

So as for "Black wanting a war with Poland because Russian guys say they don't know they thought you was white, well when youse find it yaman Logan.

Hey da words "Colonel Bill" if he said it, you could say he thought it was him but he thought the guy was official as a US Soldier Colonel saying whats if you guys was mad and act it to me sohse I know I could do somethin if you really went and did it. It's like play fake sides to see Bill he says like Virginia by DC or somethin . I'se was NEVER Colonel Bill Never.

About me growing cold to Cary. My friend and guy a year younger Cary Goldberg owned the place Polish John and I lived. He was still kind and a friend when I acted cold about calling him Mr. Goldberg some wealthy building owner. But you see, things like the bounty hunter taking a guy away and other units being cold in a way they did not have life cold suggested I not open up and say the "man" is some nice guy about stuff. You see he was but realized when new people aren't cold they grow to cold to people who provide decent housing at a decent price. The show Bounty hunter on cable will show you the type of guy that does the job. Could be up on the internet youtube or something. So things like a little kid (African-American) comes to the door really just selling candy but when Bounty hunters and cold things happen you wonder is this it in an ultimate way. I dropped cold for a minute when I realized in this case she wanted a little money for something. I didn't want candy but handed her some paper money just the same.

As for John and his wife it was the day after 9/11/2001 and the cable company didn't have me on iso for war room coverage so these immigrants next door caught our feed of 3 weeks anti-terror military feed. So John and I know big shit went down and he didn't speak any mutual language much but we got our point across. Anyway I activated online his cell. But in my defense it seemed you would want him up on it.

[Note for exact learners of the guy M -ah-ss-toe-voy] the woman at Out Patient Blood Draw at ENH (Evanston Northwestern Healthcare) grew excited as she is from the Ukraine. Please allow her peace in her work. That is not the point to me. She knew of my na me as M-ah-ss-toe-vai-ya in Ukraine and was so impressed with the work the "M -ah-ss-toe-vai-ya" had done in improving land value in the Ukraine I was treated just so special

even though that day in the USA I did not feel so special. So she says the “stone markers” which define roads and addresses and (from Gramps) stone bridges over little creeks and such (golf course water hazards often show these) were all made by the M-ah-ss-toe-vai-ya” Most in Russian Cyrillic it looks like Moct is the word for bridge. In modern bridge is like a huge suspension bridge. So about the ending of the name Voy not Vaia. At Ellis Island the guy felt it read feminine and wouldn’t accept it. So if it were Spanish changing to Mosto with accent on the end wouldn’t just be normal it would be accepted. Say it were Dutch or German or Nordic “Masten” or “Van Masten” would be fine just because preserving “Moct” is what the family would want. Of course insistence on universal acceptance is up to the world’s places. The family is OK with the end of the word change.

Anyone remember the CSK? The cunningly simple kingdom reunites with love for tea.

In Europe a man comes to realize he must see the USA. He arrives this Mr. Berger Van Mastbergensternoosterwitskia he stops into Sonny’s food tonight in this Camel Hair coat so new it shines a feeling that of course no one even in Al Capone’s Chicago no one will show a dark side too. So, he goes around and sees if it’s OK for us and that’s cold.

In his Europe folks at times went dead in the head. If a guy goes dead in the head and another guy acts real special and keeps him alive as a helper it’s totally normal and not totally secret as to who is “dead”

Now you get to me, Bill Mr Berger Van Mastbergensternoosterwitskia knows full well I’m not “dead” Everyone in my life knows I’m the guy.

So you get to our mutual friend Stephanie Nee Getter her guy went out in the head because she took it out. So on their trip to Gothenberg it’s obvious the guy is trying to find her. Only for years my name is used as the other guy never knew what to say.

So my guys in the old Hebrew school gang are like, the circumstances would indicate he could not possibly do the stuff.

So, yes he does. When they go dead in the head I get taken to Leadership training. Yes the first special school happened in 1974 or so and I did mention the special school. Of course to Japan it was meant as our “nice world” use of Yakooza, where one is separate from the blessing intentionally so everyone will not fail if the big ship fails.

So each time the leadership council convenes we discuss the state of the planet as in who gets to make cars, computers and various things like military hardware.

The reason for public saying, pardon. Is that you mother fucking Jewish pals of mine can't justify anything to the world as to why we get to have ONE god damn thing including our own human life.

Of course I want to say fuck off to you but since you murmur something about parlor games to some nig who takes a poke at me. (he wasn't gonna kill me but OK if the money says take a swing many folks have more then enough anger to piss him off with a poke)

So now these Jews are "Up in fucking arms" that someone else should tell them they have been fucked in the ass by worldwide terror and international "fair" competition.

Your kids are stupid, your schools fail, you drop countless amounts of ordinance wherever the hell you want and you want me to justify at the meeting what's cool about you.

You put me in a very awkward position and I resent the hell out of you.

Thousand File Data Keeper:

[Daskia Cpacebo Los Angeles FBI Berman]

[Mr. Berman identified himself to Mr. Mostovoy at the address 1032 W. Oakdale as the SEC -FBI Informer in 1988 due to a forced warning to another individual that the two of us had as an associate at the Board of Options exchange, since the individual in question may have wanted to address me negatively to do something against Mr. Berman he revealed in his own sound at 2 foot distance his role with the SEC and FBI. The FBI was merged with Homeland Security in 2004.

Mar 30, 2013 09:41p CDT

Berman Profile 1001; So I have a friend Bruce. Bruce went cold early with an insurance policy fund after his father died. Bruce pays the plumber or tells you about the dangers of fat calories for your heart. I decided to work up a profile as he does so freely share the meaning on Bill's life to potential marriage types. So Bruce looks like this to Bill.

[Da Berman gewolle Die Punkt Hier is Will ist Das, Ha, Ya Nicht Kind Will Gesproch Schrieben Das und die man ist Kinder Tod! OK abend neugen gut]

The response of the child must be attempted first and foremost. The quote, "Hear little one I have a piece of candy in my pocket would you like to take it" The limit of comprehension can be seen by emotional instability. His fear of men and castration has left him without the tools to function in modern society. The tragic irony of the life is that achieving the dream of partial awareness of life is available in the modern world. Work self is declared to have no impact on private life, legally (to himself). The realization that all the world does not love his stooge leads one to believe that the drama of death is laughable. The man is Jewish without question. To be a Jew implies some sort of respect of others lives. The nature and questioning of others mating habits while passing on 16 perspective wives, (although not the entire list) has gained loyalists and not people he has taken advantage of. Thinking, pondering the car seat does not sit well with what passes for a legal mind. It is this man who through ignorance can destroy society as we know it. Do the ends justify the means? If money is the end result the answer to this man is yes. The devaluation of law leads to anarchy and can create a society of lawlessness and mayhem. What have I brought to this man's door? I can certainly say that looks can be deceiving. The re is a joke he tells, "If you catch your wife in bed with your best friend, who do you shoot?"

In the final analysis it is the case that he has mastered the look and feel of his life. One German Car, One SUV, One House, And One Job. What is wrong with this little one. With every million comes added social responsibility. What would have been enough wandering the southland. One day he may have to do his own dirty work.

Imbecile that he his, disgraced as he is, he will die a Berman. (No threat intended)

His Friend in Fire MTR

Roth Profile 1001

He's backed the wrong horse so long he doesn't know which end the shit goes out!

NOW – Let the man write.

Gut:

Berman attempts to be an adult professional person through the means of artificial attainment of mental presentations. Through acquisition of phrases that collect respect but not the knowledge base that creates

thoughts, pre-programmed acceptable answers sound meaningful and well. The nature of the earlier report of foolish behavior persist. One on thoughts such as the economy, he has been programmed that any raising of the corporate tax strangles business. Any and all attempts to further a meaningful adult conversation become impossible as the individual who blessed it was a crook. You see the explanation to people of a Jewish faith impresses Jewish accountants trained before the "Berman" era as the king of Israel and an FBI informant on securities violations. Now a Homeland security agent every and all quotes do not belong to Mr. Berman but the German people.

As the Forum business questions are obviously well and adult perhaps Mr. Berman as the most important Homeland Security American in Los Angeles could discuss all of the answers with you. At the very least let us hear the business answers,. As you know the German will ask and read the smartest answer to him.

Only the young German can't possibly respect any of the questions. You need for the exam to get a Jewish accountant over age 50 to read the responses to identify which sort of political life Mr. Berman is portraying with you.

Specialist(21)

The person is not running a business. We are running it covertly. What is your interest in the old man's PC? He himself has been bankrupted 3 times by me personally. If you money hunt him we get pissed off at you because you destroy honest stealing. Yes we sell to other people for big money. The guy writing it never sees one dollar from it. Just buy it, if you missed the live. The guy loses respect for honest stealing because you old people think you can steal it for nothing. It's like a \$5.00 bill for the money stuff and plans from someone. Leave his stuff alone please. Take a shot in the dark at the guy who told you about it and ask how much wallet money the guy wants to give it to you.

Yes the live sale of the German system to "Watch the Russian Spy Live" is most impressive and pricey. Welcome to those guests. As a Russian spy you note the fluidity of the manner of writing of the individual do you not? Perhaps you would enjoy some Russian love through the use of Stolichnaya Vodka. The caviar of Romanoff is most excellent although the fisheries in Russia have some issues on occasion. Yes the Vodka and Caviar made Russia what it is today. The American people have issues.

The poor Negro elected to your White House encourages everyone to take part in criminal activities. The 100,000 Red Army Soldiers on U.S. soil love the game so much 10,000 have become officers of the Police Departments in all the states. The American method of bribery at first seemed to amateur for belief. The Russian method of payments, now installed proves how effective the great Russian system is for you.

Your fascination with German interests the woman mostly who never used logic but feelings to dictate the criminal behavior of the animal within. Yes Lions are most impressive to you. The cross cultural divide in Russia was solved in Math class. Russians were disturbed during Philosophy and Language but not during Math. The proof that one could accomplish the most non-natural but synthetic is the smartest one in Russia. The "Hair" love amuses us. The person says certain hair can and can't accomplish a bright thing. In Russia hair is your Pubic hair then you would think the body hair and last the hair on your head.

The most love puzzle it is agreed the Jews in America are the winners.

The fight puzzle in America has gone to the African. The African head is run by Russia of course so when you think of some English king in Obama's head you fail to realize the only reason people do not debate Mr. Obama is that we do not allow it.

As for detected information on Mr. Obama, he has asked his friend from England to do the math for the US Economy. We are told the English professor to justify his position creates a puzzle worthy of the great Lypunov in involving the multi year deficit increase vis a vis decrease through special derivative functions that may take several months to run through. It should lower it barring the derivative inversion effect that may be discussed in the third week provided the first weeks do not need review.

BM(Age 50)

Important people are called PeePee's to some which is to say one Pee is for Powerful and the second Pee is Person.

When they tapped me to run for public office in 2005 the call to David in Novaks office at the Washington Post should be reviewed for public what happened.

So as it happens "Dispute Settling" my group claims I left our local problem solving with the call. It was just each of my group said you could take anyone on in the group and run them over with your life. I wasn't going to let this happen without a declaration for Washington.

So about the groups first way, there is this thing called "Taking a Neutral Corner." If you don't allow Neutral corner as in "Which group is the neutral corner on it" you get Melee which means the people who throw chairs as unrest in a chair throw them at anyone. Pie fighting is one thing but the verbal stones showed the melee was on.

Video for William "Bill" Mostovoy downloaded to Status. 2:43p
3/30/13

[Personal Statement on girl love]

The ball of wax. The big answer.

[Dressed Sloppy saying it]

Come on tempt yourself click on the link and watch a video—

William "Bill" Mostovoy

5' 8" (with shoes) 172cm tall

As of 3/27/2013

NOTE: To do the weight match use Body Mass Index (BMI) BMI currently 28.9. I am not trying to make you guys diet. The doctor says to stay alive I at least had to be under 30 with it. The actual at weight is 24.9! Wow I couldn't believe it but then I made 50 and people die at 50 of heart attacks so I went on the beans and rice thing and it worked. 25 -30 is considered "overweight" 30+ BMI "Obese"

Weight 186 lbs (down from a high of ~220lbs Jan 1, 2013)

Condition: Type II Diabetic.

Folgers booze is up. ¼ cup corn meal, 1 cup sugar, ½ tsp yeast, 1 big coffee container (plastic) with warm water 8 barley bits, 8 rice grains as a bless with grain.

Bon Appetite is to Dis some proper Englishman, you don't have to feel French. Mangiano is the same wording in eyetye. Como Bueno in Mexican is cool. Remember you don't have to switch how you feel in North America with these.

Lindsay and I dreamt about doing up a Mangianos in Old Orchard mall (She might drink and I will look the other way)

Jennifer and I dreamt about the 95th floor of the Hancock center to discuss heavy economic issues the nation faces. (Points, its about points, The rate is zero dear we can't go negative and it can't be stimulated more with point movement)

Daniel in California has the key video of what Lindsay and Jennifer need to keep kids happy if they take the diaper off and run to the potty. (He looks fine that is what it looks like to diaper dandy and diaper general boy)

One other thing about who you feel might be Jennifer and Lindsay put up some nut or if you are not a nut but think you should see what he thinks is nuts on the developer page. No lie it's like Bill looks like every "Doc" that told Bi-Polar girls to take their meds and then they grow cold to this doc with a reputation. He enjoyed thinking it himself about this. You see he did tell them this only they want the docs on the same medicines to prove they are OK to take.

Bill Mostovoy(50)

Many people feel since Bill suffers from Bi -Polar disorder he writes the book all bi -polar people write about God saying your groovy and saint Peter might let you into heaven if only the Lion would hunt other apple trees.

If you want this book Retha at Amazon.com is for you. Apologies to the author for duplicating the description. It looks good.

..

He didn't do anything like that Bill said. Ms. Bogard was messed with on NBC 5 morning television this morning.

In Retha's Song: A Rhapsody of the Soul, Retha hears her "God," the sun, speak to her for the first time at the age of seven. He speaks of a baby boy being born who lived far away from her and is her beloved. As long as she listens to God's voice and stays on her path and the young boy stays on his path, with God's guidance, they will meet.

She strays many times from the voice of God and her path. During the journey, she is struck with a devastating Bipolar Disorder, and her young son is diagnosed with Crohn's disease, which nearly took his life. Her faith began taking new direction, and she began experiencing phenomenal supernatural events in her life. Her intuition became increasingly powerful; however, internal, mind-altering suffering kept plaguing her.

Music, directed by the angels, was the compelling force that was the interwoven thread that could bring these two souls together, as they are both singers and songwriters. Could a miracle happen?

(:

So still many bi-polar friends check in either by going to the web site or asking a "blessed person" what is on the first page. So the bi -polar older person who wants to be both Jewish and my father hears, "There is a very nice picture of Dachau" on the front page, He says that is where the Jews should go to see it. Of course it is clean and modern and an elevated train stop because in paying respect to the martyrs that died Bill as a posting web person must actually have been there. So the fathers blessed world is

currently so worried about the concentration camp picture coming back to haunt them.

[deutsch]

Der Kinder Die Worten Nicht Gut Weg Mit Juden. Mein Nom ist Will. Will horst das. Die Worte Will gesproch opfer punkten kalt ya. "Will lieben fer der Kalt Deutsch Kind Gesproch Tod Juden. Will Lehernst gut, Ya. (Implicate in English)

[evrit]

Ha yelda v ha yeled midaber SHEL benyamim, "Tov Mayod Ani Lo Tovah Shel Berlin, Achshav, L'hitraot" Benyanmim lo echod sha -ah ha midaber Ken v lo. Lo lama sha -ah. Ha Berlin Yeladim shel ha yeladim shel ha Bayt Hatorah shel Chicago, Lo Tova shel Bayt Torah ha ertz. Ha aleph-bet v'angalet "implicate" L'hitratot.

Bill "Loops" Mostovoy(50)

Do you remember the red house on the hill story? Funny the way people cannot use "phonetic" writing. But if you could hear someone say and know how they remember just so well "the city in the teens" of course it would have been fun to know the sensitive men of the teens.

I remember America in the teens just so well.

I remember the love of the world in the teens.

The prep people give good tasting things to the long haired loving people in the sensitive person manner of the teens.

The confusion over the word teens occurs due to the debate on acceptance of the abbreviation A.D.

In life some over 13 years remember a year 1999 A.D. the modern person accepts themselves as not accepting universal religious based day keeping.

The years 2013 -2019 formerly found the name teen useful as the ending of the word in a language ancient mariners found useful.

*1 As the worlds dominant culture have no basis for knowing the mariners wording the nostalgia for an assignment date sequence of years shows the trivial nature of a mind not trained in efficient human processing.

*1 If you disdain this comment you suffer so severely from a delusion of success you need to focus firmly on human data processing functions over your proscribed "Humanism." Honestly doctors and philosophers, if you miss this trend your marginalization means you will

have no one to play with or respect you. To note with you, of course it's stupid, did you wish to have a smart person in your head doctor.

Non Voting person and Presidential Pal Bill Mostovoy(Age 50)

If you are stuck in Michigan for a summer go ahead and Michigan up some product.

Illinois and Michigan united for good drinks challenges you to get drunk using Apples and Corn.

Can with a sack lunch played with i n the morning get you drunk the next day at noon.

With the creamed corn or ear of corn

Substandard Emergency Recipe:

2 liters water

1 Ear corn niblets equivalent ground bost boiled

2 slices bread

2 apples

Boil water then add all the ingredients.

10 minutes later blend all solid ingredients with a Braun™ immersion blender.

Allow to cool in the pot for 8 hours.

The Good Stuff Recipe

To the above add a cup of sugar and a tsp rice a tsp barley, 6 hop pellets, 1 cup white sugar, 1 cup malt powder, 1 tsp vanilla, 1 tsp orange extract, ½ tsp yeast

THaks.

Mar 30, 2013 05:26a

Bill Mostovoy(Age 50)

If you see the folks at Trilogy you can say, "Bill said he only wants to speak with people that want him, Independent, Safe, Secure and Happy"

The Bible of Bill worked out to be "Be Realistic"

If Bill went cold to his Bible it was just ...blah blah blah...facts dictate control issues rule the financially and socially insolvent.

The Social Security System Administration of the USA issues a check each month. This check tells me the control is in and human factors in the electronic life matter little. The belief in "Ghosts" amuses people.

Bill is not a girl hater. Girls "Emotional last stands are the ultimate experience." Rachel and Cindy and Lisa say if he is finally ready to accept what girls go through for the ultimate satisfaction they have found it. Since at that time they finally "Got Pregnant." There is no "Guy" equivalent to this.

To bad about me being a filthy Jew to you.

I never took one person in my life as "my soldier" to act cold to someone.

I never believed I controlled another life with my mind.

It's like everyone on Facebook finally realized it. He is telling the truth. He has no children. He doesn't spy on people. He doesn't have an army. And his money is real and valid from the condition EXACTLY as submitted. Sugar issues. You missed it yesterday he was laughing walking talking and joking and his sugar went out. If you saw it you knew that if he didn't eat right then it's over.

Bill "Pepe" Mosto con accento.

Explica a mis otras apartamentos, No hay problema con sra. Solamente despues de uno ano no mira a ella. Por dos momentos frio y ahora a mio con calor. Solamente por ella apartamenta para ella. Yo digo es OK cuando AHORA you digo miralo you no entrada con Ud. Aunque despues no es una invitacion a observe mi apartamenta. Si yo explica no dinero or oro para costuma. Si con electronica mathematica machina. Si no usa nada para malo activos a personas aqui. Es importante a mio que mujeer conocen es OK con mio, no tiene a aprender cual ciudad es este. Estoy seguro con cervezas hoy. No hay problema. Aplogias a otra persona con amigas c on chica a abra mi boca. Solamente nueva a mio. Es Ok en future a es Ok si necessario a entrada por mira con malo activoes. Solamente no aqui. Una pregunta a drogas la mujer dice NO usa. OK, yo no primero facil. En future yo miro bien porque yo apreno la situacion por una mujer en la ciudad.

Mi amiga de Chicago a FB tiene problems con mio. Por veinte anos no mira a ella. Mira la madre a una idiota y la foto a mi abuela chica con muy Hermosa hijo.. Si a mio mira a miio. No tengo una hija o hijo en todo mi vida. Por uno momento quiere a escribe una nota con una cheque. Mis

Amigos escuchan a FB y probablemente no dicen verdades a facil cosa. Es verdad.

Hasta luego. Si otros con amiga aqui OK si.

-There is this thing called "Dark" in "Dark" a subject must be approved to do something if it is to be assigned as a name. The person in question does claim to have his name on some things. First, "Dark" in 2013 says, "You were not supposed to put your name on anything." Now as it happens, when you collect Dark and love to fear it as I do, one said "Sure" and then 10 others say "Sure" I am aware that you are at least "capable" at putting something together. At this point 10 other Darks **COMMAND IT in full DARK DEVIL. THIS MUST HAVE YOUR NAME ON IT AND IT WILL BE SEALED IN BLOOD.** Figuring it will be bad or embarrassing and the author or the person will have to live with the "embarrassment" in a blessed way.

So I say, as I fully admit I love to fear it, read the book and answer what you would say if someone said some of those things. Take the notes on the site and don't repeat the statements, answer them with as much verve, tenacity and obfuscation as you find necessary.

Historical Stuff as in this is the type of good information a great company like www.godaddy.com can provide.

Although I did say the 15,000 visitors this will show you that in the first 20 months Mr. Mostovoy and **NO OTHER PROVIDER TO THE WEB**

PAGE IN ANY CAPACITY drew over 5,200 unique viewers. There were no meetings or other developers of any kind on the site.

(home)

Bill Mostovoy(50)

The objection to a web person saying something like Notice is to official. This is apologized for.

OK, there is a thing about should someone pay him for something.

People look around and things to see if he could "be on TV" or something.

It is true he says things some would want to here.

All in all it was concluded, "He is not nice"

The fact is you shouldn't be permitted to use lethal force on the person just for this.

You vote "NO" to him being paid or appearing in anyway on TV

TV has good people as it is. At my age 50 it's OK. If you could find it in your heart to let the guy in the tiny studio apartment just live with what he has on his fixed monthly income then it would be nice.

Did you want "YES" for awhile yes. Over exposure on the internet made me realize without a good left hand, or right if you prefer, you should just rest.

HOMELAND SECURITY NOTICE:

My Sponsor is Toni and Glenda "nickname Michigan" is the primary. Toni must not be troubled as a business owner of "The Growling Rabbit".

Furthermore after public, private, medical explanations be it known the blessing issue and the name of the blessing is: Gun

The blessing "Gun" goes back a long way here. The blessing in Chicago on electric, mechanical things, stores and kitchens, living rooms and byways is "Gun"

That is all. You do not respect our religions. Only the strong survive. That is all

Those that use the word "Bless", "Blessing", "How is it Blessed", "What is the Blessing" should be considered Mentally Ill on the official Homeland Security System. A subject that offers Grace or a Blessing over a meal is exempt.

One note if a religious saint, patriarch, Muslim Leader or Buddhist style monk really cares about me saying it.

In the North America the rule is if you are Cross, Star, Crescent or Tao the ONLY BLESSING YOU CAN GIVE IS ONE OF THE 4. In the Animist religion or Animal Based form the people that use words should not suffer, as it happens Animals can't read. Understanding you want something blessed "Jackass" does not amuse our religious community.

So this Jew from Israel asks in her just wanted to know biggie small girl. What about Native American Indians and Tribal People and Animists. I of course know the answer. Who did you think was asking what of the four it was? As for when each has power flow with it and collect the great spirit.

Bill in the Morning_tentative(50)

It must be nice to make sales calls and make a sale. Back in the day selling at Chernin's Wolle Sanni from Nigeria, Ray Garza from Mexico and Rich Howlett from Chicago were the managers. Irv Udowitz from Brooklyn became a manager not long after and it was a great "straight commission job" for us. Putting up a grand on a Saturday netted you 6%+bonus for multiple pair sales and sale shoes. Mr. M wants you to figure out about how much that is assuming .50cents extra per sale and an average shoe price of \$50.00. So anyway, morning coffee is the usual at a place that normal people would say OK at least ask trade a web ad for a few coffees or give a mostosoft magazine for at least one free one. So anyway putting on a status that at "The Growling Rabbit" on Lunt in Chicago, you can get a coffee and examine a print copy of Mostosoft Magazine may be over stepping what is allowed. Oh, did that slip out.

So, my pal reads this at Trilogy, Inc and announces to the Mentally Ill girls, I want you tentative this morning. Oy Vay what an asshole. The nature that first nature examples some times work with the ill. If your turned off by it I say good bye for awhile. "A big cat is in amongst the trees and makes real low and is prowling by a squirrel, the big cat is getting into it but really doesn't want it as a meal. The female(in this case of course it could switch) takes her paw at full go and claw paws the behind of the male, he looks as if to say,"Hey I was getting into that.", She looks at him as if to say, "Do you really think I want to make a cub with some cat who acts like some squirrel"

Currently Bill_at_10_oclock_coffee_bemused(50)

Not presently a paying customer at Trilogy, Inc, Mr. Mostovoy considers himself a supporter and donor to the agency. As for keeping tabs and updating Trilogy, Mr. Mostovoy met many employees and clients at the agency and agreed to donate valuable rare books to them.

As for people that do "Human Analysis of Psychiatric Health" Mr. Mostovoy is aware of the importance of "analysis" he concludes that those that disrespect words that people use in key places need to be reviewed.

Confused

Complex

Over-Educated

When these words appear with someone who hold an Engineering degree conclusions based on one day will never satisfy the search for truth. (Any college diploma is the same as Engineering) in these regards.

Every fair vetting of the truth individuals had free access to him and concluded he is fine and good to go. A paid approach as to "We feel he is

dirty. Go get him” made trouble. It is my firm belief that those that accepted the challenge of getting him have scrutiny as a final diminishing of faux smart behavior to another established and well person.

You see Mr. and Mrs. Get something on him. Homeland security has there eye on you as “homeland security fool players.”

*footnote A rare book at the Vatican is examined and not kept in a vault. White gloves are used just to make sure. In a laugh and an honest, no the rare books in this case are like a “Mouse” version of Rare Books in that the original person only made a few with himself. To some even the lowliest of persons like Mr. Mostovoy can say he did it with so little resources. It looks nice because Desk Top Publishing on the internet made it possible. At home he made one and cut all the pages and made a binding. So in some parts it is rare that someone might decide to own the creation of a minimal lifes efforts at success.

Mar 29, 2013 10:11a CDT

Bill Mostovoy(Age 50)

The fact that the majority of the people I deal with suffer from mental illness may confuse decent hard working citizens. The fact that the state of Israel is not up on the fact that two woman who look the same and have African American features can differ in terms of mental health needs shows “Staggering Racism” In 1996 I went through a “recovery” program at Tinley Park Medical Center. Princess Williams an African -American person should really be considered different mentally from Rhoghnette and Ramona, names withheld here but Princess and I know who they are. As for the “unfair” fight Israel created, this is one step in showing how people decided to throw the election. March 29, 2013 you can see the statement about “woman Bill meets”. If you ask the woman Bill meets how is he doing, the woman all suffer from mental illness. I don’t know what you expected to find but the void in the woman’s lives WAS filled by your passion for an honest question. They do not stop, when you said,, thank you that will be enough.

Mental Illness sufferers you have not been left off of the site. Developer Rewards has a video showing something to you. So you say Bill is bossy. I am Bossing someone from Trilogy Inc. to look at the Developers Rewards page every day. Entertainment page is at the consent of staff.

OK, it was not a first experience with speaking with someone in 1991. Let me be clear. It is OK to disbelieve someone. You sure can disagree. Many facts of reality such as “attending” a hospital in 1991 are

the only fact to patients. There is a real important person who could check to tell you. January there was a military action. It was on TV news. Bill spoke to much about it. He feels as a person that has international relatives that someone he loves felt he should NOT have witnessed something called international military crime through the use of bombings. The fix from his American girl seemed to be a powerful "Halucinagenic Drug" that produces mental illness symptoms and may clearly be called this. The person is not arguing about the diagnosis. The fact that a witness of a crime may be the victim of a second crime should be known to you. The military action was known as "Desert Storm" and The Persian Gulf War.

It says you were crime. I had a fake ID card. I only had it so if someone wanted to really kill the guy who saw the war and blabbed about it, I could maybe make a play and say "I'm Chad Hutchinson and Bill the Russian Jewish over smart guy isn't me." But someone must have seen the computer printout of the thing and me sealing it in plastic. So at the County before paying the \$500 fine I got initiated into three gangs. As it is old people just are like wise and advising about legal and life. Deuces is what I felt I was as if you and your friend and the other guy and his friend know people that's what that is. County is male about the insult as "you guys are fags" Next it was the Kings (latin kings) Being white and checking my Spanish it was cool and fun to speak the language when I could, including Cuban version, Puerto Rican and Mexican. (if you are from a Latin Country often you don't say something to another Latin country just the same). The toughest was the Vice Lord initiation. (As for the Muslims I'm in but not about the gang of it really). Vice Lords this guy starts in with me, have you ever used the "N" word. If you're a tough and big you say, "F U Nig" and swing. The pain involved in the hit back and the fact I couldn't insure a "tie up" situation I shrugged. But having backed down as people will do the long and the short of it is "mostly we stay home and play video games and talk about being cold". There is a Vice (crime like drugs and prostitution are Vice crimes) Lord dance. Swing arms at sides face to face with another vice lord and shift weight to left then right foot. As for girls, Vice Lords is someones sister mostly and you might or might not get into a fight about it. Kings share and pass most everyones girl around sexually. These Latin chicks this all they want is to get "there king" this way and be made in cold.

Yes dear I am Jewish. The Jewish gang works with a guy called the Judge. I should say though I spoke some German with the "cage fighters" the standard Dolph and Goldy deuces. The Polish Toughs took the boot camp option for the "corn bread" and food improvement. They have jobs

with real money promised for cold things. Scammers and hiders do go to see the place but when you realize that, this is how people live, the first part of what the description was is what it was. Yes the staff both medical and protection have people from all over the world from the classic NGOON (hey buddy) to Ms. Ghandi in Medicine to Robeson to whomever the downtown office people look like.

William(50)

A game of who would you say "I" was your year from young to middle age happens on occasion. Wondering if it was real as in did you the person that asks really have your normal mom and dad and your just joking about how many kids really have no idea what that normal part that happened meant. Ok so as it happens I thought what that was to me. Those kids were called "cave people" Since there smart enough they say stuff about how would you feel to which people should say how would you feel switching it on them.

Son can you tell a lot of kids something? First a message in words could tell you something you would want to know. Say your Mom sends you an email with a subject ofhHope you are fine. And if you click on it, you could read it and it says, the Vanilla Ice Cream cup in the freezer is for you, go ahead and take it before I get home. You could then go and get it. The point about a lot of guys hearing the online book and coming and eating the Ice Cream and still being here, well I thought your mom might want to know.

Programmer suburbs(50)

I have it but so what she is some Jew. The "dark lady" intercepts it and feeds back coffin to him. She says to the guy, "were being exterminated" He knows, I mean the guy she's funning with that OK people mess around with words and maybe the sprayer for things was in. So the guy again sitting thinks Ok she remembers, "Playing with Billy's daydreaming general about worries." He throws her the best honest for it and this dark curly haired conspiracy of female dunces intercepts it to Russians. They themselves the two of them know it's the only answer but want "America" unhealthy. He says if you worry so much say "Hi and Bye" to someone 2 or 3 times a day if only on the telephone. This chick uses everything rebounded to him so cold, "why don't you" your some no sound and what kind of guy are you. All the guy did was answer. So dark curl girl says to Russian girl see he required "English Language" this should make you furious. No the Israeli girl gets into it yes why do the men of your

losing city insist on using this “English way” The guy really did and so did we hear the suburban girl who had some worry. The city dark girl set is the entire healthcare problem in the suburbs Bill from Chicago knows people. We didn’t say give us all negative out on Cicero near Midway. The girls and as far as I can tell respects maybe even loves dark curl girl for screwing up these people. The city gets health problems for it but the girls themselves get paid and the suburbs get no “music” called discussion. If you said (stressed as an actor would) you wanted all the bad stuff off someone, and you keep calling the dark curl woman is going to completely screw with you when you ask for something. After all that is what you requested.

IIT friends who care(40-60)

Bill thanks for the update on the Junkoleum™ problem update from Sheldon. Wanted to repeat one of the clever solutions to a Junkoleum problem. The silly putty story from Crayola \$79.00 for 5 lbs. Nobody could figure out what to do with this material so they made the toy which can be molded well and is non -toxic. It doesn’t set in the shape but can be re-used. The fact that it was lousy caulk and a bad sealant and a bad object creation tool did not matter in the toy application. Thanks, but I must insist John is really not a worm about software at all.

Friends of Bill(50) and Mom of Friend of Bill(65+)

As good people we could hear something more clearly as “Bill’s point is” rather than the quote “Bill says” This is no small detail. As for those that pushed “Bills Point” that the answer was food. That did prove positive however the icon based transit signs as to the needs of a person at any point proved much clearer. The words of blessing on the words continue to be, bless in person with wind. Which is to say, mental analysis proved much to painful and severe for the unresolved religious youths who desperately wish to participate in an analytical world to impress the few intellects remaining. Backtrack for a moment, see the Entertainment page before becoming upset at an apparent disrespect for intellect. Hang on to your respect if you do read and you do know. On the entertainment page you will realize 3 CLEAR and DISTINCT other answers other than intellectual analysis. First the Beatles suggest Love is the answer. Second Mulan and Ariel suggest fantasy, childhood and having children to love defines an answer. Third, on with the fight for control through the defined books that suggest analysis ended or at least should be suspended during the terrorist settling up and down period. If you apply to me, talk to someone also, the entire word usage and meaning eluded you. To say this IS THE MOST INSULTING and DEMEANING and FOOLISHLY ANAL PLAY

on the face of the earth. He not only DID say it he BROADCAST it to the world. What he would say is, "Any Questions" which is not arrogant to him. The guy already said it. If you don't have anything to say and are settled as your intellect please by all means DO NOT CARE A HOOT about what some personal web page says.

Programmer(50)

New pants at Marshals cost \$29.41 the size you ask, 34"x30" my College pant size at graduation from Ann Arbor. I am seeking to go with the AMA in getting my correct body mass index where the healthcare professionals recommend. America does have an actual chart that you should attempt to match to not be obese. Update (12:50) My correct BMI should be 24.9 to be in the normal range I am at 28.8. That looks to be a required loss of 36 more pounds. I'll keep after it to get to the 154.

Mar 28, 2013 12:32p CDT

Boy from Ann Arbor welcome to the internet steal game. Your Mom always wanted to be my asshole. What can I say you are nothing more than a monument to my incredible ego. I am smug and arrogant and just not giving enough financially for the insult I have given to your mother you. Of course I knew you would be a "special needs" kid. Best wishes in setting up the steal of the site. I am not keen to do it every day as an older person your assaultive behavior to me on the street tells me a mixed message about doing something you are either NOT able to do quickly or editorially you feel modifying and spinning the text troubles you. Of course if you feel that someone named me watches you and you are going to use "Spyware" "Malware" and other Malice driven things you will find out I have not used the computer this way and whatever. Of course everyone knows Bill can't win in telling you he doesn't, the game IS named Bill but funny how it switches as that guy gets to sleep with your mother tuck you in, get paid and be made happy and I get your love in the form of a federal investigation.

Don't use keen with me again.

Attracted older man afraid of being called a dirty old man(50)

As a person who lives near two major colleges, many young men and woman walk by. Long story short as I can, then the boys and girls have perfect internal organs, perfect weight (for the most part). Ok yes in school everyone looked love. Not trying to put down a mothers year or a daughters. Hoped it was a compliment. In ours there was like a "high sexual girl" she had 3 close friends,, they were all 'pretty enough" 18 other girls knew the 3 that knew the one people went with in talking as "the

fantasy girl.” Words like oh well and channel your interests elsewhere sweetheart mean NOTHING in today’s world. Obviously I’m missing it but I almost thought I knew that when one of “the boys” walks up to “another boy” or “the girl” the mechanical engineer side of all Michigan Engineer says those machines plug into each other without regard to any word or action either would take. I may have heard the “guys” as we called it say, “It’s called getting out of it.” Meaning giving her what she wants which seems to be operation of the joined system.

Mar 28, 2013 07:56A CDT

Of course you could think that reproductive services produced this at colleges but the nation is the same. I am not sure but L.A. Ca. seems aboard even not at a college of course.

College Man Living Life(50)

The mystery floats in, from a girl pal of Jim and Kurt last night about if, “I am as smart as I ever was.” I didn’t want to say “No.” so long words...calls for introspection...minds eye...bs...all in all very beautiful passage where you could say anyone that speaks with a vocabulary like that the answer should be an obvious yes...Jim and Kurt are however looking for the 6th grade answer on everything with the advantage they ALWAYS know which word the “girl” “bought out” on. So to explain, they said I went “under” to get the math in college. It would be tough to do and professors that bless it with live solves impress, so no I wouldn’t want to attempt many of those types of questions. In food, am I still one pancake, really, I’m not sure if others are on top of it or I’ve eaten it or it’s just syrup or butter or jelly where the pancake was. I’m fine about my “Smart and Sharp” stuff it’s just that some “long beautiful answer” like the mountains of my land have enough gold and resources for all, so yes I have all the Gold and Silver right where I can get it if need. But, Jim and Kurt I’m nailed financially if I open up about it I’m dead if I don’t I’m dead. (Kind of a shame)

Mar 28, 2013 3:30a CDT

So if you say what about “Susan, Laurens friend as Lauren or Susan” using your fine graduate student with them you will impress him as to your great knowledge and they will ask you to continue and ask how you would answer yourself and whether there is opposition amongst your peers on such things until you yourself want to know something you do not know at which point a “simple but honest” answer will arrive and you accept because you love being in words with the man. Further words grow to the simplest form and suddenly the fellow with the joke words that only some bozo would

want seem ill to you. They have titles called Corporate Sales. And at that level there isn't much to the game with you. The knock on someone is what you would say to someone to make someone else not want to know you. So the knock on "Bill" is that he is "unprofessional"

In today's world a person that is unprofessional must be something in words to horrible to describe.

Could you ask Laurns friend Susans friend Corinnes friend Lauren what a person "must be" if they are "unprofessional" Is it a "kid"? Miracle...after typing this I felt 11 years old physically.

Northern Illinois Huskies(49) (50)

Me, Kurt and Jim went hog wild getting easy woman into bed with words other guys came up with. It's from Dylan and stuff with remembering "Dylan Thomas" poems and such. We updated some made a video so we could comment about it with the single woman who wager there cold to the stripper who just gave a philosophy lecture that impressed them. A quick zipper drop OK this is the look of it, well I guess you could play with it and so forth. Anyway, bothering these guys is not my thing, it's that if you wanted to speak about what it was that bugged them in todays world, its (Rich Girl Kicks in) stolen for some pie in the sky Bill said bull shit that Jim and Kurt can't use but they discuss it with her just the same until she takes her top off. So it's Penis Envy new style where the guy gets into talking with chicks about hair and eye selection for the genetically engineered kid and they go along yes that would be cool and yes a genius dad with super athletic stuff would be totally cool and he these girls are into it, only his hanging shlong makes nothing close to this. So since the chicks are hot he does of course bang them but now to substitute something and hes all like what if I believe the kid will be this and then no it isn't but then someone else snaked me for out snaking them and there is a guilty part.

Cowboy Poet(64)

Heard about the kid that makes his livin (g) on bearing false witness to phony fathering fellow out in Seattle. So Bill says are you more of a Liar and a Thief or Liar and a Cheat and the kid and the German American boat building clown go with Liar and Cheat. You see we knew in Texas and with my cousin in Montana it's got to be made up, at least some of it. So the word we came up with was "Predicated." Each life that gets to the poet is predicated on a tall tale or lie or rumor. The wilder the story, the more the kid and the import get paid. Well the Englisman wanted it Dinousour so rumor was it went Teradactal. Giddyap. Not even you betcha.

Bill from the great beyond

Yes. Gary and My game involves moving the pieces. You can't win with your butt in a chair. However Bill from the great beyond had a "head wind" and "tail wind" issue in which announcements of his presence at new locations prevented the airplane or out of town method. He wanted "by the park" to be nice with good people and I hear it has gone good for his want and he himself has seen it. As for others, the move from South Cook to DuPage, Will, Burboinai and Peotone have reached Washington for the Illiana highway and Peotone third airport proposals. It's not Bill's fathers people there his. As for the Dad's that did not just get another TV dinner and helped, that is why they were "grandfathered" in to Six -Oh or Sponsored. Now as for the chess analysis, it is not simultaneous as it takes place in real time, it is n -dimensional as in a game you would have 3 levels complete with all the standard chess pieces a move is only on one board at a time. His business problem at Microsoft took 6 hours, in that time the local player insisted his local store not carry a can of corn. His girls insisted he behave like a Dad. Israel wanted to know if he bathed and the Obamas wanted to know if he loved them.

Russian Chess Master Former Moscow Mayor(51)

As translated. Bill played Chess acceptably. The Russian Chess masters assisted his opponents to defeat his game. There are 12 direct program inputs based in the software for chess to defeat his best moves. It took many attempts for the software but we have mastered the program. As for the mission to "solve the energy crisis" The look on Williamka's face in the halls of his fine place of education told the story regardless of the vile American sound around the event. They put to this 17 year old as if they were giants commanding him to solve this "energy crisis." He says would you permit me to get an Engineering Degree. At school we probed what is with the computer you said energy crisis he says he has to get low power devices and long lasting batteries first before the mechanical design. So not much happens until this idiot who you do or don't love Saddam Hussein makes a war. Opposing the word idiot tells me you have a different word for the person who lead the great Iraqi Republic as best as an Iraqi republic can be lead. In any event the LPG design is just about done and he explains to "George" and I wanted the quote exactly,"It's sort of a no war for oil thing sir" and this "George" gets so happy with "What's wrong with a war for oil, it's the best thing to war for." After all if you hold an oil well the guy at war has none and say a Texas, California or Alaskan energy kingpin makes an absolute fortune. Efficiency gets important and people pay what that black gold is really worth. So as for the Chess of it and George asking

him for the Chess of war we listened when he said a General knows what he holds as an asset and when to use it. The rest was easy, you told us everything he held.

Stephanie Shlarb and Stephanie Sagerman(51)

Bill was too smart for his own good.

Bill Responds through Fred's Dutch friend me(New Way)

I wanted to know if the test score was real and it was, the ACT 29. So yes there was something called smart about wording in your testing system. It is true that being too smart will get you in the kind of trouble. If there are 3 people over and you have 2 candies then don't offer candy. You see as it was told people told others that Bill was nice to everyone and that he was smart. To address the big one, which was, Bill is crazy. I would say that he was not crazy. He was not confused. The right answer involves things many people grow to feel uncomfortable and blame the smart person that the answer is difficult, painful and confusing. In the Dutch analysis Bill was never confused. Your unhappiness does not mean Bill was "Crazy". You will have to handle that.

Rogers Park Jewish Condolence Society(58)

Bill was a Drinker, Smoker, Philanderer, Gambler with the loyalty of a Wolf. A dog you feed and they stay loyal at least. The euro-trash scum dump on the innocent Mostovoy household this creature and then threaten them for years. It's a blessing he's gone. He was a horrible racist. He had the morals of a cold blooded killer, yelling shoot this and shoot that for days at a time. As a Mostovoy occasionally he would bathe. But we don't speak ill of the dead where we're from. Yes, of course he had a violent streak, yes he struck his innocent and loving father so hard he fell down and he hit the sweetest angel of a brother Daniel to the point that Daniel's arms really hurt. You don't mess with velvet in this way of course.

Programmer(50)

I'm sick of people saying people who get up "slave" to get a paycheck, work like a dog at home to keep everyone happy get actually called "slaves". The word is "worker". Even on a plantation when the slaves were not really OK with being slaves on any given day they were "workers" knowing full well when you work you could eat what was grown on the farm. Of course the other thing about some smart alek saying some degree is high and believing they can just say some guy is a slave is just not cool. The Man came down on us in '77 with the cold "east bloc" on it. The man may be the eye in the sky, you had better make sure your inside is fine

and not try some psionic bull crap because that just is not correct. You are a Comrade the other person is a Comrade, deal with that will you.

William "Bill" Mostovoy(50) changed his screen name to Programmer(50)

William "Bill" Mostovoy(50)

I'm cold to you because Russia and Germany in 1976 analyzed who an "Average American" would be. The plight of the poor African-American touched the heart of socialists and social democrats. This is now 2013 and the update for your TV is now, 'The Hughleys' and 'Dave' is no longer considered American bearded woodsman, but "German" Smith is black, deal with it. Now Russia and Germany still want to poke at Americans but you had better ask that Smith if they want German and Russian help in defeating America. As for me being a 'resident' or 'guest' of my African hosts. I ask are you 'Capitalist'? By this I mean every black person found using energy they were bothered. 30 years of PERFECT COMED payment is why Bill should get to use electric as he chooses to pay for it. One natural gas bill for 40.00 had to be forwarded to a new address, as I had move d to a hospital it worked out a few months later but that too is 30 years of good payment. I should get good treatment BECAUSE I PAY MONEY to support you and things we love. As for 'sponsorship' 300 kids signed we want Bill to live. Asking the 301st is so insulting. In 1976 it took 1 kid to do the sponsorship. As for me 'Asking for a sponsor' to live here. I have signed endorsements and have paid \$17,000 over 30 months and lived without incident.

Mar 27, 2013 04:02p CDT

OK Colonel Rasov, everything is understood but you feel I could get the country to use "real stuff" as I advised in 3 wars. It's not that your opposed to "real stuff" it's that influence to do it may take doing. I have asked you and others in the "Military Alliance" all over the world "if you could do" and you have. Graciously let me remind you of the problem. Yes Israel was on note about violence. Israel keeps 2 lists for me. On one list I am at the bottom for any Jewish compensation and positive health benefits. If Israel is loved "my Jewish friends celebrate and friends of Israel get paid and have healthy happy food and togetherness." If Israel is not loved, I go to the TOP OF THE LIST in a published form as "THE BIG JEW BILL and everyone then puts themselves on a "Big Cross Blessed American" list.

*****News Flash ***** William

"Bill" Mostovoy has a few people that want him to be without "Brain Wave Activity", "Respiration" and "A detectable pulse" in the language of

English that is known as being pronounced dead medically upon knowledge of these 3 things. Many use the word "Kill" someone to mean, "Take away all there money" or "Take away something like heath" . I love the places where an innocent lamb asks a spouse, "is there really a world where the power of love won't stop someone from wanting another person dead and buried in the ground.?" What should the loving but knowledgeable partner say? Honestly, if someone does ask another person about what they take money for in terms of "killin g" they might realize they themselves are seen as "unfit" somehow by the money plays.

See the film "Moonraker" a James Bond classic. Germans, the ship is German. Russians, the ending is a battle for space. Please forgive the "Englishman" in this one . As for Jaws the character and the dirty blonde "criminals" See what happens to them when they see the "Moonraker" ship crew.

William "Bill" Mostovoy(50)

There is a chance you want to tell each and every New Way government helper. Sacha and Malea rock! They are great kids. Each kid they know wants people to do government fairly. If you think this is picking on them it isn't. The papers are in on why this person filed for SSDI. The overriding condition is Type II diabetes post pancreatitis hospitalization. Yes the condition of Bi -Polar has been identified. Requiring something or justifying to these kids has got to stop. I just took my blood work last Friday 11 months ago an EKG and full work up were done. On Aril 8 -15 somewhere in there I will be in the office again. The deal is public because you feel anyone who webs so well is "stealing" a check. This is not the case. My heart IS good but the risk factors suggest stress of commuting and office stress would be bad as in finding Bill dead with nose on the keyboard. My friend Dave from AC Nielsen had the same and they did find him this way. Tony Kanwar, Laura Prendergast and me knew him well. Had a great Baker square in Deerfield with him once.

Mar 27, 2013 03:10p CDT

Best guys and girls know hot to get what they want and keep everyone around them happy with them. People could call this the smartest one. Lets say a girl has a boyfriend who is a freshman and he shoots free throws real well. All over school she says he is the best free throw shooter ever. Derrick Rose of the Bulls basketball franchise goes to a social event and she starts up with Mr. Derrick Rose that this freshman can beat anyone. Well in free throws there is some chance but not much the boy wins. An old

girlfriend may have said a few to many things about me being real smart. Well, many words were thrown around. Of course I know what true smart means and when to say something. [No Illegal drug exposure since 1985, others did use in 2004]

Mar 27, 2013 03:35p CDT

William "Bill" Mostovoy(50)

Wanted to get out today, its 11:32 now. On the way to meet Kinchasa at Chicago Ave and Michigan Ave for lunch at the water tower. Guy said he will meet guy there and act surprised. Gail said s he will meet Susan and also act surprised. German Nameese New Yorkers always do the loop so there won't be German Pig trouble.

Mar 27, 2013 11:32:

Oh, forgot this could go international baby. The four seasons is the best hotel for some. I recomm end it to Jennifer Aniston type people. International the Hilton on S. Michigan has what you need. The Renaissance hotel for French food and tight. The Swiss Hotel and Fairmont hotel if you really don't care what city your in. For U.S. based travelers I recommend either Hyatt in Chicago. English Barclays is nice. Old I mean old people try the Atherton (London Times most welcome). As for loop German kids, it's called a Taxi you Bauers. (Farmers)

Had a nice "stay -cation" at Evanston's Garden Inn H ilton. Chill's for lunch and a walk to the clock tower then down Sherman Ave and you have seen Evanston correctly. A nice classical concert at Pick-Steger is nice that evening. If you do love classical things. Other things include Davis Street Fishmarket and a walk along the scenic lakefront. (Not just then on the Stay-Cation.) Might be Allerton not Atherton.

Mr. Cabbie (Camel) from The Four Seasons or Water Tower..If you hear," Take me to the loop it's OK to go south on Michigan to Van Buren west to Wacker (upper) announce Wilis Tower then by the Civic Opera House continue on Wacker to Clark street South Exit the cab on Randolph. (if you please)

Assuming you're a friend. Airways rent a car is a great remote parking. Manheim road south of t he Kennedy. Formerly \$6.00 a day haven't checked since 2004. Shuttle to the terminal works great. In the cold they start your car. Trust is the name of the game anyway when you travel. Gated parking with glass house high tech counter area. Sign is ol der but so what.

Mar 27, 2013 12:58p CDT

William "Bill" Mostovoy(50)

Shachar was right in her investigation from Israel about me on Keeler. I was in German everyday. I thought I was so cold with it. The Polish kids (really over by Pulas ki and Milwaukee on Irving) thought German was cold too. Hilley over at Jazz on Irving IS and will be friend, she and the Jazz place are Israeli Vegetarian, if still open. Yes you got me, I yelled at "Washington" and Generals and Bush and just ranted in every language I could. Mostly I was lonely. Ahhh. The point that writing Top Game and Bridges polish maids and drills. Yes they have been inside with drills and rags while I knew them went with, "He plays the Saxophone." Which to some would mean the brass thing would have to be there. Many know what you would mean. It's like as Americans and we still are we were to nice. So people tried acting foreign to grow cold. New Years shooting had all of us weird. Who didn't think the guys shoot the pistols in the air as celebration? Turns out for 2 hours they shoot at people saying with revenge you lived big that year but no days in the new one. Chewing out Ehud Barak actually motivating this "little Jew" was great. He and everyone shouldn't be mad at the reference. If you do a diet in "lent" or "pre-passover" try Beans, Chopped Tomatoes, Chiles, Corn, Grains, Oyster Crackers. Do a vegetarian a favor, get a can of black beans (Bush's reduced sodium), Rotel (tomatoes and Chiles), Corn. Command them to open the three cans and dump in a Tupperware. 3 Glad Tupperware at Family Dollar second aisle on morse if you play treasure hunt. Salt and Pepper and (Vinnegar optional). Then just make or have rice or barley when ready.

Mar 27, 2003 9:30a CDT

Tell the Old Irving newbies as well as Rasov, Spain and Black South Water... You have NOT been to Chicago until you solo or with a cool other sex stood on the corner of Michigan Ave and Chicago Ave and found a park bench.

Mar 27, 2013a 9:35a CDT

Each neighborhood built that part of the city. Red line to Chicago or Blue Line to Jackson to Red Line North (to Howard) is really a good way. 146 bus from North Sheridan Road. 145 bus from Irving Park and the inner drive. By the way, the reason, the World Trade Center attack was cold. People should want if you fly to a country the anchors like high rises and downtowns would look good with ANY sort of decent people. It's just to cold to destroy these fabulous anchors the whole world approved up. Yes it's real big and people could do something cold from them but they would

have to want to and how would they get there? About my "Violent" ideas, I wanted people OFF handguns. It didn't prove anything to you but stick and stone war beats your rapid fire auto mag way to many and me.

Mar 27, 2013a 9:35a CDT

Colonel Rasov(38) – Morse Ave Boiler room (at Sheridan)

Thank you for surrendering Mr. Mostovoy to the Russian Navy located at Morse Ave in Chicago. I am 6'2" and of bald head. In Russia I served as a Colonel in the Navy. I have 10 men protecting or should I say guarding Mr. Mostovoy in a prison type situation. You are wise in extracting information about Russian spies from him. We can tell you there are many as we have taken your General and made you believe he was a Russian spy. Thankfully we got here in time to prevent the Arab kidnapping and the forcing of Mr. Mostovoy to construct a device. In Russia we already have many devices. Your Negro is shit and we do enjoy him. The fine behavior he displays in what he calls Harvard gets us \$20.00 a night or so before we make our spooky jail sounds out his door at night. American cops take the money as do Russians. Make me a decent offer.

William "Bill" Mostovoy(50) Status:

There is no problem with people to me. It's just I know 30 girls who don't want African -American men or woman on there cool network TV show. African -Americans destroyed every television show since Seinfeld. These people have created cool shows for themselves with Black stars but white people find themselves destroyed mentally by it. Most times this person can't tolerate it other than sports. The love of money was all it was to get people on every show. So, somewhere the 30 girls wanted me to defend them and be "Anti-Black" what they meant was TV. I live in a city not on a TV show. People do things and whoever is there in the city you deal with. So there is no way out of this mess. The 30 live in white bread gated communities and put my life at risk. It was bad enough when they went cold to Mexicans and there Dad and I are at a restaurant about to get jumped by water pouring folks for it. We didn't say it. Now the mind numbs at thinking about how these folks used my name and address to abuse minorities. Yes it was terrible that those folks did crime and destroyed a lot of good. I have no answer. Your "Hard" evidence Chicago, Evanston and Washington is dead wrong. How you expect me to lead your charge with my background I will never comprehend. A guy doesn't turn in life that way. It just doesn't happen. Sure, lets say they worked over Cheryl

Readus with doctored video or Julius Turman or James Drake or Kevin Green or Kevin Davis or Kelvin Gumby my life here has had so many people with so much skin you people are dead wrong. Look I do know what your saying some of those actors have no business together. So what, read a book he said. I CAN'T HELP YOU RACIST TV VIEWERS. Do I hate when people put stink on things? Yes of course I hate this. Someone like an important person who cares should deal. I am some poor city kid who doesn't want to die so you can have an extra cool hour on a \$5,000 couch.

Mar 26, 2013 3:43p CDT

Living in close quarters and with many people who take public transportation, when things get heated people use sounds and sometimes growl. The next day or next hour this person walks out I say the same loving trusting things that the person always said. The next event is always in your face. I used to pass this homeless guy who honked off "A**hole incessantly" it annoyed me but then a tough approached as we were both there I leaned in and said now, and the guy hit it, so OK it did annoy but the guy had a purpose. Lets say the guy looks to tough, you just don't know when your city or place will need that fight around. If you have a better word help out, it was called venting or blowing off steam. Many times the words would shock the uninitiated. I do apologize I walked around thinking people spoke the kings English everywhere. So out of this mouth I joined right in and even tried working in an MF or two. Of course go ahead and use it on this one.

Mar 26, 2013 4:14p CDT

William "Bill" Mostovoy(50) Status:

My good friend, I value your support in the writing on the web page. It is with no malice that I suggest, I do not NEED to talk to someone, I need someone to NEED to talk to me. I am not enchanted by my own voice. In the writing it is called an absolute truth about why people use words. They use words to gain acceptance and further words or they aim to transact business with the words. The sounds and utterances seem to mean nothing in both regards with whom you have suggested hear this person. Without the NEED to hear me, the world is just to deaf for me to care.

Mar 26, 2013 1:35p CDT

William "Bill" Mostovoy(50) Status:

Many people want to know where people are from. Some countries, the one you fear the most lets say Russia, if you fly from Moscow to Athens and spend a week in Athens, then fly to New York in Russian you have not lied or deceived someone by saying you are "From Greece" Your head and food and what you brought in your body was Greek in Russian blessing. Many could fairly accuse the group of lying but this is how it is. Say Corinne says where do you think Foster is from and I guess Holland, Belgium then Swiss, you see I wouldn't really know. You could tell she assumed it to be an easy "English" guess. It isn't easy to tell. This born and bred Chicagoan is not confused or addled. Hope to tell you 8 years in a 20 mile range called Cook County, Chicago, IL USA, born here, raised here, earned my life here. Go tell aunt Rhodie the old gray mare is dead. Honestly people, I do not want Russia to win. I do think you should be careful if you meet cold Russian heads. Gosh what should I say if I meet someone cold who is in from Greece? You put people in a terribly awkward position. For clarity, yes Parker Laketa the KSU basketball star and H-F alumni was really concerned with us. If you need an explanation he is on facebook. Also, our older George was George Biscan, his son Tommy, now big Tom also an H-F basketball bench jock and occasional free throw guy will be able to make it clear. They have spent an entire life on the subject with us. Hope you don't grow to cold to these guys. Really be nice, if you can.

Mar 26, 2013 9:20a CDT

Because a person is special they love to share simple things. Lets say the person who says this is just so simple. The innocent person doesn't really want to believe such things. Most people are honest. Most people love and live clean. Gosh to even suggest this makes me think you will give me a wallop. In underdeveloped countries such as Laos and Nigeria access to luxury medicines is not permitted. Some people grow mean and watch pharmacies. That's not true Bill. Maybe it isn't. In my heart I believe all of you that medicines only get watched by healthy pharmacists and the insurance companies. I couldn't be more sorry for being angry with my judgement. Lets say you really are great, I do, I really do feel you are. The medicine Invega costs 19 dollars a pill at one a day that is over \$300 if someone from an undeveloped nation wanted to take it as I did so regularly. So if you could just check...is it possible there is such a person that makes worse the condition from the very fact you spend to get such a medicine. Honestly, most people would "scoff" act real cold to the guy like hes a total joke. Rogers Park is funny about new people. You can "win welcome"

here and someone on the computer might be someone to copy. Yes it is a good medicine. I have some but don't like to advertise it, even to my own family

Note to my keen researchers . In the case of "Bill" Invega is taken off label. There is a chance kids that your keen study gets beet. It's not that I fear judgements by you its just for your welcome to the medical community, Be skeptical of the quick keen answer. Yes Invega is a n Anti-Psychotic although it is being researched and now prescribed for other conditions.

One other point, if everything points TO CLEANLY to someone or something being bad it's most likely a framed situation. Your assignment is to deduce any and all framed situations. Lets say a person loses a pair of glasses and another person does a crime and "accidentally" leaves the frames at the crime scene. You keen kids seem to connect the dots to cold. Now the day I lost my glasses I put it on facebook, right now, that moment, I have my people waiting to see if someone says this. It's just to easy to fool you kids. I did not do anything like what you suggest.

Mar 26, 2013 10:40a CDT

William "Bill" Mostovoy(50) Status:

Nola claims as does Sheldon that someone hacked the send on the account and that the posts you see DID NOT originate from them. Social media may have this happen. The site cannot be accountable for this. If young medical students and younger begin playing conditioning of a subject they need to analyze past research. You shock something to correct a behavior and "stroke" or reward a behavior to encourage it. The subject called "Bill from Rogers Park" is involved in the Rat with no cheese anywhere no purpose shocking experiment. Once the subject was exceeded he laughed. It's not his head. It's that when actions are taken to correct behavior there is only further shocking. (Assume a shock is a threatening email a late night phone call a denial of funds request at the very modest level) at the worst people of a questionable character take an interest in making comments to him. Being mentally exceeded by the puzzle is OK. What the heck right you give it your best shot. Remember Nola and Sheldon claim "hacki ng" here but deny "Bill" Mostovoy's claim on facebook

Mar 26, 2013 9:20

Nola Penn(70) Status:

This is Nola. I am angry you committed crimes and went to jail. I am angry you never developed relationships with woman that produced love. I am an gry you threaten your father and our love. Who cares about some old Con Bums icons. Fallen Lassen Tod.

Mar 26 2013 2:43a CDT

Sheldon Mostovoy(70) Status:

The SNT law states you need itemization for every request before distribution can be made. No you may not see any statements of account. No you may not rescind the medical power of attorney. No you may not demand payment from the special needs trust. No I will not tell you anything about my travel away from home. No I am not interested in expressions. No you will not get to see the rage inside. You are denied anger. You know that Evanston has the dirtiest police force. How do you think 10 cops were at Teich's office the day you had plotted to get me. So what you may have fooled Judy with something, but I never knew who you were and you keep showing up trying to steal my fathers fortune which passed to me. You don't get one dollar of the family trust without severe pain. You are nothing but a Jail Bird Con who takes advantage of people with intelligence. I'm through with you. No one takes on my Evanston army and my Israeli army and lives. So what your bugged. So what you have nothing. Of course some Pole Stanley lets me use the drill if I set something up for you, you little girl. Don't even try to beat these people. Rot in hell.

Mar 26 2013 2:43a CDT

Mystery Girl(25) Status:

'88 is great. To bad about your old people. But your old also. It's just when the guy used your stuff I got into your head. I'm not giving in to you but I am going to use the finger print sensor on my computer with the software to make sure it's the same guy. If someone helps me pass this to someone to get an ID it would be great. I live in the building with the guy.

A ? Not one bit of honest communication in 31 years to William "Bill" Mostovoy with him. ? No one ever just asked the time because they had to be somewhere. ? No one ever asked a question they did not have the answer to. ? No one gave him the meaning of the meaning. ? Ulterior

motive and subterfuge is all Bill Mostovoy sees. ? Some people give warm regards well just the same and I make like I don't know about the screw job. ? Should you meet someone and they say they have Bill fooled about such things, he isn't fooled. ? Rude people do this to him. ? Once you take the money you act rude to him. ? Doubtless anyone that reads this will not have taken the money. ? When you said, "Have a nice week end?" did you know how mine would turn out? ?

Mar 26, 2013 2:00a CDT

But Bill come on did you have a group of people that were nice once. The answer is yes, but mentally I picture a little boy painted by Renoir looking at a wrist Casio as if to say reassuringly that in true beautiful mind "Nash" fashion, you will now be treated rudely for twice as much time as you fooled them into accepting you're a) Jew or b) Cross until you yourself have a lost feeling about it. After all Mr. Religious it is said, "how is it blessed", I had hoped someone would accept it is blessed "Bill" that failed as Bill the garbage collector from an urban ghetto and Bill the mechanic must have to say it to be blessed "Bill". I felt it was blessed with my being and collection of cells which contained the energy to relate to those who dared take on the obnoxious that a person called "him" was there. Rude kicks in instinctively here to the enemies of my health. Instantly the ladies chant falsely. Instantly the doctor suggests, "Give him false warm regards." Leaving off the word false.

Mar 26, 2013 2:21a

William "Bill" Mostovoy(50) Status:

A bit colder during each fight, giving highlight information it is wondered, "How does someone with that technical resume (posted on the about link) match." As an attitude it rhymed with a fun way to look at coding. "Loops and Scoops" "Loops and Hoops" "Loops and Poops" some went with a very normal good day or bad day way called "Variables" (Huh?!?). Of course you might come up with others.

Mar 25, 2013 5:56p CDT

William "Bill" Mostovoy(50) Status:

PhD. Candidates have an oral exam to qualify. A goodness and fitness test of morality also is used. Dr. Sheldon Mostovoy attained a PhD in 1967 from IIT in Chicago. As the son of an aspiring PhD then a Dr. of Philosophy then an Associate Professor, people wondered why someone doesn't "melt" and "just watch TV" Of course this person does love doing it. But someone, maybe an interested female reported me as lazy. Anyway,

Daniel a brother came along in 1967 June. To win as a PhD you must take all the tricks publicly with sound. So simple questions were met with so much force young "Billy" and "Peter" had to figure out why someone would struggle so with life. For example, "Why does a rubber duck float, (could have been the toy boat)?" was met with such a Buoyancy and Displacement lecture if you hadn't seen it you would have been sure Billy was real tall with a tweed jacket on.

William "Bill" Mostovoy(50) Status:

This person had a nice lunch at Leona's of Rogers Park today. Hope you can enjoy a provolone beef on a bun with dipping "au jus" with fries. Having lost some pounds, let me assure you my bun issue is fine. I love a good bun and good buns in specific. As for the lass that said "His answer is shoveling food in his mouth" let me say, the answer can be found at an airport or train station, the food icon, the information icon, the lodging icon, the transportation icon, the Olympic games icons for events, the religious center icon. Now even those that specialize in one area or go there for work, there are times they themselves must pick to go to one of the other areas. In 2007 this was my definition.

4-13-2013

USB stick spy information really sells. Steal it off Mostosoft and \$50/flash drive. Refillable.

Hi

There is a chance Google Earth is used to change the "blessing of Rogers Park"

From Juneway at the North to Hollywood Peterson South or reversed Lake Shore Drive ends into Sheridan Road North

Rogers Park is blessed East and West.

West is Jewish and Latin with some Black. Touhy Ave is about the center of Rogers Park.

The one SACRED ROAD or is it TWO or THREE....

Western is cold and functional, most Americans would just drive it. If you stop in, locals look like a Variety

Clark is youth vigor and fun, with international food from Cheap to Ritz (It's the north side you may use words of a descriptive nature)
It's your best action street.

The "el" stops at Granville, Loyola, Morse, Jarvis and Howard between Clark and Sheridan. For action proceed to Clark. Only on summer days you would want to walk to the BEACH and get off of SHERIDAN to the trail

Sheridan going South from Evanston has Disabled People and Old Retirement Centers. Some youth of African decent at Touhy beach, they love the park and hoops. Then Loyola and "insurance check" people such as myself and students for www.luc.edu Loyola University. Then the actual campus. Then Sacred Heart Cross to the north of Highrise Jewish Elderly.

It's cold.

Thanks, the book took place near Pulaski and Irving for two and Ballard and Potter in Des Plaines for one.

4-12-2013

My good friends did I mention Peter's second wife died suddenly at 42 of a brain aneurism, If you misconstrue it is on you. I hear in some places woman over 40 are asked to request an extra marital affair from a man with a car. While at her house she asks if he can still do a "hurled seat" she asks let me dump the weight of my house on your head for a second and she drops a 5 lb hand weight at 3.5 ft over his head 110cm and it falls on his head. She takes a car to an autoshop and says drop the engine

out and give me the value for it. She also siphons the Gas to fill her tank. You see you could say I was for this, but why would I be it would put my life at risk. 10 great girls each weekend, in one month that retirement picture and fidelity thing look good. Med Students why does the body which is 65% water become 40% water with salt dumped in the mouth.

-Mosto

Note to Louis, Mike and Alan. In a world where obvious “puff claims” about oneself take place. My claims have all been explained. In a world where some individual wants you to believe yourself to want to “outfox” others for a prize. I say over and over, “I did not win” and I am “exceeded” as to what you would want. Religiously she has me because yes I would have wanted to win and take the financial prize, get the girl and go to my “other house.” I can’t think of anything that would make this possible. I would rather die respectful then do those lives that do disrespect and run around the world on an airplane. I am not a passport holder and I am not doing any disrespectful bad thing. You will undoubtedly here this is some “outfoxing you” maneuver. I am just not clever enough. At 40 I may have thought I could beat the system of security and “get away with something.” Over and over for 10 years, fearing every store merchant may hunt me down as if I had stolen something I cannot be some “fox” to you. Hear I sit.

4-12-2013 07:06p CDT.

My good friend, hello. Mentioning “names” and “places of education” one could think dwelling is what this pulpit is about. To dislodge the present just for a second with you may remind you, the youth of a nation goes through your old story like it was new again. So to say, “Jimbo” has made his “Microwave Popcorn Maker” you would think that his school chum is on our minds. We progress as doctors of the pulpit by forgetting purposefully those immature people who attempt new methods of solving trivial problems to earn an unfair dollar. So the fellow, who thinks he can say is Jewish, but is not our friend, ally or associate thinks he can say a “Microwave Coffee Press” might be fun. What an idiot. Coffee is a celebration at a fine establishment or to be enjoyed in a fine custom crafted machine. Taking a teaspoon of coffee in a “boooowl” of water and microwaving for 3 minutes may make some brown fluid, that then can be poured through a strainer or filter. But you see this so called clever method is really grounds for our OCD squad to take over the so called “inventors” kitchen. Everyone knows the father decides on such things.

Note: Toni and Laurra and “Michigan” at The Growling Rabbit, one of you might run the at home “Coffee Haus” and brew up a pot and take the others like me for a cash bonanza or just good feeling. I mean it should be people you know to look at they won’t be cold about it.

Photo posted by William “Bill” Mostovoy...Not trying to prove something...I just don’t remember if I bumped into something. I don’t remember falling down. It’s kind of dizzy focusing on pages. To Argyle Abbey at Trilogy, I really am William. Your what no grandiose comment confused me. Don’t people like me say it that way.. As for could a person like me be phoned into Trilogy as an individuals “Big Person” you see that is not acceptable to some groups based on height and weight and condom size. It has been about two months since “Bill” the person made an obvious effort to say things appropriate for his size. It is his hope you would have accepted.

That you might kind person, tell Mike, I may have received a blow to the head. If this explains things. I am icing it down with frozen corn niblets. If it is not smart to say subdural-hematoma, I think there is something of a huge not behind my right ear.

Regrets. Saw Corinne today at Trilogy. So after a nice chat she goes to call the Dr. to see if she can fit me in. She says to him Sheldon is here. I lose it in a nice way saying have you spoken with him, “No.” a nice Good-Bye and a don’t call me said real nice and I’m home icing my skull. I am afraid someone will call me stupid if I ask them to look at the back of my head.

4-11-13(News Update)

Congratulations to my Niece who travels into the United States from South America frequently. Your application to be a registered importer of functionally controlled substances has been approved. This letter indicates your paperwork has been received and processed by the IRS. You must retain this letter upon any and all Tax Consultations from the IRS. The law enforcement community understands entirely your desire to assist the in importation of goods. The presentation of this letter requires payment of \$1,200 initially to activate the permit. At the request of agent “Orange” you are to supply the \$1,200 for tax purposes and be happy.

Sincerely,

Friends of the importation Bureau
The Internal Revenue Department of Project X

*****PAPER*****SAVE***

Note: Dates are NOT important on this type of document.

Signatures are for the NOT digital age. As for postmarks, no one needs those,. Hand delivered is the way to go. As far as names of individuals they can be made up in this type of thing for security. Contact information of the made up agent is never required on this type of document for security. If the contact person uses some jargon that would be OK on this type of thing. As for the masthead on the stationery computer paper and printouts should be fine. Things like the director’s name and official agency symbol must be omitted for security purposes on this type of thing.

Special Fiction Reissue

Well, the computer person writes a story that with observation and digital retransmission the entire world may fall down like electronic dominoes should one person in the computer game decide to link to real time military hardware.

Yes Susan, like an Anti -Aircraft gun or yes Rich like an auto -fire defense canon.

Did you know teachers and older people have parents often as well. In this case, even me the teacher figured out how to do Bill’s logic, that is the guys name.

So his Father doesn’t love the idea that foul play could take place on a computer so he says, “Bill has illusions that “he(Bill)” is influential when really his computer career is over and anyone can use DTP to have something printed.

“So I will tell you once I did it”, Rachel said, “It worked.

It is so simple if you can remember the KEY words. I couldn’t get it but in this case it went

	Book				
No		Yes			
		Influential			
		No	Yes		
		Injurious	Informative		
	No	Yes	No		Yes
	Dissociate		Pshciatric		

Action Needed (payments/battles)

Now at this point he says the book is to be considered NOT INFLUENTIAL and yet let us analyze the next portion. As it happens Bill's father keeps ALL of Bill's money. So when the subject of Book enters the equation how does Bill retain "Normal" operation of his life with this tree.

He says things that could injure reputations.

Who paid for church every day in Chicago?

This isn't Sunday is it?

Jack writes so well about subjects and now Diane says she will use the serious plunger if those old style deep questions find their way into Jack's head to explore. How does she know the correct loving approach without reason. The reason for love and the reason for wellness needed definition.

Your wandering Jack. Sit down and love, said Diane. We need more cookies. Everyone got lots of cookies. God will provide cookies. Thanks Di. So Hansel and Gretel say the English language makes people dead inside.

Gretel agrees with Diane and Hansel values the illustrations. Follow the bread crumbs to your new lives. Do they have a Tasty Freeze around here. Jack you know that is cold, Diane said.

"You are so much like your father.", Diane said

"You are not your brother's keeper it says in the bible", Jack replied.

In this land you must differ ever so slightly from the exact blessing of your blessing giver.

Blessing is good. Politically and to go to places where persons arrived at a learning place at the same year, you would do what was called, "doing two" This person knows this.

Over and over you tell people about "brother's keeper" It was a shame Cain slew Able but in today's world you seem not to care. It was who you knew.

This is not about this person's family.

Say John Johnson Sr. had a blessed son John Johnson Jr. If Sr. said it one way and said to Jr. I would like you to say it this way now, it is the duty of the son to say it the new way.

In the past Sr. realized that if he used his word "lowly" for a group people grew defensive. So if Jr. uses "ground up individual" this would be preferred. As to why, Sr. got in a heap of hot water and great wars happened. If you don't change something, people defeat you in war. Germany will lose to America again with this, guaranteed.

11-Apr-13

Did the companion video. Code: Do want you Bill Mostovoy, READ or HEAR READ book on him? Do want Bill know what write down? Call a for character assassination. Dis workee see karakter assassination work each time. No nice guy say..put it no nice guy he got not big Nixon. Nixon only Dick in China from U.S.

Do Harvard girls assassinate him daily. Course cause one beam one gun make panda girl stroke hair and say beauty girl make Bill dumb guy so take puter stuff rich for Japan/rice cunt-ry.

Do doctor of head protect with vicious lies. Yes say big money to it.

So decent MF -er jus askee on read or hear something, would you want the guy to hear what you just said or wrote about them.

Say God's day, man say, He steal Roman Nails from port and not pay. He make riot in peaceful Jerusalem at money table. He not pay when he say bless bread.

If religious guy say word Blaspheme. You watch guy say he hisself got God complex problem/

11-Apr-13

Classical music finds opposition often amongst African people, not for the lack of beauty in the work, in the "deviling" it must take to create a violin string. The pounding and sanding of a wood baseboard for a grand piano shock those that use the wood to create spears to hunt gazelle and then roast over a wood fire flame. The human voice aria impress however most of all. The pledge drive continues at WFMT and after your friend finishes the viewing you may invite them for, on sound the joke defines the French and Spanish words for little tasty bites is explained. The pronunciation of the street Goethe on the north side is explained. The monitor was about to roar with laughter at the "phonetic pronunciation of Hors' D'ouvres"

As for Frank Thomas of course he should still be a ball fan.

The news of background checks rages flaming in the news. If the person says hello to himself at home the grunt of Rachmannanoff belching "English" makes one really want the word like "Die Steingast" definition of the German royals from Harvarrd.

Simply, wait periods are required. Chinese laundry method required. Pick it up a week from next Tuesday. There are your Guns and Ammo sir. As for the method of payment, a credit card must be used that has a zero balance. A code at the credit company will flag it as a "watched item" code 001 gun, 002 automatic rifle, 003 explosive.

Without a zero balance or card an application may be filled out in store for the gun shop to maintain.

A person may be visited by terrorists anywhere in the country just as easily as meeting a vicious neighbor. Defending oneself makes some sense. As for background checks, the sheriff or municipality police chief would get a google earth map point on the given address of the gun with the concentration map being provided by software.

Spilly(ageless)

(Be the Mic on it ladies)

Mike,

If you could do this your cold. (Cold is the new, Totally Cool)

If I wrote this could you "Mic" it up

Mic: Hello, fullfirstname, it would be totally cold if you went just with public web stuff on, "Mike, Bill and Chris".

if agreement in anyway

Mic: You rock. Could you get the world file as a "share toy" it will benefit us in the end.

Colombia is winning! Totally being smeared by nieces. If someone swaps world on this person, she could sell it elsewhere.

Mic: Stop your whining Willie.

Bill" Once again my mood is elevated, but it's just every time her guy does a crime he calls my phone and says my name ten times to "any agent" eavesdropping. It's a film called "implicated" only I didn't do it. She says in 1983 I split a bag of pot but was the one who split a 1/2 into 2 1/4's

Dang I'm not cold to people with it. It's no life for me to be into. I never went bogus to people for it.

Thanks

Spilly

Please do the year with Programmers say 25 to 35. It could be like your thing. Hey, your good with the computer right?

What is in your, “Kidney Pie?” What is in your, ”Liver Sausage?”

Hey did you ever figure out how to plug the antennae from your TV to a metal window frame to make the entire frame into a TV antennae?

7-Apr-2013

William “Bill” Mostovoy(Site Manager) posted a photo. “Glad no one is on or someone might think there is trouble worth stealing his keystrokes!” it is Live!

Bill Mostovoy(Amazon.com blood pressure OMRON customer)

The game referred to is called the “Wolf tail of protection” the nurse is asked by the stalker wife, when is William’s appointment. She does not know exactly how to protect him or even tell the “Wolf tails who he is” Every time he is startled, shaken and abused for messing with big “Bill Mostovoy’s” medical excursion. On the way it’s like right this way sir. After by God every dumpster diver and city rat who extorts for protection sizes him up.

Listen, I apologize if you feel, Vapor Wife is the one who knows how many people it might involve. The city CAN be fun, and probably she asked one nice person who wanted to take a trip up to see NU and it just got to be a thing. Vapor Wife is most likely rich and insists on good coverage.

A couple of twenties say, buys enough cans and chicken to have a nice party that night. NO, in no way to I know if she knows "bad" people. So she told a friend nicely. It is my hope that you realize that through the NAACP page you can get how people eat off of good safe Vapor protection. Love.

Apr 7, 2013 04:56p CDT

You were assigned 4 projects over the weekend. How many were accomplished? You were to acquire NCH software. You were to acquire a commode, could use a downspout with hose to a 3 gallon container with lid, You were to acquire a Rubbermaid trash can. You were to begin assembling your ten friends for the posts.

Now as for the issue of communist "care", that word in communism means preserving the collective order through behavior modification. The word "luck" is similar in English. If the neighbor is a bad communist to you she cares to take more from you then the state recommends. So when someone cares, do they care where you put your money in your home, so someone else can take it?

As for medical care, it is to be considered an "exception" to most ordered lives. Your "care" about the authors medical visits and the inability to deal with my doctor fairly by phone made the person cancel all further medical visits.

As of this point, the intervention has been so massive, that the person will not be able in the spirit of National Socialism to attend a medical doctor and defraud the state of the insurance payment.

-Mosto

People of faith: I could get there easily and well to see the doctor tomorrow. I have received a threat that the only place I will feel healthy is in the office on that day. It indicates to the National Socialist that a problem must be enhanced in a DOUBLED MANNER for receiving this medical care. Now, simple things can be used to explain how someone can be made to feel bad,. As one who HAS EXPERIENCED the ignoring of the threat, the blood work is done, my internal meter is good, my scale tells me the conditions. It's not worth risking cardiac arrest for a few moments of GOOD MEDICAL CONVERSATION.

-Mosto

Told Nola and Shell the joke at Leona's, some people make it a long one. A guy walks in to see the doctor, doctor gives him a physical, says you look great the guy walks out the door and falls down dead. The nurse up

front gets the doctor, he takes a pulse and says he's dead so could you make it look like he was just coming in then.

04/07/2013 04:21p CDT

Tell the doctor the person still loves them.

The biggest curveball to the Navies of all countries. Many people know about settling old scores. European conflicts resolved with some animosity. Asian crisis people held some grudges. The money play on the winner is Bogota. Every person that scored big with drugs and bought guns became a de-facto soldier of Colombia. It works out well in disguising the attacks as Mexican.

Good luck in your struggle with snow. About the straw cut into three sections with a wax tip on both ends and then vacuum-sealed it reminded me of a delightful lick candy that you poured on your tongue called the Pixie stick. As it is Nose Candy as they say, the Pixie Stick people might be happy to help.

To defend myself this person invented the pre-rolled package, happy butter and toot stick distribution methods, of course the person was at a point of a gun for it.

Apr 7, 2013 02:01p CDT

Don Lord ran a good business at Chernin's. Don hired every race and creed for his stores and warehouse. As great people from the different race a vote was taken amongst the best salesman people ever and the attempts to create the perfect Caublanasion as Tiger Woods put it were underway. The mix of Caucasian, Black white and Asian in old world. Bill felt at the time once it's done it's America's worst nightmare, not for the look, but first he will know every candle in everyone's Menorah, and next he won't have any "Boings." Think about it.

6-Apr-2013

Billy "Colada" Mostolet

You see the "Eau du Toilette" is said Oh do toilet meaning Water of the Toilet, but really fill the sink with water. Add drops of Eau du Toilette in basin. It is so delightful you will want to wash it all over. The perfume you dab on. The Eau du Toilette is as described. Anyone for some L'are du Temp. Growling rabbit was in French today. Through my snit at having to wait in line and left without my Eh-clair.

Billy "Bridges" Mostovoy

They have a rule for Billy if he travels, he may only stay at one hotel in a city 3 days when traveling with a few rustic cabin exceptions. So to the travelers who love the Four Seasons and Ar bitron hotel give it a whirl and switch hotels to be fun. Well each group from each place probably has there own rules, that must be a local thing because many opt to live in hotels. I would just be expressing going to stay in a hotel for this person would not work out.

No the hotel doesn't really care unless someone from home calls.

Apr 6, 2013 01:23p CDT

Billy "Music Man" Mostovoy

Children of the Sun, Billy Thorpe. About Judy Byers history. Her aunt is Jennie if you read.

Chicago Tribune "Aaron"

January 18, 2002

Jennie Kaplan Aaron, 89, died with her loved ones by her side on Dec. 19, 2001 in Beverly Hills, CA. Jennie was born in Russia on Jan. 7, 1912, the third of five daughters to Rose Osherenko and Phillip Kaplan. A lifelong resident of Chicago, until 1996, she graduated from Marshall High School, Normal Teacher's College and the University of Illinois at Urbana. As a progressive young woman, Mrs. Aaron began teaching in the Chicago Public School system, where she taught for over forty years. An unwavering Cub's fan, an avid reader and lover of both nature and the fine arts, Jennie was a maternal figure to all she met. Known for her compassionate heart, she was a tireless volunteer for many causes, perhaps nowhere more so than the Hadassah House of the North Shore. Her friends considered her one of the finest soup makers, and her family is vying for her griddle and recipe to her delicious buttermilk pancakes. Jennie Aaron was married for 62 loving years to her devoted husband Joseph Aaron, who preceded her in death four years earlier. She also was the last survivor of the tight-knit Kaplan sisters; Faye Gaberman, Sadie Byer, Eva Brodar and Esther Jonas. She was a proud mother to her daughter Bonnie Aaron Levin and son, the late Dr. B. Michael Aaron; an adoring grandmother to Brad Aaron, Jordan and Helen Levin and Leigh Levin; a beloved great-grandmother to Grace and Joe Levin; an affectionate aunt to Judy Byer Mostovoy, Joanne Jonas Zitter and Dr. Richard Jonas and a dear friend to many. The family will conduct a memorial service on Jan. 27, 2002 at her daughter's home in Los Angeles, CA. In lieu of flowers, the family requests donations be made to the Jennie Aaron Fund at North Shore Hadassah, 1724 First Street, Highland Park, IL 60035 or a charity of your choice.

Billy "Old Man Spilly" Mostovoy,
 Did you realize the stuff is nothing new? Marcus Leshock at WGN
 is up with this for himself.

<http://wgntv.com/leshock-value/>

It is my hope you look at Marcus A/ V blog for yourself. Marcus works in my Berkerley (Berke) but if you feel Marcus is not putting the convo one more about Mostosoft kids posts your so off sir. He's with us totally.

Obviously "Marcus Leshock" is much more professional as he has an entire television network with him. If some decent person emails marcus with some Navy Bean Mostosoft file it might be a nice touch. To me I would want he and Mr. Tom Skilling to see the Can of Pineapple video if you believe in the "Head Trip"

-Mosto

About being what a Mayor would do. OK this is why people required math. 50 wards have 50 alderman with one mayor. The Mayor decides with the council on spending. Every alderman "cares BIG TIME" about the big city. The words "What is the plan for your ward?" made people weird. OK say you were mayor Robeson, you would take the 50 pages, say this is what the guys say, My page on top says we will see how we can pay for it. You would so. So anyway, "Pointing to something in the ward you did is the best way to say the city is improving if you want the big alderman check" My take is that the Aldermanic Office perk should be used to put the full 30K Staff into a guy, that says "Make me 30K to replace you AND gimme something to point at in the ward." I'm goin down to city hall. All I care about youse is da one thing they point at. What you do, you do. When the 30 is in we will see. Do you understand I am not asking you to break the law.

Of course the budgets on plans for the city are voted on and modified for other wards, Come on. No one plans to fail, they just fail to plan.

Since you asked, my ward is the way people want it, and so saying something might be out of line. The intersection of Clark -Rogers-Jarvis I would recommend a cul -de-sac at Jarvis dumping into Clark. Traveling westbound at Jarvis you would not intersect clark. A Few Parking spots there would be good. Rogers has the toughest Bus left from Howard Street inbounds and a bit of a wait from the north bound 22 Clark Bus. The food store is easily accessed with a trip around the block. The Jarvis block between Ashland and Clark are the affected homes, they might prefer it, as

less look around traffic would be taking it. Temporary construction barrel blocks could be used to test a day or two.

Bill Mostovoy (Brewer)

By law public brewing of good sharing people of brew, by Jim Brewer/Goat Boy law must drain the gallon or 4.86L brew of the remaining grains and bread soak pieces. This material goes in a slop bucket with 1 cup white flour instantly after draining. It is hoped an Arab will be told and prepare the animal feed from this NOT -Blessed for human consumption material.

As the White flour was underneath my 2 rolls of 1 cup rice flour ½ cup corn flour made 2 rolls baked with ¼ cup corn oil dripped over each one.

Could have used some sugar but it's OK. The most critical I could be was to my tongue it had a bit of bitter.

-Mostovoy

You can't beat the house in Las Vegas but can you beat a coffee house with a guest fool No help first make a Café Soy Latte with a Cocoa sprinkle top. Not just old coffee with soy milk microwaved topped with nestles sugar free coffee powder. How much would you charge for a Grande?

Bill Mostovoy(Obsessed with fixing broken city operation)

Look, Marshall's department store, purchased by T J Maxx has some good things at a good price. The wheel of retailing lecture from Professor Peters IIT Stuart school on how businesses price themselves upscale with involved manager has a fine example in Target. The popcorn bit \$1.00 bag is \$4.00 with Starbucks lattes now available (On Howard and Sacramento in Evanston). So you did say that yes Target and me are good, especially with kids. But Marshall's was also on the list. First thing tell the counter to put some box on the open door to hold flyers or ads. Next,, do not hire a full time greeter, but you can if times are good to wander in and tell people a hello or something. The coffee stand isn't unique but off to the left, cram in a bar counter and some stools with a half -pig pen thing. Fitting room

system is fine but Men's traverses the store. 10x10 square feet by the ties and belts is clearly how that should be. Thanks to Marshalls for the Genuine Levi's 505 jeans \$24.95 32x30 thanks for asking.

About the kids making some cold up there if Detroit Axle catches you he will put you in the back of Marshall's as your alleged reason for being there was to "get a job" Now walking out without paying is not right once you are responsible for the dollar value of anything that comes up missing here. Really. No. Just sit here while I phone your mother about taking you to County Jail or sitting in this store room for a while. Since Axle is in, they are not some army that will travel far. Just a thought on a wing and a prayer.

-Mosto

FINGERPRINT SCANNER ORDERED: Delivery by USPS of USB Fingerprint Scanner from Zivco should arrive Saturday. Online suggested the post office sat on it today as I would "just have played with it and wasted a Friday, (mysteries and suspicions of course)

Anyway, the word on the street is a tough puzzle to solve, the words are, "We are Bill's cold shoulder" to which you reply Bill is using people to be COLD to me. The invention of the "Cold Shoulder" was to have an old girlfriend grow cold to "Bill himself", Why someone would tell you we are Bill's cold shoulder is they no you will grow so angry and not at the people but at BILL himself.

Rumor, the guy walks up to every r ace he hates and says, "This is a message from Mr. M." "Bill sent us good didn't he" at this point you do not attempt to solve the gun issue but put a gun on Mr. M himself or Bill.

Do I think someone will request every use of the scanner be sent out the web to verify fingerprints of the "Cold Shoulder Bandit" I assume right now it is being taken apart and installed.

NOTICE: All senior team leaders at Microsoft. A Team Leader is to STAND BEHIND HIS PROGRAMMERS, for the next 6 months, the TEAM LEADER WILL NOT REVIEW IN A NORMAL FASHION DIGITAL INFORMATION...The Person will stand behind the programmers from 8:30-10 10:15-12 01p-05:00p Should the team leader be caught away from the post they will be terminated. All email and telephone will be hand led by the team candidate and relayed orally to the TEAM LEADER.

BEST PART TEAM LEADER: Staff quote, "May I use the printer?" "May check the email?" TEAM LEADER HAS POWER.

AS FOR BEST PART, PART II: Command, "Read me my email!"
 "Check the hard drive space on our system!"
 Cool huh:?!

WARNING: Mostosoft Dealer Violation: Bill's Booth Videos have LABELS as to BUSINESS USE. TOPIC And WHAT COLD PEOPLE WOULD DO WITH IT.

The man from California by Way of Polands Israel claims "It shouldn't matter and SOLD another ABSOLUTE FILM DISASTER OF WILLIAM!

If the video wasn't clicked on from www.mostosoft.com/BillsBooth.htm they have done a HATCHET JOB, disservice and FAILED THE PURPOSE OF THE INDIVIDUAL KNOWING ALL DEALERS. The purpose of OFFICIAL MOSTOSOFT DEALERS is JUST THIS KIND OF SECURITY ISSUE.

-Mosto

To the male bastion that takes the woman's movement as something that is a fad...Let me assure you, your technical abilities have been passed at a level you have become outmoded by developers who use standardized methods. If in explaining you bother to say, "Honey" or "Sweet pea" or "Darling" or any other words other then "It requires" you are going to give up a goal. You have not recognized a dangerous player in a dangerous area. The dangerous area is the digital system "stud muffin."

Bill Mostovoy(Actor)

Fell into Gollum to describe the face of the former Goyle. He and the Goyles went around to pick up shakes. What has da Baggins got in his pockets...Well this reporter should be happy about disrespecting the encompassing underthings who rule the sewers. Fact of the matter is he seems to enjoy real eyesing dose goyles and dufusses still infest the public thoroughfare. What da hay dem books now seem welcome to migrant sewer users.

Bill Mostovoy(50)

It seems we are the Victim of the United Kingdom in a prank so cold they destroy the very essence of Chicago Architecture. The Original Harold Washington Library had gargoyles that looked so grotesque it would scare the little children. If you place something so cold in a public place they age perfectly. The face is turned cold to a side and down. If the name William Mostovoy or any funding representing the person William Mostovoy(50) of rogers park was used I disown all of you.

This is disgraceful. If a gun were in your mouth you would see the person and Gun as beautiful. You swallowed the love of the world. Those that realize public art alerts you to inner pain revealed and that all people that have pain suffer the look of those Gargoyles. The person looks like a gentle own to you now roosting. We have gone to angels they say, the city of Al Capone. We just put you to sleep and tell people your living on some farm somewhere.

Who would want to see some half beautiful owl on a stupid book depository. They ought to burn all the books in there down and stock it with chip book digital change readers that tell you to have lunch at one of the nice loop restaurants and forget such trivial little things. It's just that in dark times things of light people become twisted. It would have been refreshing for me to gaze upon that Gargoyle today.

Apr 5, 2013 11:17a CDT

Bill Mostovoy(Office Workers Intl. United in How do we do this)

Discovery that no person tells you how to fill exactly computer job times, let the staff recommend

1) Open the day with ADMIN time 15 minutes, Outlook™ Microsoft was designed with everything you need to BEGIN a work day. Answer emails right that minute from all individuals that sent you one the prior day. Responding with an AUTORESPONDER is OK for this manager.

2) Plan when during the day you plan to take breaks and stick to it.

3) List everyday your open issues and save with a filename for that date

4) CHECK THE BOX SITTING BY YOUR CUBE IT'S A MAIL STOP, THAT MAIL IS FOR YOU!

5) Open and read your mail

6) Assess who is on the project or what phase the people you work with closely need from you or for you

7) Do your job

8) Fridays at 4:45, collect your dailys and make a progress report, if not requested, send it to your team leader, manager, or director just the same

9) Say have a nice weekend at 5:00PM Friday come home and reward yourself with a new webpage such as www.mostosoft.com/BillsBooth.htm

10) Park in the same spot everyday, enter and leave at the same time every day. If in defense work do not.
 William Mostovoy Posted a photo...

Irish Intelligence. Sorry about the lack of voter registration. You didn't have love for the type of democracy I was, where I decide and of other Ise decide we got a guy. It's not that who ya voting for was cold it's jus disagreean once aguy sahy's its kald.

Nola is Dad's girlfriend.

Did Judy speak any languages, She always answered she took some French in School, Her granddaughters spoke Hebrew so any film they speak and she says "Glida" (Ice Cream). You must read until the Styx river crossing entry. To note, all reports to males on the persons activities go through Womankind, not one male does a primary, in any language. He himself knows they know a man should know but fear the world he reported. What happens is he who speaks of "enemies of the people" must be an "enemy of the people" Bill does not make charges, he states, if you enjoy certain behaviors they are taking place in various locations. As Bruce he says that on the order of Nonchalance to making America Communist upsets (me or "him"). So as Bruce with wife and family I would test my nonchalance on a behavior to check paying attention, regretfully woman have a gay man who loves there husband usually tell her what to say. So Bruce himself will be purely fooled on the paying attention to what he(I) said. It's an unbeatable defeat of straight male America!!!In the rainbow, you must have a question, "Who is the straight guy" or you would just be hypocrites.

(Courtesy of the Chicago Tribune Obituary Page)

Judith Byer Mostovoy, 66

January 13, 2004

•
 Judith Byer Mostovoy, a lawyer and former Homewood village trustee, liked few things more than channeling her talents into projects that made life better for women and children. Mrs. Mostovoy, 66, of Evanston, died of ovarian cancer Thursday, Jan. 8, at Hospice of the North Shore in Skokie. She grew up on the North Side of Chicago and graduated from Sullivan High School and the University of Illinois. The family moved to Homewood in 1966, Along with three other women, Mrs. Mostovoy started the first nursery school program for the Homewood Park District. In 1972,

she became president of the National Council of Jewish Women, South Cook section. Under her leadership, seed money was provided to Aunt Martha's Youth Service Center to start their first group home. She was active with the South Suburban Family Shelter, where she helped initiate the community's rape crisis hot line and served on the advisory board, and with Temple Anshe Shalom in Olympia Fields, where she taught 1st and 9th grades. When her sons were in their teens, she decided to become an attorney, graduating from John Marshall Law School in 1980. She later became a board member of the Women's Bar Association. "She was doing rape crisis work and after she'd go to court, she'd come home and say 'I can do a better job prosecuting these people.' And that was it," said her husband of 46 years, Sheldon. "Once she put her mind to it, she could do anything." Despite being diagnosed with ovarian cancer in 1994, she remained active. As a Homewood village trustee from 1997 -2001, she made many contributions, including "Light Up Homewood," a program to celebrate all faiths during the holiday season. In recent years, she also taught a class at Governors State University on Supreme Court decisions. In recognition of the commitment to her community, she received many honors, including the Illinois Woman of Achievement Award. "Judy always filled me with awe in her many accomplishments as a caring, productive person," her husband said. Other survivors include three sons, Peter, Bill and Danny; and four grandchildren. Services have been held.

Bill Mostovoy(Navy Bean Storage Creator)

Had to check the exact dimensions, and it checked, it's exact. The issue is as follows, if you as a person ever let on you know intimate details of my past and I don't act like I heard you, it is that I will beat your face so severely with fist punches and slaps you will become in a state of zero brain wave activity.

If you decide you know something about this person and you say it to his face, he will hurt you very bad.

If you learn this persons people before you meet him, he will never, I mean never spend one second with you.

If you meet his "friend" or "family member" and have a frank and honest discussion about this person, I am not ever going to have a relationship with you.

If you ask one question of another person who sort of knows him about him, we can never have a relationship.

If you viewed a tape of him without clothes on, he does not want to know you or have a relationship with you.

If you checked his "Girlfriend" database posted information, he does not want to know you or have a relationship.

If you verified his medical records, he does not want to know you or have a relationship with you.

If you verified his bank account information he does not want to know you or have a relationship with you.

If you checked out his dry cleaners he does not want to know you or have a relationship with you.

If you mentioned his name at a coffee shop or restaurant he does not want to know you or have a relationship with you

If you went to his college campus and used his name as a reference he does not want to know you or have a relationship with you

If you traveled internationally and listed his home and city address, he does not want to know you or have a relationship with you

If you collect security video and compile a day of security video, he does not want to know you or have a relationship with you

If you record his sound on your iPhone in public, he does not want to know you or have a relationship with you.

Your cold with the person or better yet, you really shouldn't be involved

-Mosto

After all that he says, "There is this thing called "getting someone with your head" First let's say you wanted to know how many condoms someone had or used. I took three from the Trilogy basket making real check both ways to see if anyone saw me. Believing it might encourage interest but also old time city religious anger, I tucked them in my jacket.

So lets say every Feb 7, you give your boy or girl who you do not have relations with 12 condoms. They are free or set a nominal service fee, call me you say when you are out or return the remaining by next Feb 7. So you say why pop on the camera in the bathroom and wait to take them. Not what was meant.

Second have person take a survey about issues. I have been asked and I did tell them about things. What someone does with the information is the "getting" we were referring to. A nice one is working out so two people meet at a train station or airport having both been given a big story. A lucrative family mutual uncle mentioned both of them but you must do 3

things first in Seattle, then the key to the UPS mail box will have the letter you require.

April 5, 2013, 06:00a CDT

Bill Mostovoy(Author)

Publishes the Collected work including “Play -For-It” Payback Gift, see Author Spotlight above. Let us say a friend wants to inscribe the person named

The future proposed by pals with wealth and medical training suggests they live in a world called not reality based. Louis and Mike think months and years ahead. They say “Future” like Rachel for gosh darn sure. The art of it is BM (Bill Murray) in What About Bob. If you do not show this to them instantly, they will know how BM feels about life with them. Let’s say they struggle with, “If all you want to do is...” The guy is love of discovery, if it is TV and Computer. The fact that BM sees many things they feel resemble other things so exactly nothing more could be gleaned is wrong. The coke bottle frame lens guys do NOT get, that “Life Is Beautiful” Roberto Benigni directs. One the fact that the written work suggests, Academic Behavior prevents them from realizing very key information.

If it was “Academic” then it would not have been written.

If you remember a woman Valerie Plaine from a Washington scandal. She wanted to know if the Russians were selling nuclear material through buyers in Africa. Her adventure became well documented.

The exercise in writing, informs the readers of the degradation and decay in a real sense for purposes of course correction of the nation. The academics who attempt did not have the access of Mostovoy. The field correspondents watched and reported on IED explosions daily. The president and security forces world wide began lockdowns of people, places and things.

The knowledge gap of the academic and his nation loom vastly as a chasm of illusion of former life and Hades.

In a mythological sense the academic work tells the reader, the world crossed over the river Styx. There is NO turning back once the realization takes place. One of two things may have happened. One it HAS been realized and the short shrift on the work buys time to check if Styx was crossed. Second, the complete denial of the massive destructive forces changing the planets nation states daily. If the former then best wishes to the effort. If the latter, the work will keep you posted as commanded sirs.

4-April-2013

Bill Mostovoy(Growling Rabbit Customer)

Had an out of this world, (mind blowing) Rineskiula said. Mind blowing is good I said. Met someone who looks like someone. I swear I am not prone to missing faces. Embarrassed as I was I feel I must know someone in her family. Steve the Bronco soccer player out of W. Bloomfield 79 must have a sister like this. Or this is what's weird I thought it was Cindy Doyle out of H-F, how both? Don't know.

In other news the insidious Arab bomber is soaking kite string in Gas. Filling the pie filling can with gas, placing the can all the way across the street and pushing the string into the cig lighter. Watch out under car bomb lookers this is insidious. It might be trunked if you open the push could get you.

Bill Mostovoy(subject of international rumors)

The man who was hated like Hamen in an early time in the central part of Europe discovered that when he told the beloved keepers of the financial records something the story always changed in a way not expected. The man proved he could count expertly. The man, the financial person, was honest. The words the man like Hamen used were in German. The financial person said he couldn't get a German dictionary so he used the Danish Dictionary. Now lets say you hear someone say, I am going to kill the bottle. Most English speakers know you will be drinking the remaining portion. As listeners or Words and not Phrases you say "Kill Bottle" this although people still might understand would very likely assume a murder is at hand. Everyday for 9 years the "Israeli Paid Skokie Protection" of this person led to ABSOLUTE DISASTER. Is it understandable why such a verbal person as Hamen wanted the financial person destroyed off of the face of the earth.

April 4, 2013 06:22p CDT

Bill Mostovoy (Electric Customer Chicago)

Well I open the Bill and wow what a savings with the new delivery system. But wait, I disconnected cable and went to the 20" TV. My gosh 155 units for \$8.31 electric services in March, It was a whopping 455 last year, of course the hot days required fans and a/c output for a while, by gosh cheap skates demand someone check the energy draw on a cable box (Motorola) in this case!). It costs 13.41 to have service and in this case \$2.86 in taxes for a March electric Bill of under \$25.00

Bill Mostovoy posted a photo...Apr 4, 2013 04:53p CDT

Admission of a slob to Vapor girl at work. Descriptions don't do it justice does it. Do the rabbit ears show?

Bill Mostovoy(Age 50)

Yes I am aware that some home made toy could ruin some person's home or take the life to the point of injury of death. In the second world war, Russian Comrades walked out as did Poles with pitchforks against Panzher (Panther Tanks) by God my Pitchforks in Illinois smell those NAZI's like you would not believe. Do I love Beethoven? Yes I do. Do I love Mercedes? Yes I do. Some crazed German wants to turn me into Sausage. He isn't the only race but as an example it is a darn good one. Lets say it's soviet, Chinese, Nigerian me and my people might look a little odd. If you see it our way it works. Lets say some kid is all into every method, in the Army we say, "Look we have lot's of stuff all put together." I am sorry we live in world with AK -47 and other Assault rifles. Through your horrible treatment of people many find it necessary that as a last resort they have something that at least looks cold. By God girl you have 27 meat cleavers on your block. You have Uzi and Galeel s and Jericho missiles and you fear a guy in his own neighborhood with a "nail stick." My God the use of Chemical, Biological and Nuclear agents you don't rule out but you fear my "nail stick" idea. Take a hike and find nature.

IN GOOD FUN, for after you digest that.

Let's say your something called "Sexually Based" In the relationship, it seems you want me to moon you, with you holding the Navy Bean Storage system and do some penetrating. I would be willing as I could place under the mooning area something called a fleshy part to you that resembles said holder. You would be permitted to play with it and place it as you see fit. Honestly my mooning never really excited me. It is possible you feel I myself am overly concerned with having your moon directed in a way to make you uncomfortable. It really wan't my way to do this.

Apr 4, 2013 3:52p CDT

Bill Mostovoy(Age 50)

Assuming a world where family, friends, professionals and other interested parties wait in judgment until a satisfactory demonstration is conveyed. As it happens the issues those individuals were waiting on had been addressed. Nevertheless, once addressed, do they intend to reward the individual? Do they intend to lay in wait until other so called violations occur and deauthorize him his life? Should any restitution take place for any misunderstandings that cost William "Bill" Mostovoy financially?

William "Bill" Mostovoy born march 4th 1963 accepts his position as an unwelcome person. The issue of the financial responsibility in holding a trust remains the issue. Those that would profit from a death remain enemies of William "Bill" Mostovoy. Both of his brothers and nieces stand to profit quite heavily from the death of William "Bill" Mostovoy. At this point any request to behave "against" William "Bill" Mostovoy are to be seen as financial steals. Rumors of foreign and domestic violence have been addressed formally. Should you feel authorized by a notice from the Homeland Security Department, Interpol or the SVR, William "Bill" Mostovoy has been made aware that no connection to any officially elected person is aware of the conduct of these "so called agents" Yes they carry guns and have made up badges. It is in your best interest to use the Fingerprint Scan method to make sure. Any and all fingerprints can be verified at your local police department.

Apr 4, 2013 2:31p CDT

Bill Mostovoy(50)

Went to the Common Cup this morning at Morse and Greenview. It is a lovely day today. My apologies to the significant person in the side area whom I opened a big mouth to like such a good person would just key in www.mostosoft.com at some fellow coffee drinker. So having said, "Is mostosoft.com up" he responded in away, nice and kind and all, but as if none of the it was heard, as in, "What was that website again." As I have said, yes I know significant people, let me state I feel that I open my mouth to truly and that when I do, everyone says this is a hole for me to fill. I might be full of holes, but no one seems to want to tell me what the hole is that I need to realize in a way I can get. So, to me, I'm some nail polish, logo on a shirt or icing on a cake, or whatever extra you would want to have in a really great speaking together. Rumors that someone like me tells people this is some edict from G-d, I do not understand. Anyway, the site looks good to me and a full site review should take place if you can.

By the way, I am bound to truth. I never lie but can be sarcastic.

Apr 4, 2013 12:03p CDT

To note if you remember the games, what he was saying was, "Come into my parlor, said the spider to the fly." I decided to fly away.

Apr 4, 2013 12:10p CDT he spent some down and hunted down Sheldon providence reports.

Bill Mostovoy(50)

Vapor friends let me tell you that this person never devotes 100% of my attention to anything. This means when the TV is on this person barely

knows anything about what is on the show. I am so angry for people believing “If programmed by media and accepted or not accepted then valid judgement made.” That noise is just on. It’s like caring for a noisy kid who occasionally laughs and you find yourself laughing along. Do not insult me again please. The people on TV put it on. If it made you think something say it.

What it was, was people from another country come over and ask for your big guy to explain it to them. Spanish speakers and me have done it on Univision and Telemundo about how not serious most of the shows in Spanish are. Europeans expect too much thinking from that thing. Russians really need to figure out more than most if they study America. As years ago, the Three’s Company Analysis, does the person say, they have some college or are they a teacher or PhD.

The only news programs at the College Level are on PBS. The News Hour at 6:00PM Local Time shows you what are called the “real decision makers” Professor blow hard on fox never met the President or Congress. On PBS, there is the Senator himself. Commentators talk in a style called “pepper” to get the public on board with the feeling the trivial lives influence Washington.

Take the show on NBC Meet The Press, There is the Senator surrounded by want to be leaders and ‘Party Boss Chairman.’ A party boss chairman is the leader of the (RNC OR DNC). The leaders of the parties lie through their teeth on television.

Bill Mostovoy(50)

Wenklen Bij De Bank. Trinken Bier. Respekt Naturalijk. Working with Karo Corn Syrup in the next batch of bread beer. Hope you click the M-Flag to see what this was.

Bill Mostovoy(50)

Thanks for enjoying the April Fools Day Special. April 2, 2013 3:42p CDT Mostosoft Went Live! The franchisees are working hard to keep you current. Yes the site is text based aside from the Bills Booth page. This page has the videos for Bill of the hosting company. As for the kids it is just so great Maroon5 came aboard with the Daylight project. If you guys in your Mostosoft circle are great, get yourself a band and take them to the top of the charts with your stuff.

Thanks for contributing and keep enjoying Mostosoft.

Chapter 5

Simple Machines for Hopeful Energetic Kids

The Dark Continent Science

In a world where you accept the phrase someone was “asking for Africa” and someone went into it. This person relates the story of how the computer was set up as the 15,000km runner to ask this other person if the person has trouble in there place. The guys says it must be some way to war with it. The guy can see it one way but doesn't know if his place makes the thing. So the guy says the first ones were so simple no one thought you felt all these places were to cold. The teaching stick comes out for the guy and he says there is a box and on the box you can see through. If I put 2 sticks of the same size in and make a line at 2 and take a coal and mark 2 and of course see where one is and so on until 10. Removing one it says if you look close at the opening it's the 9, take 2 more and you may have forgotten but look on the side it shows 7. So the person that says do I need to get sticks to make one, well to the person who wanted you to figure it out...The best way was beads on a post . 10 beads on a spindle with 10 rows of beads is the final object. Some places call this an Abacus. Slide a bead up, then 2 more to add 1+2 and look +8 go 1-7 and look its over slide the column down and 1 on it's neighbor and 1 more over reading 1-10 bead and 1-1 bead,.

So anyway this guy as the asking for African felt using American leader to prove it. The guy was Ben Franklin and he saw lightening as a useful thing somehow. He devised a test with a kite on a string attached to a key to see if lightning would travel on the metal. So as the story goes what if the keys glowed and you had 10 of them lined up and when you made it correct they lit up. Of course nature doesn't provide this a lot and putting lightning in a box may be two cold for spear people but you know you might enjoy it. Were you mad about the spear thing. It was to see that you comprehend big things and he was asking if this were OK. Spears hurt people and could kill me if you want so you know of course I know.

Bye.

buy it.

Sugar and Apples

Hypothesis: Boiled apples produce a better apple sauce then a direct machine processed apple. The cellulose breakdown before mashing should produce pure results seen in the apple sauce.

Goal: To produce a powdered product that may be sugar based on apples.

Product: Powdered apple lemonade. Use of fresh lemons and apples only as the ingredients preferred.

What is the best apple for boiling?

After a boil a drying time for the entire apple may be beneficial.

The best use for garden or back yard apple tree apples is boiled.

Early Television

To the 10 devils raising me through video surveillance some 40+ years later, the answer to your question of through the wall camera involved at that time the Aluminum Siding on the side of the house. The plates were heated and charged and the "image" bakes on the siding plate which is read electrically.

As for "getting out" by 1970 the Television Aerial was real good. The fact that those prongs had to be elevated on the roof must have been the biggest inside joke in town. You see the gutters and fascia and all of the rest of the top exterior can act if wired in and grounded, which they are,, as the built in receiver/transmitter mechanism.

The person that realized it first must have been "Russian" because there is no capitalist angle to continue to sell antennae.

The antennae or aerial was never used in Russia. So when Sheldon comes back from his Russian trip, the worst time ever for us at home, boom the new stuff is on the house. It took Judy's desire for ADT security to smooth it out and feel well in that place.

As for the first day of tuning it for the through the wall picture, The moving object kept shorting it out or something, and the persistence in finding out what kept moving,, regardless of my screaming and howling with pain is that the microphone was not on. The joys of the early Scientologists.

Bi-Color Secret Codes

So In my Africa as it was asked for I go out each day looking for my happiness. If someone is angry with me they must be finding their happiness this way.

Ever play the game with red and white pegs. Ask if you can take 10 minutes with someone who wants you to love a computer. If they are busy see this for at least 10 minutes. The game with the boats has pegs in it as I remember.

W W W R ?TOP ROW Let this equal the number 1

W W W R ?-Scnd row this is also the number 1

Lets say the game is called addition

W W R W <? -This is the tough part, what does this odd set of pegs mean? It means you have 1(2) and

R R W R zero(1) it goes 1,2,4,8 or from left to right 8,4,2,1 into go bigger 16.

R R R R ? Did you get it

W W W R

R W W W W ! Oh my to many for a 4 peg board. Word size 4 bits holds 0-15 or 0x0 to 0xF Hex

Adding an extra 4 would give

WWWR WWWW

Assignment: Arrange a 0x41 and then a 0x31. Look up or believe when I tell you Hex 41 is a Capital A in USASCII – Code and Hex 30 is 0, 0x31 is a 1 0x39 is 9

It makes a good steak sauce. Now you ask if I just make the 1 why doesn't it count. It can if you indicate to me or the program is using "BCD" Binary Coded (decimal) which is your not about showing someone in a printed or screen way along with words the number 1, you just wanted to play with it to add, subtract and things.

Chapter 6

Fiction, Pure Fiction

Index of Vocabulary Words:

(Most writing involves good language description the author permits some "Phoenetic" approaches, as educated people not to apologize for how people perceive language it is the hope of the editors that when word appear such as pronunciation guides you attempt to decipher using a pause and say aloud method to capture a meaning. The use of German "Nameses" puzzles many. The place in south east Asia called Viet Nam (has Nam pronounced Nahm) a German N-ah-mese refers to a soldier of German origin who fights with the tactics used in guerilla and formal military fighting. As for the site name, for the hearing impaired and other nationals, it is M -ah-ss-toe-s-awft d-ah-t c-ah-m.

To further clarify the confusion that arose due to the claim of having "Harvard" blessing on the finished works. It did not imply attendance at the

University called Harvard. Each sentence in the work produced analytical thinking on the correct usage of each word in the text. Each word, barring the exception noted* proved to be a most positive and interesting use of correctness.

*Yale University a blessing not mentioned fights to portray wording in quotes and to define points such as the manner in which a true form being on earth conveys messages and have spoken in a definitive tone on the exceptions noted above. For example at Yale a detective may bark, "Shaddup" indicating the person should be quiet as in reference to the English dangling participle "Shut up" implying the You sir must shut the mouth using your upper and lower lip in a clenching manner thereby defining a mouth in a position of being shut in regards to the lower lip rising up to meet the upper.

(To my lip reading friend on TV it is easy to try the end of M -ah-ss-toe-v-oy if you bite your bottom lip real big with your top front teeth and exhale v-oy. A B is lips together kissing out the B -oy now Toy is lips apart tongue on the top of your mouth and exhale, so if T the mouth will be open a bit which may be hard to detect if quick, but B and V you should get hopefully.)

The fantasy of being with the love of Universities escapes Dr. Roth presently. He feels Mr. Mostovoy failed to complete the "foreign" language portion of his academic sojourning. It had been hoped the discussion with Paris in French on the subjects of the day had proven the merit of his philosophies and meanings in the French tongue.

First the "La Monde" article of 2005 followed by the discussions on radio for French TV should have sufficed.

To get beer and bread in German as well as describe detailed tools and operations of machines in German should have sufficed for academic engineering.

I will make every attempt to have the final review of languages delivered and verified that Mostovoy, William David can and will convey proper messaging in other tongues.

The love of Spanish persists. Many discussions in Spanish Dr. Roth might feel slighted and defeated. The "Fidel Explanation" most recently displays a very regal approach to formal Spanish.

Best wishes to Dr. Roth and the Academics looking to use there "Foreign Tongues"

In language in some tongues and expressed as a written portion a concept known as an analogy in the English language refers not exactly to

the objects in the analogy however a conclusion about life shows that from simple objects a great conclusion manifests itself. If some said that another way, as in words about clothes may be not about style of shirt but what one says about oneself when not in a way ready to make love with clothes off.

So in this part of the words if the analogy to life is important then yes. Others may feel that as written on a day when a special breakfast would be eaten you see it could be both.

The person that writes things such as this, once may have declared this is how "I" say things and you should accept this as the way "I" speak. A remarkable thing happens when people tell the young person who obviously shows ability to communicate, educated people agreed on a standard to say things well and that although most people in your area would comprehend exactly the expression, you can learn to say and write things for all to decipher.

So the person that used clever local phrases and made people laugh and sing the music of the city wondered if this boy has gone so far is he still the same person we knew and loved?

The pancake story is how it must be said to me. To me the first pancake is special and when you say it at least about the one who has the honor to put it to you I say that I thought the first pancake was fine but the, all you can eat, approach on TV and the internet, kept piling on to what appeared to be an all you can eat honorable special. Then the butter and syrup were added by those that said yes to the same pancakes that had been stacked. The jelly on some of the middle pancakes was special you would want to just take that one out special and have it some. If you feel it's you about knowing me, I feel it's me myself with this.

So are we having breakfast or speaking about you again.

A game of people called the fox and the hound created so much love among kids they still love to play. They neglected a few things, such as there is more than one game in America. For one, the young lovelies seem not to get the "Bull and Bull Fighter" contest. In which they see a bit of cape, as if they have something on someone, charge, and always miss. Upon suggesting the bull fighter should charge, the obviously smarter person goes them albeit accidentally. So you say yes of course the Ice Hockey contest in the north is good with him. Yes of course, tend the net skate pass and check your way to achieving a goal. Mix it up well and you have a good game otherwise someone goes into the box for roughing.

Back to the fox and the hound. The fox is considered sly and always seems to get in the chicken coop, stealing eggs to eat and eating the chickens. The fox will do this forever if you do not catch the sly one. So over there they invented, "The Fox Hunt" With great pageantry horns play and riders take to the mount. The flashy red colors and the noble beasts excite the leashed dogs to the point of frenzy. A caught fox is displayed in a cage for all to see and the one with the cage takes a few steps and releases the fox to the woods. The trumpet sounds and the riders are off and the hounds too.

The point children is the fox wins with the chicken and the egg puzzle but you yourself know about the hound. The hounds eventually catch the fox and rip it to shreds or the riders shoot it with guns out of the tree.

Next time, work with my friend the Carolinian fisherman as well as the Asian Fisherman. Get a good bait put it on a lure and see what you get and don't fox the wrong chicken coop.

As it happens many people and many families speak things in parts. Much like the theater each person says the lines that relate to the lines before and the finished production reveals the nature of the family unit. Many wanted the story to be heard as the mouse, the cat, the dog, and the woman at the refrigerator who feeds them. The owner's shoes could on occasion be heard. The three blind mice story of three children also grew as a popular option. The three stooges model works for many as well. Foolish adventures of no value producing on chuckles and laughter excited some of the boys.

In other terms words like, the smart one in the family would be Dad, the paperwork person of clerical value would be Mom, the punch would be Peter, the balloon would be Bill, and the Dummy would be Dan. What about the girls in the story Dad? Well that's just it my sweet. The nature of the paperwork person and the smart person is bring home someone we would love. How does one go about doing this my sweet? It would not seem thorny and yet it poses some questions. First, you must accept Punch, Balloon or Dummies Dad as the smartest person in your world. The issue here is you wanted the person you were going to be with to be the smartest person in your world. You wanted to have fun with a Dummy. Why should

a smart and clerical couple love you? You wanted good Punch and someone that would fight for you and give you some of the good sweet punch you love so much. Then you said, you must punch the smart and clerical people some how to prove you should get some wealth. This they did not love and would never love. You say you wanted to take a shot on a balloon that could take you up so high and make you feel good, and maybe not know why. They said that is not smart. The person that waits for balloons real or imagined will not get you anything. What you need they said is to be productive.

Long story short, Bill, Peter and Daniel single straight men 50,52 and 45

One day in middle school the teacher announced to her English class a person she respected had written a novel based on a real life. The author she said was nothing but computer memory and things to me as a person back in school. As it happens, young students of English, modern writing he says takes place in a manner called DTP, desk top publishing.

Well, the computer person writes a story that with observation and digital retransmission the entire world may fall down like electronic dominoes should one person in the computer game decide to link to real time military hardware.

Yes Susan, like an Anti -Aircraft gun or yes Rich like an auto -fire defense canon.

Did you know teachers and older people have parents often as well. In this case, even me the teacher figured out how to do Bill's logic, that is the guys name.

So his Father doesn't love the idea that foul play could take place on a computer so he says, "Bill has illusions that "he(Bill)" is influential when really his computer career is over and anyone can use DTP to have something printed.

"So I will tell you once I did it", Rachel said, "It worked.

It is so simple if you can remember the KEY words. I couldn't get it but in this case it went

Book
No Yes
 Influential

	No	Yes	
	Injurious	Informative	
	No	Yes	No
	Dissociate	Pshciatric	Yes

Action Needed (payments/battles)

Now at this point he says the book is to be considered NOT INFLUENTIAL and yet let us analyze the next portion. As it happens Bill's father keeps ALL of Bill's money. So when the subject of Book enters the equation how does Bill retain "Normal" operation of his life with this tree.

He says things that could injure reputations.

Who paid for church every day in Chicago?

This isn't Sunday is it?

Jack writes so well about subjects and now Diane says she will use the serious plunger if those old style deep questions find their way into Jack's head to explore. How does she know the correct loving approach without reason. The reason for love and the reason for wellness needed definition.

Your wandering Jack. Sit down and love, said Diane. We need more cookies. Everyone got lots of cookies. God will provide cookies. Thanks Di. So Hansel and Gretel say the English language makes people dead inside.

Gretel agrees with Diane and Hansel values the illustrations. Follow the bread crumbs to your new lives. Do they have a Tasty Freeze around here. Jack you know that is cold, Diane said.

"You are so much like your father.", Diane said

"You are not your brother's keeper it says in the bible", Jack replied.

In this land you must differ ever so slightly from the exact blessing of your blessing giver.

Blessing is good. Politically and to go to places where persons arrived at a learning place at the same year, you would do what was called, "doing two" This person knows this.

Over and over you tell people about "brother's keeper" It was a shame Cain slew Able but in today's world you see m not to care. It was who you knew.

This is not about this persons family.

Say John Johnson Sr. had a blessed son John Johnson Jr. If Sr. said it one way and said to Jr. I would like you to say it this way now, it is the duty of the son to say it the new way.

In the past Sr. realized that if he used his word “lowly” for a group people grew defensive. So if Jr. uses “ground up individual” this would be preferred. As to why, Sr. got in a heap of hot water and great wars happened. If you don’t change something, people defeat you in war. Germany will lose to America again with this, guaranteed.

To be an author the person set a goal of vending 100 books to people the individual did not know personally. As a young person the individual grew bashful at the very mention of meeting an author he had read. Petite Sue Grafton seemed like a monster, albeit a kind one at the Diversey shop. Her Everex functions quite well to author novels such as, “A” is for Alibi. So bashful Bill decides to put some finished best part on some file and print and now the belief, rational or otherwise is that people want to ask, “Where is the rest of it?” So many persons in knowing other persons begin by learning every word the other person uses. So the person got too far with words, so the person now put out something that someone could look at. Father used a word with this person once called “Polemic” to which if it is a polemic and the author is then asked, “What’s your answer?” It never would have been written had the person had the answer to the polemic presented.

First use of the words Faith, Hope and Love in the writing of Mostovoy, WD, Try it on a thesis you love ladies.

Those with religion and faith hope for a moral director and film crew.

Love: Clouds Data: Reality

The goal remains conveyed wellness directly. Who can Bill get to convey wellness in person without a fee?

The fatal assumption made years ago that the sire and mother want more for the offspring than they had breaks down at the first introduction of a new positive element to the child based in technology, seen in love and accepted intrinsically by the youth

So, what ever became of the PhD club at Microsoft™ you ask? Well, a certain year wanted in on the old man’s professorships and easy office life so they bought four positions at the firm. Two Asian men of

Chinese decent and two Jewish men of suburban decent went into the firm some 15 years ago and not only did they not distinguish the place with the presence of PhD. they insulted everyone they came in contact with.

The bright future realized they sat and worshipped as those academic wizards will do and today they found reward . They finally found 4 doors for them with their own desks, their own common area 4 company Cadillacs and they finally realize the dream. Step one is to load the fridge with iced tea. It has sugar in it but in today's world they could always bring in their own. They do not have the internet on their own machines for security. They can get to a machine if they like of a non -PhD who has agreed to send or allow them at their leisure to send messages. The big bosses explained some food issues as a side note, feeling they would like to join in on the day be it Beef, Chicken or Fish. Beef issues in software houses arise, as in what is the meat of the program. Chicken works but is believed not to be so courageous. Fish makes people fishy of things as in real suspicious. There is of course time for suspicion.

Long story short, they get fat and cold and speak Chinese and the Chinese kids that ask if their mother is making a good sandwich get it eaten by the PhD who assumed every test Chinese kid was there for the sandwich and milk test.

In the 1960's the game started. Since you used the word "dig" in a way that I understood from that time. A girls father typed up a letter that made her an FBI agent and that if her guy was using or selling Marijuana she could "arrest" him. It said she had the right to search his house and car and all kinds of things nosy fathers want to know. The father has another person with the same letter to receive his daughters messages. The fact that the father wasn't really FBI but a criminal looking to steal some students drug money and car make no difference. At this point the people that lost to this don't even use their own daughter. They type something official on a computer FedEx it and for \$100.00 opening check can destroy any and all fair businesses in an area "they don't respect"

Hopefully, the form discussion prevented you from being defeated by such a scam. If 10 agents show up, collect business cards. For security get an ink pad for thumb prints on an index card.

To make a long story short. Homeland security is left to the people who live in homes and really need the income from thieving to pay for

American extreme overconsumption. By the way everyone loved and laughed at finding out the, “spyware” program was running for all the wives and mother in-laws at the club who wanted to know if the guy nailing there daughter had porn on his computer. No, they only act Chinese when loading the software.

Slowly the embers of the peasant farmhouse fireplace ebbed into ash. The inroads of the city are filled with soldiers of the new truth. The memory of the fine gardens and hand fashioned tools are lost in the post underground world. To show face through the signals of the air one insists to know the true beauty objectively. How foolish it was to believe that the curiosity of a farmhouse could be sold in Moscow. Alexi is there now visiting upon founders day weekend. Its not so much the war of the love or the game of acquisition, it's the wonder of the game itself. Selfish rewards for the look Ivan has always said. Getting into the wellspring of knowledge without holding a group of men used to mean success. Carrying on with every babushka in town to have a simple good thing, has left Ivan without the quick retort which he shared easily on roadhouse 11. Ivan works for Boris now. It wasn't so superficial under the communists. Now the questions are presented to only the top one. What project is it that you are working on? All would like to know. Can anyone be sure with old enemies still lurking, and old scores left to settle. Pipelines for the oligarchs to the riches of Monaco, TASS reports.

Introduction:

Facebook® the social networking software allows individuals to feel connected. Had you been one of the 62 friends linked to the author you would have read and

dismissed them as just to thoughtful. Sorting through the good, the bad and justbizarre on Facebook® is not for everyone. If you wanted to know if bright people

use facebook, they do. From book and movie ideas to comments on today's new way kids, the author uses the three or four line style to poke and prod you.

Facebook Pith

To quote, "To much sense reveals nonsense" The electronic reason for being limits global footstomping. To know that we all have states of being to live with inconsistency long enough we find our happiest states.

Script Idea: ::"Vindication"::: a middle age man pushes over the top after years of taking the easy answers and dealing with the tough Viet Nam era issues.

Recreational drug guy meets his own conservative life and thinks it is justified.

Suppose there were a drug people did in school 25% bomb out hate it and grow

poor 75% get high and love it. Everyone knows the odds. Is 75% capitalist success

America good enough to win at high life?

Script Idea: "Hallmark" a college fraternity gets a job traveling around Indiana

checking on Hallmark card store shelves his so -so marriage and family lead him to kiss a 17 year old girl upstairs and think about it. Featuring Kevin Reynolds (2 Guys and a girl)

Script idea?: "What's his name?" a high tech worker with a Russian name gets involved with military data and homeland security both loves him and hates him.

Society. -Can 1 person in a society assume knowledge of another persons knowledge..Can 1 person assume you "know the pledge" or "know where they are" In society games someone can say, "In our society we all will know our names" Does divine right give you the right to not know anything about your own society.

Men complete the puzzle with a 1 woman complete the same puzzle with 0. When 0 no crying about anything makes sense. When 1 everything seems like a cry. Objections welcome.

"Those that don't play the society game are called anti-social"

AI meets SL: Artificial Intelligence meets "Silly Logic" to defeat an the existing knowledge based, who are equipped with AI. Take the surprise bet below. Hidden comment for the bet. It's more a masked then encrypted system you will find. \$03 for detecting SL. Straight Digital Logic DL works with SL players try asking a series of yes/no questions to get the prize.

Know your facebook pals? Say you had network TV on for a second and they say, "Stay tuned for a Presidential Address" Do you flip to Showtime or watch the president. Are you Enterprise or Boobyprise?

Liberty, Fraternity and Equality kissing.

For techies: Would you like a site that answered without further searching your "What is" questions. What is 2^9 ? What is a beetle? What is google? What is demeanor? What is the formula for a mortgage calculation?

Robomop mops the floor. Its probably all a robot should be. Bing Robomop videos to see some cute videos. Chased by dogs and cats makes it worth the price.

IBM made a program to answer questions in natural language. It plays Jeopardy in the video. 10sec commercial but after it fairly shows the issues.

So you get into your "Autocar" say "Take me to the spaceport" and it says which one. You know theres an extra fee for your droid.

Script Idea? "What have you been working on." a documentary with snippets of every high tech idea from robotics to space medicine.

Jetsons? A car that drives itself. Humans are just too smart. For real its called Google Streets and was funded by the military.

Robots: Where will you be when you think you have got to get yourself a robot.

I have dreams at night and last night in the dream I'm telling myself I have one.

Wierd stuff but it all seems believable to me.

Script Idea: A day in the life of Mr Robot or Mr Robot and Mr Body.

Multiple-Choice Life? A question comes up to you. Do you analyze the possible

answers and give the answer which involves the least effort. Turn your 80 into a

100 with simple logic. Beware of the 52% guy who knows making it up all to well.

Its called partial credit, but does it satisfy?

Icons? Anyone waiting for the next 19 year old Jim Morrison to define an era. We

get Efron, Bieber and the Jonas brothers. Is middle age not worth being poetically

defined.

Humanize This? If there were a web site "shoottheshit.com" where you just say

something and it answers would it be cool. "Do you know about waves" it could

say sure and then put a detail up if you want.

Personal Computing: A person may use the Sex Calculator application but override

with the other needs computer OS. The OS controls wants. Move - Don't Move

processing shows all humans are. Those that avoid danger and move to food and

sex best win.

Choices for your mind? With billions of web sites and 300 TV channels the world

can put their heads on a multiplicity of things. Finding something of a like mind

becomes a challenge you might not even want. Denard Robinson for heisman?

? "What did you put out?" Carrs water crackers with 60 brie (exact) and Salmon Roe caviar. Pricey and worth it.

Movie Name? Putting Out or "What did you put out?" guy talk girl scenes you get the picture. Sure you'll see a romantic comedy if the sex calculator works out.

Script Idea? "What did you put out" 2 eligible bachelor friends date 2 woman by putting out food for one guy and drugs for another. Food guy makes no love yet they connect. Drug guy scores but its no big deal to him. They switch methods clumsily and work out some middle ground.

Opening shot two guys together in a kitchen one guy throws to gether some fried chicken with prep video discussing life and woman.

Drug guy uses the drug cocaine to win her. Food guy hears this as drugs and uses the drug mushrooms which may cause illness. Drug guy tries food and uses wrong seasons and substitutions.

Third guy briefly says "Yeah we just opened a bottle of wine and put on some jazz...Were going to the mountains this weekend." guy uses the drug cocaine to win her Food guy heres it as drugs and puts out mushrooms whic h may cause ill...ness. Coke guy tries food as an inticement and blah blah seasons wrong and substitutions.

OK one more I have to invent slob and slob girl here, "He put out a pizza and

thinks shes great."Debbie man, shes really cool"

Sons of Tucson guy for slob! Sex Calculator comes into the discussion. How much goes in before the slot machine pays off. "It can't be just your guitar my friend."

Ashton and Heigel? If you don't like it go out to the Japanese -Jewish place Sosumi.

Share to much? People can be wires just looking to light someones lightbulb.

Issues like shorting out, switching and wavelength happen in relationships. Try

Ibuprofin if you share to much. It gives a nice med-head.

Just Talk? Verbal people don't "want" something. Care givers just think "what do

you want" selfs say "What do I want" since were co-ed girls can start with "the" to

Good relationships involve being "in with it." not over with it in the concept

of "wanting something."

Two types of people, knows what you want and gives it to you or knows what you

want and doesn't.

\$.02 hey you know we valued protest songs and angst riddled overcoming lyrics

yet the minimalist "ghandiesque" "yodaesque" style of private public overexposure

of kids may take down the horseshit of American doctrine without a shot.

Robots? The Japanese imagination loves these things. How about a R2 unit for

kids room that is a shredder/garbage can that moves. It could have speakers, a

microphone, a cool display and wheels. Sing in your room and play back. Internet

audio searching available.

The Apple Munch?

Alarm Clock. Hotspot. USB, 2nd monitor PC interface. Power base automatic

charging.

Personal Note: That's why we got into Computer Engineering in the first place.

Said dramatically as if for a movie

Stay tuned for a very special Mike and Molly where Mike gets shot dead by gang

violence and Molly is left at the funeral picking up the pieces.

iPhone App? FastMath use SAY, "220 divided by 12" SAY

"Payment 30 year

mortgage 6 percent." keep an accumulator for column addition. #2:

SAY "12PM

Today lunch say yum hungry.,: At 12 it says Yum Hungry

The USA loves Cats and Dogs mostly. I know about the Pigs, Chickens, Cows and

Horses of course. Our terrorist enemy doesn't get us. I think this issue is the big

Smart? You know what to grab and where to sit. Take the feel better life and don't

worry about the schemes.

Food?!? Many colleges go with CANNED answers. Try Spinach Quaved with salt.

Garbanzos boiled food processed into a paste with salt, pepper, green seasoning,

onion. White Beans just dumped into the food processor. EASY

VEG. No

Brainers.

There is no way the world beats Al -Qaida and world wide terror by shooting in Afghanistan.

Script Idea: A 20 something writer wannabe stays clean while his college cools get great jobs and do coke. He can't get anyone to read his material. He gets optioned for 10K but can't get anyone into him. "No one comes around anymore"
Lindsay Lohan as the love interest gets won over by lines as the writer struggles to figure out why. Job guy gets drinks with the boss. He orders a Coke while Robert Wagoner gets scotch.
Paris Hilton plays a hot receptionist being hit on and gets offers in a side plot.

Adult Idea: Workouts for your head. Take NEWS at the gym, religious center or school. CO-ED lightweight 30 minutes local 30 minutes discussion. College 1 Hour intelligence report 45 minute discussion. Were just to fit for our heads. Late Night weekend package available.

Did you hear the one about the Rabbi doing coke on the torah? He smeared the commandments and kept the golden calf. The funny part is Jews ARE golden calf type people. Calf, Calf, Calf...wine gulp...Calf Meat on a stick.

You think people care what is said. Everyone is like a gas syringe old person trying to get past the words.

Some say there is no difference between woman. I say some woman know what

you want and give it to you. Some woman know what you want and don't

Great three day weekend but just thinking do you give steak and lobster with words or do you feel cold and young amorphous easy phrases win in cold. Offer and proffer something tasty.

Brilliant Idea: A White House that is a theme park with way out booths (Big but televisable) with Boston Tea Party Hippies, LA Realists, Chicago Jails with people hooting ideas as the President schedules day events in the park. New York is sort of the host, scheduling and moving with the president.

Possible International section: Costumed like lets make a deal for some. Real tourists and a working white house in the center. Its a small world after all. And a roving home office place based on something in the U.S.A

The 2000-2010 decade was not a peaceful time. Things changed, the end of the video store for Video On Demand. 3g and 4g phones. Wireless LANS. Kindles and iPads, Wine Chillers. Hybrid Cars were amongst the changes.

Obama does not run private wars the way George W. Bush and Dick Cheney did.

Your friend W.D. found himself in a top game war and finds the calming influence of Obama "cool" So I had a relative from Russia so what. I had to write a book about the experience. So you think your up on U.S. policy towards people and

Long thoughts expressed use words. The words made sense to the speaker. Many

people hear one word in the thought and think of the word for a while and they cease listening to the thought. When meeting confusion or "spacing out" ask what word it was.

A young med-school applicant is shown a picture. In the picture is a male with a fatal stab wound. He also is exposed revealing his extremely large manhood. The person is asked what they notice about the picture. You want to believe its the wound don't you.

Note the pulling out of combat troops from Iraq. VP Biden goes to Baghdad to formalize this. At its peak 360,000 US Forces attended the war. 4680 Died and 18,000 were wounded. Peace with a presence may yet happen.

If you meet someone Liberal on Social issues and Conservative on financial ones find out what issue they are "Liberal" on

Spouse Analysis: Do you find them in the "Smart or Dumb" category or "Sweet/Sour/Salty" game? Top of Form

To note, umb guy wins. A woman doesn't really want to think with you. This is not to say she is not smart.

I'm, a victim of circumstance. Moe, Larry the cheese

Bottom of Form

Did you know DNA research kills evolution theory. Survival of the fittest holds but DNA changes can NOT be explained.

General Motors reports they are going public with an IPO in August.
Currently
GM is not a publicly held company. A GM-Chevy Volt qualifies you
for a \$7500
tax credit.

RUMOR: Kids no longer want to leave home. They love the couch
and their room.

The perfect life they know belongs at home. The nest has more toys
and joys than
they could find at home. (Was it money and fooling around that let
us leave)

President Obama sounds like a beltway Bob to me. What's different.
(The beltway
is D.C.s freeway.) He never met a Washington insider he didn't love.

The Chevy Volt pricing came out today. The Volt costs \$41,000 and
goes 700
miles before filling up. It's a hybrid. For the stock tip, find out who
makes the best
Lithium Ion car batteries. Hydrogen and Electric cars both use them.

Hair: Straight, Wavy, Curly, Kinky and None. Straights see things
straight, Wavy
waves at things nicely. Curly has wierd looping stories to it. Kinky
sets artificial
lines cold and none gives you what's in the head. This works for all
races.

Kids enjoy being "Processors". In ours it's doing the robot. They
seem to enjoy
input(TV) and digital output. IF you love computer so much, THEN
me. Try your
head there way for fun. B.

About aging superstar Tom Cruise, you should check out he and his
ex-wife Nicole

in Eyes Wide Shut. She offers him Pot in it, scandalous.

Vital information gets lost to most in the well equipped den. It gets non-plussed through the lemonade law that takes place with families sharing drinks, pop-corn and grapes. I thought warnings of change, urban violence and war needed deeper thought.

Redemption, that is the word to seek. Have a great 4th of July weekend. As I remember it the Declaration of Independence signing took place on that date.

Is it just me or do you feel Doctors ran off with all the money after Viet Nam. In my friend Phil's insta -poll 10 out of 10 doctors hold the over in the \$3.6 million dollar prize game. The insurance companies and doctors earned record profits. They claim care would go down with less money. Why? The new law won't fix it. No one has the courage to take on the AMA.x it, it will insure doctors get paid. No one has the courage to take on the AMA.

Hair Plugs and good shape make aging superstar Tom Cruise look 26. Our Tom grosseed 20.5 Mill ion in Knight and Day third place. Better movie at home "Minority Report" Spielberg with Crruise.

The subject of tunnel vision affects everyone. International politics dictate everyone accomplishes one thing. The big world takes care of it self. Most people don't see well. I will say there is a forest amongst the trees. Multi - processing can

work to avoid the rut of a single purpose life. To create TV someone has to write and act.

Did I mention Hydrogen Powered Vehicles emit no pollution? No more dependence on foreign oil and a no oil spill world sound good as well.

Hydrogen Powered CarsHydrogen powered cars have already made their debut.

Since hydrogen is the most abundant element in the universe it only make sense

that hydrogen powered cars would someday make the limelight.

Well that day

is already here. Though hydrogen powered cars are not ready for primetime for

consumers yet,... many manufacturers are showing off their concept cars and

prototypes to get consumers excited about the future.

If anyone asks what the USA does well it's heating, cooling and refrigeration. We

have the best appliances in the world. We couldn't resist making wine chillers to

keep us all drunk on each other. It's ok to love your "fridge".

Top of Form

For those with kids...Ask them if they live with a programmed life.
 Many do and
 respond so. Those older had one that expired at about 18. What does
 the program
 do and does it make them happy

It's called the New Way and much of it equates to Japan -USA
 agreement on things.

Music

A grunting person often intrudes "English, Achh" the new virtual
 rules provide no covering respect for historical sounds that defined meaning
 to the settlers of a place. This listen defines the elders to some. The battle
 for which sounds involve, can the creator of the music create the instrument
 on which it is realized. Only acapella opera music impresses the African
 tribes. This is not the west Angela Merkel. So now we are going in the
 Mercedes. (Klein: It is so juicy the musical knowledge of the new world
 Mein Fuhererkopf). Die Klavier nicht sounded gut, bitte. Die Arbeit Die
 Mannenklavier geimmelen.

The super group comments led to Ophelia's question, "What was
 that in response too?" ed. Most possibly Mark Knopfler and Dire Straits,
 "Industrial Disease"

Maroon 5 a modern music creation group uses technology much as
 Mostosoft had envisioned. Good work people. Daylight Project

The April Fool of rock music in 2013 relates the failure of the
 established super groups to acknowledge "Beck" if the song "Loser" charts
 to the extent that it does then the super groups play to an audience that
 expects staying power of good drunk. That powering through a twelve
 pack, smoking a joint at the show, you feel like loving the one your with and
 dragging yourself up and getting to something called, "Ya gotta take
 responsibility ya know." This quote knocked out the rockers love for
 himself that as an icon the supergroup fan as a parent ties himself to a stake
 and sets fires and coals to his feet, lest his offspring be as cold and attend the
 legendary "Bashes" of the supergroup era. Sure "Time of your Life",

Greenday melted into the American Psyche through the little box grown to a wall. The youth of a nation all speak of the legends of the past world. Youth want power and control. Supergroup parents acting as kids want control over aging so desperately the youth leaves childbearing years as a youth themselves. Through Marshal Mathers, "Slim Shady" leading throngs of identically trained kids in mass attacks on order through some bad "Nookie" the world blew out youth direction for "Party in the USA" Miley Cyrus and Justin Bieber "Raincoat" which Billy and Susie really love. So to Adelle, "Skyfall" and all the super duper loves of Joss Stone. The word is the bird. Make music for the Liszts.

"wdm" comments shown as (wdm)

First DJ job in 1979 on a rock station WHFH -FM Flossmoor. Back then the era of Rock music knew of the ups and downs of extreme living. Rock stars used drugs and both loved and abused many sexual partners. These rock musician stars were not saints. They did set the mood and the tone for the change and acceptance of the tools of the modern world. Retaining a good heart and your good self through confusing times made good sense in music. (wdm)

-Apologies if this makes wdm more important than he is. To note it might be poorly written but the "I overcalled brought great ire." To note those that grew with the Beatles Are and Will continue to be both "The Biggest Criminals" and "Biggest Law Enforcers" of life. It's always wrong to me. Suck an egg blue meanies on this one.

Billy Shears is with the heads. If you look through the Beatles collection the only time the Beatles "went gone" publicly was with "Helter Skelter" John swears he didn't want the "One Two Three four five six seven all good children go to heaven." Line to change in the further verse but insists I overcalled it at a moment of truth and that is on the vinyl (Heaven being replaced by Hell) in that verse. As for "I hope we passed the audition." The successful Beatles rock and roll 4 member band had achieved much success and it was seen as an ironic statement. In truth self doubt amongst the successful is a wee part of things and topping yourself takes some doing. Fear of dopes. The blisters on my fingers reference

involves the work involved in playing the guitar. Playing a guitar involves moving the tips of your fingers up and down on the strings on the neck of the guitar while strumming. Although not many care about hard work as lounge lizard pill popping drunken lazy bones, the Beatles and John really did want to complain like a baby in real terms as to why he should stop playing that moment on the guitar and make love in another way. Sorry for any and all "image shattering" I may have been believed to have caused. -wdm

Drink responsibly means, NOT drinking and driving, NOT drinking on the job, NOT drinking as an underage person"

As for these things we call words, "Drink with class" to be accepted. The staff did NOT oppose wine chillers merely suggested it would be nice if someone just put a bottle in the "fridge" for 2 to 3 hours or even over a period of days to enjoy cold wine. It shocked many occasional Beer and Wine drinkers how many "wine chilling" units America sells and at what would appear to be a decadent price.

Craft brewing rages on as a national hobby. Mr. Obama himself creates samples in the White House presently. Craft Brewing at establishments locally include Goose Island on Clark and The Station in Flossmoor. The success of the brewers remarkably led to a decrease in market share for Anheiser-Busch the makers of Budweiser they purchased Goose Islands profits but not process and sell Honkers Ale and Goose Island Pilsner coast to coast for the local success. Other products not listed by Goose Island provide a topic for research.

People that brew love process success and although enjoying the product makes people smile we remind you that brewing to taste is NOT the following image!

BoothCast™ submission for brewing [Video Beer Inventio n
"Vocabuled"] Auf Deutsch Die Worte Spanisoiizhe ist "Cerveza" fer Bier. Der Mannen Gesproch Englishoishe "CareBesa" die shiff untermann fer klein arbeit auf shiff bitte. Die Spanisoiishe Rinst Das Coberen. Die Teller Rinst Man Worte fer "Die Kopf" is " Cabeza". Die Punkt die Wasser Rinster gesproch die denken fer bier mit gut geist mit die shiff kuchen man fer gutte nacht?!? Herr Kapitan.

The ancient mariners had a saying warm beer and bread, they say will raise the dead. The recipe is ancient and was developed by sailors who kept a barrel of water on the vessel. In many cases keeping bread from growing old stale or moldy they dropped it in the barrel directly. Adding sugar they discovered that over time they had a beverage they enjoyed.

After the basics are known “flavorings” and additives perfected the brew. Today we have modern brewing and distilling. This is of course the start of it. Enjoy an ale today. Enjoy a pint today. Some English major you are.

Not to let it go or anything but the art of it puts a Spanish Sailor on a German Vessel in take 1. The guy at the barrel is German and he wants to take out a soaked bread piece from the cask. The Spanish sailor walks up and the German takes a bite of his bread. The Spanish guy says “b eber” (to drink, eng.) and the guy drunkenly misses the middle b and says beer. Now as the drunken night continues the Spanish guy realizes this German will think he has invented the greatest thing ever so he uses his Cabeza and is sure that the Spanish have this and it is called Cerveza as he was trying to use his Cabeza to figure out if he had consumed it on a previous voyage for paid professional sailors.

Recipes

- 1) The Brew Pop – 1 Gallon Water 1 Tbsp Rice, 1 Tsp Yeast, 1 Cup Sugar, ¼ cup Karo Corn Syrup.
- 2) The Rum Brew Pop- Same but add 1 cup molasses.
- 3) The Brew Pop Beer -Same with 6 Oz Cream corn, ¼ cup barley, 1 cup dry malt, 6 hop pellets “American Summit.
- 4) The Super Brew Pop, add corn, Add bread cubes to the top 2 slices, blend using a blender.
- 5) Corn Monster: 1 Can Corn, ¼ cup Rice Flour, Yeast, Malt

Please read all of it to find out if the author is crazy or we the U.S. singles people out.

Biography of a Web Host

This work is dedicated to people who grasp a situation.

Here are thoughts for a beginning wave.

You get to an age where your mother and father do not "have your back." They do not have your "6". If on a clock you face 12, the 6 is behind you as at your back.

Upon asking you find someone has a secret past. There are reasons for things you might not comprehend. Do you believe in second chances.

Computers keep memories alive in digital photographs. On social media do you fear an old friend sharing a photo on the system they share Facebook™ on.

Should the nosy person you knew in high school keep all your stuff on the hard drive in case your college lover asks her for it.

Should girls on “Girlnet” describe the men they know keeping secret details about lovers and friends.

This made me laugh, “Do woman at school most want to know what is in a man’s pants.” Is it keys, change, a rubber ball a pocket knife and a compass. They also wondered why the person would, “Try to get in the other persons pants.” They would not probably fit as well as there own.

Upon review of the 4 basics, Food, Sex, Drugs and Feces the Star Trek group claim, “This is only for the biological people captain.” So for the music and stage as well as joy of life people the song, “Love is the Drug” might be what you need to escape the 4 basics on the call.

Remember the 4P’s of marketing a product: Product, Price, Place and Performance. A good product that is to expensive won’t sell. Each P makes up your marketing mix.

OK this is from Chicago. It is where one of the guys named Bill lives. He says he lives now in Serbia. It’s really filled with Bosnian Serbs looking for a better life in America. About half of the units speak Serbian. The maintenance janitor is on site speaking Serbian. You can get the American to answer the service messages on the machine.

To African-American people they look like big white people. They look like union construction workers that built much of this city.

The reason for this status is...If you want to check on a resident you may NOT use the word "If" in dealing with the Serbians.

If you said, "Report all interactions with Bill" they could do it.

Saying "If Bill does anything cold" call me. Fails

They really try to do what you want. As I hear it Bill the developer sits quietly and doesn't hurt a fly. The Serbians could relate this. Socially and politically the Serbians hate black, white and Hispanic so asking nicely will not help.

They have been good soldiers in the fight for former Yugoslavia but Bill is not Russian or Jewish to them, he is the Smith. The Russians didn't accept him and Jews didn't accept him. He speaks in tongues but says for making dollars work he is Smith.

Dangerous Words: "Let me see it for a bit." From phone to PC this bankrupted millions of people last year. From connect time you may get "points from God" but it will darn near cost you everything you own. Friends, money, religion everything is at risk from "letting someone see it for a second" They intend to kill something in that time and the loaner will go to jail or lose a big amount in fines.

To my friends that aren't "New Testament" enabled. The God character in life LOSES to Romans, Jews and Pilate. So when people say the guy is "God on the computer" or some such thing, the Jews, Romans and Traitors will win. Keep the faith with life but know, in a dangerous world phrases that use "God" are invitations to disaster. As the bible story the guy in question was some guard.

If God tells you, "Bill wants to tell you something." Check the website he works on.

If a blind person asks, "What does Bill do at work?" and you say he appears to just sit there. An explanation of the importance of phones and computers is imperative.

The legend of Sherchan must show the truth of attempting difficult tasks. May provides the best climate for scaling the tallest peak in the world, Mr. Everest. So Sherchan an 85 year old man did not love that his oldest man to climb the great peak had been surpassed. The camera crew filmed his stretching training and exercise. The old fellow looked good. The children just knew any person who the video takes too will be successful. Sherchan died on the mountain yesterday. When a man at 85 dies very few people note it as exceptional. The lesson and purpose of the legend is the mind may be willing but the body not. Also certain things show you the fool you knew yourself to be. Did Sherchan want the mountain to take him up? Perhaps he and the mountain live as one now.

Beware.

This cool Israeli said they had homeland security figured out. They went on the web and found each Church web site person. Then they offered money for each anti -Jewish person. Well my goodness did they find it a good investment. You see each minor dispute the bad guy would get turned in. Each veteran that fund raised on the web was offered the same if they turned someone in to Israel

The problem is, the people made up cases and changed evidence to make the person appear guilty. These cold Jews destroyed decent people left and right. The free speech destruction goes on to this day.

OK, Jews are fine members of America. The people lied to the good Jews. So did Jews destroy free speech America. Everyone did. In the "Bearing False Witness" thing people grew cold to Bill.

As for the Bill and Mr. Mosto thing. Bill and Mr. Mosto are not always the same. This fools the family of Mr. Mosto. Bill's family is anti-Jewish. Mr. Mosto is not. He wanted to expose the error to be fixed. Creating a profit motive for anti -Jewish was stupid and dumb and needs to stop.

The law of unintended consequence is in play.

You don't get to know, "What is Bill thinking" and "What is Mr. Mostovoy thinking"

So when Bill or Mr. Mostovoy post on the internet, those cold individuals say, "Bill wants to tell you something." The reason Bill or Mr. W. Mostovoy post on the internet is that is the method on which he tells someone something. Creating phrases without the web may or may not work.

So other offers from other countries went in. The various communities heard the Jewish offer, this is the one known to Bill and Mr. W. Mostovoy. The Russians, Germans, Arabs also found it a good method. One guy said, "Give the buyer anything that is unclear" Oh boy did this guy get responses from the world.

So by making these offers the world ended.

The Obama library slated to go on the south side of the city may be plagued by problems. Racial tension and racial pride in terms of the #blacklivesmatter business leads all non-minority firms out of the selection process. The African answer as all in the city have been required to attend brings the real solution. The wood frame bricked building with actors doing requests on Obama speeches. Remember Ossie Davis? Actors will act as Obama with low-tech benches for sitting and a platform stage with a hand made podium. That south side college stuff is paying dividends on this one.

First, get your cost overruns together. Then make sure to close key streets. Then break the water pipes. Then exceed the electrical grid. The Kenyan heritage must be embraced.

This isn't racist people. Its called "City College" ask any disenfranchised individual in this city about the text above. Not only do they agree they will punish you for throwing up some cold building without "city college"

He did his best people. If you miss the stink you are not going to get the s*it.

What is Bill? Bill is a nice man.

So people ask, "In English, is it the way you say something that makes you feel your YouTube stuff is special?"

The answer is certain people bring words to life. Certain people pronounce words in a style you are familiar with. Since the American Revolution in 1776 Americans have a national identity issue with how to pronounce things. The interjection of one French word at that time occurred very much to the anger of English overlords. To this day if someone is bible riding an American person they MUST use slang or a word from another language. For example, someone might put "Earl" in there car. In German the word for oil is earl.

Bill's educator sound confused you. His attempts to do his network of people who imitate the sight grew cold. They slavishly killed the video project.

Imagine if Bill Murray and Chevy Chase in Caddyshack had been replaced by kids just learning to read. As an assignment for your own YouTube thing, get the scripts for Caddyshack and Monty Pythons Holy Grail and do your deadpan read of it into the Camera. Your editor will then show you the original movie.

I am not a big mouth. I intended to share my sound and wisdom of the years. This idea found anger, denial and bargaining but not any acceptance. Wisdom transfer failed to complete.

OK if it were a social psychologist I would say...

Bill Says something. Peter says after not hearing it, "What did the dumb person say?" Cousin Mark says, "What kind of money is in his

pocket after saying it?" Brother Daniel says 'Did he fart or go after it and what was being put out the behind?"

Papa on hearing Peter Mark and Daniel doesn't use any good thinking with Bill "caca" at that point.

Cousin Julie could explain but then she would suffer the Peter, Mark and Daniel

Light captures an image on a camera. No one will pay you for your photo or video. Contract first people get paid. If you can get a contract, then accept promise of payment.

People do not get to be heroes much. Telling the world the city has, gangs, crime and drugs will not bring action from the good people. They will hide.

If you here Kohler they are coding a "Kill" on the net. If someone sounds like a militant lesbian and you want to agree to have girl power and they say, "How about overthrowing Bruce Smith?" They overthrow not one man but the entire nation. You do not get to thank a soldier or politician. You get to cower in fear at the foreign gun that will be in your life. So bashing one Smith means you have no love for the stars and stripes. You may ask as if you want it, "Did you have it written that the person speaking wishes to overthrow America?"

Remember the expression KISS? Keep It Simple Stupid is correct. The letters called the acronym spell KISS.

Boy did the person goof who invented web pages such as www.mostosoft.com

My family politely uses the words "Bills Feces" or "Bills Excrement" or "Bills S*it" to refer to all of the things on the site. If you think the stuff on the site runs in families you need your head examined. No person Bill knows or ever knew takes part in "Web Surfing"

Leave it for the kids they say. Oh and do if you find someone who knows me, no using The Crimson, Syracuse with them use the English word for "Caca"

To say to you that the guy has a "completion hangup" goes without saying

My competitors at Sagersoft ask everyone to make him relax and have a snack. Those creeps at homeland keep saying finish it. But sir its supposed to be like a "connect the dots" experience. I make a few points and the good people connect them revealing a satisfying picture.

At home make 5 points for your kid and say connect the dots. Make 4 corner points and the roof of a lean roof.

What is it when the fellow connects all of his own dots. "Caca" Don't destroy every puzzle please homeland. I can give you the answer key. Many can.

By the way, "Colombia" may win the war yet after all with Chocolate, Coffee, Bananas and drugs they will get to steal all of the snow of the world. Now doesn't Colombia have the most snow.

On "Judgement day and the Rapture" When God asks "Did he use drugs." I beg you answer with the intended meaning TODAY. The inhale issue of 1986 doesn't count! Honest, my Colombian on reserve is dark roast coffee.

Anyway Rich and Corey the local Fox news guys had the top 5 guy movies

Godfather
Fast Times at Ridgemont High
Caddyshack
Die Hard
Gladiator

I couldn't apologize more hard to kids. This "eye on the dinosaur" tips from tv insults everyone.

What no

Guardians
Star Wars

What I'm stumped fellas
Sleepless in Seattle
When Harry met sorry.

NBC chick is like I didn't know Beatles and light skin is like,
"Whats a Janet Jackson"

4-30-2017

The nature of the read changed in our era of equality. Security cameras looking for hidden guns make the human look like a skeleton. My financier security cool tells me he hasn't seen me with skin ever. He assumed I was more dark skinned based on comments. Height also couldn't be determined and the non-basketball looking guy found himself always with Goliaths looking for the other well spoken giant.

So the reads of which we speak involve, eating, relationship fruition, altered states to rest and excrement. The song version grew fun and absurd in a reduction until absurd fashion. The unsaid part of the song would be the bank and finance portion of life.

To note altering oneself lists as your story and desire to relate your story not just pleasure pills but pain, service and work.

To comprehend fully find simple words and write the paper The Struggle for E.Rf.As.Excr. with a conclusion or running theme of the financing issue. Examples of hospitals and jails would work.

(Apology to The True Blue Spirit)
Sing:: Food, Sex, Drugs and Shit.....Repeat then Financed.

The world asked about the finest thing built in the USA and the world. From Haditha, Al-Kindi hospitals in Iraq to Hadassah hospital in Israel, "Doctors without borders" needed a place to operate. So spies please ask for a tour of the hospital in the countries you visit. Could you allow a message to African and South Americans and Russians? Two machines

need your eyes, The C-T scanner and the MRI machine . The love we have goes out to all.

The Medical Centers in the USA honestly hire persons from all over the world.

Life for scientists involves use of units. Distance can be measured in meters or feet for example. New units arose this week

Personal Stress – Tugs (Tgs.) Sweetness – (Fudge Bars Fb.)

Success – (Upsides Ud.)

Failure – (Dumps Dmp.)

Thank you for your input.

How they came up is for your creativity but in Fudgebars please assign to Fruit Juice, Honey, Mo lasses and Maple Syrup as well as Splenda et. Al

Sound (Bells or dB) Light (Candles Candella) Engine

Ratings(Horses – Hp) Existing units.

OLD ILLUSTRATION: Explained, Cynical but modern. REALLY THINK. ENEMY IS USED FOR JEWS. My cool Israeli friend needs to really think and its true. TURNING IN TO ISRAEL THIS SPIED INFORMATION, Please help and NOT AGREE

4-26-2017

Leadership in a diverse world implies different tactics. In many places, doing exactly what one of the leaders does constitutes leadership and learning. In our place ‘the important factor of timing’ matters more then the method of action. The subject who learns may have a different skill set and the leader at there discretion may or may not use them in various circumstance.

The, “Monkey see monkey do”, method did not function for many sections of a population.

The example of baseball’s Joe Maddon of the championship Cubs may make you want to do what Joe does at the same time Joe does it. Was

the time on the clock the same for you or the inning. If Joe changes pitchers at 100 thrown would you do the same? Which player should play where?

Two types of thing occur as a manager "Motivation and Tactics."

Many managers tried negative things such as, saying, "Your head is where the sun doesn't shine." Many other phrases weren't nice called, "The kick in the pants method."

Many now act sad if the kick is required. The old say use "The carrot and the stick to motivate:" The burro will not go unless both exist.

Many apologized for the motivation expressed to lead. This guy feels the same as that person. Deal with it and move on.

Four 7's and a King

The way of life puzzle approaches the pilloried author. The undefeated team asks his family, what is the guy really. The answer appears on the computer screen of the Navy man and it says, "Eater" Well the Navy man gives it to the high jailbird in town and they begin balancing eating with the fat jailbird and the author. The family the author grew up with wanted the "Fancy Feast" model of life with a bit of "food tweaking." This universal theme created the leader follower model of the sloppy people who eat puzzle

So the author sits and watches TV, the author is diabetic, his family isn't. So what they declare about his desire to only eat at mealtime. What do you do? I want to get the right answer was what the author replied. That didn't always mean, milk or meat in the next oral ingestion. The motto "Live, Love, Eat" might work if the slobs didn't always tweak away the living and loving.

So what "boichickel" don't you want to eat." How can one tell food obsessed people sitting is more important thing if you prepare the food yourself.. The jailbird yells into Centcom with the Navy big guy get the mother fucker up and fucking eat.

Only Peter could destroy peaceful eating and furniture.

Observations

The violent European faced with the, Viet Nam situation on being 'cold' ask about things such as, "How does it kill you." These violent people needed to be ...corrected. The poor held the answer, "Its not how

does it kill you but how do you cheat to win at it.” The white man in the USA cheated the slaves by denying the man wages for services rendered.

As long ago as slavery was the stories of cheating prevail to this day. Many call the word “Justified” to explain poor crime.

...Europe and Arabs not allowed here.

So the rhetorical question, “Is cheating allowed?” in the eyes of the Jews, Christians, Muslims and the other world religions like Taoism and Shintoism.

Take the everything is wild but 7's you “Cheat” by giving one player 4 7's and a King

He has 5 7's by rule the other guy has 5 aces.

So how bad is the guy with 5 7's? Depends on what's called the “Money Play.”

A guy plays chess with another less capable player he loses 5 times, then a “facetime” is setup to a computer person (or Russian grand master) and suddenly the player is whipped by the easy win.

Is sports fixed.” Yes and No. If you doubt the boxer boxes you get hit in the gut so yes he is clever. The athlete is now not dumb he is a bit bored by perfection in his body and knows he has more in common with the “opposition” than the fan.

Hey he cheated me may have saved nuclear war.

A status departure is taking place now. It is for people with 2 sons or for 2 brothers to understand their parents. Let me publish the quiz. More status messages below the quiz.

Bill was Casual, Not Rich , Not Married and a failed religion switcher.

Life is good. With the new PC and Windows 10 site management is easier for all of us. Please see the review on the Computers link on topics. It was once said computers will not truly be personal until they are little and talking. Well technology catches up to peoples dreams these days with phones, tablets and super light laptops. People need some content and

Mostosoft intends to start some quality subjects. Kids grow up with social media; they should learn to manage the digital content of the image or likeness they were blessed with. The site stands as a guide as to the things people spoke of in the tongue of truth. Hopefully the dealer network can provide parents and budding citizens an outlet and share experience of a PVC (Personal Video Club). Thanks and have a great spring. Play ball!

Congratulations for those making a living doing PVC's, personal video clubs. I know all too well how important it is to keep track of your online video presence. Let me say if you want to link to any of my YouTube style videos shown on the Video Playback page "You Can". As Arnold is quoting as saying about weight lifting and coming to America, "You Can Do It!" I know because I get weekly visits and things that tell me "What are you Mostosofting about?" makes sense in our advanced society. Thanks to the pioneers who got us ready for things kids will one day take for granted. First, "Do you Mostosoft?" find the page and be a Mostosoft buddy even before video occurs.

About foot pump orbital centripetal. I'm fascinated with it. It's OK to show your friends or kids and teachers. The video Playback page is now featuring the animated view of it see all of them including the cartoon with character coil. 4 years anniversary in and still getting the visits on the site. I hope you enjoy all the updates including Entertainment and Drinks.

Love Me.

Bye.

P.S. Into all lives there are negatives. I went public but I'm not your Mostosoft dealer. Discuss "Permanent" record if it is bothering you.

Hi the Video Playback stuff for the host of Mostosoft "Bill" has taken on a clearer focus. The Rhoades car is what these pedal cars are now called. Our friends at YouTube have many great examples of Rhoades Cars, Notice the wheels. Wheels are a big decision on these.

Thanks for Mostosofting about 125 cool new people stop by each month. Me, with FB being cool but in my rear view mirror, anyone can see me at @BMosto on twitter.

Hopefully prizes to the coolest LPG Cart someone posts on the web. Definitely use the Rhoades Car designation on YouTube. Have a great spring everyone.

Welcome to Mostosoft....The critical text has been out of print for awhile. RIP book readers. Reinvented the video blog idea and have a new video on the Videos page. Quadricycle now has over 500 hits a real success for us. Try Lpg_PutTogether for the latest. Have a good year. 4 years current site a rousing success. Tell someone overseas.

The site was and is innocent. The club idea of PVC, personal video clubs was to protect against abuse of video and protect innocent people including children. My apologies to those who immediately think of degenerate and other pornographic ideas. Finding good answers to today's loomenfials needs guidance.

Mr. Clean leaves your dishes spotless but would you leave him with your 15 year old daughter. Regrets on bad thoughts.

Does ownership matter in response to questions? So, if the question is, "Are you over 21?" is in question if the answer and question are read aloud by a third party. All questions submitted to Male, Female or Machines deserve to be answered.

Ownership, Consistency, Persistence, Applicability all must be addressed to continue in the age of information.

Are you for war?

Does democracy work?

Does tomorrow depend on the answers given today?

The new way said no to Bill giving an answer. (Sorry about that. Web pages were to promote talk)

Bill enjoys baseball on television. Recently the Chicago National League team wins. Bill lives a life of very little consequence.

Men often wonder where other men find intrigue and passion, or war. Bill liked tidy things. Not a lot of juice could be found for the

emulators. The sons and daughters of the degreed and stories needed to find other endeavors.

Sitting and out making embroider the gilded lily of discontent.

Find fame fortune and feast. All he does is watch baseball. Go fly a kite.

Time to calibrate. The manned mission to Mars is scheduled in the 2020's with a Mars Rover Ver 2.0 launching in 2020. Tesla announces an electric car for the rest of us at rapid charging and over 200 mpc (miles per charge). Self driving cars now called autonomous vehicles get better each year despite recent setbacks. The PC on the Dell website has vast memory and processing power.

Violence plagues the inner city. People argue as they always did politically in the USA.

Imagine how small the earth must look, if someone were to gaze for it standing on the surface of Mars. Have we gone to far.

While the Olympics celebrated sport, the bio-diversity in Brazil shrinks due to the desire of Brazilians to use former rainforest land for cattle ranches.

U.S. swimmers probably use performance enhancing drugs. Lochte and Phelps have the jaw syndrome of someone that dopes.

The LPG Cart never lived. Hoped for college tries or corporate sponsorship. The frame seen hear costs about \$1200, the fittings to make it LPG would cost about \$600-. But Bill...(never catch the rest of those) that would be something great for kids and young adults to race.

The Mona Lisa portrait showed the essence of both the subject and the painter Leonardo DaVinci. DaVinci worked 500 years ago and created detailed designs of mechanical objects of his day. From War tools such as the Catapult, to Lens Grinding tools to many other theoretical machines like the Air Screw that give the idea of a helicopter, they clearly showed how engineering designs would look from that point forward.

An exhibit is touring the U.S.A. and is currently at The Water Tower mall in Chicago entitled DaVinci machines. The curators have commissioned construction of many of the drawings of Leonardo. \$15.00 adults, \$12 Students. Searching the web you can find some video of the exhibit. (Google: DaVinci ABC7Chicago.com).

One idea the Rotational to Linear motion machine shows a machine with the off center post idea! Was that DaVinci or an over and back attribution, we may never know but the exhibit truly impresses the engineer of any era.

So for the kids the post of 7 -24-2016 was to inspire a 5 step assignment in Linear to Rotational motion.

- 1) Cut out a cut sheet
- 2) Prove the up and down linear motion produces a rotation. (Seeing the exhibit or exhibit video would help)
- 3) Create an animation of the mechanism
- 4) Create a physical model of the mechanism
- 5) Show in a video animation of the mechanism driving a cart
Promise of tomorrow.
- 6) ENVISION or Do create 2 Linear Propulsion Carts and race them
- 7) Using foot pump orbital centripetal and a play pedal animate a car going with it
- 8) Create a working concept car that goes with the Play Pedal and Foot Pump Orbital Centripetal
- 9) (**MrMostoman YouTube Channel has the animation of many of these ideas)

Thanks everyone and hope you get those DaVinci books, visit the exhibit and do some of the project.

If any of you have a special artistic person or teacher, the assignment is to duplicate the LPG video of your choice. The quadricycle has been

viewed over 300 times. (Practically gone viral in Bill world) This is the “Cut Sheet” please boys and girls moms and dads print out the cut sheet and create your LPG Quadricycle videos. Remember simple video rules, the time of a video is key 15 sec, 30 sec or 60 sec or 90 sec. The Mechanism has origins in Leonardo Da Vinci’s work over 500 years ago. Internet searching on Da Vinci machines may get you started.

Here is that cut sheet. (Mouse over use the Right Mouse button and print.

What is an a** h***? Again since you had to guess what the two words were, the rest may be of mild importance. New York, Chicago and L.A. have big city news on TV. Of course Houston and Phoenix as well as many other places do. So on the news, the guys pistol whipping clerks or stealing cars at gunpoint from gas pumps qualify as a** h***’s to this person. Now the problem of the beautiful princess and instructional drill soldier says he, she is also an a** h***, to make the subject act properly. Lazy and slothful people it seems draw attraction of there a** h***.

Now some people are “national” and some are “local”, Personally if I could avoid the big city folk called a** h***. I would avoid them at all costs. Its possible at some point this persons behavior had the being “cross” as an a** h****. The people doing the big cities should know that once the name and face are seeing a** h**** it’s the guy with a gun, knife or breaking and entering kind of a** h*** in the life.

Come on suburban guys and gals don’t use that kind of chat on big city person trying to maintain dignity in what you call a world of a** h***’s

Go onto a big city news web site and see for yourself. Memorial day weekend hundreds were wounded in gun violence and rest in peace for many as well.

As a freelance idea man for political and business leaders know that the world is at an impasse. Will you be able to proceed should the following questions produce answers.

Question 1:

What is the meaning of “selfish” as defined by peoples of the early 20th century, say 1950-1970, the age of questions? Isn’t it the “ish -ness” of the self-ness as in be there at Three-ish

Question 2:

Sure it could be answered easily and you could also use “liberal arts” to help things along.

Should smart people have the correct/right answer to a question?

Are alternate possible answers to be given as well. Does smart include,, what to equip oneself digitally to answer questions.

So simple answer of the past. You wouldn’t be much of a smart person if you didn’t have correct answers.

So when resolved the discussion of home, “super brains” can continue.

Note: Penny Marshal I would take a meeting with you any time. Oh by the way did you get one of those cool Fonzie reverse mortgages. Richie or Opie Taylor, your also welcome. Hope it didn’t sound uppity.

Screenplay Idea: Fetching

An Heiress desires to create a film about dogs who find life as “baseball” players. They have a designated hitter and fetch the ball running in the obstacle course of the 4 base system. Finding backers, love and adventure the matron of “A leash of their own wins the hearts of future puppy bowl contenders.

The purpose of convincing an old lover baseball is for foolish dogs who run around in the summer heat is a running theme. Real would be great, CGI might grow cool.

Europe and the words, "You look Fetching dear." Inclusive.

Happy Memorial Day Weekend in the USA. It is the beginning of Summer here and drivers, flyers and train travelers will be out discovering the great outdoors even if just cooking a hot dog outside.

Posit: What is smart in a Google world? Anybody could be good at trivia should they have IBM Watson access. Even a plain smart phone with a search engine blows doors off of human data brain searches.

Age alert, the kid knows its an app isn't into it being a "Web Site."

So even if basic science yields nothing new, step by step engineering could take us to the ends of the solar system. Astronomers keep yelling they found some possible planets. Yay, I think?

Mothers know to teach the young when there is a smart thing about. What should the Papa bears do, knowing Google had the answer they said was on the tip of there tongue. Yes that part which tastes salt, sweet, sour and bitter. This is what the kids are raving about, "Misconstrue" is where its at.

Teachers or those blessed by China and Japan to teach in the office have a youth puzzle. Each day there is a Lie a Misconstrue and an Omission of sorts. Keeps people totally confused as to the truth.

So he says he is having coo ked goose this holiday? Huh? Lie, Omission or Misconstrue.

Hi everybody. Do you have what I have, in terms of fear? Do you fear being misunderstood? Generalize well and you have a theory. Generalize poorly and you are a stereotyping racist . If you and another person show up for the last item, both would say, "you take it" If you had

something and someone wanted some you would split it in half 50 -50. In private I got caught in racism. Could you forgive me? I said if you want drugs in the city here, say to the African skin tone, "How much for a quantity of drugs?" Boy did my Jewish brothers and cousins slam the door on my face. What about best dressed African and sweet big, delicious chef and hostess types. I repeated, yes, you can. So they have said they want to put me in the asylum again for such talk. (Oh and by the way the you take it, or share it line brought a laugh to many of the African race.) So I have been moping around saying to myself, "I'm Brian Fellowes." Brian is Tracy Morgan's creation for SNL. Tracy it is reported didn't want to leave the young underdeveloped sort out of the laugh. Brian doesn't ever get passed saying his name really loud. So I don't want to go to the asylum. I am not God. I was not sent by God. And by God I am not front page news for muttering to African homeland security agents. I am ramping up on some medicines and tapering off others, a few milligrams different then quoted to finish the month then the dose matches. My doctors know this is fine. The inflexible security people say I have targeted minorities, play like God and take medicines incorrectly. This then affords homeland security more time for surveillance. I have had real dealings between the races and call things in my race like some are "heads" that dress well and some are "tails" called butts that offend you. Gosh darn it if the words just came out wrong to some butt. I know you won't forgive because that wouldn't make America great again.

(A collection of humorists posted this. WDYT)

Donald Trump announces U.S. Supreme Court choices

The court should side with the state in all cases of human rights.

Local Bill: Human rights are a big issue

What are you meaning

Police shootings, lives matter, accountability and community relations with mentally ill, veteran and unemployed persons make demands on the Human Rights issue.

Radicalized people must be stopped.

Trials and Not Guilty verdicts cost too much. The court keeps appointments with the bad people then puts them in jail based on what was said about them in grade school.

Yes, of course, Guilty until proven innocent.

Yes to border patrols catching big dominant male Mexicans and outfitting them with tracking chips and collars that explode in the big city zone.

Yes it might be used effectively on Negroes if we get Thomas some moonshine he said he wouldn't care as long as he could play jug.

Am I wrong, come on people Rapists need Racists rights at stake.

Guns don't kill people in cars with guns, people kill people in cars with guns.

Flat out sir "Guilty until proven innocent!"

Local Bill: "Enough of this foolish chicanery." Forcefully played, do you mean you are not engaging in the foolish behavior? The ways to misconstrue thinking by the nation relegates communication to this.

Referred to in the presidential lexicon is "Sass" its not forbidden and not encouraged.

But to the point Abe Lincoln supporters made years after he died, "What are you doing (or will you do) in Mr. Lincoln's chair?"

Homeland security report listed as unsure if it qualified un-American. The justice also noted that objecting to the government will not be tolerated although television style mock protesting will be recruited by the military.

Is Air BNB safe? Resort towns would be fine. Inner city crime would make it unsafe. The Chicago city council visits the issue today. One of the Air BNB host sellers complains that regulation is unfair to honest sellers. Sad is it is this libertarian view abdicates governments command to provide for the welfare of the people, inclusive of restricting dangerous things. The well spoken woman truly believes in deregulation and you can see it in the passion of the Republican party. So, the party of responsibility belongs squarely with the Democrats.

So its as regulated as well as Uber and as seen in the mass murder and assault by Uber drivers, plunking some rube into "An Urban Garden Called Englewood" say would get quite the abject lesson in "city living."

But Bill Republicans want to be responsible for the rights of the fetus. Funny how that works.

This machine will free you from thinking?
Does it compute?
No, it vacuums!

Rough seas make for good sailors.
People use words to live by.
Do people use words to live by?
Do people and don't do people sail.

Thieves feel sorry for slaves.
Slaves get no reward for hard work.
Have you been selected for reward?

The author is not qualified to give you answers. What if the question, "Do you want to have an intelligent conversation, somewhere in your life?" is asked. The modern answer is No. So writing long status messages about school is dumb. I mean should you teach, knowledge, education or wisdom? It is Math, or the addition symbol or the wisdom it will produce an integer.

Long and the short of it "App Elementary school" goes about \$30k and the kid is on film and digital a ll day with fairy God mother style instruction. Core curriculum is covered.

Good boys and girls feel happy to be there. The question is do bell shaped curves apply to how someone feels in a learning institution. I know you tell the old people tests are OK but the print and news media tell me you lied to the old people and demanded schools be test free.

No quiz is going to make Buffy and Jody unhappy.

The assignment was to see what it meant to people to encounter a conservative and liberal in the old school days of 50 years ago in the USA.

The ketchup issue was the tip of the iceberg. Conservatives wore plain shirts with collars while liberals wore everything from tie die to hemp clothing.

Bland food was preferred with debates on whether, Pita Bread or Tortillas could be seen as bread in America. So again, the ketchup thing, is it a “whacky sauce” or not. The Chili Pepper also was on the bubble. Since that time immigration from Mexico has put quite a spin on the American mind.

Also the once young circus ring master of Comedy Central Jon Stewart is out with a comment that Mr. Donald J. Trump republican candidate is a “Man -Baby.” Now Jon is real successful but this statement from the newly white bearded Wolf Blitzer imitator is quite the pot calling the kettle black. Meaning Jon has been Americas Man-Baby for years.

Interestingly people like Jon always find it adult to say things like Rosa Parks type people are sexy and Elle Mc Pheresen types are not. Proving since he can lie about it with a straight face beauty is in the eye of the beholder.

It had to happen with Shock radio being roughly around as long as Donald J. Trumps business career. Trump has appeared on Howard Sterns program many times and the style of quick put downs is the style of the radio wise guys.

So the assignment was to find out what holds the “essence” of a conservative and what holds the “essence” of liberal. Rest in peace Prince. Who knew the network news would paint the picture of the purple rain artist over and over until we all believe he was a conservative icon.

The assignment, with the success of “Dancing With the Stars.” Does a person need “Dancing Lessons” if they want to dance.

Stay away from politics unless you accept my cocktail/drink offer to you.

Let me tell you the new frat trick. Take the pledge and ask, "Are you pro-life." To which you answer not at all but act disappointed by the answer. Next visit the big brother typee asks, ""Are you Pro -Choice." That's the fun eternal pledge joke.

Brother Dan the old ZBT loved that one. The super smart pledge who is versed heres the actives say, "Oh yeah that guys Bill Busker cold." Any name they pick works.

Hmmm old Daneroonie turning 49 on Flag day.

So age matters none.

The rule was W.D. (DaWilliam) doesn't get to win. It mattered because he seemed smart to people. Agreeing with DaWilliam's logic left people low and uncomfortable. When asked things such as, "how do you know what a book is about?" (You read it not ask someone and pick the 3 adjectives that are used as a third word. When asked if she said, "375 for 18 minutes" ask what is it at 525F.

So again, oh yes 50 years ago a true conservative wouldn't have had a bottle of ketchup in her home. So funny business yenta says it to the German neo-conservative and we chat and of course he knows just what W.D. meant about conservatives and ketchup.

So to the protest of millions of happy Jewish democrats, W.D. claims the "Beta of Republicans" an indication of volatility is with the Republicans now and as predictable as business cycles should keep up the Republican conservatism, unless food or ketchup are involved.

American Gothic looked like gorgeous DeAmilias grandparents, as well as sexy Ryans. The response in saying conservative and knowing what some people think it looks like are two completely different things.

Come on people live life in Technicolor.

The U.S.A. election for president narrowed to basically Hillary Clinton (d) and Donald Trump(r)

The international community now tries to sort the tea leaves to support a candidate and policy that favor that community's trade with the U.S.

Along those lines allies and adversaries weigh the strength of U.S. resolve. In Israel support is gauged for both Israel and the Palestinians.

Americans have been supportive of Israel as well as the PLO. What many staunch Israelis can't comprehend is the depth and true love for the "underdog" Palestinian people.

Oddly enough Germans are taught the love of Mercedes is love for modern Europe's Germany.

Encouraging Jews to ask, "What is your view of the Palestinians" draws the ire of the simple Semites. They need to hear "We love Israel" from Americans. The support that Americans give Palestinians makes them blame those who asked them to research your facts.

As in, I said you can't trust some of these candidates due to their commitments to Israel's arch enemy.

So best wishes International trade seekers. The waters seem to be getting less murky. The house and senate are where the action will be regardless of president. (Known as the undercard)

Best wishes to those active truth seekers.

Overheard, "Come on Woodhouse the guys a bus bombing terrorist and doesn't deserve you."

(May the forth be with you)

Hi everyone. Being not the youngest fox in the chicken coop I grew up with the message, "All you need is love" so its fun to see all the groups

getting equal opportunity. The rainbow movement allows for things like open gay service in the military and same sex marriage in many states. So at present single apartment life for this 53 year old guy is fun. My homeland security team watches over the web site and operations of my life.

How to say it to the world that doesn't notice. The guys in the Navy and Army love each other in the way that they look act and are alike. Sharing clothes and bodies is a natural. The Dad's my age don't think of it as homosexual or weird, its just how new kids are.

So honest to goodness a persons orientation does not get someone excluded from the armed forces. These special ops guys get information by posing as young sexual woman, curious boys and overtly curious older males.

But W.D. who doesn't know this as in who could you tell. Barak and V.P Biden make a good pair with rainbow flag in tow.

So as a older guy, you think this must be a bomb on someone. Nope its just how it is. Refer to the David James Elliot show JAG to see about how the preference puzzle began to change.

So you get it, the buddy system works into any number of gay lives.

So as a bomb, then we need Presidential Politics to tell us what toilet to use.

TV Note, Sex and Drugs and Rock and Roll a 10 episode show from 2015 might get your love.

To that she, she male, teenager in my homeland security head, I know you and your pal could kick my ass.

Tracing through cyberspace to show how one message links to a multitude of nodes relies on assumptions about clean message pass on. In the old days a person "passed on" what they had heard or seen at an event. Today, the person "posts as a status" or "tweets" the "passed on digital nugget". The issue of first person story telling muddles the truth table

formally. Reading, “He said Hello” or “I said Angela for President” can be tricky. I might be “Ich” on a German machine or “Ahnee” on an Israeli machine. Subsequent questions asked of the person tweeting or status posting confuse the issue further by suggesting “He” endorses Angela.

Sorry kids, moms and dads, there is no truthful way to post a story in fair play.

As a guess, some countries you only get to quote your bible in sound. Discovery and personal identity fail as in the multitude of “first persons.” God is great, God is good, on this day our God loves us and provides for opportunities for trade and travel. And so it goes that the trade drives the parties together and that in sunshine on times of operation it is swell to desire what has been expressed and offered for the amount that all in fairness should offer to convey a proper trade.

(***Again the type of thing he thinks is fun but Facebook thinks he’s a chump for, its not anti-trump or anti-girl or anti-big bang theory)

4-20-2016

Knowledge base the cloud, individualism and shared data segments.

Formalization of the collective consciousness

Decentralization of the brilliant.

European endorsements by language

Middle eastern expectations

North American Class system

Test Case 1:

A 10 year old has an incident with neighbors. His parents put up a wall fence with the neighbors, suggests the government of Texas should fence the border with Mexico.

A 60 year old candidate suggests a border fence with Mexico.

Question: Is there a less right or more incorrect statement for each.

So pursuit of a line of reasoning on a cloud sounds like this.

Do good fences make good neighbors.

An 18 year old girl asks, “Am I attractive to you?” is she saying it to an overweight member of the opposite/different race 3 times her age.” Or “An 18 year old living in similar socio economic basis.”

To wit the answer of the old guy is “I’m 53” and the digital denies this response to the cloud.

In re, the requirement of sexual overtones on a digital.

Not only considered illegal but shaming would take place in Euro - American gaming.

There are endorphins and neurotransmitters that react to give the brain states of success and failure. Do define success or failure on these chemical signatures or on a third party called the judge of such things, that yes that could be considered a success or failure.

Didn't see or hear the art of it but wore the emotional life of it.

Pseudo emotional. Yes.

At this point she wants to know if she is sexy to you.

Take the case of a smart environment like a college, lab or job two men are speaking on a subject the female in the room enjoys, the smarter of the two men is established, at least in her eyes. The attractive one is not the established smarter of the two, but on the one that errs. E.g. Mrs. Obama, Mrs. Clinton. Pursued just the same and shruggingly accepted Mr. Obama and Mr. Clinton

I'm 53

Hi. The author W.D. Mostovoy does not offer his works for download or sale anywhere to his knowledge. A cracked EPUB file may be circulating the web. Its exact content has not been verified for authenticity.

A sound sample is available of the work Top Game on the downloads page.

Good-bye to the facebook. My attempts at witticisms defeated the paradigms of success held dear.

Thanks to those using Mostosoft. Over 6000 Hits per year for the last 3 years. Since 2013 people love to say, "What are you Mostosofting about." Tech joke the GE programming guru is completely out done by the zazy guy. Putting fruit hats on animals. Thanks guys for zazzying me, its real special\

Bill went to Michigan, got a B. S. Engineering in Computer Engineering. Back at its inception there was no video hosting on the web. Ideas being what they are YouTube filled the bill well.

Interesting web page www.23andme.com for genetic testing. I recommend going for it with a friend to compare results. (Parents included)

Happy Birthday Bill Mostovoy born 3/4/1963

“Too much sense reveals nonsense” -Mosto [Available Downloads] The download will begin free -> [Free eBook Kindle, iPad, Nook Book Anthology] check your downloads folder on windows systems.
“He was serious” – Anonymous.

Have you ever come to terms with your fathers quirky behavior. I have an account with him and he wants things now in a more orderly way. I feel the guy is not diagnosed but schizophrenic in behavior.

Took my change in for \$18.02 A Jelly Jar holds about 400 pennies. Had 2 jars, one with Pennies, one with Nickels and dimes.

The PVC idea for personal video clubs idea is listed on facebook hope you “like” the page. This is Bill on a Sunny Day in May at age 50

Bill Mostovoy posted a photo.

Happy mother’s day to you. Had a meal with Dad and Mom’s new friend Nola. Nola’s daughter in law creates “Autistic Mice” for science out in San Francisco. Hannah turned three, Rene’s daughter and Bennet is doing the doctor thing. Me I make Ouzo at home. See the home brewing page from the menu.

Try the simple machines link to see the latest. Great day today. Sunny and seventy.

Remember to say, “have a nice weekend today.” Out of the blue burst mode, “how was the pizza?” Hard target cold calling, for fun sell pizzas for Leonas, JB Albertos, Petes, Giordanos, Dominoes on North Clark.

Cold call 773 all night as prank calls. Sponsor people, call the business and place the order for people. Today for fun, tomorrow for marketing payments. Fill the stores which are "For Profit" and not runaway "showpieces" Come on you people loved this place, fix it with phone and love.

The books are cold. Go over to www.lulu.com if you want to Find: Mostovoy, Had a thought. If the fourth quarter is ours, or late innings rallies are your thing. Maybe just maybe a book that says, "The Payback Gift" in big letters and Mostovoy in the lower right corner will look like a playbook for you to "be" in the future. Maybe just maybe you read it, maybe you just believe you know what is in it.

As Ernie Kessinger used to say, Lets play two Burt.

As Ernie Kessinger used to say, Lets play two Burt.

USB stick spy information really sells. Steal it off Mostosoft and \$50/flash drive. Refillable.

Hi

There is a chance Google Earth is used to change the "blessing of Rogers Park"

From Juneway at the North to Hollywood Peterson South or reversed
Lake Shore Drive ends into Sheridan Road North

Rogers Park is blessed East and West.

West is Jewish and Latin with some Black. Touhy Ave is about the
center of Rogers Park.

The one SACRED ROAD or is it TWO or THREE....

Western is cold and functional, most Americans would just drive it.
If you stop in, locals look like a Variety

Clark is youth vigor and fun, with international food from Cheap to
Ritzy (It's the north side you may use words of a descriptive nature)
It's your best action street.

The "el" stops at Granville, Loyola, Morse, Jarvis and Howard
between Clark and Sheridan. For action proceed to Clark. Only on summer
days you would want to walk to the BEACH and get off of SHERIDAN to
the trail

Sheridan going South from Evanston has Disabled People and Old
Retirement Centers. Some youth of African decent at Touhy beach, they
love the park and hoops. Then Loyola and "insurance check" people such as
myself and students for www.luc.edu Loyola University. Then the actual
campus. Then Sacred Heart Cross to the north of Highrise Jewish Elderly.

It's cold.

Thanks, the book took place near Pulaski and Irving for two and
Ballard and Potter in Des Plaines for one.

My good friends did I mention Peter's second wife died suddenly at
42 of a brain aneurism, If you misconstrue it is on you. I hear in some
places woman over 40 are asked to request an extra marital affair from a
man with a car. While at her house she asks if he can stil I do a "hurled

seat” she asks let me dump the weight of my house on your head for a second and she drops a 5 lb hand weight at 3.5 ft over his head 110cm and it falls on his head. She takes a car to an autoshop and says drop the engine out and give me the value for it. She also siphons the Gas to fill her tank. You see you could say I was for this, but why would I be it would put my life at risk. 10 great girls each weekend, in one month that retirement picture and fidelity thing look good. Med Students why does the body which is 65% water become 40% water with salt dumped in the mouth.

-Mosto

Note to Louis, Mike and Alan. In a world where obvious “puff claims” about oneself take place. My claims have all been explained. In a world where some individual wants you to believe yourself to want to “outfox” others for a prize. I say over and over, “I did not win” and I am “exceeded” as to what you would want. Religiously she has me because yes I would have wanted to win and take the financial prize, get the girl and go to my “other house.” I can’t think of anything that would make this possible. I would rather die respectful then do those lives that do disrespect and run around the world on an airplane. I am not a passport holder and I am not doing any disrespectful bad thing. You will undoubtedly here this is some “outfoxing you” maneuver. I am just not clever enough. At 40 I may have thought I could beat the system of security and “get away with something.” Over and over for 10 years, fearing every store merchant may hunt me down as if I had stolen something I cannot be some “fox” to you. Hear I sit.

07:06p CDT.

My good friend, hello. Mentioning “names” and “places of education” one could think dwelling is what this pulpit is about. To dislodge the present just for a second with you may remind you, the youth of a nation goes through your old story like it was new again. So to say, “Jimbo” has made his “Microwave Popcorn Maker” you would think this school chum is on our minds. We progress as doctors of the pulpit by forgetting purposefully those immature people who attempt new methods of solving trivial problems to earn an unfair dollar. So the fellow, who thinks he can say is Jewish, but is not our friend, ally or associate thinks he can say a “Microwave Coffee Press” might be fun. What an idiot. Coffee is a celebration at a fine establishment or to be enjoyed in a fine custom crafted machine. Taking a teaspoon of coffee in a “boooowl” of water and microwaving for 3 minutes may make some brown fluid, that then can be poured through a strainer or filter. But you see this so called clever method

is really grounds for our OCD squad to take over the so called “inventors” kitchen. Everyone knows the father decides on such things.

Note: Toni and Laurra and “:Michigan” at The Growling Rabbit, one of you might run the at home “Coffee Haus” and brew up a pot and take the others like me for a cash bonanza or just good feeling. I mean it should be people you know to look at they won’t be cold about it.

Photo posted by William “Bill” Mostovoy...Not trying to prove something...I just don’t remember if I bumped into something. I don’t remember falling down. It’s kind of dizzy focusing on pages. To Argyle Abbey at Trilo gy, I really am William. Your what no grandiose comment confused me. Don’t people like me say it that way.. As for could a person like me be phoned into Trilogy as an individuals “Big Person” you see that is not acceptable to some groups based on heigh t and weight and condom size. It has been about two months since “Bill” the person made an obvious effort to say things appropriate for his size. It is his hope you would have accepted.

That you might kind person, tell Mike, I may have received a blow to the head. If this explains things. I am icing it down with frozen corn niblets. If it is not smart to say sub -dural-hematoma, I think there is something of a huge not behind my right ear.

Regrets. Saw Corinne today at Trilogy. So after a nice chat she goes to call the Dr. to see if she can fit me in. She says to him Sheldon is here. I lose it in a nice way saying have you spoken with him, “No.” a nice Good-Bye and a don’t call me said real nice and I’m home icing my skul. I am afraid someone will call me stupid if I ask them to look at the back of my head.

(News Update)

Congratulations to my Niece who travels into the United States from South America frequently. Your application to be a registered importer of functionally controlled substances has been approved. This letter indicates your paperwork has been received and processed by the IRS. You must retain this letter upon any and all Tax Consultations from the IRS. The law enforcement community understands entirely your desire to assist the in importation of goods. The presentation of this letter requires payment of \$1,200 initially to activate the permit. At the request of agent “Orange” you are to supply the \$1,200 for tax purposes and be happy.

Sincerely,
 Friends of the importation Bureau
 The Internal Revenue Department of Project X
 I M P O R T A N T * * * * * S A F E * * * * * H O U S E
 * * * * * P A P E R * * * * * S A V E * * * * *

Note: Dates are NOT important on this type of document.
 Signatures are for the NOT digital age. As for postmarks, no one needs those,. Hand delivered is the way to go. As far as names of individuals they can be made up in this type of thing for security. Contact information of the made up agent is never required on this type of document for security. If the contact person uses some jargon that would be OK on this type of thing. As for the masthead on the stationery computer paper and printouts should be fine. Things like the director's name and official agency symbol must be omitted for security purposes on this type of thing.

Special Fiction Reissue

Well, the computer person writes a story that with observation and digital retransmission the entire world may fall down like electronic dominoes should one person in the computer game decide to link to real time military hardware.

Yes Susan, like an Anti -Aircraft gun or yes Rich like an auto -fire defense canon.

Did you know teachers and older people have parents often as well. In this case, even me the teacher figured out how to do Bill's logic, that is the guys name.

So his Father doesn't love the idea that foul play could take place on a computer so he says, "Bill has illusions that "he(Bill)" is influential when really his computer career is over and anyone can use DTP to have something printed.

"So I will tell you once I did it", Rachel said, "It worked.

It is so simple if you can remember the KEY words. I couldn't get it but in this case it went

	Book			
No		Yes		
			Influential	
		No	Yes	

	Injurious	Informative	
	No	Yes	No
	Dissociate	Pshciatric	Yes

Action Needed (payments/battles)

Now at this point he says the book is to be considered NOT INFLUENTIAL and yet let us analyze the next portion. As it happens Bill's father keeps ALL of Bill's money. So when the subject of Book enters the equation how does Bill retain "Normal" operation of his life with this tree.

He says things that could injure reputations.

Who paid for church every day in Chicago?

This isn't Sunday is it?

Jack writes so well about subjects and now Diane says she will use the serious plunger if those old style deep questions find their way into Jack's head to explore. How does she know the correct loving approach without reason. The reason for love and the reason for wellness needed definition.

Your wandering Jack. Sit down and love, said Diane. We need more cookies. Everyone got lots of cookies. God will provide cookies. Thanks Di. So Hansel and Gretel say the English language makes people dead inside.

Gretel agrees with Diane and Hansel values the illustrations. Follow the bread crumbs to your new lives. Do they have a Tasty Freeze around here. Jack you know that is cold, Diane said.

"You are so much like your father.", Diane said

"You are not your brother's keeper it says in the bible", Jack replied.

In this land you must differ ever so slightly from the exact blessing of your blessing giver.

Blessing is good. Politically and to go to places where persons arrived at a learning place at the same year, you would do what was called, "doing two" This person knows this.

Over and over you tell people about "brother's keeper" It was a shame Cain slew Able but in today's world you seem not to care. It was who you knew.

This is not about this person's family.

Say John Johnson Sr. had a blessed son John Johnson Jr. If Sr. said it one way and said to Jr. I would like you to say it this way now, it is the duty of the son to say it the new way.

In the past Sr. realized that if he used his word "lowly" for a group people grew defensive. So if Jr. uses "ground up individual" this would be

preferred. As to why, Sr. got in a heap of hot water and great wars happened. If you don't change something, people defeat you in war. Germany will lose to America again with this, guaranteed.

Did the companion video. Code: Do want you Bill Mostovoy, READ or HEAR READ book on him? Do want Bill know what write down? Call a for character assassination. Dis workee see karakter assassination work each time. No nice guy say..put it no nice guy he got not big Nixon. Nixon only Dick in China from U.S.

Do Harvard girls assassinate him daily. Course cause one beam one gun make panda girl stroke hair and say beauty girl make Bill dumb guy so take puter stuff rich for Japan/rice cunt-ry.

Do doctor of head protect with vici ous lies. Yes say big money to it.

So decent MF -er jus askee on read or hear something, would you want the guy to hear what you just said or wrote about them.

Say God's day, man say, He steal Roman Nails from port and not pay. He make riot in peaceful Jerusalem at money table. He not pay when he say bless bread.

If religious guy say word Blaspheme. You watch guy say he hisself got God complex problem/

Classical music finds opposition often amongst African people, not for the lack of beauty in the work, in the "deviling" it must take to create a violin string. The pounding and sanding of a wood baseboard for a grand piano shock those that use the wood to create spears to hunt gazelle and then roast over a wood fire fla me. The human voice aria impress however most of all. The pledge drive continues at WFMT and after your friend finishes the viewing you may invite them for, on sound the joke defines the French and Spanish words for little tasty bites is explained. The pronunciation of the street Goethe on the north side is explained. The monitor was about to roar with laughter at the "phonetic pronunciation of Hors' D'ouvres"

As for Frank Thomas of course he should still be a ball fan.

The news of background checks rages flaming in the news. If the person says hello to himself at home the grunt of Rachmannanoff belching "English" makes one really want the word like "Die Steingast" definition of the German royals from Harvard.

Simply, wait periods are required. Chinese laundry method required. Pick it up a week from next Tuesday. There are your Guns and Ammo sir. As for the method of payment, a credit card must be used that has a zero balance. A code at the credit company will flag it as a "watched item" code 001 gun, 002 automatic rifle, 003 explosive.

Without a zero balance or card an application may be filled out in store for the gun shop to maintain.

A person may be visited by terrorists anywhere in the country just as easily as meeting a vicious neighbor. Defending oneself makes some sense. As for background checks, the sheriff or municipality police chief would get a google earth map point on the given address of the gun with the concentration map being provided by software.

William posted a photo 11:02PM

William "Bill" Mostovoy(Owner Omron Blood Pressure Gauge)

In the text ivf is mentioned. The sugar issue ruled this person out. My biological father donated as well as an unknown biological son of the German sire. I have no illusions that I'm a dad.. The "brother " has said, "How would you like to have Bill Mostovoys baby so much his sex life seems to be my issue. Covering him or else had come up. After all they are good kids their dads are nationalistic oh boy.

We've met my biological mother and this person. Judy and me just forgot after a while. After about six(6) years of age, she Judy was the mother. As for Sheldon, woman have ways about belief I believe he is not the biological father. Things Judy may have said, protected our happy home.

Spilly(ageless)
(Be the Mic on it ladies)
Mike,

If you could do this your cold. (Cold is the new, Totally Cool)

If I wrote this could you "Mic" it up

Mic: Hello, fullfirstname, it would be totally cold if you went just with public web stuff on, "Mike, Bill and Chris".

if agreement in anyway

Mic: You rock. Could you get the world file as a "share toy" it will benefit us in the end.

Colombia is winning! Totally being smeared by nieces. If someone swaps world on this person, she could sell it elsewhere.

Mic: Stop your whining Willie.

Bill" Once again my mood is elevated, but it's just every time her guy do es a crime he calls my phone and says my name ten times to "any agent" eavesdropping. It's a film called "implicated" only I didn't do it. She says in 1983 I split a bag of pot but was the one who split a 1/2 into 2 1/4's

Dang I'm not cold to pe ople with it. It's no life for me to be into. I never went bogus to people for it.

Thanks
Spilly

Please do the year with Programmers say 25 to 35. It could be like your thing. Hey, your good with the computer right?

Bill "Mt Clean" Mostovoy(young as ever, take me on my one room ladies)

Yes it had been rough around the corners. Found the missing glasses tossed under the kitchen table. I've decided to wear them to see if I get accused!

Cleaned the house. Made 2 sales calls. Walked to the cleaners and Pharmacist. Called the doctor for the A1C (6.2). Modified 9 web pages, and posted 4 videos. I'm bushed.

Apr 9, 2013 06:33p CDT

William "Bill" Mostovoy(Did you know Will in German is the name "Vil or Vill written Wil", Famous Wil, Wiley Brandt former Chancellor of Germany)

Anywat the Author Spotlight page takes you to an Authorized Link in with lulu. Many of you are told the "page is bad and it links out of Mostosoft" That is what is called a dirty trick. No today, Mitch and Ashlee in Kentucky had a spat about if mental illness on Ashlee's part can be part of Mitch's strategy meetings. I had no answer in print or today on what is fair. I ask nicely do not ask this person to way in on what is "fai r play" and what is a dirty trick. I am somewhat upset many individuals do not admit there are ANY dirty tricks that go on,. They go on to tell you corruption is not a problem. With evidence every day in the media, forgive the person for what he believed was casually mentioning it.

Be good everyone. Smartfest at the Growling Rabbit Friday 7 -9, symposium on Kant or something Procedural Cloud Openings and what not.

Nah, but you should go over by Milllenium's

 Hey did you ever figure out how to plug the antennae from your TV to a
 metal window frame to make the entire frame into a TV antennae?

William "Bill" Mostovoy(Site Manager) posted a photo. "Glad no
 one is on or someone might think there is trouble worth stealing his
 keystrokes!" it is Live!

Bill Mostovoy(Amazon.com blood pressure OMRON customer)

The game referred to is called the "Wolf tail of protection" the
 nurse is asked by the stalker wife, when is William's appointment. She does
 not know exactly how to protect him or even tell the "Wolf tails who he is"
 Every time he is startled, shaken and abused for messing with big "Bill
 Mostovoy's" medical excursion. On the way it's like right this way sir.

After by God every dumpster diver and city rat who extorts for protection sizes him up.

Listen, I apologize if you feel, Vapor Wife is the one who knows how many people it might involve. The city CAN be fun, and probably she asked one nice person who wanted to take a trip up to see NU and it just got to be a thing. Vapor Wife is most likely rich and insists on good coverage. A couple of twenties say, buys enough cans and chicken to have a nice party that night. NO, in no way to I know if she knows "bad" people. So she told a friend nicely. It is my hope that you realize that through the NAACP page you can get how people eat off of good safe Vapor protection. Love.

Apr 7, 2013 04:56p CDT

You were assigned 4 projects over the weekend. How many were accomplished? You were to acquire NCH software. You were to acquire a commode, could use a downspout with hose to a 3 gallon container with lid, You were to acquire a Rubbermaid trash can. You were to begin assembling your ten friends for the posts.

Now as for the issue of communist "care", that word in communism means preserving the collective order through behavior modification. The word "luck" is similar in English. If the neighbor is a bad communist to you she cares to take more from you than the state recommends. So when someone cares, do they care where you put your money in your home, so someone else can take it?

As for medical care, it is to be considered an "exception" to most ordered lives. Your "care" about the authors medical visits and the inability to deal with my doctor fairly by phone made the person cancel all further medical visits.

As of this point, the intervention has been so massive, that the person will not be able in the spirit of National Socialism to attend a medical doctor and defraud the state of the insurance payment.

-Mosto

People of faith: I could get there easily and well to see the doctor tomorrow. I have received a threat that the only place I will feel healthy is in the office on that day. It indicates to the National Socialist that a problem must be enhanced in a DOUBLED MANNER for receiving this medical care. Now, simple things can be used to explain how someone can be made to feel bad,. As one who HAS EXPERIENCED the ignoring of the threat, the blood work is done, my internal meter is good, my scale tells me the

conditions. It's not worth risking cardiac arrest for a few moments of
GOOD MEDICAL CONVERSATION.

-Mosto

Told Nola and Shell the joke at Leona's, some people make it a long one. A guy walks in to see the doctor, doctor gives him a physical, says you look great the guy walks out the door and falls down dead. The nurse up front gets the doctor, he takes a pulse and says he's dead so could you make it look like he was just coming in then.

04:21p CDT

Tell the doctor the person still loves them.

This is the biggest curveball to the Navies of all countries. Many people know about settling old scores. European conflicts resolved with some animosity. Asian crisis people held some grudges. The money play on the winner is Bogota. Every person that scored big with drugs and bought guns became a de -facto soldier of Colombia. It works out well in disguising the attacks as Mexican.

Good luck in your struggle with snow. About the straw cut into three sections with a wax tip on both ends and then vacu -sealed it reminded me of a delightful lick candy that you poured on your tongue called the Pixie stick. As it is Nose Candy as they say, the Pixie Stick people might be happy to help.

To defend myself this person invented the pre -rolled package, happy butter and toot stick distribution methods, of course the person was at a point of a gun for it.

02:01p CDT

Don Lord ran a good business at Chernin's. Don hired every race and creed for his stores and warehouse. As great people from the different race a vote was taken amongst the best salesman people ever and the attempts to create the perfect Caublanasion as Tiger Woods put it were underway. The mix of Caucasion, Black white and Asian in old world. Bill felt at the time once it's done it's America's worst nightmare, not for the look, but first he will know every candle in everyones Menorah, and next he won't have any "Boings." Think about it.

Billy "Colada" Mostolet

You see the “Eau du Toilette” is said Oh do toilet meaning Water of the Toilet, but really fill the sink with water. Add drops of Eau du Toilette in basin. It is so delightful you will want to wash it all over. The perfume you dab on. The Eau du Toilette is as described. Anyone for some L’are du Temp. Growling rabbit was in French today. Through my snit at having to wait in line and left without my Eh-clair.

Billy “Bridges” Mostovoy

They have a rule for Billy if he travels, he may only stay at one hote l in a city 3 days when traveling with a few rustic cabin exceptions. So to the travelers who love the Four Seasons and Arbitron hotel give it a whirl and switch hotels to be fun. Well each group from each place probably has there own rules, that must be a local thing because many opt to live in hotels. I would just be expressing going to stay in a hotel for this person would not work out.

No the hotel doesn’t really care unless someone from home calls.

01:23p CDT

Billy “Music Man” Mostovoy

Children of the Sun, Billy Thorpe. About Judy Byers history. Her aunt is Jennie if you read.

Chicago Tribune “Aaron”

Jennie Kaplan Aaron, 89, died with her loved ones by her side on Dec. 19, 2001 in Beverly Hills, CA. Jennie was born in Russia on Jan. 7, 1912, the third of five daughters to Rose Osherenko and Phillip Kaplan. A lifelong resident of Chicago, until 1996, she graduated from Marshall High School, Normal Teacher's College and the University of Illinois at Urbana. As a progressive young woman, Mrs. Aaron began teaching in the Chicago Public School system, where she taught for over forty years. An unwavering Cub's fan, an avid reader and lover of both nature and the fine arts, Jennie was a maternal figure to all she met. Known for her c ompassionate heart, she was a tireless volunteer for many causes, perhaps nowhere more so than the Hadassah House of the North Shore. Her friends considered her one of the finest soup makers, and her family is vying for her griddle and recipe to her delicious buttermike pancakes. Jennie Aaron was married for 62 loving years to her devoted husband Joseph Aaron, who preceded her in death four years earlier. She also was the last survivor of the tight -knit Kaplan sisters; Faye Gaberman, Sadie Byer, Eva Brodar and Esther Jonas. She was a proud mother to her daughter Bonnie Aaron Levin and son, the late Dr. B. Michael Aaron; an adoring grandmother to Brad Aaron, Jordan and Helen Levin and Leigh Levin; a beloved great -grandmother to Grace and Joe Levin; an

affectionate aunt to Judy Byer Mostovoy, Joanne Jonas Zitter and Dr. Richard Jonas and a dear friend to many. The family will conduct a memorial service on Jan. 27, 2002 at her daughter's home in Los Angeles, CA. In lieu of flowers, the family requests donations be made to the Jennie Aaron Fund at North Shore Hadassah, 1724 First Street, Highland Park, IL 60035 or a charity of your choice.

Billy "Old Man Spilly" Mostovoy,

Did you realize the stuff is nothing new? Marcus Leshock at WGN is up with this for himself.

<http://wgntv.com/leshock-value/>

It is my hope you look at Marcus A/V blog for yourself. Marcus works in my Berkerley (Berke) but if you feel Marcus is not putting the convo one more about Mostosoft kids posts your so off sir. He's with us totally.

Obviously "Marcus Leshock" is much more professional as he has an entire television network with him. If some decent person emails marcus with some Navy Bean Mostosoft file it might be a nice touch. To me I would want he and Mr. Tom Skilling to see the Can of Pineapple video if you believe in the "Head Trip"

-Mosto

About being what a Mayor would do. OK this is why people required math. 50 wards have 50 alderman with one mayor. The Mayor decides with the council on spendin g. Every alderman "cares BIG TIME" about the big city. The words "What is the plan for your ward?" made people weird. OK say you were mayor Robeson, you would take the 50 pages, say this is what the guys say, My page on top says we will see how we can pay for it. You would so. So anyway, "Pointing to something in the ward you did is the best way to say the city is improving if you want the big alderman check" My take is that the Aldermanic Office perk should be used to put the full 30K Staff into a g uy, that says "Make me 30K to replace you AND gimme something to point at in the ward." I'm goin down to city hall. All I care about youse is da one thing they point at. What you do, you do. When the 30 is in we will see. Do you understand I am not asking you to break the law.

Of course the budgets on plans for the city are voted on and modified for other wards, Come on. No one plans to fail, they just fail to plan.

Since you asked, my ward is the way people want it, and so saying something mi ght be out of line. The intersection of Clark -Rogers-Jarvis I

would recommend a cul -de-sac at Jarvis dumping into Clark. Traveling westbound at Jarvis you would not intersect Clark. A Few Parking spots there would be good. Rogers has the toughest Bus left from Howard Street inbounds and a bit of a wait from the north bound 22 Clark Bus. The food store is easily accessed with a trip around the block. The Jarvis block between Ashland and Clark are the affected homes, they might prefer it, as less look around traffic would be taking it. Temporary construction barrel blocks could be used to test a day or two.

Bill Mostovoy (Brewer)

By law public brewing of good sharing people of brew, by Jim Brewer/Goat Boy law must drain the gallon or 4.86 L brew of the remaining grains and bread soak pieces. This material goes in a slop bucket with 1 cup white flour instantly after draining. It is hoped an Arab will be told and prepare the animal feed from this NOT -Blessed for human consumption material.

As the White flour was underneath my 2 rolls of 1 cup rice flour ½ cup corn flour made 2 rolls baked with ¼ cup corn oil dripped over each one.

Could have used some sugar but it's OK. The most critical I could be was to my tongue it had a bit of bitter.

-Mostovoy

5-April-2013

Bill Mostovoy(Dessert Chef)

Soaked the pineapple. Had a vanilla cupcake hanging around. Cut the round bottom half way. Put the pineapple round in the center and topped with the iced top. "Greatest Pineapple Cupcake Everrrr"

-Mosto

You can't beat the house in Las Vegas but can you beat a coffee house with a guest fool No help first make a Café Soy Latte with a Cocoa sprinkle top. Not just old coffee with soy milk microwaved topped with nestles sugar free coffee powder. How much would you charge for a Grande?

Bill Mostovoy(Obsessed with fixing broken city operation)

Look, Marshall's department store, purchased by T J Maxx has some good things at a good price. The wheel of retailing lecture from Professor Peters IIT Stuart school on how businesses price themselves upscale with involved manager has a fine example in Target. The popcorn bit \$1.00 bag

is \$4.00 with Starbucks lattes now available (On Howard and Sacramento in Evanston). So you did say that yes Target and me are good, especially with kids. But Marshall's was also on the list. First thing tell the counter to put some box on the open door to hold flyers or ads. Next,, do not hire a full time greeter, but you can if times are good to wander in and tell people a hello or something. The coffee stand isn't unique but off to the left, cram in a bar counter and some stools with a half pig pen thing. Fitting room system is fine but Men's traverses the store. 10x10 square feet by the ties and belts is clearly how that should be. Thanks to Marshalls for the Genuine Levi's 505 jeans \$24.95 32x30 thanks for asking.

About the kids making some cold up there if Detroit Axle catches you he will put you in the back of Marshall's as your alleged reason for being there was to "get a job" Now walking out without paying is not right once you are responsible for the dollar value of anything that comes up missing here. Really. No. Just sit here while I phone your mother about taking you to County Jail or sitting in this store room for a while. Since Axle is in, they are not some army that will travel far. Just a thought on a wing and a prayer.

-Mosto

FINGERPRINT SCANNER ORDERED: Delivery by USPS of USB Fingerprint Scanner from Zivco should arrive Saturday. Online suggested the post office sat on it today as I would "just have played with it and wasted a Friday, (mysteries and suspicions of course)

Anyway, the word on the street is a tough puzzle to solve, the words are, "We are Bill's cold shoulder" to which you reply Bill is using people to be COLD to me. The invention of the "Cold Shoulder" was to have an old girlfriend grow cold to "Bill himself", Why someone would tell you we are Bill's cold shoulder is they no you will grow so angry and not at the people but at BILL himself.

Rumor, the guy walks up to every race he hates and says, "This is a message from Mr. M." "Bill sent us good didn't he" at this point you do not attempt to solve the gun issue but put a gun on Mr. M himself or Bill.

Do I think someone will request every use of the scanner be sent out the web to verify fingerprints of the "Cold Shoulder Bandit" I assume right now it is being taken apart and installed.

-Mosto

To the male bastion that takes the woman's movement as something that is a fad...Let me assure you, your technical abilities have been passed at a level you have become outmoded by developers who use standardized methods. If in explaining you bother to say, "Honey" or "Sweet pea" or "Darling" or any other words other than "It requires" you are going to give up a goal. You have not recognized a dangerous player in a dangerous area. The dangerous area is the digital system "stud muffin."

Bill Mostovoy(Actor)

Fell into Gollum to describe the face of the former Goyle. He and the Goyles went around to pick up shakes. What has da Baggins got in his pockets...Well this reporter should be happy about disrespecting the encompassing underthings who rule the sewers. Fact of the matter is he seems to enjoy real eyesing dose goyles and duff usses still infest the public

thoroughfare. What da hay dem books now seem welcome to migrant sewer users.

Bill Mostovoy(50)

It seems we are the Victim of the United Kingdom in a prank so cold they destroy the very essence of Chicago Architecture. The Original Harold Washington Library had gargoyles that looked so grotesque it would scare the little children. If you place something so cold in a public place they age perfectly. The face is turned cold to a side and down. If the name William Mostovoy or any funding representing the person William Mostovoy(50) of rogers park was used I disown all of you.

This is disgraceful. If a gun were in your mouth you would see the person and Gun as beautiful. You swallowed the love of the world. Those that realize public art alerts you to inner pain revealed and that all people that have pain suffer the look of those Gargoyles. The person looks like a gentle own to you now roosting. We have gone to angels they say, the city of Al Capone. We just put you to sleep and tell people your living on some farm somewhere.

Who would want to see some half beautiful owl on a stupid book depository. They ought to burn all the books in there down and stock it with chip book digital change readers that tell you to have lunch at one of the nice loop restaurants and forget such trivial little things. It's just that in dark times things of light people become twisted. It would have been refreshing for me to gaze upon that Gargoyle today.

Apr 5, 2013 11:17a CDT

Bill Mostovoy(Office Workers Intl. United in How do we do this)

Discovery that no person tells you how to fill exactly computer job times, let the staff recommend

1) Open the day with ADMIN time 15 minutes, Outlook™ Microsoft was designed with everything you need to BEGIN a work day. Answer emails right that minute from all individuals that sent you one the prior day. Responding with an AUTORESPONDER is OK for this manager.

2) Plan when during the day you plan to take breaks and stick to it.

3) List everyday your open issues and save with a filename for that date

4) CHECK THE BOX SITTING BY YOUR CUBE IT'S A MAIL STOP, THAT MAIL IS FOR YOU!

5) Open and read your mail

6) Assess who is on the project or what phase the people you work with closely need from you or for you

- 7) Do your job
 - 8) Fridays at 4:45, collect your dailys and make a progress report, if not requested, send it to your team leader, manager, or director just the same
 - 9) Say have a nice weekend at 5:00PM Friday come home and reward yourself with a new webpage such as www.mostosoft.com/BillsBooth.htm
 - 10) Park in the same spot everyday, enter and leave at the same time every day. If in defense work do not.
- William Mostovoy Posted a photo...

Irish Intelligence. Sorry about the lack of voter registration. You didn't have love for the type of democracy I was, where I decide and of other Ise decide we got a guy. It's not that who ya voting for was cold it's jus disagreean once aguy sahy's its kald.

Nola is Dad's girlfriend.

Did Judy speak any languages, She always answered she took some French in School, Her granddaughters spoke Hebrew so any film they speak and she says "Glida" (Ice Cream). You must read until the Styx river crossing entry. To note, all reports to males on the persons activities go through Womankind, not one male does a primary, in any language. He himself knows they know a man should know but fear the world he reported. What happens is he who speaks of "enemies of the people" must be an "enemy of the people" Bill does not make charges, he states, if you enjoy certain behaviors they are taking place in various locations. As Bruce he says that on the order of Nonchalance to making America Communist upsets (me or "him"). So as Bruce with wife and family I would test my nonchalance on a behavior to check paying attention, regretfully woman have a gay man who loves there husband usually tell her what to say. So Bruce himself will be purely fooled on the paying attention to what he(I) said. It's an unbeatable defeat of straight male America!!!In the rainbow, you must have a question, "Who is the straight guy" or you would just be hypocrites.

(Courtesy of the Chicago Tribune Obituary Page)

Judith Byer Mostovoy, 66

January 13, 2004

*

Judith Byer Mostovoy, a lawyer and former Homewood village trustee, liked few things more than channeling her talents into projects that made life better for women and children. Mrs. Mostovoy, 66, of Evanston, died of ovarian cancer Thursday, Jan. 8, at Hospice of the North Shore in Skokie. She grew up on the North Side of Chicago and graduated from Sullivan High School and the University of Illinois. The family moved to Homewood in 1966. Along with three other women, Mrs. Mostovoy started the first nursery school program for the Homewood Park District. In 1972, she became president of the National Council of Jewish Women, South Cook section. Under her leadership, seed money was provided to Aunt Martha's Youth Service Center to start their first group home. She was active with the South Suburban Family Shelter, where she helped initiate the community's rape crisis hot line and served on the advisory board, and with Temple An she Shalom in Olympia Fields, where she taught 1st and 9th grades. When her sons were in their teens, she decided to become an attorney, graduating from John Marshall Law School in 1980. She later became a board member of the Women's Bar Association. "She was doing rape crisis work and after she'd go to court, she'd come home and say 'I can do a better job prosecuting these people.' And that was it," said her husband of 46 years, Sheldon. "Once she put her mind to it, she could do anything." Despite being diagnosed with ovarian cancer in 1994, she remained active. As a Homewood village trustee from 1997-2001, she made many contributions, including "Light Up Homewood," a program to celebrate all faiths during the holiday season. In recent years, she also taught a class at Governors State University on Supreme Court decisions. In recognition of the commitment to her community, she received many honors, including the Illinois Woman of Achievement Award. "Judy always filled me with awe in her many accomplishments as a caring, productive person," her husband said. Other survivors include three sons, Peter, Bill and Danny; and four grandchildren. Services have been held.

Bill Mostovoy(Navy Bean Storage Creator)

Had to check the exact dimensions, and it checked, it's exact. The issue is as follows, if you as a person ever let on you know intimate details of my past and I don't act like I heard you, it is that I will beat your face so severely with fist punches and slaps you will become in a state of zero brain wave activity.

If you decide you know something about this person and you say it to his face, he will hurt you very bad.

If you learn this persons people before you meet him, he will never, I mean never spend one second with you.

If you meet his “friend” or “family member” and have a frank and honest discussion about this person, I am not ever going to have a relationship with you.

If you ask one question of another person who sort of knows him about him, we can never have a relationship.

If you viewed a tape of him without clothes on, he does not want to know you or have a relationship with you.

If you checked his “Girlfriend” database posted information, he does not want to know you or have a relationship.

If you verified his medical records, he does not want to know you or have a relationship with you.

If you verified his bank account information he does not want to know you or have a relationship with you.

If you checked out his dry cleaners he does not want to know you or have a relationship with you.

If you mentioned his name at a coffee shop or restaurant he does not want to know you or have a relationship with you

If you went to his college campus and used his name as a reference he does not want to know you or have a relationship with you

If you traveled internationally and listed his home and city address, he does not want to know you or have a relationship with you

If you collect security video and compile a day of security video, he does not want to know you or have a relationship with you

If you record his sound on your iPhone in public, he does not want to know you or have a relationship with you.

Your cold with the person or better yet, you really shouldn't be involved

-Mosto

After all that he says, “There is this thing called “getting someone with your head” First let's say you wanted to know how many condoms someone had or used. I took three from the Trilogy basket making real check both ways to see if anyone saw me. Believing it might encourage interest but also old time city religious anger, I tucked them in my jacket.

So lets say every Feb 7, you give your boy or girl who you do not have relations with 12 condoms. They are free or set a nominal service fee,

call me you say when you are out or return the remaining by next Feb 7.
So you say why pop on the camera in the bathroom and wait to take them.
Not what was meant.

Second have person take a survey about issues. I have been asked and I did tell them about things. What someone does with the information is the “getting” we were referring to. A nice one is working out so two people meet at a train station or airport having both been given a big story. A lucrative family mutual uncle mentioned both of them but you must do 3 things first in Seattle, then the key to the UPS mail box will have the letter you require.

April 5, 2013, 06:00a CDT

Bill Mostovoy(Author)

Publishes the Collected work including “Play -For-It” Payback Gift, see Author Spotlight above. Let us say a friend wants to inscribe the person named

The future proposed by pals with wealth and medical training suggests they live in a world called not reality based. Louis and Mike think months and years ahead. They say “Future ” like Rachel for gosh darn sure. The art of it is BM (Bill Murray) in What About Bob. If you do not show this to them instantly, they will know how BM feels about life with them. Let’s say they struggle with, “If all you want to do is...” The guy is love of discovery, if it is TV and Computer. The fact that BM sees many things they feel resemble other things so exactly nothing more could be gleaned is wrong. The coke bottle frame lens guys do NOT get, that “Life Is Beautiful” Roberto Benigni directs. One the fact that the written work suggests, Academic Behavior prevents them from realizing very key information.

If it was “Academic” then it would not have been written.

If you remember a woman Valerie Plaine from a Washington scandal. She wanted to know if the Russians were selling nuclear material through buyers in Africa. Her adventure became well documented.

The exercise in writing, informs the readers of the degradation and decay in a real sense for purposes of course correction of the nation. The academics who attempt did not have the access of Mostovoy. The field correspondents watched and reported on IED explosions daily. The president and security forces world wide began lockdowns of people, places and things.

The knowledge gap of the academic and his nation loom vastly as a chasm of illusion of former life and Hades.

In a mythological sense the academic work tells the reader, the world crossed over the river Styx. There is NO turning back once the realization takes place. One of two things may have happened. One it HAS been realized and the short shrift on the work buys time to check if Styx was crossed. Second, the complete denial of the massive destructive forces changing the planets nation states daily. If the former then best wishes to the effort. If the latter, the work will keep you posted as commanded sirs.

Bill Mostovoy(Growling Rabbit Customer)

Had an out of this world, (mind blowing) Rineskiula said. Mind blowing is good I said. Met someone who looks like someone. I swear I am not prone to missing faces. Embarrassed as I was I feel I must know someone in her family. Steve the Bronco soccer player out of W. Bloomfield 79 must have a sister like this. Or this is what's weird I thought it was Cindy Doyle out of H-F, how both? Don't know.

In other news the insidious Arab bomber is soaking kite string in Gas. Filling the pie filling can with gas, placing the can all the way across the street and pushing the string into the cigarette lighter. Watch out under car bomb lookers this is insidious. It might be trunked if you open the push could get you.

Bill Mostovoy(subject of international rumors)

The man who was hated like Hamen in an early time in the central part of Europe discovered that when he told the beloved keepers of the financial records something the story always changed in a way not expected. The man proved he could count expertly. The man, the financial person, was honest. The words the man like Hamen used were in German. The financial person said he couldn't get a German dictionary so he used the Danish Dictionary. Now lets say you hear someone say, I am going to kill the bottle. Most English speakers know you will be drinking the remaining portion. As listeners or Words and not Phrases you say "Kill Bottle" this although people still might understand would very likely assume a murder is at hand. Everyday for 9 years the "Israeli Paid Skokie Protection" of this person led to ABSOLUTE DISASTER. Is it understandable why such a verbal person as Hamen wanted the financial person destroyed off of the face of the earth.

April 4, 2013 06:22p CDT

Bill Mostovoy (Electric Customer Chicago)

Well I open the Bill and wow what a savings with the new delivery system. But wait, I disconnected cable and went to the 20" TV. My gosh 155 units for \$8.31 electric services in March, It was a whopping 455 last year, of course the hot days required fans and a/c output for a while, by gosh cheap skates demand someone check the energy draw on a cable box (Motorola) in this case!). It costs 13.41 to have service and in this case \$2.86 in taxes for a March electric Bill of under \$25.00

Bill Mostovoy posted a photo...

Admission of a slob to Vapor girl at work. Descriptions don't do it justice does it. Do the rabbit ears show?

Bill Mostovoy(Age 50)

Yes I am aware that some home made toy could ruin some person's home or take the life to the point of injury of death. In the second world war, Russian Comrades walked out as did Poles with pitchforks against Panzher (Panther Tanks) by God my Pitchforks in Illinois smell those NAZI's like you would not believe. Do I love Beethoven? Yes I do. Do I love Mercedes? Yes I do. Some crazed German wants to turn me into Sausage. He isn't the only race but as an example it is a darn good one. Lets say it's soviet, Chinese, Nigerian me and my people might look a little odd. If you see it our way it works. Lets say some kid is all into every method, in the Army we say , "Look we have lot's of stuff all put together." I am sorry we live in world with AK -47 and other Assault rifles. Through your horrible treatment of people many find it necessary that as a last resort they have something that at least looks cold. By God girl you have 27 meat cleavers on your block. You have Uzi and Galeels and Jericho missiles and you fear a guy in his own neighborhood with a "nail stick." My God the use of Chemical, Biological and Nuclear agents you don't rule out but you fear my "nail stick" idea. Take a hike and find nature.

IN GOOD FUN, for after you digest that.

Let's say your something called "Sexually Based" In the relationship, it seems you want me to moon you, with you holding the Navy Bean Storage system and do some penetrating. I would be willing as I could place under the mooning area something called a fleshy part to you that resembles said holder. You would be permitted to play with it and place it as you see fit. Honestly my mooning never really excited me. It is possible you feel I myself am overly concerned with having your moon directed in a way to make you uncomfortable. It really wan't my way to do this.

Bill Mostovoy(Age 50)

Assuming a world where family, friends, professionals and other interested parties wait in judgment until a satisfactory demonstration is conveyed. As it happens the issues those individuals were waiting on had been addressed. Nevertheless, once addressed, do they intend to reward the individual? Do they intend to lay in wait until other so called violations occur and deauthorize him his life? Should any restitution take place for any misunderstandings that cost William "Bill" Mostovoy financially? William "Bill" Mostovoy born March 4th 1963 accepts his position as an unwelcome person. The issue of the financial responsibility in holding a trust remains the issue. Those that would profit from a death remain enemies of William "Bill" Mostovoy. Both of his brothers and nieces stand to profit quite heavily from the death of William "Bill" Mostovoy. At this point any request to behave "against" William "Bill" Mostovoy are to be seen as financial steals. Rumors of foreign and domestic violence have been addressed formally. Should you feel authorized by a notice from the Homeland Security Department, Interpol or the SVR, William "Bill" Mostovoy has been made aware that no connection to any officially elected person is aware of the conduct of these "so called agents" Yes they carry guns and have made up badges. It is in your best interest to use the Fingerprint Scan method to make sure. Any and all fingerprints can be verified at your local police department.

He went to the Common Cup this morning at Morse and Greenview. It is a lovely day today. My apologies to the significant person in the side area whom I opened a big mouth to like such a good person would just key in www.mostosoft.com at some fellow coffee drinker. So having said, "Is mostosoft.com up" he responded in away, nice and kind and all, but as if none of the it was heard, as in, "What was that website again." As I have said, yes I know significant people, let me state I feel that I open my mouth to truly and that when I do, everyone says this is a hole for me to fill. I might be full of holes, but no one seems to want to tell me what the hole is that I need to realize in a way I can get. So, to me, I'm some nail polish, logo on a shirt or icing on a cake, or whatever extra you would want to have in a really great speaking together. Rumors that someone like me tells people this is some edict from God, I do not understand. Anyway, the site looks good to me and a full site review should take place if you can.

By the way, I am bound to truth. I never lie but can be sarcastic.

Apr 4, 2013 12:03p CDT

To note if you remember the games, what he was saying was, "Come into my parlor, said the spider to the fly." I decided to fly away.

Apr 4, 2013 12:10p CDT he spent some down and hunted down Sheldon providence reports.

Bill Mostovoy(50)

Vapor friends let me tell you that this person never devotes 100% of my attention to anything. This means when the TV is on this person barely knows anything about what is on the show. I am so angry for people believing "If programmed by media and accept or not accept then valid judgement made." That noise is just on. It's like caring for a noisy kid who occasionally laughs and you find yourself laughing along. Do not insult me again please. The people on TV put it on. If it made you think something say it.

What it was, was people from another country come over and ask for your big guy to explain it to them. Spanish speakers and me have done it on Univision and Telemundo about how not serious most of the shows in Spanish are. Europeans expect to much thinking from that thing. Russians really need to figure out more than most if they study America. As years ago, the Three's Company Analysis, does the person say, they have some college or are they a teacher or PhD.

The only news programs at the College Level are on PBS. The News Hour at 6:00PM Local Time shows you what are called the "real decision makers" Professor blow hard on fox never met the President or Congress. On PBS, there is the Senator himself. Commentators talk in a style called "pepper" to get the public on board with the feeling the trivial lives influence Washington.

Take the show on NBC Meet The Press, There is the Senator surrounded by want to be leaders and 'Party Boss Chairman.' A party boss chairman is the leader of the (RNC OR DNC). The leaders of the parties lie through there teeth on television.

Wenklen Bij De Bank. Trinken Bier. Respekt Naturalijk. Working with Karo Corn Syrup in the next batch of bread beer. Hope you click the M-Flag to see what this was.

Bill Mostovoy(50)

Thanks for enjoying the April Fools Day Special. Mostosoft Went Live! The franchisees are working hard to keep you current. Yes the site is text based aside from the Bills Booth page. This page has the videos for Bill of the hosting company. As for the kids it is just so great Maroon5 came

aboard with the Daylight project. If you guys in your Mostosoft circle are great, get yourself a band and take them to the top of the charts with your stuff.

Thanks for contributing and keep enjoying Mostosoft.

It's Personal

“When a glimpse of stocking was looked on something shocking, heaven knows, anything goes.”

He had a thought. If the fourth quarter is ours, or late innings rallies are your thing? Maybe just maybe a book that says, “

There is a chance Google Earth is used to change the "blessing of Rogers Park"

My good friends did I mention Pierce's second wife died suddenly at 42 of a brain aneurism, If you misconstrue it is on you. I hear in some places woman over 40 are asked to request an extra marital affair from a man with a car. While at her house she asks if he can still do a “hurled seat” she asks let me dump the weight of my house on your head for a second and she drops a 5 lb hand weight at 3.5 ft over his head 110cm and it falls on his head. She takes a car to an auto shop and says drop the engine out and give me the value for it. She also siphons the Gas to fill her tank. You see you could say I was for this , but why would I be it would put my life at risk. 10 great girls each weekend, in one month that retirement picture and fidelity thing look good. Med Students why does the body which is 65% water become 40% water with salt dumped in the mouth.

Note to Louis, Mike and Alan. In a world where obvious “puff claims” about oneself take place. My claims have all been explained. Do you believe, in a world where some individual wants you to believe yourself to want to “outfox” others for a prize? I say over and over, “I did not win” and I am “exceeded” as to what you would want. Religiously she has me because yes I would have wanted to win and take the financial prize, get the girl and go to my “other house.” I can't think of anything that would make this possible. I would rather die respectful then do those lives that do disrespect and run around the world on an airplane. I am not a passport holder and I am not doing any disrespectful bad thing. You will undoubtedly here this is some “outfoxing you” maneuver. I am just not clever enough. At 40 I may have thought I could beat the system of security and “get away with something.” Over and over for 10 years, fearing every store merchant may hunt me down as if I had stolen something I cannot be some “fox” to you. Hear I sit.

Mentioning “names” and “places of education” one could think dwelling is what this pulpit is about. To dislodge the present just for a second with you may remind you, the youth of a nation goes through your old story like it was new again. So to say, “Jimbo” has made his “Microwave Popcorn Maker” you would think this school chum is on our minds. We progress as doctors of the pulpit by forgetting purposefully those immature people who attempt new methods of solving trivial problems to earn an unfair dollar. So the fellow, who thinks he can say is Jewish, but is not our friend, ally or associate thinks he can say a “Microwave Coffee Press” might be fun. What an idiot. Coffee is a celebration at a fine establishment or to be enjoyed in a fine custom crafted machine. Taking a teaspoon of coffee in a “boooowl” of water and microwaving for 3 minutes may make some brown fluid, that then can be poured through a strainer or filter. But you see this so called clever method is really grounds for our OCD squad to take over the so called “inventors” kitchen. Everyone knows the father decides on such things. Note: Toni and Laurra and “Michigan” at The Growling Rabbit, one of you might run the at home “Coffee Haus” and brew up a pot and take the others like me for a cash bonanza or just good feeling. I mean it should be people you know to look at they won’t be cold about it.

by Bill Bridgeman...Not trying to prove something...I just don’t remember if I bumped into something. I don’t remember falling down. It’s kind of dizzy focusing on pages. To Argyle Abbey at Trilogy, I really am William. Your what no grandiose comment confused me. Don’t people like me say it that way.. As for could a person like me be phoned into Trilogy as an individuals “Big Person” you see that is not acceptable to some groups based on height and weight and condom size. It has been about two months since “Bill” the person made an obvious effort to say things appropriate for his size. It is his hope you would have accepted.

That you might kind person, tell Mike, I may have received a blow to the head. He wondered if this explains things. I am icing it down with frozen corn nibblers. If it is not smart to say sub-dural-hematoma, I think there is something of a huge not behind my right ear. Regrets. Saw Corinne today at Trilogy. So after a nice chat she goes to call the Dr. to see if she can fit me in. She says to him Stanley is here. I lose it in a nice way saying have you spoken with him, “No.” a nice Good-Bye

and a don't call me said real nice and I'm home icing my skull. I am afraid someone will call me stupid if I ask them to look at the back of my head.
11-13(News Update)

Congratulations to my Niece who travels into the United States from South America frequently. Your application to be a registered importer of functionally controlled substances has been approved. This letter indicates your paperwork has been received and processed by the IRS. You must retain this letter upon any and all Tax Consultations from the IRS. The law enforcement community understands entirely your desire to assist the in importation of goods. The presentation of this letter requires payment of \$1,200 initially to activate the permit. At the request of agent "Orange" you are to supply the \$1,200 for tax purposes and be happy.

Sincerely,

Friends of the importation Bureau

The Internal Revenue Department of Project X

I M P O R T A N T * * * * * S A F E * * * * * H O U S E

* * * * * P A P E R * * * * * S A V E * * * * *

Note: Dates are NOT important on this type of document. Signatures are for the NOT digital age. As for postmarks, no one needs those,. Hand delivered is the way to go. As far as names of individuals they can be made up in this type of thing for security. Contact information of the made up agent is never required on this type of document for security. If the contact person uses some jargon? Then that would be OK on this type of thing. As for the masthead on the stationery computer paper and printouts should be fine. Things like the director's name and official agency symbol must be omitted for security purposes on this type of thing.

Special Fiction Reissue

Well, the computer person writes a story that with observation and digital retransmission the entire world may fall down like electronic dominoes should one person in the computer game decide to link to real time military hardware.

Yes Susan, like an Anti-Aircraft gun or yes Rich like an auto-fire defense canon.

Did you know teachers and older people have parents often as well. In this case, even me the teacher figured out how to do Bill's logic, that is the guys name.

So his Father doesn't love the idea that foul play could take place on a computer so he says, "Bill has illusions that "he(Bill)" is influential when really his computer career is over and anyone can use DTP to have something printed.

“So I will tell you once I did it”, Rachel said, “It worked.
It is so simple if you can remember the KEY words. I couldn’t get it but in
this case it went

Book				Influential
No	Yes	No	Yes	
		Injurious	Informative	
	No	Yes	No	Yes
	Dissociate	Psychiatric		Action

Needed (payments/battles)

Now at this point he says the book is to be considered NOT INFLUENTIAL
and yet let us analyze the next portion. As it happens Bill’s father keeps
ALL of Bill’s money. So when the subject of Book enters the equation how
does Bill retain “Normal” operation of his life with this tree.
He says things that could injure reputations.

Who paid for church every day in Chicago?

This isn’t Sunday is it?

Jack writes so well about subjects and now Diane says she will use the
serious plunger if those old style deep questions find their way into Jacks
head to explore. How does she know the correct loving approach without
reason. The reason for love and the reason for wellness needed definition.
Your wandering Jack. Sit down and love, said Diane. We need more
cookies. Everyone got lots of cookies. God will provide cookies. Thanks
Di. So Hansel and Gretel say the English language makes people dead
inside.

Gretel agrees with Diane and Hansel values the illustrations. Follow the
bread crumbs to your new lives. Do they have a Tasty Freeze around here.
Jack you know that is cold, Diane said.

“You are so much like your father.”, Diane said

“You are not your brother’s keeper it says in the bible”, Jack replied.

In this land you must differ ever so slightly from the exact blessing of your
blessing giver.

Blessing is good. Politically and to go to places where persons arrived at a
learning place at the same year, you would do what was called, “doing two”
This person knows this.

Over and over you tell people about “brother’s keeper” It was a shame Cain slew Able but in today’s world you seem not to care. It was who you knew.

This is not about this persons family.

Say John Johnson Sr. had a blessed son John Johnson Jr. If Sr. said it one way and said to Jr. I would like you to say it this way now, it is the duty of the son to say it the new way.

In the past Sr. realized that if he used his word “lowly” for a group people grew defensive. So if Jr. uses “ground up individual” this would be preferred. As to why, Sr. got in a heap of hot water and great wars happened. If you don’t change something, people defeat you in war. Germany will lose to America again with this, guaranteed.

Did you see the companion video? Code: Do want you , READ or HEAR READ book on him? Do want Bill know what write down? Call a for character assassination. No nice guy Do Harvard girls assassinate him daily. Course cause one beam one gun make panda girl stroke hair and say beauty girl make Bill dumb guy so take putter stuff rich for Japan/rice country.

Do doctor of head protect with vicious lies. Yes say big money to it.

So decent MF-er jus askee on read or hear something, would you want the guy to hear what you just said or wrote about them.

Say God’s day, man say, He steal Roman Nails from port and not pay. He make riot in peaceful Jerusalem at money table. He not pay when he say bless bread.

If religious guy say word Blaspheme. You watch guy say he has not got a God complex.

Classical music finds opposition often amongst African people, not for the lack of beauty in the work, in the “devilizing” it must take to create a violin string. The pounding and sanding of a wood baseboard for a grand piano shock those that use the wood to create spears to hunt gazelle and then roast over a wood fire flame. The human voice aria impress however most of all. The pledge drive continues at WFMT and after your friend finishes the

viewing you may invite them for, on sound the joke defines the French and Spanish words for little tasty bites is explained. The pronunciation of the street Goethe on the north side is explained. The monitor was about to roar with laughter at the "phonetic pronunciation of Hors' D'ouvres

As for Frank Thomas of course he should still be a ball fan.

The news of background checks rages flaming in the news. If the person says hello to himself at home the grunt of Rachmaninoff belching "English" makes one really want the word like "Die Steingast" definition of the German royals from Harvard.

Simply, wait periods are required. Chinese laundry method required. Pick it up a week from next Tuesday. There are your Guns and Ammo sir. As for the method of payment, a credit card must be used that has a zero balance.

A code at the credit company will flag it as a "watched item" code 001 gun, 002 automatic rifle, 003 explosive.

Without a zero balance or card an application may be filled out in store for the gun shop to maintain.

A person may be visited by terrorists anywhere in the country just as easily as meeting a vicious neighbor. Defending oneself makes some sense. As for background checks, the sherriff or municipality police chief would get a google earth map point on the given address of the gun with the concentration map being provided by software.

10-13

In the text ivf is mentioned. The sugar issue ruled this person out. My biological father donated as well as an unknown biological son of the German sire. I have no illusions that I'm a dad.. The "brother " has said, "How would you like to have s baby so much his sex life seems to be my issue. Covering him or else had come up. After all ththey are good kids their dads are nationalistic oh boy.

We've met my biological mother and this person. Trudy and me just forgot after a while. After about six(6) years of age, she Trudy was the mother. As for Stanley, woman have ways about belief I believe he is not the biological father. Things Trudy may have said, protected our happy home.

Colombia is winning! Totally being smeared by nieces. If someone swaps world on this person, she could sell it elsewhere.

Mic: Stop your whining Willie.

Bill" Once again my mood is elevated, but it's just every time her guy does a crime he calls my phone and says my name ten times to "any agent"

eavesdropping. It's a film called "implicated" only I didn't do it. She says in 1983 I split a bag of pot but was the one who split a 1/2 into 2 1/4's

Dang I'm not cold to people with it. It's no life for me to be into. I never went bogus to people for it.

Please do the year with Programmers say 25 to 35. It could be like your thing. Hey, your good with the computer right?

9-

Bill "Mt Clean" Bridgeman (young as ever, take me on my one room ladies) Yes it had been rough around the corners. Found the missing glasses tossed under the kitchen table. I've decided to wear them to see if I get accused! Cleaned the house. Made 2 sales calls. Walked to the cleaners and Pharmacist. Called the doctor for the A1C (6.2). Modified 9 web pages, and posted 4 videos. I'm bushed.

Anyway the Author Spotlight page takes you to an Authorized Link in with lulu. Many of you are told the "page is bad and it links out of M.soft" That is what is called a dirty trick. No today, Mitch and Ashlee in Kentucky had a spat about if mental illness on Ashlee's part can be part of Mitch's strategy meetings. I had no answer in print or today on what is fair. I ask nicely do not ask this person to way in on what is "fair play" and what is a dirty trick. I am somewhat upset many individuals do not admit there are ANY dirty tricks that go on,. They go on to tell you corruption is not a problem. With evidence every day in the media, forgive the person for what he believed was casually mentioning it.

Be good everyone. Smartfest at the Growling Rabbit Friday 7-9, symposium on Kant or something Procedural Cloud Openings and what not. Nah, but you should go over by Millenium's

$32 \times 29 \frac{3}{4}$ pant width that is $32 * 2.54 = 81.28 \text{cm} \times 76 \text{cm}$ Bill "Cho Lee"

Bridgeman pants 82x76 ok so about

Height: 172cm Weight: 87 kg

Panda love for colleges includes Michigan at Ann Arbor, Jeff and Diana had a nice wedding at the GRCC, Carol, John and Rachel can tell you about

New China "Ford" love

Hillman Oscar bopped out the door this morning had a thing for him the quiz.

What is in your, "Kidney Pie?" What is in your, "Liver Sausage?" Hey did you ever figure out how to plug the antennae from your TV to a metal window frame to make the entire frame into a TV antennae?

7-

Bill Bridgeman(Site Manager) posted a photo. "Glad no one is on or someone might think there is trouble worth stealing his keystrokes!" it is Live!

(Amazon.com blood pressure OMRON customer)

The game referred to is called the "Wolf tail of protection" the nurse is asked by the stalker wife, when is William's appointment. She does not know exactly how to protect him or even tell the "Wolf tails who he is" Every time he is startled, shaken and abused for messing with big "s" medical excursion. On the way it's like right this way sir. After by God every dumpster diver and city rat who extorts for protection sizes him up. Listen, I apologize if you feel, Vapor Wife is the one who knows how many people it might involve. The city CAN be fun, and probably she asked one nice person who wanted to take a trip up to see NU and it just got to be a thing. Vapor Wife is most likely rich and insists on good coverage. A couple of twenties say, buys enough cans and chicken to have a nice party that night. NO, in no way to I know if she knows "bad" people. So she told a friend nicely. It is my hope that you realize that through the NAACP page you can get how people eat off of good safe Vapor protection. Love.

Apr 7, 04:56p CDT

You were assigned 4 projects over the weekend. How many were accomplished? You were to acquire NCH software. You were to acquire a commode, could use a downspout with hose to a 3 gallon container with lid, You were to acquire a Rubbermaid trash can. You were to begin assembling your ten friends for the posts.

Now as for the issue of communist "care", that word in communism means preserving the collective order through behavior modification. The word "luck" is similar in English. If the neighbor is a bad communist to you she cares to take more from you then the state recommends. So when someone cares, do they care where you put your money in your home, so someone else can take it?

As for medical care, it is to be considered an "exception" to most ordered lives. Your "care" about the authors medical visits and the inability to deal with my doctor fairly by phone made the person cancel all further medical visits.

As of this point, the intervention has been so massive, that the person will not be able in the spirit of National Socialism to attend a medical doctor and defraud the state of the insurance payment.

People of faith: I could get there easily and well to see the doctor tomorrow. I have received a threat that the only place I will feel healthy is in the office on that day. It indicates to the National Socialist that a problem must be enhanced in a DOUBLED MANNER for receiving this medical care. Now, simple things can be used to explain how someone can be made to feel bad,. As one who HAS EXPERIENCED the ignoring of the threat, the blood work is done, my internal meter is good, my scale tells me the conditions. It's not worth risking cardiac arrest for a few moments of GOOD MEDICAL CONVERSATION.

Told Naomi and Shell the joke at Leona's, some people make it a long one. A guy walks in to see the doctor, doctor gives him a physical, says you look great the guy walks out the door and falls down dead. The nurse up front gets the doctor, he takes a pulse and says he's dead so could you make it look like he was just coming in then.

Tell the doctor the person still loves them.

What is the biggest curveball to the Navies of all countries? Many people know about settling old scores. European conflicts resolved with some animosity. Asian crisis people held some grudges. The money play on the winner is Bogota. Every person that scored big with drugs and bought guns became a de-facto soldier of Colombia. It works out well in disguising the attacks as Mexican.

Good luck in your struggle with snow. About the straw cut into three sections with a wax tip on both ends and then vacu-sealed it reminded me of a delightful lick candy that you poured on your tongue called the Pixie stick. As it is Nose Candy as they say, the Pixie Stick people might be happy to help.

To defend myself this person invented the pre-rolled package, happy butter and toot stick distribution methods, of course the person was at a point of a gun for it.

Don Lord ran a good business at Chernin's. Don hired every race and creed for his stores and warehouse. As great people from the different race a vote was taken amongst the best salesman people ever and the attempts to create

the perfect Caublanasion as Tiger Woods put it were underway. The mix of Caucasian, Black white and Asian in old world. Bill felt at the time once it's done it's America's worst nightmare, not for the look, but first he will know every candle in everyones Menorah, and next he won't have any "Boings." Think about it.

Billy "Colada" M.let

You see the "Eau du Toilette" is said Oh do toilet meaning Water of the Toilet, but really fill the sink with water. Add drops of Eau du Toilette in basin. It is so delightful you will want to wash it all over. The perfume you dab on. The Eau du Toilette is as described. Anyone for some L'are du Temp. Growling rabbit was in French today. Through my snit at having to wait in line and left without my Eh-clair.

Billy "Bridges" Bridgeman

They have a rule for Billy if he travels, he may only stay at one hotel in a city 3 days when traveling with a few rustic cabin exceptions. So to the travelers who love the Four Seasons and Arbitron hotel give it a whirl and switch hotels to be fun. Well each group from each place probably has there own rules, that must be a local thing because many opt to live in hotels. I would just be expressing going to stay in a hotel for this person would not work out.

No the hotel doesn't really care unless someone from home calls.

A

Billy "Music Man" Bridgeman

Children of the Sun, Billy Thorpe. About Trudy Boones history. Her aunt is Jennie if you read.

Chicago Tribune "Aaron"

January 18, 2002

Jennie Kaplan Aaron, 89, died with her loved ones by her side on Dec. 19, 2001 in Beverly Hills, CA. Jennie was born in Russia on Jan. 7, 1912, the third of five daughters to Rose Osherenko and Phillip Kaplan. A lifelong resident of Chicago, until 1996, she graduated from Marshall High School, Normal Teacher's College and the University of Illinois at Urbana. As a progressive young woman, Mrs. Aaron began teaching in the Chicago Public School system, where she taught for over forty years. An unwavering Cub's fan, an avid reader and lover of both nature and the fine arts, Jennie was a maternal figure to all she met. Known for her compassionate heart, she was a tireless volunteer for many causes, perhaps nowhere more so than the Hadassah House of the North Shore. Her friends considered her one of

the finest soup makers, and her family is vying for her griddle and recipe to her delicious buttermilk pancakes. Jennie Aaron was married for 62 loving years to her devoted husband Joseph Aaron, who preceded her in death four years earlier. She also was the last survivor of the tight-knit Kaplan sisters; Faye GaBowman, Sadie Boone, Eva Brodar and Esther Jonas. She was a proud mother to her daughter Bonnie Aaron Levin and son, the late Dr. B. Michael Aaron; an adoring grandmother to Brad Aaron, Jordan and Helen Levin and Leigh Levin; a beloved great-grandmother to Grace and Joe Levin; an affectionate aunt to Trudy Boone Bridgeman, Joanne Jonas Zitter and Dr. Richard Jonas and a dear friend to many. The family will conduct a memorial service on Jan. 27, 2002 at her daughter's home in Los Angeles, CA. In lieu of flowers, the family requests donations be made to the Jennie Aaron Fund at North Shore Hadassah, 1724 First Street, Highland Park, IL 60035 or a charity of your choice.

Billy "Old Man Spilly" Bridgeman,

Did you realize the stuff is nothing new? Marcus Leshock at WGN is up with this for himself.

<http://wgntv.com/leshock-value/>

It is my hope you look at Marcus A/V blog for yourself. Marcus works in my Berkeley (Berke) but if you feel Marcus is not putting the convo one more about M.soft kids posts your so off sir. He's with us totally.

Obviously "Marcus Leshock" is much more professional as he has an entire television network with him. If some decent person emails Marcus with some Navy Bean M.soft file it might be a nice touch. To me I would want he and Mr. Tom Skilling to see the Can of Pineapple video if you believe in the "Head Trip"

About being what a Mayor would do. OK this is why people required math. 50 wards have 50 alderman with one mayor. The Mayor decides with the council on spending. Every alderman "cares BIG TIME" about the big city. The words "What is the plan for your ward?" made people weird. OK say you were mayor Robeson, you would take the 50 pages, say this is what the guys say, My page on top says we will see how we can pay for it. You would so. So anyway, "Pointing to something in the ward you did is the best way to say the city is improving if you want the big alderman check" My take is that the Aldermanic Office perk should be used to put the full 30K Staff into a guy, that says "Make me 30K to replace you AND gimme something to point at in the ward." I'm goin down to city hall. All I care

about youse is da one thing they point at. What you do, you do. When the 30 is in we will see. Do you understand I am not asking you to break the law.

Of course the budgets on plans for the city are voted on and modified for other wards, Come on. No one plans to fail, they just fail to plan. Since you asked, my ward is the way people want it, and so saying something might be out of line. The intersection of Clark-Rogers-Jarvis I would recommend a cul-de-sac at Jarvis dumping into Clark. Traveling westbound at Jarvis you would not intersect clark. A Few Parking spots there would be good. Rogers has the toughest Bus left from Howard Street inbounds and a bit of a wait from the north bound 22 Clark Bus. The food store is easily accessed with a trip around the block. The Jarvis block between Ashland and Clark are the affected homes, they might prefer it, as less look around traffic would be taking it. Temporary construction barrel blocks could be used to test a day or two.

(Brewer)

By law public brewing of good sharing people of brew, by Jim Brewer/Goat Boy law must drain the gallon or 4.86L brew of the remaining grains and bread soak pieces. This material goes in a slop bucket with 1 cup white flour instantly after draining. It is hoped an Arab will be told and prepare the animal feed from this NOT-Blessed for human consumption material. As the White flour was underneath my 2 rolls of 1 cup rice flour ½ cup corn flour made 2 rolls baked with ¼ cup corn oil dripped over each one. Could have used some sugar but it's OK. The most critical I could be was to my tongue it had a bit of bitter.

-Bridgeman

5

(Dessert Chef)

Soaked the pineapple. Had a vanilla cupcake hanging around. Cut the round bottom half way. Put the pineapple round in the center and topped with the iced top. "Greatest Pineapple Cupcake Everrrr"

You can't beat the house in Las Vegas but can you beat a coffee house with a guest fool No help first make a Café Soy Latte with a Cocoa sprinkle top. Not just old coffee with soy milk microwaved topped with nestles sugar free coffee powder. How much would you charge for a Grande?

(Obsessed with fixing broken city operation)

Look, Marshall's department store, purchased by T J Maxx has some good things at a good price. The wheel of retailing lecture from Professor Pierces IIT Stuart school on how businesses price themselves upscale with involved manager has a fine example in Target. The popcorn bit \$1.00 bag is \$4.00 with Starbucks lattes now available (On Howard and Sacramento in Evanston). So you did say that yes Target and me are good, especially with kids. But Marshall's was also on the list. First thing tell the counter to put some box on the open door to hold flyers or ads. Next,, do not hire a full time greeter, but you can if times are good to wander in and tell people a hello or something. The coffee stand isn't unique but off to the left, cram in a bar counter and some stools with a half-pig pen thing. Fitting room system is fine but Men's traverses the store. 10x10 square feet by the ties and belts is clearly how that should be. Thanks to Marshalls for the Genuine Levi's 505 jeans \$24.95 32x30 thanks for asking.

About the kids making some cold up there if Detroit Axle catches you he will put you in the back of Marshall's as your alleged reason for being there was to "get a job" Now walking out without paying is not right once you are responsible for the dollar value of anything that comes up missing here. Really. No. Just sit here while I phone your mother about taking you to County Jail or sitting in this store room for a while. Since Axle is in, they are not some army that will travel far. Just a thought on a wing and a prayer.

FINGERPRINT SCANNER ORDERED: Delivery by USPS of USB Fingerprint Scanner from Zivco should arrive Saturday. Online suggested the post office sat on it today as I would "just have played with it and wasted a Friday, (mysterys and suspicions of course)

Anyway, the word on the street is a tough puzzle to solve, the words are, "We are Bill's cold shoulder" to which you reply Bill is using people to be COLD to me. The invention of the "Cold Shoulder" was to have an old girlfriend grow cold to "Bill himself", Why someone would tell you we are Bill's cold shoulder is they no you will grow so angry and not at the people but at BILL himself.

Rumor, the guy walks up to every race he hates and says, "This is a message from Mr. M." "Bill sent us good didn't he" at this point you do not attempt to solve the gun issue but put a gun on Mr. M himself or Bill.

Do I think someone will request every use of the scanner be sent out the web to verify fingerprints of the "Cold Shoulder Bandit" I assume right now it is being taken apart and installed.

NOTICE: All senior team leaders at Microsoft. A Team Leader is to STAND BEHIND HIS PROGRAMMERS, for the next 6 months, the TEAM LEADER WILL NOT REVIEW IN A NORMAL FASHION DIGITAL INFORMATION... The Person will stand behind the programmers from 8:30-10 10:15-12 01p-05:00p Should the team leader be caught away from the post they will be terminated. All email and telephone will be handled by the team candidate and relayed orally to the TEAM LEADER.

BEST PART TEAM LEADER: Staff quote, "May I use the printer?" "May check the email?" TEAM LEADER HAS POWER.

AS FOR BEST PART, PART II: Command, "Read me my email!" "Check the hard drive space on our system!"

Cool huh:?!

WARNING: M.soft Dealer Violation: Bill's Booth Videos have LABELS as to BUSINESS USE. TOPIC And WHAT COLD PEOPLE WOULD DO WITH IT.

The man from California by Way of Polands Israel claims "It shouldn't matter and SOLD another ABSOLUTE FILM DISASTER OF WILLIAM! If the video wasn't clicked on from www.M.soft.com/BillsBooth.htm they have done a HATCHET JOB, disservice and FAILED THE PURPOSE OF THE INDIVIDUAL KNOWING ALL DEALERS. The purpose of OFFICIAL M.SOFT DEALERS is JUST THIS KIND OF SECURITY ISSUE.

To the male bastion that takes the woman's movement as something that is a fad... Let me assure you, your technical abilities have been passed at a level you have become outmoded by developers who use standardized methods. If in explaining you bother to say, "Honey" or "Sweet pea" or "Darling" or any other words other than "It requires" you are going to give up a goal. You have not recognized a dangerous player in a dangerous area. The dangerous area is the digital system "stud muffin."

(Actor)

Fell into Gollum to describe the face of the former Goyle. He and the Goyles went around to pick up shakes. What has da Baggins got in his pockets... Well this reporter should be happy about disrespecting the encompassing underthings who rule the sewers. Fact of the matter is he seems to enjoy real eyesing dose goyles and dufusses still infest the public

thoroughfare. What da hay dem books now seem welcome to migrant sewer users.

It seems we are the Victim of the United Kingdom in a prank so cold they destroy the very essence of Chicago Architecture. The Original Harold Washington Library had gargoyles that looked so grotesque it would scare the little children. If you place something so cold in a public place they age perfectly. The face is turned cold to a side and down. If the name William Bridgeman or any funding representing the person William Bridgeman of rogers park was used I disown all of you.

This is disgraceful. If a gun were in your mouth you would see the person and Gun as beautiful. You swallowed the love of the world. Those that realize public art alerts you to inner pain revealed and that all people that have pain suffer the look of those Gargoyles. The person looks like a gentle own to you now roosting. We have gone to angels they say, the city of Al Capone. We just put you to sleep and tell people your living on some farm somewhere.

Who would want to see some half beautiful owl on a stupid book depository. They ought to burn all the books in there down and stock it with chip book digital change readers that tell you to have lunch at one of the nice loop restaurants and forget such trivial little things. It's just that in dark times things of light people become twisted. It would have been refreshing for me to gaze upon that Gargoyle today.

Office Workers Intl. United in How do we do this)

Discovery that no person tells you how to fill exactly computer job times, let the staff recommend

1) Open the day with ADMIN time 15 minutes, Outlook™ Microsoft was designed with everything you need to BEGIN a work day. Answer emails right that minute from all individuals that sent you one the prior day.

Responding with an AUTORESPONDER is OK for this manager.

2) Plan when during the day you plan to take breaks and stick to it.

3) List everyday your open issues and save with a filename for that date

4) CHECK THE BOX SITTING BY YOUR CUBE IT'S A MAIL STOP, THAT MAIL IS FOR YOU!

5) Open and read your mail

6) Assess who is on the project or what phase the people you work with closely need from you or for you

7) Do your job

- 8) Fridays at 4:45, collect your dailys and make a progress report, if not requested, send it to your team leader, manager, or director just the same
- 9) Say have a nice weekend at 5:00PM Friday come home and reward yourself with a new webpage such as www.M.soft.com/BillsBooth.htm
- 10) Park in the same spot everyday, enter and leave at the same time every day. If in defense work do not.
- William Bridgeman Posted a photo...

Is that Irish intelligence? Sorry about the lack of voter registration. You didn't have love for the type of democracy I was, where I decide and of other Ise decide we got a guy. It's not that who ya voting for was cold it's just disagreean once aguy sahys its kald.

Naomi is Dad's girlfriend.

Did Trudy speak any languages, She always answered she took some French in School, Her granddaughters spoke Hebrew so any film they speak and she says "Glida" (Ice Cream). You must read until the Styx river crossing entry. To note, all reports to males on the persons activities go through Womankind, not one male does a primary, in any language. He himself knows they know a man should know but fear the world he reported. What happens is he who speaks of "enemies of the people" must be an "enemy of the people" Bill does not make charges, he states, if you enjoy certain behaviors they are taking place in various locations. As Bruce he says that on the order of Nonchalance to making America Communist upsets (me or "him"). So as Bruce with wife and family I would test my nonchalance on a behavior to check paying attention, regretfully woman have a gay man who loves there husband usually tell her what to say. So Bruce himself will be purely fooled on the paying attention to what he(I) said. It's an unbeatable defeat of straight male America!!!In the rainbow, you must have a question, "Who is the straight guy" or you would just be hypocrites.

(Courtesy of the Chicago Tribune Obituary Page)

Judith Boone Bridgeman, 66

January 13, 2004

*

Judith Boone Bridgeman, a lawyer and former Homewood village trustee, liked few things more than channeling her talents into projects that made life better for women and children. Mrs. Bridgeman, 66, of Evanston, died of ovarian cancer Thursday, Jan. 8, at Hospice of the North Shore in Skokie. She grew up on the North Side of Chicago and graduated from Sullivan

High School and the University of Illinois. The family moved to Homewood in 1966, Along with three other women, Mrs. Bridgeman started the first nursery school program for the Homewood Park District. In 1972, she became president of the National Council of Jewish Women, South Cook section. Under her leadership, seed money was provided to Aunt Martha's Youth Service Center to start their first group home. She was active with the South Suburban Family Shelter, where she helped initiate the community's rape crisis hot line and served on the advisory board, and with Temple Anshe Shalom in Olympia Fields, where she taught 1st and 9th grades. When her sons were in their teens, she decided to become an attorney, graduating from John Marshall Law School in 1980. She later became a board member of the Women's Bar Association. "She was doing rape crisis work and after she'd go to court, she'd come home and say 'I can do a better job prosecuting these people.' And that was it," said her husband of 46 years, Stanley. "Once she put her mind to it, she could do anything." Despite being diagnosed with ovarian cancer in 1994, she remained active. As a Homewood village trustee from 1997-2001, she made many contributions, including "Light Up Homewood," a program to celebrate all faiths during the holiday season. In recent years, she also taught a class at Governors State University on Supreme Court decisions. In recognition of the commitment to her community, she received many honors, including the Illinois Woman of Achievement Award. "Trudy always filled me with awe in her many accomplishments as a caring, productive person," her husband said. Other survivors include three sons, Pierce, Bill and Danny; and four grandchildren. Services have been held.

(Navy Bean Storage Creator)

Had to check the exact dimensions, and it checked, it's exact. The issue is as follows, if you as a person ever let on you know intimate details of my past and I don't act like I heard you, it is that I will beat your face so severely with fist punches and slaps you will become in a state of zero brain wave activity.

If you decide you know something about this person and you say it to his face, he will hurt you very bad.

If you learn this persons people before you meet him, he will never, I mean never spend one second with you.

If you meet his "friend" or "family member" and have a frank and honest discussion about this person, I am not ever going to have a relationship with you.

If you ask one question of another person who sort of knows him about him, we can never have a relationship.

If you viewed a tape of him without clothes on, he does not want to know you or have a relationship with you.

If you checked his "Girlfriend" database posted information, he does not want to know you or have a relationship.

If you verified his medical records, he does not want to know you or have a relationship with you.

If you verified his bank account information he does not want to know you or have a relationship with you.

If you checked out his dry cleaners he does not want to know you or have a relationship with you.

If you mentioned his name at a coffee shop or restaurant he does not want to know you or have a relationship with you

If you went to his college campus and used his name as a reference he does not want to know you or have a relationship with you

If you traveled internationally and listed his home and city address, he does not want to know you or have a relationship with you

If you collect security video and compile a day of security video, he does not want to know you or have a relationship with you

If you record his sound on your iPhone in public, he does not want to know you or have a relationship with you.

Your cold with the person or better yet, you really shouldn't be involved

After all that he says, "There is this thing called "getting someone with your head" First let's say you wanted to know how many condoms someone had or used. I took three from the Trilogy basket making real check both ways to see if anyone saw me. Believing it might encourage interest but also old time city religious anger, I tucked them in my jacket.

So lets say every Feb 7, you give your boy or girl who you do not have relations with 12 condoms. They are free or set a nominal service fee, call me you say when you are out or return the remaining by next Feb 7. So you say why pop on the camera in the bathroom and wait to take them. Not what was meant.

Second have person take a survey about issues. I have been asked and I did tell them about things. What someone does with the information is the "getting" we were referring to. A nice one is working out so two people meet at a train station or airport having both been given a big story. A lucrative family mutual uncle mentioned both of them but you must do 3

things first in Seattle, then the key to the UPS mail box will have the letter you require.

5, , 06:00a CDT

(Author)

Publishes the Collected work including “Play-For-It” Payback Gift, see Author Spotlight above. Let us say a friend wants to inscribe the person named

The future proposed by pals with wealth and medical training suggests they live in a world called not reality based. Louis and Mike think months and years ahead. They say “Future” like Rachel for gosh darn sure. The art of it is BM (Bill Murray) in What About Bob. If you do not show this to them instantly, they will know how BM feels about life with them. Let’s say they struggle with, “If all you want to do is…” The guy is love of discovery, if it is TV and Computer. The fact that BM sees many things they feel resemble other things so exactly nothing more could be gleaned is wrong. The coke bottle frame lens guys do NOT get, that “Life Is Beautiful” Roberto Benigni directs. One the fact that the written work suggests, Academic Behavior prevents them from realizing very key information.

If it was “Academic” then it would not have been written.

If you remember a woman Valerie Plaine from a Washington scandal. She wanted to know if the Russians were selling nuclear material through buyers in Africa. Her adventure became well documented.

The exercise in writing, informs the readers of the degradation and decay in a real sense for purposes of course correction of the nation. The academics who attempt did not have the access of Bridgeman. The field correspondents watched and reported on IED explosions daily. The president and security forces world wide began lockdowns of people, places and things.

The knowledge gap of the academic and his nation loom vastly as a chasm of illusion of former life and Hades.

In a mythological sense the academic work tells the reader, the world crossed over the river Styx. There is NO turning back once the realization takes place. One of two things may have happened. One it HAS been realized and the short shrift on the work buys time to check if Styx was crossed. Second, the complete denial of the massive destructive forces changing the planets nation states daily. If the former then best wishes to the effort. If the latter, the work will keep you posted as commanded sirs.

(Growling Rabbit Customer)

Had an out of this world, (mind blowing) Rineskiula said. Mind blowing is good I said. He met someone who looks like someone. I swear I am not prone to missing faces. Embarrassed as I was I feel I must know someone in her family. Steve the Bronco soccer player out of W. Bloomfield 79 must have a sister like this. Or this is what's weird I thought it was Cindy Doyle out of H-F, how both? Don't know.

In other news the insidious Arab bomber is soaking kite string in Gas. Begin by filling the pie filling can with gas, placing the can all the way across the street and pushing the string into the cig lighter. Watch out under car bomb lookers this is insidious. It might be trunked if you open the push could get you.

(subject of international rumors)

The man who was hated like Hamen in an early time in the central part of Europe discovered that when he told the beloved keepers of the financial records something the story always changed in a way not expected. The man proved he could count expertly. The man, the financial person, was honest. The words the man like Hamen used were in German. The financial person said he couldn't get a German dictionary so he used the Danish Dictionary. Now lets say you hear someone say, I am going to kill the bottle. Most English speakers know you will be drinking the remaining portion. As listeners or Words and not Phrases you say "Kill Bottle" this although people still might understand would very likely assume a murder is at hand. Everyday for 9 years the "Israeli Paid Skokie Protection" of this person led to ABSOLUTE DISASTER. Is it understandable why such a verbal person as Hamen wanted the financial person destroyed off of the face of the earth.

4, 06:22p CDT

(Electric Customer Chicago)

Well I open the Bill and wow what a savings with the new delivery system. But wait, I disconnected cable and went to the 20" TV. My gosh 155 units for \$8.31 electric services in March, It was a whopping 455 last year, of course the hot days required fans and a/c output for a while, by gosh cheap skates demand someone check the energy draw on a cable box (Motorola in this case!). It costs 13.41 to have service and in this case \$2.86 in taxes for a March electric Bill of under \$25.00

posted a photo...Apr 4, 04:53p CDT

Admission of a slob to Vapor girl at work. Descriptions don't do it justice does it. Do the rabbit ears show?

(Age 50)

Yes I am aware that some home made toy could ruin some person's home or take the life to the point of injury or death. In the second world war, Russian Comrades walked out as did Poles with pitchforks against Panzher (Panther Tanks) by God my Pitchforks in Illinois smell those NAZI's like you would not believe. Do I love Beethoven? Yes I do. Do I love Mercedes? Yes I do. Some crazed German wants to turn me into Sausage. He isn't the only race but as an example it is a darn good one. Lets say it's soviet, Chinese, Nigerian me and my people might look a little odd. If you see it our way it works. Lets say some kid is all into every method, in the Army we say, "Look we have lot's of stuff all put together." I am sorry we live in world with AK-47 and other Assault rifles. Through your horrible treatment of people many find it necessary that as a last resort they have something that at least looks cold. By God girl you have 27 meat cleavers on your block. You have Uzi and Galeels and Jericho missiles and you fear a guy in his own neighborhood with a "nail stick." My God the use of Chemical, Biological and Nuclear agents you don't rule out but you fear my "nail stick" idea. Take a hike and find nature.

IN GOOD FUN, for after you digest that.

Let's say your something called "Sexually Based" In the relationship, it seems you want me to moon you, with you holding the Navy Bean Storage system and do some penetrating. I would be willing as I could place under the mooning area something called a fleshy part to you that resembles said holder. You would be permitted to play with it and place it as you see fit. Honestly my mooning never really excited me. It is possible you feel I myself am overly concerned with having your moon directed in a way to make you uncomfortable. It really wasn't my way to do this.

(Age 50)

Assuming a world where family, friends, professionals and other interested parties wait in judgment until a satisfactory demonstration is conveyed. As it happens the issues those individuals were waiting on had been addressed. Nevertheless, once addressed, do they intend to reward the individual? Do they intend to lay in wait until other so called violations occur and deauthorize him his life? Should any restitution take place for any misunderstandings that cost Bill Bridgeman financially? Bill Bridgeman born March 4th 1963 accepts his position as an unwelcome person. The

issue of the financial responsibility in holding a trust remains the issue. Those that would profit from a death remain enemies of Bill. Both of his brothers and nieces stand to profit quite heavily from the death of Bill Bridgeman. At this point any request to behave "against" Bill Bridgeman are to be seen as financial steals. Rumors of foreign and domestic violence have been addressed formally. Should you feel authorized by a notice from the Homeland Security Department, Interpol or the SVR, Bill Bridgeman has been made aware that no connection to any officially elected person is aware of the conduct of these "so called agents" Yes they carry guns and have made up badges. It is in your best interest to use the Fingerprint Scan method to make sure. Any and all fingerprints can be verified at your local police department.

He went to the Common Cup this morning at Morse and Greenview. It is a lovely day today. My apologies to the significant person in the side area whom I opened a big mouth to like such a good person would just key in www.M.soft.com at some fellow coffee drinker. So having said, "Is M.soft.com up" he responded in away, nice and kind and all, but as if none of the it was heard, as in, "What was that website again." As I have said, yes I know significant people, let me state I feel that I open my mouth to truly and that when I do, everyone says this is a hole for me to fill. I might be full of holes, but no one seems to want to tell me what the hole is that I need to realize in a way I can get. So, to me, I'm some nail polish, logo on a shirt or icing on a cake, or whatever extra you would want to have in a really great speaking together. Rumors that someone like me tells people this is some edict from G-d, I do not understand. Anyway, the site looks good to me and a full site review should take place if you can.

By the way, I am bound to truth. I never lie but can be sarcastic.

Apr 4, 12:03p CDT

To note if you remember the games, what he was saying was, "Come into my parlor, said the spider to the fly." I decided to fly away.

Apr 4, 12:10p CDT he spent some down and hunted down Stanley providence reports.

Vapor friends let me tell you that this person never devotes 100% of my attention to anything. This means when the TV is on this person barely knows anything about what is on the show. I am so angry for people believing "If programmed by media and accept or not accept then valid judgement made." That noise is just on. It's like caring for a noisy kid who occasionally laughs and you find yourself laughing along. Do not insult me

again please. The people on TV put it on. If it made you think something say it.

What it was, was people from another country come over and ask for your big guy to explain it to them. Spanish speakers and me have done it on Univision and Telemundo about how not serious most of the shows in Spanish are. Europeans expect to much thinking from that thing. Russians really need to figure out more than most if they study America. As years ago, the Three's Company Analysis, does the person say, they have some college or are they a teacher or PhD.

The only news programs at the College Level are on PBS. The News Hour at 6:00PM Local Time shows you what are called the "real decision makers" Professor blow hard on fox never met the President or Congress. On PBS, there is the Senator himself. Commentators talk in a style called "pepper" to get the public on board with the feeling the trivial lives influence Washington.

Take the show on NBC Meet The Press, There is the Senator surrounded by want to be leaders and 'Party Boss Chairman.' A party boss chairman is the leader of the (RNC OR DNC). The leaders of the parties lie through there teeth on television.

Thanks for enjoying the Fools Day Special. Went Live! The franchisees are working hard to keep you current. Yes the site is text based aside from the Bills Booth page. This page has the videos for Bill of the hosting company. As for the kids it is just so great Maroon5 came aboard with the Daylight project. If you guys in your M.soft circle are great, get yourself a band and take them to the top of the charts with your stuff. Thanks for contributing and keep enjoying M.soft.

You can tell Rico I was not the one to tell the "Black Guy" to miss the head and poke with open fingers under the chin. If you miss the head below just a bit with open fingers its just like a poke. So it's not even hitting someone in the head you just said that he did just put his hand flat
And poke under the chin
Poke unter da chin

Nixon

Students for a Democratic Society

People United Can Not Be Defeated

Minor Jewish issues came up in Top Game and Bridges.

Oy Vay the Jewish Nixon worked like a Dog on the Cover-up the guy IS now really impeachable.

Went to take my Holiday Dump...Heard that "She" wanted it blessed.

Long story short if you ask your woman if she wants to bless your actual shit in the can. You may pop her from the side on the chin really hard. She won't see it. Hey look at that and pop straight forward on her chin.

God says, "Something always hurts on that hole." "Noticed the new sphincteritis condition whereby the direct nerve from the sphincter connects to the optic nerve!@! Upon standing and speaking the brain and heart are bypassed directly to the tongue!

Shin kick, ankle bump, chin pop, rope burn. All day when this blessing shit starts. Dumb oaf walked right up and kicked the side of my foot!@!

Anyone want to do Bill a favor?

The way to say things about the stuff on the pages is to Daniel, Pierce, Eileen, Claire, Mark, Zack, Steve Bridgeman, Greg Bridgeman

Bill is so seriously "lifed"

That is all they need to here to back off.

Hey I heard one of my Virtual wives paid 50 grand for me. The yentas bought 9 more for 5,

So I announce I might go out. The cat knows it's to the coffee shop.

I congratulate her, a friend actually as virtual wives all share virtual husbands for a few dollars themselves as being with the superiors.

To the friends it's a science. I get it. In a maze the scientist puts the mouse down in the maze and then places the cheese. Opens door one to see the mouse run the maze. Changing the conditions by "guarding the cheese with a "cat threat" may deter the mouse from running the maze, after all the mouse might get eaten.

So I'm totally pathed by Cat Scientists who regulate each cat on the road to protect there loving virtual hubby. This sucks, I get no money or love from these science geeks.

Exclusive: Foreign nationals selling "Exclusive" access to monitor Bill or Kill Bill or Marry Bill felt that if it had the word "Exclusive" people paid more.

(It meant if you sold it once you COULD NOT sell it again)

Corruption:

Meet: (Debate point: Can you meet on the web?)

Well it's OK for the chicks to "watch" him today after all they sucked someone else's kids pen and blamed some 50 year old Jew trying to get some sleep.

You stupid people all want to believe that after such a great revelation the guy gets a "reward"

The chick who just blew away some stunt cock comes back with couldn't you just accept it, "That she is my killer" and won't stop until I'm dead.

If you do not say at least you should stop you risk something.

(Many find the fluidity or flow of the Social Network to be Non-Fluid in the sense the "Voice" that carries the post would be assumed to be a consistent portrayal) This page for many is a grab "what is mine" in terms of what someone special needed to see out of a post and leave the rest to smooth as silk readers. There is no apology necessary to the smooth as silk but hopefully a local person with "star Chicago/L.A" could read it, It's like to note if you have Chicago '70 bless or L.A. '80 or Seattle '90 (give or take with a grain of salt on '90) as a US born person it will read fine all of it. Meaning aloud or verbally pronounced, on the meaning thing."

(Detroit/Cleveland/Long Island have the Chicago '70 bless if they say they do meaning they heard it at home)

The words "give him your bless" in match making for a prize of money in a contest along with good song made the girls who were promised want and commit religiously. They threaten fire from the rain clouds by every NAZI they can get close to us.

At night they wake "Steve" up with are you on your back or front and what does your "it" look like right now. Not displeasing he says but come on no quiet sleep and 10 a night after she falls asleep switch. Attoning 19 years or not 19 again.

Explanation of the system cost \$1M US the huste to make it back. \$5.00 clown contests fill the rest of each day.

Reading the site doesn't matter. No more he says you made \$1M in profit as it is. Says he never wanted it even though it was said Doc could keep him "very good"

So we heard you were all cold racially? Well if I can't impress you with cold, my friend is cruel but to be cruel to young African-Americans he tries to get them to attempt college. If you save 100 one dollar bills and get 10 friends, he will attempt to match 100-1 and invest, not guaranteeing anything. He makes you cold because that white man just took your hundred. So if you do feel like letting this white doctor grow cruel to you, go ahead and have your kids go ahead and ask for a dollar every now and then for the college fund. It really may pay off. As for what I said to Billy. All I could think to say was "Try Mentos, The Fresh Maker." The radio announcer in me nailed it and I left happy. Try Dr. Scott Sagerman at Alexian, he of course hears how cold I am but reference Medical Opinions for true feelings on doctors.

Anyway hope things work out.

10 dollars Nancy is fun as just true love for art wanting Notes over Bill.

Your Dad was cool and he was cold to you but he was as much a dad to me as a true other family man could be.

Dad has a really nice version to Billy Mentos to, that being Stanley. Sort of I see that you have a Choc-o-late bar there.

Many woman grow a bit colder as candy will spoil your appetite and they would love to get into it fairly as in, will those mints really fill you up.

Gosh, all in a quick shopping trip anything can happen.

Remember taking an envelope with the 100-1's and 100-100's and safe deposit box them. Mark your taxes as prepaid gift to TID – Tax Free gift prepaid expense. The box is for holding purposes for the recipients (as a token to return the 100-1s

So to request a special from an agency or college like the UNCF go ahead and request a TID management number to see if your individuals get preference if denied admission a gift will be sent in an amount deemed

acceptable to both parties. (most likely all of it, but you see exact dates of distribution may be important)

Ron dreamt a second ago when this kid comes to the door he's cold I'm 100 times better and it's in here the addresses I'm not chasing foolish people down for this.

You will never amount to anything, you live rotten filthy lives and this door is not open to you until you prove yourself. "Good Luck" italicized.

This is a test to see if this is active

Please accept an invitation to run restore from www.M.soft.com

This is not auto-generated. This is Bill referencing a thank you for the gift of Hagueland's "Mind Design" text many years ago.

Thank you for your time. As a professional it is my hope something of an informal style may develop. A few subjects may be of interest. As of my interest of your professional life and personal life I assure you, nothing invasive or offensive will take place by me. If agencies representing me, then of course I understand the chagrin.

Sincerely

Your Friend

Bill

In Revocation it was said "I am revoking your PhD. for the wandering part." now as me I laugh and know of course you still are.

-> The new thing we are calling it is "Reading into it something that may really not be there."

In many cases if it is said like, "You can't see that something is important" the person Reading into it wants to NOT have you overcome the fact you may have missed a finer point but COMMAND you NOT to see what the finer point was.

* As a person that method of reading into things killed what is called an honest chance at someone seeing "the light"
If you do read in, "is Bill claiming to be the light." Not exactly, lets say you DISAGREED you would say the light I see tells me that the statement is True False or Personal in decision. To say it CHALLENGES the very integrity of the persons goodness and fitness to do this embarasses the process.

-The Wandering Passage paraphrased may have been fake.

In specific what it was, was the following.

I gathered you had music on and were sitting at a computer and since I do know who you are it amused me the “random thoughts stuff until”

Good song

We do important search stuff..

I thought she was already dead (meaning my mother) <- yes she had a few near death so it must have been 2003 and the post sugery pain in her was total “dog heart” experiment with doctor stuff, real sick so it was on my mind.

Not much

About 500

He is the center part of it.

I did not have the other part you were answering.

Why fight it the posts get weird and justify what you want
Went on the backup drive to look for some old food page and found believer who believes, “why don’t you make a new one” Well searching a hard drive isn’t cold you just poke around and read. The hook-up guy in California’s north isn’t susceptible to sexy, super hot woman but he says, this will destroy his person as a reward to him and perhaps me for accepting but not realizing it’s cold to my special “gift to gay readers” So anyway as I mentioned the Russian thing being the other guy in California for using actual Russians, by the time that belief gets her the Ionization Pulse, over tweaked shit my head is wasted. Army dude pops on what did she say. His dick gets hard because the chick is nude and beating off and each insult goes unreported. Even if someone did care about someone teasing a developer

what difference would it make. No Jew can put together these words to mean anything other than fuck him up the ass either way. So fuck this shit man. Getting me up at 5 am to give me super secret stuff has made me to great a person for you to fucking handle. So the Russians and Jews wanted to play “the crazy house” game on folks who advertised “suicide” In writing the book the author revealed knowledge of war and Presidential misconduct. In a manner befitting a marine he offered to the President, as he realized, “A rational marine eats his gun rather than embarrass the president.” “Offering it to the President, the kindest George W. Bush said no by no means is an American (such as you) supposed to do that for me.

In the uncut film “A Few Good Men” the Martinson suicide is removed. It took the sting out of the film. Since young people wanted the quotes but not the sting it was removed. Gentle bugs that make honey called bees “sting” some people that get near the hive and it makes a little bump from this normally friendly flying insect. If the name isn’t exactly Martinson it is my apologies I just can’t know what it was at the moment. Full uniform with a classic shiny silver bottom clip handle pistol is used.

If Bill asks for something like “India or The Mosque” has it use Potter Rd India If Poland, use both John and Linda Homewood Poland and Keeler Ave Poland with the Y Poland to request, Please to tell me if you have his English words that say, “Do you want me to”

Thanks you as Poland the guy takes on decent things and doesn’t care to be tough or cold about it because he hates things he doesn’t even know. “So your not polish you say to your new friend who said he was.”

So as for “Black wanting a war with Poland because Russian guys say they don’t know they thought you was white, well when youse find it yaman Logan.

Hey da words “Colonel Bill” if he said it, you could say he thought it was him but he thought the guy was official as a US Soldier Colonel saying whats if you guys was mad and act it to me sohse I know I could do somethin if you really went and did it. It’s like play fake sides to see Bill he says like Virginia by DC or somethin . I’s was NEVER Colonel Bill Never.

About me growing cold to Cary. My friend and guy a year younger Cary Goldberg owned the place Polish John and I lived. He was still kind and a friend when I acted cold about calling him Mr. Goldberg some wealthy

building owner. But you see, things like the bounty hunter taking a guy away and other units being cold in a way they did not have life cold suggested I not open up and say the “man” is some nice guy about stuff. You see he was but realized when new people aren’t cold they grow to cold to people who provide decent housing at a decent price. The show Bounty hunter on cable will show you the type of guy that does the job. Could be up on the internet youtube or something. So things like a little kid (African-American) comes to the door really just selling candy but when Bounty hunters and cold things happen you wonder is this it in an ultimate way. I dropped cold for a minute when I realized in this case she wanted a little money for something. I didn’t want candy but handed her some paper money just the same.

As for John and his wife it was the day after 9/11/2001 and the cable company didn’t have me on iso for war room coverage so these immigrants next door caught our feed of 3 weeks anti-terror military feed. So John and I know big shit went down and he didn’t speak any mutual language much but we got our point across. Anyway I activated online his cell. But in my defense it seemed you would want him up on it.

[Note for exact learners of the guy M-ah-ss-toe-voy] the woman at Out Patient Blood Draw at ENH (Evanston Northwestern Healthcare) grew excited as she is from the Ukraine. Please allow her peace in her work. That is not the point to me. She knew of my name as M-ah-ss-toe-vai-ya in Ukraine and was so impressed with the work the “M-ah-ss-toe-vai-ya” had done in improving land value in the Ukraine I was treated just so special even though that day in the USA I did not feel so special. So she says the “stone markers” which define roads and addresses and (from Gramps) stone bridges over little creeks and such (golf course water hazards often show these) were all made by him” Most in Russian Cyrillic it looks like Moct is the word for bridge. In modern bridge is like a huge suspension bridge. So about the ending of the name Voy not Vaia. At ellis Island the guy felt it read feminie and wouldn’t accept it. So if it were Spanish changing to M. with accent on the end wouldn’t just be normal it would be accepted. Say it were dutch or german or Nordic “Masten” or “Van Masten” would be fine just because preserving “Moct” is what the family would want. Of course insistence on universal acceptance is up to the worlds places. The family is OK with the end of the word change.

Anyone remember the CSK? The cunningly simple kingdom reunites with love for tea.

In Europe a man comes to realize he must see the USA. He arrives this So, he goes around and sees if it's OK for us and that's cold.

In his Europe folks at times went dead in the head. If a guy goes dead in the head and another guy acts real special and keeps him alive as a helper it's totally normal and not totally secret as to who is "dead"

Now you get to me, Bill Mr Berger Van Mast knows full well I'm not "dead" Everyone in my life knows I'm the guy.

So you get to our mutual friend Stephanie Nee Getter her guy went out in the head because she took it out. So on there trip to Gothenberg it's obvious the guy is trying to find her. Only for years my name is used as the other guy never knew what to say.

So my guys in the old Hebrew school gang are like, the circumstances would indicate he could not possibly do the stuff.

So, yes he does. When they go dead in the head I get taken to Leadership training. Yes the first special school happened in 1974 or so and I did mention the special school. Of course to Japan it was meant as our "nice world" use of Yakooza, where one is separte from the bless intentionally so everyone will not fail if the big ship fails.

So each time the leadership council convenes we discuss the state of the planet as in who gets to make cars,computers and various things like military hardware.

The reason for public saying, pardon. Is that you mother fucking Jewish pals of mine can't justify anything to the world as to why we get to have ONE god damn thing including our own human life.

Of course I want to say fuck off to you but since you murmer something about parlor games to some nig who takes a poke at me. (he wasn't gonna kill me but OK if the money says take a swing many folks have more then enough anger to piss him off with a poke)

Your kids are stupid, your schools fail, you drop countless amounts of ordinance wherever the hell you want and you want me to justify at the meeting what's cool about you.

You put me in a very awkward position and I resent the hell out of you.

Thousand File Data Keeper:

Mr. Bowman identified himself to Mr. Bridgeman at the address 1032 W. Oakdale as the SEC-FBI Informer in 1988 due to a forced warning to another individual that the two of us had as an associate at the Board of Options exchange, since the individual in question may have wanted to address me negatively to do something against Mr. Bowman he revealed in his own sound at 2 foot distance his role with the SEC and FBI. The FBI was merged with Homeland Security in 2004.

Mar 30, 09:41p CDT

Bowman Profile 1001; So I have a friend Bruce. Bruce went cold early with an insurance policy fund after his father died. Bruce pays the plumber or tells you about the dangers of fat calories for your heart. I decided to work up a profile as he does so freely share the meaning on Bill's life to potential marriage types. So Bruce looks like this to Bill.

The response of the child must be attempted first and foremost. The quote, "Hear little one I have a piece of candy in my pocket would you like to take it" The limit of comprehension can be seen by emotional instability. His fear of men and castration has left him without the tools to function in modern society. The tragic irony of the life is that achieving the dream of partial awareness of life is available in the modern world. Work self is declared to have no impact on private life, legally (to himself). The realization that all the world does not love his stooge leads one to believe that the drama of death is laughable. The man is Jewish without question. To be a Jew implies some sort of respect of others lives. The nature and questioning of others mating habits while passing on 16 perspective wives, (although not the entire list) has gained loyalists and not people he has taken advantage of. Thinking, pondering the car seat does not sit well with what passes for a legal mind. It is this man who through ignorance can destroy society as we know it. Do the ends justify the means? If money is the end result the answer to this man is yes. The devaluation of law leads to anarchy and can create a society of lawlessness and mayhem. What have I brought to this man's door? I can certainly say that looks can be deceiving. There is a joke he tells, "If you catch your wife in bed with your best friend, who do you shoot?"

In the final analysis it is the case that he has mastered the look and feel of his life. One German Car, One SUV, One House, And One Job. What is wrong with this little one. With every million comes added social responsibility. What would have been enough wandering the southland. One day he may have to do his own dirty work.

Imbecile that he his, he disgraced as he is, he will die a Bowman. (No threat intended)

His Friend in Fire MTR

Roth Profile 1001

He's backed the wrong horse so long he doesn't know which end the shit goes out!

NOW – Let the man write.

Gut:

Bowman attempts to be an adult professional person through the means of artificial attainment of mental presentations. Through acquisition of phrases that collect respect but not the knowledge base that creates thoughts, pre-programmed acceptable answers sound meaningful and well. The nature of the earlier report of foolish behavior persists. One on thoughts such as the economy, he has been programmed that any rising of the corporate tax strangles business. Any and all attempts to further a meaningful adult conversation become impossible as the individual who blessed it was a crook. You see the explanation to people of a Jewish faith impresses Jewish accountants trained before the "Bowman" era as the king of Israel and an FBI informant on securities violations. Now a Homeland security agent every and all quotes do not belong to Mr. Bowman but the German people. As the Forum business questions are obviously well and adult perhaps Mr. Bowman as the most important Homeland Security American in Los Angeles could discuss all of the answers with you. At the very least let us hear the business answers,. As you know the German will ask and read the smartest answer to him.

Only the young German can't possibly respect any of the questions. You need for the exam to get a Jewish accountant over age 50 to read the responses to identify which sort of political life Mr. Bowman is portraying with you.

The person is not running a business. We are running it covertly. What is your interest in the old man's PC? He himself has been bankrupted 3 times by me personally. If you money hunt him we get pissed off at you because you destroy honest stealing. Yes we sell to other people for big money. The guy writing it never sees one dollar from it. Just buy it, if you missed the live. The guy loses respect for honest stealing because you old people think you can steal it for nothing. It's like a \$5.00 bill for the money stuff and plans from someone. Leave his stuff alone please. Take a shot in the dark

at the guy who told you about it and ask how much wallet money the guy wants to give it to you.

Yes the live sale of the German system to “Watch the Russian Spy Live” is most impressive and pricey. Welcome to those guests. As a Russian spy you note the fluidity of the manner of writing of the individual do you not? Perhaps you would enjoy some Russian love through the use of Stolichnaya Vodka. The caviar of Romanoff is most excellent although the fisheries in Russia have some issues on occasion. Yes the Vodka and Caviar made Russia what it is today. The American people have issues. The poor Negro elected to your White House encourages everyone to take part in criminal activities. The 100,000 Red Army Soldiers on U.S. soil love the game so much 10,000 have become officers of the Police Departments in all the states. The American method of bribery at first seemed to amateur for belief. The Russian method of payments, now installed proves how effective the great Russian system is for you.

Your fascination with German interests the woman mostly who never used logic but feelings to dictate the criminal behavior of the animal within. Yes Lions are most impressive to you. The cross cultural divide in Russia was solved in Math class. Russians were disturbed during Philosophy and Language but not during Math. The proof, that one could accomplish the most, non-natural but synthetic, is the smartest one, in Russia. The “Hair” love amuses us. The person says certain hair can and can’t accomplish a bright thing. In Russia hair is your Pubic hair then you would think the body hair and last the hair on your head.

The most love puzzle it is agreed the Jews in America are the winners. The fight puzzle in America has gone to the African. The African head is run by Russia of course so when you think of some English king in Obama’s head you fail to realize the only reason people do not debate Mr. Obama is that we do not allow it.

As for detected information on Mr. Obama, he has asked his friend from England to do the math for the US Economy. We are told the English professor to justify his position creates a puzzle worthy of the great Lypunov in involving the multi year deficit increase vis a vis decrease through special derivative functions that may take several months to run through. It should lower it barring the derivative inversion effect that may be discussed in the third week provided the first weeks do not need review.
BM(Age 50)

Important people are called PeePee's to some which is to say one Pee is for Powerful and the second Pee is Person.

When they tapped me to run for public office in 2005 the call to David in Novaks office at the Washington Post should be reviewed for public what happened.

So as it happens "Dispute Settling" my group claims I left our local problem solving with the call. It was just each of my group said you could take anyone on in the group and run them over with your life. I wasn't going to let this happen without a declaration fo Washington.

So about the groups first way, there is this thing called "Taking a Neutral Corner." If you don't allow Neutral corner as in "Which group is the neutral corner on it" you get Melee which means the people who throw chairs as unrest in a chair thow them at anyone. Pie fighting is one thing but the verbal stones showed the melee was on.

Video for Bill Bridgeman downloaded to Status. 2:43p 3/30

[Personal Statement on girl love]

The ball of wax. The big answer.

[Dressed Sloppy saying it]

Come on tempt yourself click on the link and watch a video—

Bill Bridgeman

5' 8" (with shoes) 172cm tall

As of 3/27/

NOTE: To do the weight match use Body Mass Index (BMI) BMI currently 28.9. I am not trying to make you guys diet. The doctor says to stay alive I at least had to be under 30 with it. The actual at weight is 24.9! Wow I couldn't believe it but then I made 50 and people die at 50 of heart attacks so I went on the beans and rice thing and it worked. 25-30 is considered "overweight" 30+ BMI "Obese"

Weight 186 lbs (down from a high of ~220lbs Jan 1,)

Condition: Type II Diabetic.

Folgers booze is up. ¼ cup corn meal, 1 cup sugar, ½ tsp yeast, 1 big coffee container (plastic) with warm water 8 barley bits, 8 rice grains as a bless with grain.

Bon Apetite is to Dis some proper Englishman, you don't have to feel French. Mangiano is the same wording in eyetye. Como Bueno in Mexican is cool. Remember you don't have to switch how you feel in North America with these.

Lindsay and I dreamt about doing up a Mangianos in Old Orchard mall (She might drink and I will look the other way)

Jennifer and I dreamt about the 95th floor of the Hancock center to discuss heavy economic issues the nation faces. (Points, its about points, The rate is zero dear we can't go negative and it can't be stimulated more with point movement)

Daniel in California has the key video of what Lindsay and Jennifer need to keep kids happy if they take the diaper off and run to the potty. (He looks fine that is what it looks like to diaper dandy and diaper general boy)

One other thing about who you feel might be Jennifer and Lindsay put up some nut or if you are not a nut but think you should see what he thinks is nuts on the developer page. No lie it's like Bill looks like every "Doc" that told Bi-Polar girls to take there meds and then they grow cold to this doc with a reputation. He enjoyed thinking it himself about this. You see he did tell them this only they want the docs on the same medicines to prove they are OK to take.

Many people feel since Bill suffers from Bi-Polar disorder he writes the book all bi-polar people write about God saying your groovy and saint Pierce might let you into heaven if only the Lion would hunt other apple trees.

If you want this book Retha at Amazon.com is for you. He shares apologies, to the author, for duplicating the description. It looks good.

..

He didn't do anything like that Bill said. Ms. Bogard was messed with on NBC 5 morning television this morning.

n Retha's Song: A Rhapsody of the Soul, Retha hears her "God," the sun, speak to her for the first time at the age of seven. He speaks of a baby boy being born who lived far away from her and is her beloved. As long as she listens to God's voice and stays on her path and the young boy stays on his path, with God's guidance, they will meet.

She strays many times from the voice of God and her path. During the journey, she is struck with a devastating Bipolar Disorder, and her young son is diagnosed with Crohn's disease, which nearly took his life. Her faith began taking new direction, and she began experiencing phenomenal supernatural events in her life. Her intuition became increasingly powerful; however, internal, mind-altering suffering kept plaguing her.

Music, directed by the angels, was the compelling force that was the interwoven thread that could bring these two souls together, as they are both singers and songwriters. Could a miracle happen?

(:

So still many bi-polar friends check in either by going to the web site or asking a “blessed person” what is on the first page. So the bi-polar older person who wants to be both Jewish and my father hears, “There is a very nice picture of Dachau” on the front page, He says that is where the Jews should go to see it. Of course it is clean and modern and an elevated train stop because in paying respect to the martyrs that died Bill as a posting web person must actually have been there. So the fathers blessed world is currently so worried about the concentration camp picture coming back to haunt them.

Bill “Loops” Bridgeman

Do you remember the red house on the hill story? Funny the way people cannot use “phonetic” writing. But if you could hear someone say and know how they remember just so well “the city in the teens” of course it would have been fun to know the sensitive men of the teens.

I remember America in the teens just so well.

I remember the love of the world in the teens.

The prep people give good tasting things to the long haired loving people in the sensitive person manner of the teens.

The confusion over the word teens occurs due to the debate on acceptance of the abbreviation A.D.

In life some over 13 years remember a year 1999 A.D. the modern person accepts themselves as not accepting universal religious based day keeping. The years -2019 formerly found the name teen useful as the ending of the word in a language ancient mariners found useful.

*1 As the worlds dominant culture have no basis for knowing the mariners wording the nostalgia for an assignment date sequence of years shows the trivial nature of a mind not trained in efficient human processing.

*1 If you disdain this comment you suffer so severely from a delusion of success you need to focus firmly on human data processing functions over your proscribed “Humanism.” Honestly doctors and philosophers, if you miss this trend your marginalization means you will have no one to play

with or respect you. To note with you, of course it's stupid, did you wish to have a smart person in your head doctor.

Non Voting person and Presidential Pal (Age 50)

If you are stuck in Michigan for a summer go ahead and Michigan up some product.

Illinois and Michigan united for good drinks challenges you to get drunk using Apples and Corn.

Can with a sack lunch played with in the morning get you drunk the next day at noon.

With the creamed corn or ear of corn

Substandard Emergency Recipe:

(Age 50)

If you see the folks at Trilogy you can say, "Bill said he only wants to speak with people that want him, Independent, Safe, Secure and Happy"

The Bible of Bill worked out to be "Be Realistic"

If Bill went cold to his Bible it was just ...blah blah blah...facts dictate control issues rule the financially and socially insolvent.

The Social Security System Administration of the USA issues a check each month. This check tells me the control is in and human factors in the electronic life matter little. The belief in "Ghosts" amuses people.

Bill is not a girl hater. Girls "Emotional last stands are the ultimate experience." Rachel and Cindy and Lisa say if he is finally ready to accept what girls go through for the ultimate satisfaction they have found it. Since at that time they finally "Got Pregnant." There is no "Guy" equivalent to this.

To bad about me being a filthy Jew to you.

I never took one person in my life as "my soldier" to act cold to someone.

I never believed I controlled another life with my mind.

It's like everyone on Facebook finally realized it. He is telling the truth. He has no children. He doesn't spy on people. He doesn't have an army. And his money is real and valid from the condition EXACTLY as submitted.

Sugar issues. You missed it yesterday he was laughing walking talking and

joking and his sugar went out. If you saw it you knew that if he didn't eat right then it's over.

MOne minor issue is that in the root you place the file index.htm for the entry web page.

As for people laughing at "TV" and "Paid" Bill is a tireless self promoter and it's not just the works of fiction it's 15,000 unique internet visitors 220,000 times saying "What did Bill do today" that would make him think someone would suggest TV in some capacity be it writing or a brief on camera interview."

Love.

AMERICA PLEASE DO NOT HATE THE AUTHOR I WANT ISRAELI PEOPLE TO GET YOUR POINT, IF GERMAN OR COLD TO JEWS LET IT GO INTO A TRANSLATION TO YOUR DOGS.

-There is this thing called "Dark" in "Dark" a subject must be approved to do something if it is to be assigned as a name. The person in question does claim to have his name on some things. First, "Dark" in says, "You were not supposed to put your name on anything." Now as it happens, when you collect Dark and love to fear it as I do, one said "Sure" and then 10 others say "Sure" I am aware that you are at least "capable" at putting something together. At this point 10 other Darks **COMMAND IT in full DARK DEVIL. THIS MUST HAVE YOUR NAME ON IT AND IT WILL BE SEALED IN BLOOD.** Figuring it will be bad or embarrassing and the author or the person will have to live with the "embarrassment" in a blessed way.

So I say, as I fully admit I love to fear it, read the book and answer what you would say if someone said some of those things. Take the notes on the site and don't repeat the statements, answer them with as much verve, tenacity and obfuscation as you find necessary.

Historical Stuff as in this is the type of good information a great company like www.godaddy.com can provide.

Although I did say the 15,000 visitors this will show you that in the first 20 months Mr. Bridgeman and **NO OTHER PROVIDER TO THE WEB PAGE IN ANY CAPACITY** drew over 5,200 unique viewers. There were no meetings or other developers of any kind on the site.

(home)

The objection to a web person saying something like Notice is to official.
This is apologized for.

OK, there is a thing about should someone pay him for something.
People look around and things to see if he could "be on TV" or something.
It is true he says things some would want to here.
All in all it was concluded, "He is not nice"
The fact is you shouldn't be permitted to use lethal force on the person just
for this.
You vote "NO" to him being paid or appearing in anyway on TV

TV has good people as it is. At my age 50 it's OK. If you could find it in
your heart to let the guy in the tiny studio apartment just live with what he
has on his fixed monthly income then it would be nice.
Did you want "YES" for awhile yes. Over exposure on the internet made
me realize without a good left hand, or right if you prefer, you should just
rest.

HOMELAND SECURITY NOTICE:

My Sponsor is Toni and Glenda "nickname Michigan" is the primary. Toni
must not be troubled as a business owner of "The Growling Rabbit".
Furthermore after public, private, medical explanations be it known the
blessing issue and the name of the blessing is: Gun
The blessing "Gun" goes back a long way here. The blessing in Chicago on
electric, mechanical things, stores and kitchens, living rooms and byways is
"Gun"
That is all. You do not respect our religions. Only the strong survive. That
is all

Those that use the word "Bless", "Blessing", "How is it Blessed", "What is
the Blessing" should be considered Mentally Ill on the official Homeland
Security System. A subject that offers Grace or a Blessing over a meal is
exempt.
One note, if a religious saint, patriarch, Muslim Leader or Budhist style
monk really cares about himm they should say it.

In the North America the rule is if you are Cross, Star, Crescent or Tao the
ONLY BLESSING YOU CAN GIVE IS ONE OF THE 4. In the Animist
religion or Animal Based form the people that use words should not suffer,

as it happens Animals can't read. Understanding you want something blessed "Jackass" does not amuse our religious community. So this Jew from Israel asks in her just wanted to know biggie small girl. What about Native American Indians and Tribal People and Animists. I of course know the answer. Who did you think was asking what of the four it was? As for when each has power flow with it and collect the great spirit.

It must be nice to make sales calls and make a sale. Back in the day selling at Chernin's Wolle Sanni from Nigeria, Ray Garza from Mexico and Rich Howlett from Chicago were the managers. Irv Udowitz from Brooklyn became a manager not long after and it was a great "straight commission job" for us. Putting up a grand on a Saturday netted you 6%+bonus for multiple pair sales and sale shoes. Mr. M wants you to figure out about how much that is assuming .50cents extra per sale and an average shoe price of \$50.00. So anyway, morning coffee is the usual at a place that normal people would say OK at least ask trade a web ad for a few coffees or give a M.soft magazine for at least one free one. So anyway putting on a status that at "The Growling Rabbit" on Lunt in Chicago, you can get a coffee and examine a print copy of M.soft Magazine may be over stepping what is allowed. Oh, did that slip out.

So, my pal reads this at Trilogy, Inc and announces to the Mentally Ill girls, I want you tentative this morning. Oy Vay what an asshole. The nature that first nature examples some times work with the ill. If your turned off by it I say good bye for awhile. "A big cat is in amongst the trees and makes real low and is prowling by a squirrel, the big cat is getting into it but really doesn't want it as a meal. The female(in this case of course it could switch) takes her paw at full go and claw paws the behind of the male, he looks as if to say,"Hey I was getting into that.", She looks at him as if to say, "Do you really think I want to make a cub with some cat who acts like some squirrel" Currently Bill_at_10_oclock_coffee_bemused

Not presently a paying customer at Trilogy, Inc, Mr. Bridgeman considers himself a supporter and donor to the agency. As for keeping tabs and updating Trilogy, Mr. Bridgeman met many employees and clients at the agency and agreed to donate valuable rare books to them.

As for people that do "Human Analysis of Psychiatric Health" Mr. Bridgeman is aware of the importance of "analysis" he concludes that those that disrespect words that people use in key places need to be reviewed.

Confused

Complex

Over-Educated

When these words appear with someone who hold an Engineering degree conclusions based on one day will never satisfy the search for truth. (Any college diploma is the same as Engineering) in these regards.

Every fair vetting of the truth individuals had free access to him and concluded he is fine and good to go. A paid approach as to “We feel he is dirty. Go get him” made trouble. It is my firm belief that those that accepted the challenge of getting him have scrutiny as a final diminishing of faux smart behavior to another established and well person.

You see Mr. and Mrs. Get something on him. Homeland security has there eye on you as “homeland security fool players.”

*footnote A rare book at the Vatican is examined and not kept in a vault.

White gloves are used just to make sure. In a laugh and an honest, no the rare books in this case are like a “Mouse” version of Rare Books in that the original person only made a few with himself. To some even the lowliest of persons like Mr. Bridgeman can say he did it with so little resources. It looks nice because Desk Top Publishing on the internet made it possible. At home he made one and cut all the pages and made a binding. So in some parts it is rare that someone might decide to own the creation of a minimal lifes efforts at success.

The fact that the majority of the people I deal with suffer from mental illness may confuse decent hard working citizens. The fact that the state of Israel is not up on the fact that two woman who look the same and have African American features can differ in terms of mental health needs shows “Staggering Racism” In 1996 I went through a “recovery” program at Tinley Park Medical Center. Princess Williams an African-American person should really be considered different mentally from Rhoghnette and Ramona, names withheld here but Princess and I know who they are. As for the “unfair” fight Israel created, this is one step in showing how people decided to throw the election. March 29, you can see the statement about “woman Bill meets”. If you ask the woman Bill meets how is he doing, the woman all suffer from mental illness. I don’t know what you expected to find but the void in the woman’s lives WAS filled by your passion for an honest question. They do not stop, when you said,, thank you that will be enough.

Mental Illness sufferers you have not been left off of the site. Developer Rewards has a video showing something to you. So you say Bill is bossy. I

am Bossing someone from Trilogry Inc. to look at the Developers Rewards page every day. Entertainment page is at the consent of staff.

OK, it was not a first experience with speaking with someone in 1991. Let me be clear. It is OK to disbelieve someone. You sure can disagree. Many facts of reality such as “attending” a hospital in 1991 are the only fact to patients. There is a real important person who could check to tell you. January there was a military action. It was on TV news. Bill spoke to much about it. He feels as a person that has international relatives that someone he loves felt he should NOT have witnessed something called international military crime through the use of bombings. The fix from his American girl seemed to be a powerful “Halucinagenic Drug” that produces mental illness symptoms and may clearly be called this. The person is not arguing about the diagnosis. The fact that a witness of a crime may be the victim of a second crime should be known to you. The military action was known as “Desert Storm” and The Persian Gulf War.

It says you were crime. I had a fake ID card. I only had it so if someone wanted to really kill the guy who saw the war and blabbed about it, I could maybe make a play and say “I’m Chad Hutchinson and Bill the Russian Jewish over smart guy isn’t me.” But someone must have seen the computer printout of the thing and me sealing it in plastic. So at the County before paying the \$500 fine I got initiated into three gangs. As it is old people just are like wise and advising about legal and life. Deuces is what I felt I was as if you and your friend and the other guy and his friend know people that’s what that is. County is male about the insult as “you guys are fags” Next it was the Kings (latin kings) Being white and checking my Spanish it was cool and fun to speak the language when I could, including Cuban version, Puerto Rican and Mexican. (if you are from a Latin Country often you don’t say something to another Latin country just the same). The toughest was the Vice Lord initiation. (As for the Muslims I’m in but not about the gang of it really). Vice Lords this guy starts in with me, have you ever used the “N” word. If you’re a tough and big you say, “F U Nig” and swing. The pain involved in the hit back and the fact I couldn’t insure a “tie up” situation I shrugged. But having backed down as people will do the long and the short of it is “mostly we stay home and play video games and talk about being cold”. There is a Vice (crime like drugs and prostitution are Vice crimes) Lord dance. Swing arms at sides face to face with another vice lord and shift weight to left then right foot. As for girls, Vice Lords is someones sister mostly and you might or might not get into a fight about it.

Kings share and pass most everyone's girl around sexually. These Latin chicks this all they want is to get "there king" this way and be made in cold. Yes dear I am Jewish. The Jewish gang works with a guy called the Judge. I should say though I spoke some German with the "cage fighters" the standard Dolph and Goldy deuces. The Polish Toughs took the boot camp option for the "corn bread" and food improvement. They have jobs with real money promised for cold things. Scammers and hiders do go to see the place but when you realize that, this is how people live, the first part of what the description was is what it was. Yes the staff both medical and protection have people from all over the world from the classic NGOON (hey buddy) to Ms. Ghandi in Medicine to Robeson to whomever the downtown office people look like.

William

A game of who would you say "I" was your year from young to middle age happens on occasion. Wondering if it was real as in did you the person that asks really have your normal mom and dad and your just joking about how many kids really have no idea what that normal part that happened meant. Ok so as it happens I thought what that was to me. Those kids were called "cave people" Since there smart enough they say stuff about how would you feel to which people should say how would you feel switching it on them.

Son can you tell a lot of kids something? First a message in words could tell you something you would want to know. Say your Mom sends you an email with a subject ofhHope you are fine. And if you click on it, you could read it and it says, the Vanilla Ice Cream cup in the freezer is for you, go ahead and take it before I get home. You could then go and get it. The point about a lot of guys hearing the online book and coming and eating the Ice Cream and still being here, well I thought your mom might want to know.

Programmer suburbs

I have it but so what she is some Jew. The "dark lady" intercepts it and feeds back coffin to him. She says to the guy, "were being exterminated" He knows, I mean the guy she's funning with that OK people mess around with words and maybe the sprayer for things was in. So the guy again sitting thinks Ok she remembers, "Playing with Billy's daydreaming general about worries." He throws her the best honest for it and this dark curly haired conspiracy of female dunces intercepts it to Russians. They themselves the two of them know it's the only answer but want "America" unhealthy. He says if you worry so much say "Hi and Bye" to someone 2

or 3 times a day if only on the telephone. This chick uses everything rebounded to him so cold, "why don't you" your some no sound and what kind of guy are you. All the guy did was answer. So dark curl girl says to Russian girl see he required "English Language" this should make you furious. No the Israeli girl gets into it yes why do the men of your losing city insist on using this "English way" The guy really did and so did we hear the suburban girl who had some worry. The city dark girl set is the entire healthcare problem in the suburbs Bill from Chicago knows people. We didn't say give us all negative out on Cicero near Midway. The girls and as far as I can tell respects maybe even loves dark curl girl for screwing up these people. The city gets health problems for it but the girls themselves get paid and the suburbs get no "music" called discussion. If you said (stressed as an actor would) you wanted all the bad stuff off someone, and you keep calling the dark curl woman is going to completely screw with you when you ask for something. After all that is what you requested.

IIT friends who care(40-60)

Bill thanks for the update on the Junkoleum™ problem update from Stanley. Wanted to repeat one of the clever solutions to a Junkoleum problem. The silly putty story from Crayola \$79.00 for 5 lbs. Nobody could figure out what to do with this material so they made the toy which can be molded well and is non-toxic. It doesn't set in the shape but can be re-used. The fact that it was lousy caulk and a bad sealant and a bad object creation tool did not matter in the toy application. Thanks, but I must insist John is really not a worm about software at all.

Friends of Bill and Mom of Friend of Bill(65+)

As good people we could hear something more clearly as "Bill's point is" rather than the quote "Bill says" This is no small detail. As for those that pushed "Bills Point" that the answer was food. That did prove positive however the icon based transit signs as to the needs of a person at any point proved much clearer. The words of blessing on the words continue to be, bless in person with wind. Which is to say, mental analysis proved much to painful and severe for the unresolved religious youths who desperately wish to participate in an analytical world to impress the few intellects remaining. Backtrack for a moment, see the Entertainment page before becoming upset at an apparent disrespect for intellect. Hang on to your respect if you do read and you do know. On the entertainment page you will realize 3 CLEAR and DISTINCT other answers other than intellectual analysis. First the Beatles suggest Love is the answer. Second Mulan and Ariel suggest fantasy, childhood and having children to love defines an answer. Third, on

with the fight for control through the defined books that suggest analysis ended or at least should be suspended during the terrorist settling up and down period. If you apply to me, talk to someone also, the entire word usage and meaning eluded you. To say this IS THE MOST INSULTING and DEMEANING and FOOLISHLY ANAL PLAY on the face of the earth. He not only DID say it he BROADCAST it to the world. What he would say is, "Any Questions" which is not arrogant to him. The guy already said it. If you don't have anything to say and are settled as your intellect please by all means DO NOT CARE A HOOT about what some personal web page says.

Programmer

New pants at Marshals cost \$29.41 the size you ask, 34"x30" my College pant size at graduation from Ann Arbor. I am seeking to go with the AMA in getting my correct body mass index where the healthcare professionals recommend. America does have an actual chart that you should attempt to match to not be obese. Update (12:50) My correct BMI should be 24.9 to be in the normal range I am at 28.8. That looks to be a required loss of 36 more pounds. I'll keep after it to get to the 154.

Mar 28, 12:32p CDT

Boy from Ann Arbor welcome to the internet steal game. Your Mom always wanted to be my asshole. What can I say you are nothing more than a monument to my incredible ego. I am smug and arrogant and just not giving enough financially for the insult I have given to your mother you. Of course I knew you would be a "special needs" kid. Best wishes in setting up the steal of the site. I am not keen to do it every day as an older person your assaultive behavior to me on the street tells me a mixed message about doing something you are either NOT able to do quickly or editorially you feel modifying and spinning the text troubles you. Of course if you feel that someone named me watches you and you are going to use "Spyware" "Malware" and other Malice driven things you will find out I have not used the computer this way and whatever. Of course everyone knows Bill can't win in telling you he doesn't, the game IS named Bill but funny how it switches as that guy gets to sleep with your mother tuck you in, get paid and be made happy and I get your love in the form of a federal investigation. Don't use keen with me again.

Attracted older man afraid of being called a dirty old man

As a person who lives near two major colleges, many young men and woman walk by. Long story short as I can, then the boys and girls have perfect internal organs, perfect weight (for the most part). Ok yes in school

everyone looked love. Not trying to put down a mothers year or a daughters. Hoped it was a compliment. In ours there was like a “high-sexual girl” she had 3 close friends,, they were all ‘pretty enough” 18 other girls knew the 3 that knew the one people went with in talking as “the fantasy girl.” Words like oh well and channel your interests elsewhere sweetheart mean NOTHING in today’s world. Obviously I’m missing it but I almost thought I knew that when one of “the boys” walks up to “another boy” or “the girl” the mechanical engineer side of all Michigan Engineer says those machines plug into each other without regard to any word or action either would take. I may have heard the “guys” as we called it say, “It’s called getting out of it.” Meaning giving her what she wants which seems to be operation of the joined system.

Mar 28, 07:56A CDT

Of course you could think that reproductive services produced this at colleges but the nation is the same. I am not sure but L.A. Ca. seems aboard even not at a college of course.

College Man Living Life

The mystery floats in, from a girl pal of Jim and Kurt last night about if, “I am as smart as I ever was.” I didn’t want to say “No.” so long words...calls for introspection...minds eye...bs...all in all very beautiful passage where you could say anyone that speaks with a vocabulary like that the answer should be an obvious yes...Jim and Kurt are however looking for the 6th grade answer on everything with the advantage they ALWAYS know which word the “girl” “bought out” on. So to explain, they said I went “under” to get the math in college. It would be tough to do and professors that bless it with live solves impress, so no I wouldn’t want to attempt many of those types of questions. In food, am I still one pancake, really, I’m not sure if others are on top of it or I’ve eaten it or it’s just syrup or butter or jelly where the pancake was. I’m fine about my “Smart and Sharp” stuff it’s just that some “long beautiful answer” like the mountains of my land have enough gold and resources for all, so yes I have all the Gold and Silver right where I can get it if need. But, Jim and Kurt I’m nailed financially if I open up about it I’m dead if I don’t I’m dead. (Kind of a shame)

Mar 28, 3:30a CDT

So if you say what about “Susan, Laurens friend as Lauren or Susan” using your fine graduate student with them you will impress him as to your great knowledge and they will ask you to continue and ask how you would answer yourself and whether there is opposition amongst your peers on such things until you yourself want to know something you do not know at which point

a “simple but honest” answer will arrive and you accept because you love being in words with the man. Further words grow to the simplest form and suddenly the fellow with the joke words that only some bozo would want seem ill to you. They have titles called Corporate Sales. And at that level there isn’t much to the game with you. The knock on someone is what you would say to someone to make someone else not want to know you. So the knock on “Bill” is that he is “unprofessional”
 In today’s world a person that is unprofessional must be something in words to horrible to describe.

Could you ask Laurns friend Susans friend Corinnes friend Lauren what a person “must be” if they are “unprofessional” Is it a “kid”? Miracle...after typing this I felt 11 years old physically.

Northern Illinois Huskies(49)

Me, Kurt and Jim went hog wild getting easy woman into bed with words other guys came up with. It’s from Dylan and stuff with remembering “Dylan Thomas” poems and such. We updated some made a video so we could comment about it with the single woman who wager there cold to the stripper who just gave a philosophy lecture that impressed them. A quick zipper drop OK this is the look of it, well I guess you could play with it and so forth. Anyway, bothering these guys is not my thing, it’s that if you wanted to speak about what it was that bugged them in todays world, its (Rich Girl Kicks in) stolen for some pie in the sky Bill said bull shit that Jim and Kurt can’t use but they discuss it with her just the same until she takes her top off. So it’s Penis Envy new style where the guy gets into talking with chicks about hair and eye selection for the genetically engineered kid and they go along yes that would be cool and yes a genius dad with super athletic stuff would be totally cool and he these girls are into it, only his hanging shlong makes nothing close to this. So since the chicks are hot he does of course bang them but now to substitute something and hes all like what if I believe the kid will be this and then no it isn’t but then someone else snaked me for out snaking them and there is a guilty part.

Cowboy Poet(64)

Heard about the kid that makes his livin(g) on bearing false witness to phony fathering fellow out in Seattle. So Bill says are you more of a Liar and a Thief or Liar and a Cheat and the kid and the German American boat building clown go with Liar and Cheat. You see we knew in Texas and with my cousin in Montana it’s got to be made up, at least some of it. So the word we came up with was “Predicated.” Each life that gets to the poet is predicated on a tall tale or lie or rumor. The wilder the story, the more the

kid and the import get paid. Well the Englisman wanted it Dinousour so rumor was it went Teradactal. Giddyap. Not even you betcha.

Bill from the great beyond

Yes. Gary and My game involves moving the pieces. You can't win with your butt in a chair. However Bill from the great beyond had a "head wind" and "tail wind" issue in which announcements of his presence at new locations prevented the airplane or out of town method. He wanted "by the park" to be nice with good people and I hear it has gone good for his want and he himself has seen it. As for others, the move from South Cook to DuPage, Will, Burboinainis and Peotone have reached Washington for the Illiana highway and Peotone third airport proposals. It's not Bill's fathers people there his. As for the Dad's that did not just get another TV dinner and helped, that is why they were "grandfathered" in to Six-Oh or Sponsored. Now as for the chess analysis, it is not simultaneous as it takes place in real time, it is n-dimensional as in a game you would have 3 levels complete with all the standard chess pieces a move is only on one board at a time. His business problem at Microsoft took 6 hours, in that time the local player insisted his local store not carry a can of corn. His girls insisted he behave like a Dad. Israel wanted to know if he bathed and the Obamas wanted to know if he loved them.

Russian Chess Master Former Moscow Mayor(51)

As translated. Bill played Chess acceptably. The Russian Chess masters assisted his opponents to defeat his game. There are 12 direct program inputs based in the software for chess to defeat his best moves. It took many attempts for the software but we have mastered the program. As for the mission to "solve the energy crisis" The look on Williamka's face in the halls of his fine place of education told the story regardless of the vile American sound around the event. They put to this 17 year old as if they were giants commanding him to solve this "energy crisis." He says would you permit me to get an Engineering Degree. At school we probed what is with the computer you said energy crisis he says he has to get low power devices and long lasting batteries first before the mechanical design. So not much happens until this idiot who you do or don't love Saddam Hussein makes a war. Opposing the word idiot tells me you have a different word for the person who lead the great Iraqi Republic as best as an Iraqi republic can be lead. In any event the LPG design is just about done and he explains to "George" and I wanted the quote exactly,"It's sort of a no war for oil thing sir" and this "George" gets so happy with "What's wrong with a war for oil, it's the best thing to war for." After all if you hold an oil well the

guy at war has none and say a Texas, California or Alaskan energy kingpin makes an absolute fortune. Efficiency gets important and people pay what that black gold is really worth. So as for the Chess of it and George asking him for the Chess of war we listened when he said a General knows what he holds as an asset and when to use it. The rest was easy, you told us everything he held.

Stephanie Shlarb and Stephanie Sagerman(51)

Bill was to smart for his own good.

Bill Responds through Freds Dutch friend me(New Way)

I wanted to know if the test score was real and it was, the ACT 29. So yes there was something called smart about wording in your testing system. It is true that being to smart will get you in the kind of trouble. If there are 3 people over and you have 2 candie then don't offer candy You see as it was told people told others that Bill was nice to everyone and that he was smart. To address the big one, which was, Bill is crazy. I would say that he was not crazy. He was not confused. The right answer involves things many people grow to feel uncomfortable and blame the smart person that the answer is difficult, painful and confusing. In the Dutch analysis Bill was never confused. Your unhappiness does not mean Bill was "Crazy". You will have to handle that.

Rogers Park Jewish Condolonce Society(58)

Bill was a Drinker, Smoker, Philanderer, Gambler with the loyalty of a Wolf. A dog you feed and they stay loyal at least. The euro-trash scum dump on the innocent Bridgeman household this creature and then threaten them for years. It's a blessing he's gone. He was a horrible racist. He had the morals of a cold blooded killer, yelling shoot this and shoot that for days at a time. As a Bridgeman occasionally he would bathe. But we don't speak ill of the dead where were from. Yes, of course he had a violent streak, yes he struck his innocent and loving father so hard he fell down and he hit the sweetest angel of a brother Daniel to the point that Daniels arms really hurt. You don't mess with velvet in this way of course.

Programmer

I'm sick of people saying people who get up "slave" to get a paycheck, work like a dog at home to keep everyone happy get actually called "slaves". The word is "worker". Even on a plantation when the slaves were not really OK with being slaves on any given day they were "workers" knowing full well when you work you could eat what was grown on the farm. Of course the other thing about some smart alek saying some degree is high and believing

they can just say some guy is a slave is just not cool. The Man came down on us in '77 with the cold "east bloc" on it. The man may be the eye in the sky, you had better make sure your inside is fine and not try some psionic bull crap because that just is not correct. You are a Comrade the other person is a Comrade, deal with that will you.

Bill Bridgeman changed his screen name to Programmer

Bill Bridgeman

I'm cold to you because Russia and Germany in 1976 analyzed who an "Average American" would be. The plight of the poor African-American touched the heart of socialists and social democrats. This is now and the update for your TV is now, 'The Hughleys' and 'Dave' is no longer considered American bearded woodsman, but "German" Smith is black, deal with it. Now Russia and Germany still want to poke at Americans but you had better ask that Smith if they want German and Russian help in defeating America. As for me being a 'resident' or 'guest' of my African hosts. I ask are you 'Capitalist'? By this I mean every black person found using energy they were bothered. 30 years of PERFECT COMED payment is why Bill should get to use electric as he chooses to pay for it. One natural gas bill for 40.00 had to be forwarded to a new address, as I had moved to a hospital it worked out a few months later but that too is 30 years of good payment. I should get good treatment BECAUSE I PAY MONEY to support you and things we love. As for 'sponsorship' 300 kids signed we want Bill to live. Asking the 301st is so insulting. In 1976 it took 1 kid to do the sponsorship. As for me 'Asking for a sponsor' to live here. I have signed endorsements and have paid \$17,000 over 30 months and lived without incident.

Mar 27, 04:02p CDT

OK Colonel Rasov, everything is understood but you feel I could get the country to use "real stuff" as I advised in 3 wars. It's not that your opposed to "real stuff" it's that influence to do it may take doing. I have asked you and others in the "Military Alliance" all over the world "if you could do" and you have. Graciously let me remind you of the problem. Yes Israel was on note about violence. Israel keeps 2 lists for me. On one list I am at the bottom for any Jewish compensation and positive health benefits. If Israel is loved "my Jewish friends celebrate and friends of Israel get paid and have healthy happy food and togetherness." If Israel is not loved, I go to the TOP OF THE LIST in a published form as "THE BIG JEW BILL and everyone then puts themselves on a "Big Cross Blessed American" list.

*****News Flash ***** Bill Bridgeman has a few people that want him to be without “Brain Wave Activity”, “Respiration” and “A detectable pulse” in the language of English that is known as being pronounced dead medically upon knowledge of these 3 things. Many use the word “Kill” someone to mean, “Take away all there money” or “Take away something like heath” . I love the places where an innocent lamb asks a spouse, “is there really a world where the power of love won’t stop someone from wanting another person dead and buried in the ground.?” What should the loving but knowledgeable partner say? Honestly, if someone does ask another person about what they take money for in terms of “killing” they might realize they themselves are seen as “unfit” somehow by the money plays.

See the film “Moonraker” a James Bond classic. Germans, the ship is German. Russians, the ending is a battle for space. Please forgive the “Englishman” in this one. As for Jaws the character and the dirty blonde “criminals” See what happens to them when they see the “Moonraker” ship crew.

Bill Bridgeman

There is a chance you want to tell each and every New Way government helper. Sacha and Malea rock! They are great kids. Each kid they know wants people to do government fairly. If you think this is picking on them it isn’t. The papers are in on why this person filed for SSDI. The overriding condition is Type II diabetes post pancreatitis hospitalization. Yes the condition of Bi-Polar has been identified. Requiring something or justifying to these kids has got to stop. I just took my blood work last Friday 11 months ago an EKG and full work up were done. On Aril 8-15 somewhere in there I will be in the office again. The deal is public because you feel anyone who webs so well is “stealing” a check. This is not the case. My heart IS good but the risk factors suggest stress of commuting and office stress would be bad as in finding Bill dead with nose on the keyboard. My friend Dave from AC Nielsen had the same and they did find him this way. Tony Kanwar, Laura Prendergast and me knew him well. Had a great Baker square in Deerfield with him once.

Mar 27, 03:10p CDT

Best guys and girls know hot to get what they want and keep everyone around them happy with them. People could call this the smartest one. Lets say a girl has a boyfriend who is a freshman and he shoots free throws real well. All over school she says he is the best free throw shooter ever.

Derrick Rose of the Bulls basketball franchise goes to a social event and she starts up with Mr. Derrick Rose that this freshman can beat anyone. Well in free throws there is some chance but not much the boy wins. An old girlfriend may have said a few to many things about me being real smart. Well, many words were thrown around. Of course I know what true smart means and when to say something. [No Illegal drug exposure since 1985, others did use in 2004]

Bill Bridgeman

Wanted to get out today, its 11:32 now. On the way to meet Kinchasa at Chicago Ave and Michigan Ave for lunch at the water tower. Guy said he will meet guy there and act surprised. Gail said she will meet Susan and also act surprised. German Nameese New Yorkers always do the loop so there won't be German Pig trouble.

Mar 27, 11:32:

Oh, forgot this could go international baby. The four seasons is the best hotel for some. I recommend it to Jennifer Aniston type people. International the Hilton on S. Michigan has what you need. The Renaissance hotel for French food and tight. The Swiss Hotel and Fairmont hotel if you really don't care what city your in. For U.S. based travelers I recommend either Hyatt in Chicago. English Barclays is nice. Old I mean old people try the Atherton (London Times most welcome). As for loop German kids, it's called a Taxi you Bauers. (Farmers)
 Had a nice "stay-cation" at Evanston's Garden Inn Hilton. Chill's for lunch and a walk to the clock tower then down Sherman Ave and you have seen Evanston correctly. A nice classical concert at Pick-Steger is nice that evening. If you do love classical things. Other things include Davis Street Fishmarket and a walk along the scenic lakefront. (Not just then on the Stay-Cation.) Might be Allerton not Atherton.
 Mr. Cabbie (Camel) from The Four Seasons or Water Tower..If you hear," Take me to the loop it's OK to go south on Michigan to Van Buren west to Wacker (upper) announce Wilis Tower then by the Civic Opera House continue on Wacker to Clark street South Exit the cab on Randolph. (if you please)
 Assuming you're a friend. Airways rent a car is a great remote parking. Manheim road south of the Kennedy. Formerly \$6.00 a day haven't checked since 2004. Shuttle to the terminal works great. In the cold they start your car. Trust is the name of the game anyway when you travel.

Gated parking with glass house high tech counter area. Sign is older but so what.

Bill Bridgeman

Shachar was right in her investigation from Israel about me on Keeler. I was in German everyday. I thought I was so cold with it. The Polish kids (really over by Pulaski and Milwaukee on Irving) thought German was cold too. Hilley over at Jazz on Irving IS and will be friend, she and the Jazz place are Israeli Vegetarian, if still open. Yes you got me, I yelled at "Washington" and Generals and Bush and just ranted in every language I could. Mostly I was lonely. Ahhh. The point that writing Top Game and Bridges polish maids and drills. Yes they have been inside with drills and rags while I knew them went with, "He plays the Saxophone." Which to some would mean the brass thing would have to be there. Many know what you would mean. It's like as Americans and we still are we were to nice. So people tried acting foreign to grow cold. New Years shooting had all of us weird. Who didn't think the guys shoot the pistols in the air as celebration? Turns out for 2 hours they shoot at people saying with revenge you lived big that year but no days in the new one. Chewing out Ehud Barak actually motivating this "little Jew" was great. He and everyone shouldn't be mad at the reference. If you do a diet in "lent" or "pre-passover" try Beans, Chopped Tomatoes, Chiles, Corn, Grains, Oyster Crackers. Do a vegetarian a favor, get a can of black beans (Bush's reduced sodium), Rotel (tomatoes and Chiles), Corn. Command them to open the three cans and dump in a Tupperware. 3 Glad Tupperware at Family Dollar second aisle on morse if you play treasure hunt. Salt and Pepper and (Vinnegar optional). Then just make or have rice or barley when ready.

Mar 27, 2003 9:30a CDT

Tell the Old Irving newbies as well as Rasov, Spain and Black South Water... You have NOT been to Chicago until you solo or with a cool other sex stood on the corner of Michigan Ave and Chicago Ave and found a park bench.

Mar 27, a 9:35a CDT

Each neighborhood built that part of the city. Red line to Chicago or Blue Line to Jackson to Red Line North (to Howard) is really a good way. 146 bus from North Sheridan Road. 145 bus from Irving Park and the inner drive. By the way, the reason, the World Trade Center attack was cold. People should want if you fly to a country the anchors like high rises and

downtowns would look good with ANY sort of decent people. It's just to cold to destroy these fabulous anchors the whole world approved up. Yes it's real big and people could do something cold from them but they would have to want to and how would they get there? About my "Violent" ideas, I wanted people OFF handguns. It didn't prove anything to you but stick and stone war beats your rapid fire auto mag way to many and me.

Mar 27, a 9:35a CDT

Colonel Rasov(38) – Morse Ave Boiler room (at Sheridan)

Thank you for surrendering Mr. Bridgeman to the Russian Navy located at Morse Ave in Chicago. I am 6'2" and of bald head. In Russia I served as a Colonel in the Navy. I have 10 men protecting or should I say guarding Mr. Bridgeman in a prison type situation. You are wise in extracting information about Russian spies from him. We can tell you there are many as we have taken your General and made you believe he was a Russian spy. Thankfully we got here in time to prevent the Arab kidnapping and the forcing of Mr. Bridgeman to construct a device. In Russia we already have many devices. Your Negro is shit and we do enjoy him. The fine behavior he displays in what he calls Harvard gets us \$20.00 a night or so before we make our spooky jail sounds out his door at night. American cops take the money as do Russians. Make me a decent offer.

Bill Bridgeman Status:

There is no problem with people to me. It's just I know 30 girls who don't want African-American men or woman on there cool network TV show. African-Americans destroyed every television show since Seinfeld. These people have created cool shows for themselves with Black stars but white people find themselves destroyed mentally by it. Most times this person can't tolerate it other then sports. The love of money was all it was to get people on every show. So, somewhere the 30 girls wanted me to defend them and be "Anti-Black" what they meant was TV. I live in a city not on a TV show. People do things and whoever is there in the city you deal with. So there is no way out of this mess. The 30 live in white bread gated communities and put my life at risk. It was bad enough when they went cold to Mexicans and there Dad and I are at a restaurant about to get jumped by water pouring folks for it. We didn't say it. Now the mind numbs at thinking about how these folks used my name and address to abuse minorities. Yes it was terrible that those folks did crime and destroyed a lot of good. I have no answer. Your "Hard" evidence Chicago, Evanston and

Washington is dead wrong. How you expect me to lead your charge with my background I will never comprehend. A guy doesn't turn in life that way. It just doesn't happen. Sure, lets say they worked over Cheryl Readus with doctored video or Julius Turman or James Drake or Kevin Green or Kevin Davis or Kelvin Gumby my life here has had so many people with so much skin you people are dead wrong. Look I do know what your saying some of those actors have no business together. So what, read a book he said. I CAN'T HELP YOU RACIST TV VIEWERS. Do I hate when people put stink on things? Yes of course I hate this. Someone like an important person who cares should deal. I am some poor city kid who doesn't want to die so you can have an extra cool hour on a \$5,000 couch.
Mar 26, 3:43p CDT

Living in close quarters and with many people who take public transportation, when things get heated people use sounds and sometimes growl. The next day or next hour this person walks out I say the same loving trusting things that the person always said. The next event is always in your face. I used to pass this homeless guy who honked off "A**hole incessantly" it annoyed me but then a tough approached as we were both there I leaned in and said now, and the guy hit it, so OK it did annoy but the guy had a purpose. Lets say the guy looks to tough, you just don't know when your city or place will need that fight around. If you have a better word help out, it was called venting or blowing off steam. Many times the words would shock the uninitiated. I do apologize I walked around thinking people spoke the kings English everywhere. So out of this mouth I joined right in and even tried working in an MF or two. Of course go ahead and use it on this one.

Mar 26, 4:14p CDT

Bill Bridgeman Status:

My good friend, I value your support in the writing on the web page. It is with no malice that I suggest, I do not NEED to talk to someone, I need someone to NEED to talk to me. I am not enchanted by my own voice. In the writing it is called an absolute truth about why people use words. They use words to gain acceptance and further words or they aim to transact business with the words. The sounds and utterances seem to mean nothing in both regards with whom you have suggested hear this person. Without the NEED to hear me, the world is just to deaf for me to care.

Mar 26, 1:35p CDT

Bill Bridgeman Status:

Many people want to know where people are from. Some countries, the one you fear the most lets say Russia, if you fly from Moscow to Athens and spend a week in Athens, then fly to New York in Russian you have not lied or deceived someone by saying you are "From Greece" Your head and food and what you brought in your body was Greek in Russian blessing. Many could fairly accuse the group of lying but this is how it is. Say Corinne says where do you think Foster is from and I guess Holland, Belgium then Swiss, you see I wouldn't really know. You could tell she assumed it to be an easy "English" guess. It isn't easy to tell. This born and bred Chicagoan is not confused or addled. Hope to tell you 8 years in a 20 mile range called Cook County, Chicago, Il USA, born here, raised here, earned my life here. Go tell aunt Rhodie the old gray mare is dead. Honestly people, I do not want Russia to win. I do think you should be careful if you meet cold Russian heads. Gosh what should I say if I meet someone cold who is in from Greece? You put people in a terribly awkward position. For clarity, yes Parker Laketa the KSU basketball star and H-F alumni was really concerned with us. If you need an explanation he is on facebook. Also, our older George was George Biscan, his son Tommy, now big Tom also an H-F basketball bench jock and occasional free throw guy will be able to make it clear. They have spent an entire life on the subject with us. Hope you don't grow to cold to these guys. Really be nice, if you can.

Mar 26, 9:20a CDT

Because a person is special they love to share simple things. Lets say the person who says this is just so simple. The innocent person doesn't really want to believe such things. Most people are honest. Most people love and live clean. Gosh to even suggest this makes me think you will give me a wallop. In underdeveloped countries such as Laos and Nigeria access to luxury medicines is not permitted. Some people grow mean and watch pharmacies. That's not true Bill. Maybe it isn't. In my heart I believe all of you that medicines only get watched by healthy pharmacists and the insurance companies. I couldn't be more sorry for being angry with my judgement. Lets say you really are great, I do, I really do feel you are. The medicine Invega costs 19 dollars a pill at one a day that is over \$300 if someone from an undeveloped nation wanted to take it as I did so regularly. So if you could just check...is it possible there is such a person that makes worse the condition from the very fact you spend to get such a medicine. Honestly, most people would "scoff" act real cold to the guy like hes a total

joke. Rogers Park is funny about new people. You can “win welcome” here and someone on the computer might be someone to copy. Yes it is a good medicine. I have some but don’t like to advertise it, even to my own family

Note to my keen researchers. In the case of “Bill” Invega is taken off label. There is a chance kids that your keen study gets beat. It’s not that I fear judgements by you its just for your welcome to the medical community, Be skeptical of the quick keen answer. Yes Invega is an Anti-Psychotic although it is being researched and now prescribed for other conditions.

One other point, if everything points TO CLEANLY to someone or something being bad it’s most likely a framed situation. Your assignment is to deduce any and all framed situations. Lets say a person loses a pair of glasses and another person does a crime and “accidentally” leaves the frames at the crime scene. You keen kids seem to connect the dots to cold. Now the day I lost my glasses I put it on facebook, right now, that moment, I have my people waiting to see if someone says this. It’s just to easy to fool you kids. I did not do anything like what you suggest.

Bill Bridgeman Status:

Naomi claims as does Stanley that someone hacked the send on the account and that the posts you see DID NOT originate from them. Social media may have this happen. The site cannot be accountable for this. If young medical students and younger begin playing conditioning of a subject they need to analyze past research. You shock something to correct a behavior and “stroke” or reward a behavior to encourage it. The subject called “Bill from Rogers Park” is involved in the Rat with no cheese anywhere no purpose shocking experiment. Once the subject was exceeded he laughed. It’s not his head. It’s that when actions are taken to correct behavior there is only further shocking. (Assume a shock is a threatening email a late night phone call a denial of funds request at the very modest level) at the worst people of a questionable character take an interest in making comments to him. Being mentally exceeded by the puzzle is OK. What the heck right you give it your best shot. Remember Naomi and Stanley claim “hacking” here but deny “Bill” Bridgeman’s claim on facebook??

Mar 26, 9:20

Naomi Penn(70) Status:

This is Naomi. I am angry you committed crimes and went to jail. I am angry you never developed relationships with woman that produced love. I am angry you threaten your father and our love. Who cares about some old Con Bums icons. Fallen Lassen Tod.

Mar 26 2:43a CDT

Stanley Bridgeman(70) Status:

The SNT law states you need itemization for every request before distribution can be made. No you may not see any statements of account. No you may not rescind the medical power of attorney. No you may not demand payment from the special needs trust. No I will not tell you anything about my travel away from home. No I am not interested in expressions. No you will not get to see the rage inside. You are denied anger. You know that Evanston has the dirtiest police force. How do you think 10 cops were at Teich's office the day you had plotted to get me. So what you may have fooled Trudy with something, but I never knew who you were and you keep showing up trying to steal my fathers fortune which passed to me. You don't get one dollar of the family trust without severe pain. You are nothing but a Jail Bird Con who takes advantage of people with intelligence. I'm through with you. No one takes on my Evanston army and my Israeli army and lives. So what your bugged. So what you have nothing. Of course some Pole Stanley lets me use the drill if I set something up for you, you little girl. Don't even try to beat these people. Rot in hell.

Mar 26 2:43a CDT

Mystery Girl(25) Status:

'88 is great. To bad about your old people. But your old also. It's just when the guy used your stuff I got into your head. I'm not giving in to you but I am going to use the finger print sensor on my computer with the software to make sure it's the same guy. If someone helps me pass this to someone to get an ID it would be great. I live in the building with the guy.

Mar 26 3:24 CDT

Bill Bridgeman Status:

A :(Not one bit of honest communication in 31 years to Bill Bridgeman with him. :(No one ever just asked the time because they had to be somewhere. :(No one ever asked a question they did not have the answer to. :(No one gave him the meaning of the meaning. :(Ulterior motive and subterfuge is all sees. :(Some people give warm regards well just the same

and I make like I don't know about the screw job. :(Should you meet someone and they say they have Bill fooled about such things, he isn't fooled. :(Rude people do this to him. :(Once you take the money you act rude to him. :(Doubtless anyone that reads this will not have taken the money. :(When you said, "Have a nice weekend?" did you know how mine would turn out? :(

But Bill come on did you have a group of people that were nice once. The answer is yes, but mentally I picture a little boy painted by Renoir looking at a wrist Casio as if to say reassuringly that in true beautiful mind "Nash" fashion, you will now be treated rudely for twice as much time as you fooled them into accepting you're a) Jew or b) Cross until you yourself have a lost feeling about it. After all Mr. Religious it is said, "how is it blessed", I had hoped someone would accept it is blessed "Bill" that failed as Bill the garbage collector from an urban ghetto and Bill the mechanic must have to say it to be blessed "Bill". I felt it was blessed with my being and collection of cells which contained the energy to relate to those who dared take on the obnoxious that a person called "him" was there. Rude kicks in instinctively here to the enemies of my health. Instantly the ladies chant falsely. Instantly the doctor suggests, "Give him false warm regards." Leaving off the word false.

Bill Bridgeman Status:

A bit colder during each fight, giving highlight information it is wondered, "How does someone with that technical resume (posted on the about link) match." As an attitude it rhymed with a fun way to look at coding. "Loops and Scoops" "Loops and Hoops" "Loops and Poops" some went with a very normal good day or bad day way called "Variables" (Huh?!?). Of course you might come up with others.

Status:

PhD. Candidates have an oral exam to qualify. A goodness and fitness test of morality also is used. Dr. Stanley Bridgeman attained a PhD in 1967 from IIT in Chicago. As the son of an aspiring PhD then a Dr. of Philosophy then an Associate Professor, people wondered why someone doesn't "melt" and "just watch TV" Of course this person does love doing it. But someone, maybe an interested female reported me as lazy. Anyway, Daniel a brother came along in 1967 June. To win as a PhD you must take all the tricks publicly with sound. So simple questions were met with so much force young "Billy" and "Pierce" had to figure out why someone would struggle so with life. For example, "Why does a rubber duck float,

(could have been the toy boat)?” was met with such a Buoyancy and Displacement lecture if you hadn’t seen it you would have been sure Billy was real tall with a tweed jacket on.

Bill Bridgeman Status:

This person had a nice lunch at Leona’s of Rogers Park today. Hope you can enjoy a provolone beef on a bun with dipping “au jus” with fries. Having lost some pounds, let me assure you my bun issue is fine. I love a good bun and good buns in specific. As for the lass that said “His answer is shoveling food in his mouth” let me say, the answer can be found at an airport or train station, the food icon, the information icon, the lodging icon, the transportation icon, the Olympic games icons for events, the religious center icon. Now even those that specialize in one area or go there for work, there are times they themselves must pick to go to one of the other areas. In 2007 this was my definition.

Hi everyone, check the media page for what I would have said on other social media had people not been insistent on me doing everything for myself. Lesson, don’t bite the hand that feeds you by being too smart. The person that knows how to attain things for themselves and others the best must be the smartest.
